# SALE INFORMATION

**STARTING TIME:** 2.00 pm

**VENUE:**

This Bull Sale will be held at Banquet, 184 Steeles Lane, Mortlake, Victoria.

**INSPECTION:**

We encourage buyers to inspect the bulls prior to Sale Day. It allows us to assist you select the sire best suited to your needs. Phone us on 0419 884 839 to make an appointment.

Lots catalogued are available for prior Sale Day inspection at our Bull Walk Day from 1.00pm on Thursday 22nd February.

Sale day inspection from 11.00am.

**CATERING:**

Light lunch will be available and refreshments after the Sale.

**FREE DELIVERY:**

Banquet offers free delivery to the buyer's nearest town on route to Adelaide, SA and Emerald, QLD and to the property within Vic.

**BULL TESTING:**

All bulls have passed a comprehensive fertility test conducted by Dr. Craig Wood and Dr. Libby Summerell of Terang Mortlake Veterinary Clinic including – examination for structural soundness, examination of reproductive organs, measurement of scrotal circumference. They were also checked for semen motility and morphology.

**Semen Motility**

Sperm cells need to be motile. At about 60um long, they've a way to travel to get the job done. Following collection of a semen sample, a drop is placed on a microscope slide and examined, 'crush side', to assess the percentage of sperm cells moving forward.

**Semen Morphology**

Morphology is the anatomy or structure of the sperm. It cannot be tested 'crush side' requiring a large specialised laboratory microscope to examine a preserved semen sample, assessing the % normal and % abnormal sperm cells. It can pick up defects in the sperm that 'crush side' testing cannot. The most serious of these defects can see the sperm start to fertilise an egg but fail to result in a viable embryo and the female will fail to fall in calf. Note that Semen Morphology can differ in subsequent samples from the same bull. Stress can cause this and putting a bull through a sale will generally cause some stress.

**SEMEN RETAINED:**

Banquet will retain semen from some of the bulls in this Sale for within herd use only. These bulls will be nominated on the supplementary sheet.

**THE BANQUET BULL GUARANTEE:**

All bulls are backed by a 3 YEAR GUARANTEE. In the event of a bull proven to be incapable of natural service the vendor can either offer a suitable replacement if available or issue a credit for future sales. The credit is a pro-rata value of the bull minus the salvage value. The guarantee can only apply if the bulls' incapacity is not caused by injury or disease since taking delivery. Any claim must be accompanied by a relevant veterinary certificate. The vendor retains the right to obtain independent veterinary confirmation of any claim.

It is important to understand that normal care must be taken, and good husbandry practices observed, as we cannot replace a bull that is injured or dies for any reason. As such, we recommend you insure animals against injury. A representative of an insurance service organisation will be available on Sale Day.

# SALE INFORMATION

**NATIONAL CATTLE HEALTH STATEMENT:**

Banquet has its own Biosecurity Plan prepared in conjunction with our local vet Dr Craig Wood. We are a J-BAS 6 herd. See page 85 for our National Cattle Health Declaration.

**STOCK HEALTH:**

All bulls have been ear notched tested negative for Pestivirus. They have also been vaccinated with Pestiguard vaccine (pestivirus), Vibriovax (vibriosis), 7 in 1 Vaccine (leptospirosis) and drenched with Dectomax. Any animals purchased for Queensland will be vaccinated against 3 day sickness and receive the 3 germ tick vaccine upon request.

**RECESSIVE GENETIC CONDITIONS (see page 80)**

All animals in this Sale are free of AM, NH, CA and DD by parentage, or have been tested free.

**NO CARRIER ANIMALS ARE BEING OFFERED FOR SALE**

**REBATE TO OUTSIDE AGENTS:**

Outside agents accompanying a purchaser to the Sale are entitled to a 5% rebate. Please refer to page 4 for further detail.

**AFTER SALE SERVICE:**

Banquet is renowned for excellence in providing after Sales service. If in doubt, speak with us or with any one of our many satisfied clients.

**FURTHER INFORMATION:**

Contact Stephen or Noeleen Branson by phoning 0419 884 839 or 0437 029 992  
or Email banquetangus@westvic.com.au

# OUTSIDE AGENT COMMISSION REBATES

5% rebate will be paid to all agents that attend and who purchase with or on behalf of their clients and settle within seven days of sale date.

2% rebate will be paid to all agents introducing clients that purchase but not accompanied by them to the sale. A written introduction must be received by the vendor 48 hours prior to the sale and accounts must be settled within 7 days of the sale date.

# SIGHT UNSEEN PURCHASING PROGRAM

100% satisfaction guarantee.

Available to buyers who cannot attend the Sale.

For those purchasers who have discussed their requirements with us prior to the Sale we offer a 100% money back guarantee if the purchaser is not completely satisfied with their purchase. We must be notified within seven days of taking delivery. However the purchaser will be responsible for return transport costs.

# WELCOME

## Welcome to our 2024 Autumn Bull Sale Catalogue.

It is hard to believe that this is the 25th time Noeleen and I have welcomed you to our Autumn Bull Sales. Many of you have shared every Sale Day with us and we hope we enjoy each other's company for many more.

Often I have used this page to vent my disgust at what is happening in our Industry. If we look back at 2023 a clear target presents, the Bureau of Meteorology. Clearly the forecasts they made have proved very inaccurate for much of Eastern Australia. Caused terrible anxiety to many and influenced decisions that has resulted in huge financial losses. But I am not adding my voice to the chorus of disgust with the BOM. I am confident they made forecasts based on the best data available and without thought of personal gain. Other groups seized upon the worst-case scenarios to make headlines, promote their Political views or prosper from farmers' distress. I reserve my disgust for these groups.

The livestock markets are rebounding strongly from the fear driven surpluses during the end of 2023. Perhaps 2024 will show us the real value of our produce.

2023 saw our clients being rewarded for the extra weight, soundness and docility of their stock. We congratulate you all on the magnificent success you have achieved.

We wish everyone good Health, Happiness and Success for this New Year.

Embrace the challenge, care for each other and celebrate your achievements.

Best Wishes

The Branson Family

# WELCOME

Every Grand Parent will understand the excitement and intrigue at watching the youngest generation develop.

We have a four year old who has proudly declared herself a Farmer. She helps her parents in the sheep yards, knows which paddock the stock are in and delights at newborn lambs and newly laid eggs.

Our two year old grandson has an obsession with tractors. Even worse than his fathers! Of course, the tractors he loves are much prettier than what his father grew up with.

Noeleen and I are so fortunate to have all our Grandies within half an hour travelling.

They are all happy and healthy. We are so blessed.

The Banquet Bunch continues to grow with Matilda Grace Branson joining the bunch on 8th September 2023.

100 COMMERCIAL ANGUS HEIFERS  
RISING TWO YEARS – PTIC

Sourced from leading Banquet Clients:

Bardon Park, Jindabelluc, Jingella, Mt Kincaid, Norman,  
Ryan Pastoral, Windarra and Winninburn.

 Banquet Doris K461

Banquet Holden H591  
**DAM: BANQUET IRENE L076**  
 Banquet Irene H490

This Sale features the first sons of Qohuna Q577, they are powerful with a lot of grunt, thickness and capacity. Qohuna Q577 sold for \$21,000 in our Autumn 2021 Sale. He was a standout of the 'Heifer Bull Run' for his low birth weight, powerful head, strong top, extreme bone, thickness and capacity. His progeny excell for these traits with the added bonus of fine, soft and shiny hair type.

Wattletop Sitz 458n E111  
**DAM: WATTLETOP DANDLOO K48**  
 Wattletop Dandloo H297

Moonshine M42 was purchased from one of the last Wattletop Bull Sales in partnership with Quarterway Stud. M42 was only a yearling at the time. He has proven to have exceptional calving ease. His calves are consistently light born with a refined shoulder but still vigorous at birth. His sons, although low birth weight, show particularly good growth, significant muscularity and extra cover. His daughters in production are long and refined through the neck and shoulder. Their udder shape and teat size are excellent. The first sons of M42 featured in our Autumn 2020 Sale. Sons have sold to \$40,000 with his top 20 sons averaging \$26,000. We have retained two sons and kept semen from another three.

**Sire: BALDRIDGE BEAST MODE B074**  
 Baldridge Isabel Y69

Trio Docklands H1  
**DAM: TRIO BURNETTE L78**  
 Trio Burnette E17

Qantas Q78 was purchased at the 2020 Trio Sale for the Sale topping \$17,000. Although only a yearling, Q78 showed the neck extension, shoulder refinement and mobility we appreciate. His sire, Beast Mode, has added the extra width of loin, width and depth of hindquarter. His skin and hair type are attributes we seek. We are pleased with the performance and consistency of his progeny. They show the attributes we chose Qantas for. We used Qantas very heavily in that first season and he has shown the ability to recover strongly. Another great positive!

 Forres Wilcoola D107

Millah Murrah Doc F159  
**DAM: BANQUET YENDI K224**  
 Banquet Yendi D351

It is the consistency of the progeny of Nuttella N462 that has us so excited. Bulls that produce consistent lines of progeny are so much more valuable. And N462 consistently improves so many traits. He adds thickness, depth and do ability to his progeny. He improves structure and temperament. N462 sons achieved top price at our Autumn Sale at \$62,000 to Glenloch and Quarterway Angus, TAS and second top price of \$60,000 to Moorunga Stud. In our Spring 2022 Sale a son topped the Sale at \$65,000 to Mountain Valley Angus, NSW. Nuttella sons were also a feature at our Spring 2023 Bull Sale where a son topped the Sale at \$42,000 to Londavra Angus, Tas.

**Sire: BEN NEVIS NEWSFLASH N239**  
 Ben Nevis Jean H215

Aryvale Bartel E7  
**DAM: BEN NEVIS CELESTE J121**  
 Ben Nevis Celeste G77

This is the first Sale we have offered sons of Rambo. We purchased Rambo as a yearling along with Glenmorgan, Fernleigh and Koojan Hills Studs for \$70,000. He was selected for his thickness, wide top, muscularity and softness. Rambo also offers a nice data set for birth weight, growth, EMA and IMF. His sire, Ben Nevis Newsflash N239, topped their 2018 Sale at \$28,000. We partnered with Bannaby Angus to purchase Newsflash's dam, Jean H215, for \$82,000 at the Ben Nevis Mature Cow Dispersal. We expect Rambo to have a strong influence at Banquet for many years. We have already used two sons.

Tarago T186 is the last of this age group of bulls. He is another thick, deep, muscular, soft and easy doing son of Nuttella. Nuttella has elevated to another level again with this offering of 22 sons. Their consistency of temperament, structure and type is amazing. Whatever cow we throw to Nuttella he performs. This time he got Burnette K006, she is a clear standout from our purchases from the Coolana Dispersal Sale. K006 tracks back to the very successful Burnette family from Raff Angus. K006 has had sons sell to \$30,000 in our Spring ‘22 Sale, and all her eight daughters have been retained. T186’s full brother featured in our Spring ‘23 Sale at Lot 2 and sold for \$16,000.

Talkabull T202, is a very smart bull to introduce the start of Ben Nevis Rambo sons. Rambo was selected for his muscularity, thickness, strong top and also a low birth to growth spread. He also has a nice pedigree being a grandson of one of Ben Nevis's best cows, Jean H215, who was purchased in conjunction with Bannaby Angus for \$82,000. T202 is very muscular, thick and rugged with a lot of width. Dam of T202, Dream G13, was purchased from the Premier Dispersal for \$38,000. This is our first Sale her sons have been offered, which she has ten on offer. We have admired G13's length, refinement, femineity and deep body since we inspected her as a 3 year old female. Her Dam, Vermont Dream Y301, has become a breed legend after the Vermont Dispersal. Dream G13, is also a great grand daughter to the great old Kiwi Dream M41. T202 only flush brother has been retained. Half brother to Lots 1, 7, 8, 22, 31, 32, 33, 38 and 52. Should be suitable for joining maiden heifers.

WOW what a package! Tom Cruise T220.

Is a unique and powerful combination of pedigree, phenotype, performance and docility.

T220 is very muscular, big loined, wide topped, rugged, extremely thick and exceptionally quiet. His sire, Rambo R230 was purchased in partnership for \$70,000. We really admired his thickness and muscularity. Rambo's Paternal Granddam, Jean H215 was the top cow at Ben Nevis's Female Sale selling for an Australian Angus cow record of \$82,000 to Bannaby and Banquet Angus.

Tom Cruise's Dam, Quiet R329 is a powerful and robust young female. Granddam Quiet J397, is a cow with lots of power and grunt, but still maternal. Quiet J397, has been in our donor team for several years. All her daughters have been retained and all her sons have been sold for breeding. Her first daughter, Quiet Q359 has recently joined the donor team. Great Granddam, Quiet Y091, was a breeding machine! She has eight daughters and six granddaughters in the donor team. She has had twelve sons used at Banquet so far and several grandsons. Whenever a Y091 son has been offered they have featured as standouts of the Sale.

One son, Sensation S005 topped our Spring 2022 Sale at \$65,000 to Mountain Valley Angus.

Another son topped our Autumn 2023 Sale at \$55,000 to Fernleigh Angus.

If you want serious maternal power Tom Cruise has got it, with Jean H215 being Ben Nevis's favourite cow and Quiet Y091 being one of Banquet's most successful cows!

Then have a look at the data on T220. No other bull in the Angus database can match his combination of short gestation (-9.5), low birth (+2.9), explosive growth (+144), high milk (+22), large scrotal (+3.4), exceptional docility (+42), large EMA (+7.0) and impressive IMF (+4.3). T220 has been a standout from a young age. We have used him in our embryo transfer program.

Tom Cruise might be the bull you have been waiting for!

A very unique package, with an outcross pedigree to the mainstream genetics.

Semen Retained. Should be suitable for joining maiden heifers.

ASHG13 PREMIER Y301 DREAM G13<sup>PV</sup>

VERMONT DREAM Y301<sup>PV</sup>

Transferabull T324, is smooth bodied, well balanced, very correct and easy doing. While having these traits he still displays grunt, bone and power. Dam of T324, Dream G13, was purchased from the Premier Dispersal for \$38,000. This is our first Sale her sons have been offered, and what a magnificent display of ten sons. We have admired G13's length, refinement, femininity and deep body since we inspected her as a 3 year old female. She is also a Great Grand Daughter to the great old Kiwi Dream M41. We are very excited to watch G13's contribution to Banquet. Flush Brother to Lot 33. Half Brother to Lots 1, 7, 8, 9, 22, 31, 32, and 52.

A special pedigree in Tradition T451. Sire Notter N297, has had a son top our Spring 2021 Sale at \$48,000 and two sons have been retained for stud use. Notter was used for his length, fine front and smooth skin. Dam, Lucky L334 is a magnificent thick, soft and easy doing female. She is a donor at Banquet. Her first two daughters, Lucky N329 and Lucky P363 have already been promoted to the donor team. Her first son sold for \$17,000 to Ryan Pastoral in our Autumn 2021 Sale. T451's flush sister is a standout of her age group. L334's latest daughter, Lucky U028 is also a star of our weaner heifers. T451 has a great head, long hip to pin and a lot of length wrapped in a smooth skinned, easy doing and very correct package. Semen Retained.

ROBONBEL VITALITY V31<sup>#</sup>

If you are after a bull with a strong head, grunt, bone, power, robust and quiet. We might have the winner for you in Tattslotto T454. Then have a look at the pedigree on this young bull. Yes another Nuttella son out of Vitality D019. D019 was purchased from Anvil Dispersal in partnership with Bannaby Angus. The Vitality family was vey successful at Anvil and D019 is already starting to produce some great progeny at Banquet. Her only other son sold for \$20,000 in Autumn 2022. With a pedigree like this T454 is no gamble.

SUITABLE FOR JOINING MAIDEN HEIFERS

Lot 91 to Lot 104 have been selected on:

Type – long necks, fine shouldered and moderate bone.

Pedigree – They are sired by proven calving ease sires that have been used by Banquet.

Birth Weight – All these bulls are in the low to moderate actual birth weight range.

EBV – EBV’s of these lots are in the low to moderate range for birth weight EBV.

Remember – Management of the heifers has the greatest impact on calving difficulties.

# BRINGING A NEW BULL HOME

Buying a bull is an investment. This investment should contribute to the genetics and sale income of your herd for many years. If you are to get the most from your new bull, it pays to look after him well, especially in the first season of use. This report discusses management strategies to maximise the productive life of your bulls.

## Arrival:

New bull buyers are often concerned about the apparent bad temperament of a bull that seemed quiet enough when purchased. Bulls can become upset and excited in the sale and delivery process. They are subjected to strange yards, different noises, loss of their mates, different people, different handling methods, trucking, unloading, new paddocks and different water and feed. This can upset animals which are normally very quiet.

When the bull arrives home, unload him at the yards into a group of cows or steers. Never jump the bull from the back of a truck into a paddock. Bulls from different origins should be put into separate yards with other cattle, steers or cows, for company.

Provide hay and water, then leave the bull alone until the next day, before giving routine health treatments.

## Mating New Bulls:

Newly purchased young bulls should not be multiple joined with older herd bulls. They will not be allowed to work much and in keeping them away from the cows, the older, dominant bull will knock them around.

Use new bulls in either single sire groups or with other young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have fewer problems later.

The Australian Association of Cattle Veterinarians (AACV) defines a normal, fertile bull as “expected to get 90% of 50 normal, cycling, disease free females pregnant within 9 weeks, and 60% of these should become pregnant in the first three weeks of joining”. This expectation would apply to 2 year old bulls, but not to younger bulls.

## During Mating:

Check bulls at least twice each week. Watch them work if possible and pay particular attention to any sign of abnormal serving problems like “corkscrew penis” or too many cows returning to heat.

Have a spare bull or bulls available to replace any that break down. If you have to replace a bull, get the bull checked by your vet. Sometimes prompt treatment for small problems can avoid culling. Vendors that provide guarantees on their bulls will usually require a veterinary certificate indicating the problem with unsatisfactory bulls.

Rotate bulls in single sire groups to make sure that any bull infertility is covered. Single sire joining works well but it has risks. The bulls must be checked regularly and carefully or the bulls rotated every one or two cycles.

RECESSIVE GENETIC CONDITIONS

This is information for bull buyers about the recessive genetic conditions, Arthrogryposis Multiplex (AM), Hydrocephalus (NH), Contractural Arachnodactyly (CA) and Developmental Duplications (DD).

Putting undesirable Genetic Recessive Conditions in perspective

All animals, including humans, carry single copies (alleles) of undesirable or "broken" genes. In single copy form, these undesirable alleles usually cause no harm to the individual.

But when animals carry 2 copies of certain undesirable or "broken" alleles it often results in bad consequences. Advances in genomics have facilitated the development of accurate diagnostic tests to enable the identification and management of numerous undesirable or "broken" genes.

Angus Australia is proactive in providing its members and their clients with relevant tools and information to assist them in the management of known undesirable genes and our members are leading the industry in their use of this technology.

What are AM, NH, CA and DD?

AM, NH, CA and DD are all recessive conditions caused by "broken" alleles within the DNA of individual animals. When a calf inherits 2 copies of the AM or NH alleles their development is so adversely affected that they will be still-born.

In other cases, such as CA and DD, calves carrying 2 copies of the broken allele may reach full-term. In such cases the animal may either appear relatively normal, or show physical symptoms that affect their health and/or performance.

How are the conditions inherited?

Research in the U.S. and Australia indicates that AM, NH, CA and DD are simply inherited recessive conditions. This means that a single gene (or pair of alleles) controls the condition.

For this mode of inheritance two copies of the undesirable allele need to be present before the condition is seen; in which case you may get an abnormal calf. A more common example of a trait with a simple recessive pattern of inheritance is black and red coat colour.

Animals with only one copy of the undesirable allele (and one copy of the normal form of the allele) appear normal and are known as "carriers".

What happens when carriers are mated to other animals?

Carriers, will on average, pass the undesirable allele to a random half (50 %) of their progeny.

When a carrier bull and carrier cow is mated, there is a 25% chance that the resultant calf will inherit two normal alleles, a 50% chance that the mating will result in a carrier (i.e. with just 1 copy of the undesirable allele, and a 25% chance that the calf will inherit two copies of the undesirable gene.

If animals tested free of the undesirable gene are mated to carrier animals the condition will not be expressed at all. All calves will appear normal, but approximately half (50%) could be expected to be carriers.

How is the genetic status of animals reported?

DNA-based diagnostic tests have been developed which can be used to determine whether an individual animal is either a carrier or free of the alleles resulting in AM, NH, CA or DD.

Angus Australia uses advanced software to calculate the probability of (untested) animals to being carriers of AM, NH, CA or DD. The software uses the test results of any relatives in the calculations and the probabilities may change as new results for additional animals become available.

The genetic status of animals is being reported using five categories:

AMF	Tested AM free
AMFU	Based on Pedigree AM free - Animal has not been tested
AM_%	_% probability the animal is an AM carrier
AMC	Tested AM-Carrier
AMA	AM-Affected

For NH, CA and DD, simply replace AM in the above table with NH, CA or DD.

Registration certificates and the Angus Australia web-database display these codes. This information is displayed on the animal details page and can be accessed by conducting an "Database Search" from the Angus Australia website or looking up individual animals listed in a sale catalogue.

Implications for Commercial Producers

Your decision on the importance of the genetic condition status of replacement bulls should depend on the genetics of your cow herd (which bulls you previously used) and whether some female progeny will be retained or sold as breeders.

Most Angus breeders are proactive and transparent in managing known genetic conditions, endeavouring to provide the best information available. The greatest risk to the commercial sector from undesirable genetic recessive conditions comes from unregistered bulls with unknown genetic background. The genetic condition testing that Angus Australia seedstock producers are investing in provides buyers of registered Angus bulls with unmatched quality assurance.

For further information contact Angus Australia's Breed Development & Extension Manager on (02) 6773 4618.

DISCLAIMER AND PRIVACY INFORMATION

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.  
PV : both parents have been verified by DNA.  
SV : the sire has been verified by DNA.  
DV : the dam has been verified by DNA.  
# : DNA verification has not been conducted.  
E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following idents.....

from member.....(name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.

Name: ..... Signature: .....

Date: .....

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350.

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email office@angusaustralia.com.au

Insurance Brokers

## FARM INSURANCE

Protect your farm business and your assets with an insurance policy tailored to meet your needs.

**Breakwater Insurance** can arrange competitive premiums and cover for commercial dairy, beef, sheep and cropping enterprises.

We offer professional, on-farm advice relating to:

- Livestock mortality
- Farm buildings and contents
- Home and contents
- Farm machinery and machinery breakdowns
- Livestock, hay, fencing and farm trees
- Liability
- Motor vehicles (all types)
- Theft
- Business interruption.

## NATIONAL CATTLE HEALTH DECLARATION

V: 02/05/18

Property Identification Code (PIC) of this property  
This MUST be the PIC of the property that  
the stock is being moved from

3	M	Y	N	L	0	4	3
---	---	---	---	---	---	---	---

Attached to accompanying NVD/Waybill No.

--	--	--	--	--	--	--	--

### Biosecurity and health information

1. Has the owner stated above owned all the cattle in this consignment since birth? Y ☒ N ☐

2. Does the property of origin have a completed on-farm biosecurity plan? Y ☒ N ☐

3a. Have these cattle been tested for the presence of pestivirus antigen?  
If tested, were any cattle found to be persistently infected? Y ☒ N ☐  
Y ☐ N ☒

3b. Have these cattle been tested for the presence of pestivirus antibody?  
If tested what percentage of the tested cattle were antibody positive? Y ☐ N ☒

4. Has the property of origin had an occurrence of clinical Johne's disease (JD) in any species in the past five years? Y ☐ N ☒ Unsure ☐  
J-BAS of Six (Optional)

5. On the property of origin, have cattle been co-grazed with dairy cattle?  
*See explanatory note for advice on co-grazing with non-bovine species* Y ☐ N ☒ Unsure ☐

6. Has the source herd had a JD test? Y ☒ N ☐ Pending ☐  
If so, which test? Check Test ☒ Sample Test ☐ Date 26 / 6 / 18  
Was the result negative? Y ☒ N ☐

7. If dairy cattle, the consignment has a Dairy Assurance Score of: Part A (herd base score) Part B (calf credits) Part C (total Dairy Score)

8. Any other relevant health information

### Treatments

Treatment type	Product	Date of treatment within last 6 months
Drench or pour-on	Dectomax	October 2023
Liver fluke		
Other treatments	AD&E	October 2023
	Vibriovax, Pestiguard	January 2024

### Current vaccinations for the cattle being moved (see explanatory note)

Clostridial (e.g. 5 in 1):	Y <input type="checkbox"/>	Botulism:	Y <input type="checkbox"/>
Leptospira (e.g. 7 in 1):	Y <input checked="" type="checkbox"/>	Bovine ephemeral fever:	Y <input type="checkbox"/>
Pestivirus:	Y <input checked="" type="checkbox"/>	Tick fever:	Y <input type="checkbox"/>
JD (Silirum):	Y <input type="checkbox"/>	Vibrio:	Y <input checked="" type="checkbox"/>

Other vaccinations (specify):

### Declaration (see explanatory notes for further information)

I Noeleen Elizabeth Branson  
(Full name)

184 Steeles Lane

(Address)

Mortlake

(Town/suburb)

Vic

3272

(Postcode)

I declare that I am the owner or the person responsible for the husbandry of the cattle and that all the information in this document is true and correct. I also declare that I have read and understood all the questions that I have answered, that I have read and understood the explanatory notes, and that I have inspected the animals and deem them to be healthy, free of signs of disease and fit to travel.
