AuctionsPlus™

LOT 1 NAMPARA BRAD PITT T114

LOT 2 NAMPARA REALITY T157

LOT 3 NAMPARA POWERSHIFT T134

Welcome

Welcome to our sixteenth annual bull sale. We have 100 bulls catalogued for sale on Tuesday February 13th (3:30pm SA time). We are always trying to remain consistent and true to our type - big, free moving, proud bulls who cover some ground and carry some muscle. We are constantly searching for that "next" bull who has that balance of calving ease, growth, carcass and yield.

Last year our Texas Powershift P632 bulls sold the house down. They were our highest averaging group of bulls for both their phenotype and figures. There are more Powershifts catalogued this year and they do not disappoint again. They really do tick all the boxes for calving ease, explosive growth and carcass merit. If you missed one last year, this might be a golden opportunity.

We have a couple of new bulls in the offering this year including a run of Varilek Geddes 7068 bulls. These bulls display real shape and punch. Our Reserve Junior Champion bull at Adelaide and Melbourne Royal Shows is a Geddes and he is just a meat machine. Tipping the scales at 816kg at 18 months is impressive in anyone's language and is an indication of the ability of these bulls to convert feed into weight.

We have a number of Texas Brad Pitt Q065 bulls this year. These bulls are very good for calving ease and birth weight with plenty of shape and muscle. Consequently, a number were selected to join 500 PTIC females destined for the Naracoorte and Mortlake feature female sales in January. These low birth weight, high growth bulls specifically selected for heifer joining have proved popular in the past.

All Nampara bulls are structurally assessed and fertility tested and are well known for their quiet temperament. By assessing structure, temperament and calving-ease and by using a limited number of sire lines over large mobs, we can more accurately appraise the impact a sire is having within the herd. The joined heifer program also means that we are aiming to breed the type of heifer bulls that can be confidently used to mate heifers whilst at the same time not compromising on shape or frame.

Buyers who cannot attend the sale in person will be able to operate through AuctionsPlus. We also have independent people available to assess bulls on your behalf. We welcome any enquiries before the sale to ensure your selection of bulls suits your breeding program. All sale bulls are guaranteed into their first working season and Nampara has a JBAS 6 Status. The bulls have been vaccinated for Vibrio, Pestiguard, and a 7 in 1 needle including their follow up vaccinations.

We are very proud to present a quiet draft of bulls with sire lines that are true to their type. This allows buyers to select from a number of bulls within each sire grouping. We are also proud of the fact that our cattle are working and making a difference in the commercial world, the true driver of profit which is, and should be, why we do what we do.

If we can be of assistance to you prior to, or after the sale, please do not hesitate to contact us.

Stuart and Natalie Hann

Inspection of Bulls On the property from 1pm on the afternoon of the sale. Bulls will be on display on Friday 2nd February as part of the Victorian Beef Week at Mortlake as well as our on property open day on Monday 5th February as part of the SA Beef Week or for inspection on property any time by arrangement.

Delivery To be co-ordinated immediately after the sale, either to be trucked directly from the property or arrangements made with the vendor to paddock animal/s until trucking available. Bulls will be delivered free within 150km of Nampara and all bulls sold will be freight assisted.

Fertility The bulls are guaranteed fertile and have been tested on the 9th January 2024 by Drew Pickford of Nationwide AB. Notice of infertility in all cases of such, to be in writing and in the hands of the vendor not later than six calendar months from date of sale.

The purchase price of any bull proved to be infertile shall be refunded in full (less the salvage value) without interest expense, cost or damages in the form of a credit at a future bull sale. A vet's certificate shall be produced by the purchaser when required.

Rebate 3% to outside agents introducing buyers in writing to the selling agents 24 hours prior to the sale and settling within seven days. Does not apply to affiliates of selling agents.

GST All lots are sold exclusive of GST.

Insurance Nampara recommends insuring all purchases at the fall of the hammer. An Elders insurance representative will be available on sale day to help with this.

Guarantee In the event of a bull proving to be infertile or incapable of natural service into their first working season, the vendor will credit the purchase price, less the salvage value of the bull, provided the problem is not caused by injury or disease incurred since taking delivery. Any claim must be accompanied by a relevant veterinary certificate. The vendor retains the right to obtain an independent veterinary confirmation of any claim. In the unlikely event that a credit is issued, it may only be claimed on one bull at a future bull sale.

Disclaimer Whilst all due care and attention has been paid to the accuracy in the compilation of this catalogue and the information neither the vendors, selling agents or representatives thereof assume any responsibility what so ever for the correctness, use or interpretation in the information of animals included herein.

AuctionsPlus

How to Register and Bid on AuctionsPlus

- 1 Go to www.auctionsplus.com.au to register at least 48 hours before the sale.
- 2 Select “**Sign Up**” in the top right hand corner.
- 3 Fill out your name, mobile number, email address and create a password.
- 4 Go to your emails and confirm the account.
- 5 Return to AuctionsPlus and log in.
- 6 Select “**Dashboard**” and then select “**Request Approval to Buy**”.
- 7 Fill in buyer details and once completed go back to Dashboard.
- 8 Complete buyer induction module (approx. 30 minutes).
- 9 AuctionsPlus will email you to let you know that your account has been approved.
- 10 Log in on sale day and connect to auction.
- 11 Bid using the two-step process – unlock the bid button and bid at that price.
- 12 If you are successful, the selling agent will contact you post sale to organise delivery and payment.

NAMPARA ANGUS - EBV DESCRIPTION

Brief Description of TransTasman Angus Cattle Evaluation

Calving Ease DIR (%) Estimates of the genetic differences between animals in the ability of their calves from 2yr old heifers to calve without assistance. Positive values are desirable.

Calving Ease DTRS (%) Estimates of the genetic differences between animals in the ability of their 2yr old daughters to calve without assistance. Positive values are desirable.

Gestation Length (days) Estimation of the genetic differences between animals in the number of days from conception to the birth of a calf. A negative value is desirable.

Birth Weight (KG) Estimates of the genetic differences between animals in calf birth weight.

200-day Weight (KG) Estimates of the genetic differences between animals in liveweight at 200 days of age.

400-day Weight (KG) Estimates of the genetic differences between animals in liveweight at 400 days of age.

600-day Weight (KG) Estimates of the genetic differences between animals in liveweight at 600 days of age.

Mature Cow Weight Estimates of the genetic difference between animals in cow weight at 5yrs of age.

Milk Estimates of the genetic differences between animals in milk production, expressed as variation in 200-day weight of daughter's calves.

Scrotal Size Estimates of the genetic differences between animals in scrotal circumference at 400 days of age.

Days to Calving Estimates of the genetic differences in female fertility, expressed as the number of days from the start of the joining period until subsequent calving.

Carcase Weight Estimates the genetic differences among animals in hot standard carcase weight at 650 days of age.

Eye Muscle Area (EMA) – cm² Estimates of the genetic differences between animals in eye muscle area at the 12/13th rib site, in a 300kg carcase.

Rib Fat Estimates of the genetic differences between animals in fat depth at the 12/13th rib site, in a 300kg carcase.

Rump Fat Estimates of genetic differences among animals in fat depth at the P8 rump site on a standard 300kg carcase.

Retail Beef Yield Estimates of genetic differences among animals in percentage retail beef yield in a 300kg carcase with 2-3mm fat trim, adjusted to 85% chemical lean.

Intra-Muscular Fat % (IMF%) Estimates of the genetic differences between animals in percentage intra-muscular fat (marbling) at the 12/13th rib site, in a 300kg carcase.

TACE Breed Average – January 2024

Explanation of Raw Data Information

Actual Eye Muscle Area – cm² The actual eye muscle area recorded for Breedplan data.

Actual Intra-Muscular Fat % The actual recorded percentage of intra-muscular fat for Breedplan data.

Scrotal Circumference The actual scrotal circumference measurement recorded.

P8 (mm) The actual measurement of fat at the P8 site for Breedplan data.

Rib Fat (mm) The actual measurement of fat depth at the 12/13th rib site.

An Explanation of the Beef Class Structural Assessment System

The Beef Class Structural Assessment System uses a 1-9 scoring system for feet and leg structure. :

A score of 5 is ideal

A score of 4 or 6 shows a slight variation, but this includes most sound animals.

An animal scoring 4 or 6 would be acceptable in any breeding program

A score of 3 or 7 shows greater variation but would be acceptable in most commercial programs

A score of 2 or 8 are low scoring animals and should be looked at cautiously and inspected very closely before purchasing

A score of 1 or 9 should not be catalogued and are considered immediate culls

Beef Class Structural Assessment to be conducted by Accredited Assessor:

Max Bowman (#1026) prior to sale.

NAMPARA ANGUS - SALE BULLS 2024

Lot 1 : Nampara Brad Pitt T114 AMFU, NHC, CAFU, DDFU **Born: 24.03.22**

This bull is more than worthy of the Lot 1 spot. He is out of a donor female and the first Brad Pitt to sell at Nampara. Impressive from every angle you can't not be impressed by his hindquarter which is packed full of muscle and follows through all the way down his thigh. A big bull who carries himself with style and stands proudly in the pen. A ripper to start!

Without a doubt one of the picks of the sale. There is so much meat and carcass in this bull yet he also has a softness to him that is reflected in his Rib and Rump fat figures which are in the top 3% of the breed. Softness combined with muscle - the all-round powerhouse package. A bull we believe reflects what we are on about - calving ease without sacrificing carcass and shape. Nampara will sell full possession and half share of semen and marketing rights.

The Powershift bulls sold extremely well in 2023 and were our highest averaging sire group. If you didn't secure one last year this might be your chance and we believe this bull to be one of the better bulls we have bred in the last few years. Out of the calving ease to growth king in Powershift and out of a donor dam who can do it and has done it, T134 reflects all the qualities of his sire - moderate birth, outstanding 600 day weight, carcass weight and a huge EMA, in the top 3% of the breed. There is a lot in this bull and when you get him on the move he is wide, long and proud. Definite stud sire potential. Nampara will sell full possession and half share of semen and marketing rights.

This bull has impressed us from the get go with his shear power, carcass and weight for age. Part of our 2023 Show team T168 was Reserve Junior Champion bull at Adelaide and Melbourne Royal Shows tipping the scales at 816kg at 18 months of age. He is out of a high performing donor female in P84 and is an accurate replica of his sire, Varilek Geddes. So so quiet, T168 is a meat machine with his EMA in the top 4% of the breed with some IMF to go with it. A really impressive bull. Nampara will sell full possession and half share of semen and marketing rights.

It's not often we offer a young spring bull this early in the catalogue but we think this guy is something special. Out of big volume Nampara Liberty L21 female and by new sire Mt Kaputar, T303 is a classy young buck who struts around the pen with style and presence. He is in the top 2% for Gestation Length with a massive 600 day figure at +138. We were really tempted to keep this bull but think he has so much to offer that he has to go and do a job for someone. Nampara will sell full possession and half share of semen and marketing rights.

SPRING BULLS Lots 38 – 45

Please note that the next pen of bulls are significantly younger than the main draft as they are from our spring calving mob. They are all by Texas Mt Kaputar Q203, a bull we purchased due to his excellent calving ease (top 5%), low birth weight (top 9%) and big 600 day figure (top 20%). He is a big bull who has stamped his mark on these calves who, whilst young, will grow into big bulls. For young bulls they have plenty of shape and style and give buyers an opportunity to get in early on new genetics coming through.

Lot 38 : Nampara T295

AMFU, NHFU, CAFU, DDFU

Born: 13.09.22
APR: SFN22T295

Heifer's First Calf

This Texas Horse Power heifer has done a good job on her first calf in T299. He's a bigger framed bull with a wide top line and again has a great balance of figures with moderate birth weight, calving ease and growth.

Purchaser.....

Starting to sound repetitive but again look at the spread of numbers on this guy – you couldn't ask for much more. Great Calving Ease, excellent Gestation Length figure, low Birth weight but then also big growth in +131 for 600 day and +81 for carcass weight. T294 is a smooth fronted very quiet young bull. A safe yet smart heifer bull.

Heifer's First Calf

It's hard to believe that a heifer can produce this much muscle and carcass in her first calf! This bull is extremely deep, wide and long. A purpose built bull – purpose built to add weight and yet he's got some Calving Ease, low Birth Weight and Rib and Rump fat. A really good spread of numbers and the more you look at him the more he appeals.

Purchaser.....

Price.....

A Note on Semen Testing

As with any species, fertility can be a problem. This is why Nampara semen test ALL sale bulls.

Bulls are examined by Nationwide Artificial Breeders for abnormalities including warts, penile fraenum and erection issues, as they undergo a physical examination of external genitalia and conformation.

The crush side test involves analysis of spermatozoa for motility, concentration, morphology and semen infections. This information provides testicular and epididymal function which helps predict the potential fertility of the bull. Only bulls that pass are certified and made available for sale.

A satisfactory result gives a high chance of fertility HOWEVER, please observe your new bull in action when first in service, complete with a thrust!! Stress of an animal can also affect fertility. Look after your bull! The most conscious producer will semen test all herd bulls, every year, before joining.

For any questions contact Drew Pickford, Nationwide Artificial Breeders Pty Ltd.
Ph: 0428 925 255

Pens of the 500 PTIC Heifers sold at Naracoorte and Mortlake in January 2024.
