

 **SALAMARA**  
LIMOUSIN & ANGUS STUD

*On Farm Bull Sale*

FRIDAY 22ND MARCH 2024 | 11.30AM AWST  
INSPECTIONS FROM 9.30AM AWST

ON PROPERTY - 500 (Lot 17) Mitchell Road  
Benger WA 6223

# Welcome

Greetings from Michael, John and Misha.

In partnership with Elders and H Francis and Co., or in conjunction with your preferred stock agent, you are warmly invited to the annual Balamara Limousin and Angus Bull Sale in Benger, Western Australia, set for the 22nd March 2024.

The decision to move the sale from Brunswick Junction Selling Complex to ON-FARM reflects our dedication to providing a unique experience. This shift isn't merely a change of scenery; it's a conscious effort to prioritise the well-being of our bulls, offering you the chance to inspect them in their natural environment and gain insight into their every day lives.

Bulls will be available for inspection directly adjacent to the auction pavilion from 9:30AWST. Join us for light refreshments upon arrival and immediately after the sale. Michael (Balamara Principal), Craig (Elders) and Scott (H Francis and Co.) will be available to showcase the bulls and answer any queries you may have.

We appreciate your consideration in Balamara supporting your breeding objectives and production systems. Your presence at the bull sale is highly valued, and we look forward to welcoming you at our farm on the 22 March 2024.

Our Warmest Regards,

*Michael, John and Misha Mammo*

### TERMS AND CONDITIONS OF SALE

The conditions of sale are those as described by the Auctioneer on sale day.

### INSURANCE DISCLAIMER

Insurance risk of stud animals sold at auction transfers to the purchaser at the fall of the hammer, including animals remaining on the vendor's property post sale. It is recommended that purchasers insure their animals at the completion of the sale. Stud animals are not covered by commercial livestock insurance.

# Additional Sale Information

## HEALTH TREATMENTS

- Vaccinated against Pestivirus (BVDV) and all bulls have been tested to show that they are not Persistently Infected animals.
- Vaccinated with 7 in 1
- Vaccinated with Pestiguard
- Vaccinated with Vibrovax against Vibriosis,
- Vaccinated with Piliguard to aid in the prevention of pinkeye

All bulls have been semen and morphology tested prior to sale indicating they are fertile and capable of natural service.

All Angus bulls have been confirmed to **not** carry recessive genetic conditions

## TRANSPORT OF NEWLY PURCHASED BULLS

Save big on herd enhancements with Balamara Bulls! Your investment goes further with free transport within Western Australia and a generous 50% contribution to transport costs to the Eastern States. This offer is available to bulls purchased at auction and with the following cattle transporters:

Within WA:

- Kelly's Livestock Transport (Steven Kelly) 0426 259 857

For Eastern States purchasers:

- Quicksilver Cattle Transport (Doug Giles) 0427 720 010

To assist us in making the appropriate arrangements to deliver bulls as soon as practicable, please complete the BUYERS INSTRUCTION SLIP at the end of the catalogue.

COONAMBLE E98<sup>#</sup>

T3 is a herd favourite at Balamara. Semen has been collected for in herd use only. Another son by Myers Fair N Square by our donor cow Balamara Pocahontas. Fair N Square adds his natural muscle pattern with high growth. T3 is so free moving and is a bull that will breed them all. He will add natural thickness to his sons but also breed strong maternal females for any self replacing herd.

## BALAMARA BIG STAR T4 (PP B U)

DOB: 28/03/2022 ID: BALPT4 HOMO. POLLED BLACK

CFLX WILD CARD (PP BB U)

S: COTTAGE LAKE BIG STAR (PP BB AC)

AUTO WAVERLY 602W (P BB U)

TMF WESTWOOD 505W (PP A AA)

D: MARYVALE HOT BUTTER H201 (P A AC)

MARYVALE DAY LILLY 8132D (P B U)

What a Star. T4 screams potential stud sire, out of possibly the most influential cow to walk the fields of Balamara (Maryvale Hot Butter H201) and by Cottage Lake Big Star. T4 is our Lead Limousin Bull at this years sale. Clean fronted, free moving, big scrotal and sound footed all without compromising soft muscle shape. He has a pedigree stacked with performance and data to match with all growth traits in the top 5% and 10% of the breed index. To top it off he is Homozygous Polled and Heterozygous Black.

**Accuracies:** Accuracies are presented with each EBV and give an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal and its relatives.

**Disclaimer:** The Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither the Australian Limousin Breeders' Society or ABRI oversee or audit the collection of this data.

# UNDERSTANDING ESTIMATED BREEDING VALUES (EBVS)

Calving Ease/Birth	<b>CEDir</b>	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	<b>CEDtrs</b>	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	<b>GL</b>	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
	<b>BW</b>	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
Growth	<b>200 Day</b>	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
	<b>400 Day</b>	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
	<b>600 Day</b>	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
	<b>MCW</b>	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
	<b>Milk</b>	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
Fertility	<b>DtC</b>	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
	<b>SS</b>	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
Carcase	<b>CWT</b>	kg	Genetic differences between animals in hot standard carcase weight at 750 days of age.	Higher EBVs indicate heavier carcase weight.
	<b>EMA</b>	cm <sup>2</sup>	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate larger eye muscle area.
	<b>Rib Fat</b>	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more fat.
	<b>P8 Fat</b>	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcase.	Higher EBVs indicate more fat.
	<b>RBV</b>	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcase.	Higher EBVs indicate higher yield.
	<b>IMF</b>	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more intramuscular fat.
Feed/Temp.	<b>NFI-F</b>	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
	<b>Doc</b>	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
Selection Index	<b>\$A</b>	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems.	Higher selection indexes indicate greater profitability.
	<b>\$A-L</b>	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems.  The \$A-L index is similar to the \$A index but is modelled on a production system where feed is surplus to requirements for the majority of the year, or the cost of supplying additional feed when animal feed requirements increase is low. While the \$A aims to maintain mature cow weight, the \$A-L does not aim to limit the increase in mature cow weight as there is minimal cost incurred if the feed maintenance requirements of the female breeding herd increase as a result of selection decisions.	Higher selection indexes indicate greater profitability.

# DISCLAIMER AND PRIVACY INFORMATION

## Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia, Australian Limousin Breeders Society and the Vendor will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

## Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.

SV : the sire has been verified by DNA.

DV : the dam has been verified by DNA.

# : DNA verification has not been conducted.

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

## Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

.....

## BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following idents.....

.....  
from member.....(name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.

Name: ..... Signature: .....

Date: .....

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350.

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email [office@angusaustralia.com.au](mailto:office@angusaustralia.com.au)

A close-up, low-angle shot of a horse's head, focusing on its eye and the top of its head. The horse is wearing a dark, possibly black, halter. The background is a textured, light-colored surface, likely a wall or a large piece of fabric. The lighting is dramatic, with strong highlights and deep shadows, creating a sense of depth and texture.
