

BOOROOMOOKA ANGUS

Established 1926

Your Quality Choice

CALVING EASE | QUIET TEMPERAMENT | HIGHLY FERTILE | HIGH MARBLING
GOOD GROWTH | STRUCTURALLY SOUND

261 HERD BOOK

Registered Bulls

Friday 16th August 2024

12 noon at Keera, Bingara, NSW

History and Breeding Principles

Booroomooka is one of the largest, most innovative and established Angus Studs in Australia. Integrity, Commitment, Reliability and Innovation are key values to the business.

The stud was founded by Gordon Munro from Keera, Bingara, NSW in 1926. An efficient, hardy, fertile herd has been developed since 1926. The Keera Property has been owned and managed by five generations of the family since 1858. In 1926 five stud heifers were purchased from Mr NL Forster, Abington, Armidale. Also select heifers were imported from Turihaua Stud, New Zealand. In 1928 more heifers were introduced from Glennelg, Waiterenui and Matapihi Studs in New Zealand.

The family owned business, is now managed by Gordon's son Hugh and grandson Sinclair. The business has properties in the Bingara area covering over 12,000 hectares. The main breeding property "Keera" is the cow/calf factory and where the replacement heifers are grown out. "Glen Park" is used to grow out the young bulls and steers. "Glenroy" has a high quality self replacing Angus commercial cow herd, producing mostly feeder steers to analyse the performance of Booroomooka bloodlines.

Over the years many bulls, embryos and semen have been imported from Scotland, USA and New Zealand. Booroomooka Angus Stud was very successful in the show ring for over sixty years. Nowadays more emphasis is placed on running cattle in larger contemporary groups, on farm visual assessment, huge on farm objective data collection, structured progeny tests and use of genomic technology. The Stud aims for continual improvement and increased accuracy in describing the genetic merit of the seedstock that it sells.

Structurally sound, fertile, quiet bulls with the genetic potential to increase long term profitability.

Welcome to the Booroomooka Annual Bull Sale

Dear Friends,

On Friday 16th August you will have a quality choice of an outstanding draft of bulls – bred with the values of Integrity, Commitment, Reliability and Innovation. Our objective is to focus on traits that help increase the long term profitability of our customers.

Since 1926, we have committed to continual improvement and adaptation to changing customer requirements. Our cow herd is unique, developed on our hilly native grass country for nearly 100 years. Our philosophy is that ‘the cows work for us, we don’t work for them’. They are raised under challenging conditions, to build resilience. Our functional fertile cow herd is imperative to the success of our bull customers.

We are committed to collecting large amounts of information on our cattle – phenotype, pedigree and genomic data. This data collection with high integrity, results in a more reliable genetic evaluation enabling increased genetic improvement. Our commitment to data collection and evaluation is such a powerful tool for you (our customer) to make effective genetic improvement.

A reliable seedstock producer also means that each year our bulls are in condition “ready to work” for you, passing a Veterinary Bull Breeding Soundness Evaluation (includes morphology), vaccinated, independently evaluated for structural soundness, temperament, muscle score, sheath and coat type.

We continue to innovate and use the latest technologies. We are highly involved in research and have collected data to help identify “Better Breeders” and “Animal Resilience”. RBVs are available on our website for MATURE BODY CONDITION. For customers requiring different coat types, COAT TYPE RBVs are also available. All sale bulls will be scanned prior to the sale for EMA, Rib Fat, P8 fat and IMF%.

You will see that you have a wonderful choice of quiet bulls – with calving ease, good growth, high fertility and high marbling. All bulls have been genomically tested to increase the accuracy of the estimated breeding values (EBVs) and are Sire Assured.

Booroomooka Angus bulls are suited to a range of markets and climates with plenty of local support all over NSW, focusing on the high marbling, premium feeder steer market. Large numbers of bulls are sold north to Qld and the Northern Territory, with success improving fertility, weight for age and meat quality. We also have a strong following in the south, in areas such as King Island and Tasmania where our bulls produce progeny to meet high quality grass-fed marketing specifications. Our Angus bulls work in many systems – grain fed, grass fed and organic. Seedstock, Angus Commercial Producers and Cross Breeders continually have success with Booroomooka Angus bulls.

Our strong commitment to increase marbling and growth has helped increase the demand for Booroomooka Angus sired progeny along the supply chain. Years of performance recording and selection of cattle with high carcass quality is being rewarded. Booroomooka Angus is a high marbling herd.

Looking forward to seeing you on sale day. If you are unable to physically attend the sale, all lots will have video footage and you can bid on Auctions Plus.

Two **OPEN DAYS** are to be held, from 9am to 5pm on 8th August and 15th August 2024. Bulls can also be inspected from 9am on sale day morning.

If you require any more information please let us know.

Kind Regards,

Hugh and Sinclair Munro.

Booroomooka Sale Details

SALE LOCATION

The Booroomooka Angus Sale is to be held on the property Keera, 5796 Copeton Dam Rd, Bingara, NSW,2404.

Nearest commercial airports are Armidale, Inverell, Moree or Tamworth. Small planes can land on our Keera Property Airstrip or at Bingara. Please ring us – to advise landing time so we can arrange for you to be picked up. Bulls may be inspected from 9am on the morning of the sale, or at any other time by arrangement with the selling agents or vendors.

GPS: Longitude 29°59'45.3", Latitude 150°46'43.7" Keera is 28km east/south east from Bingara on the Bundarra Rd (or Copeton Dam Rd)

From Armidale: *Approx 11/2 hours north west, travel to Bundarra and then Bingara.*

From Goondiwindi: *Approx 2 hours south, travel to North Star, Warialda, Bingara.*

From Tamworth: *Approx 2 hours north, travel to Manilla, Barraba, then Bingara.*

From Inverell: *Approx 50 minutes, travel on Copeton Dam Rd, from Copeton Dam travel towards Bingara.*

ACCOMMODATION

Bingara Imperial Hotel Motel	(02) 6724 1629
Bingara Fossickers Way Motel	(02) 6724 1373
Bingara Sportsmans Hotel	(02) 6724 1880
Bingara The River House	0428 834 281
Bingara Riverside Caravan Park	(02) 6724 0081
Warialda Sunflower Motel	(02) 6729 1344
Inverell Top of the Town Motel	(02) 6722 2622
Barraba The Playhouse Hotel	(02) 6782 1109

BUYER REGISTRATION

Bids can be made at the sale barn or remotely through Auctions Plus. For sale barn bids - A Buyer Registration system will apply, ensure you register prior to the commencement of the sale. To save time on sale day we strongly encourage you to Pre Register to the Selling Agents, preferably as a buyer by **5pm Wednesday 14th August**. The sale will also be interfaced with AUCTIONS PLUS. If you intend to bid on Auctions Plus, ensure you are registered on the auctions plus platform.

SALE CONDITIONS

All lots will be sold subject to the usual conditions governing

auction sales, these will be displayed on sale day. The auction price will be exclusive of GST.

DISCLAIMER

All reasonable care has been taken to ensure that the information provided in this catalogue is correct. However the vendor or the selling agent do not assume any responsibility for the correctness, use or interpretation of the information included in this catalogue.

GUARANTEE

Booroomooka guarantees the structural soundness and fertility of the bulls. The entry of every bull constitutes a guarantee by the vendor that if a bull should prove infertile or breaks down to reasons other than injury, misadventure, disease, mismanagement or negligence, the vendor will provide you with a satisfactory replacement if available, or issue you with a credit equal to the purchase price minus salvage value. This credit may be used to purchase an animal at a future Booroomooka sale. Any request for replacement/credit must be lodged with the vendor within 11 months of purchase.

INSURANCE

Facilities for insurance will be available at the sale.

HEALTH AND VACCINATION STATUS

A National Cattle Health and Vendor Declaration will be provided. The vendor has a BioCheck Biosecurity Plan, with a JBAS8 Score. The plan was done in consultation with veterinary advice. The plan is designed to ensure the farms have considered the major biosecurity risks and has appropriate risk strategies in place. The herd is monitored negative TB and is confirmed free of brucellosis. All bulls have been tested PI free of pestivirus and vaccinated against pestivirus.

All bulls have been vaccinated against vibriosis, botulism, BEF (three day sickness),7 in1. Bulls have had a lice/drench treatment in July. If you require purchased bulls to have specific vaccinations (eg tick fever) please let us know and we will organize.

FEET AND COAT TYPE

None of the bulls offered for sale have had feet trimmed or coats clipped. All bulls have been independently assessed for feet/leg structure. Genomically enhanced structural ebvs are printed in the catalogue and Research Breeding values for Coat type are available on the Booroomooka website.

BUILDING BETTER BREEDERS

Booroomooka Angus has been breeding a resilient fertile cow herd in the hilly terrain of Keera since 1926. We have been collecting data on female body composition and all bulls have Mature Body Condition Research Breeding Values that are available on our website at www.booroomooka.com.au Our philosophy is the "Cows work for us", they need to be resilient – adapted to cope with lower quality grasses and seasonal fluctuations.

VETERINARY BULL BREEDING SOUNDNESS EVALUATION

All bulls have undertaken a Veterinary Bull Breeding Soundness Evaluation, subjected to a physical examination of structural soundness, examination of the reproductive tract, including an internal examination and visualization of the penis. Each bull was subjected to a semen collection and evaluation including **morphology**.

GENETIC TESTING

The genetic status of individual sale bulls is displayed in the catalogue.

LOOKING AFTER YOUR NEW BULL

After purchasing your bull, please ensure you fill out the buyers instruction sheet which includes delivery instructions. The sale bulls have been prepared so that they are ready to go to work with your cows. Previous to that they have been fed a nutritionally balanced high fibre mix. When you get your new bull home do not put him with older bulls. Booroomooka bulls are used to being handled with horse, vehicles and respond to quiet working dogs. When your new bull is joined to your cows, inspect him at least weekly to ensure he is walking freely and his penis appears to be normal. If there is a problem take him out of the cows and report to a vet. Early treatment is vital. It is a good idea to have spare bull/s ready to work if a problem/s occur. When joining is finished, the bull would appreciate a drench and lice treatment. If you have any questions regarding the bulls, the progeny etc please let us know. If you require more information go to www.booroomooka.com.au.

Our Sale Bulls include our very best. To ensure genetic continuity we will retain semen access (rights) for specific bulls - the “Booroomooka ” bulls.

Lots showing this elite logo  will require that Booroomooka shall retain the right to collect up to 600 straws for Booroomooka use only. Booroomooka will collect semen by agreement and at its cost and Booroomooka will reimburse for any extra expenses associated with the semen collection for Booroomooka’s use.

NLIS Tag/Freeze Branding

All bulls will have NLIS ear tags attached and we will transfer to your nominated PIC. All bulls will be freeze branded with the bull ID.

Genetic Improvement Tool

To make genetic change in traits we use the Trans Tasman Angus Cattle Evaluation as a valuable tool. EBVs have been proven to be more accurate than raw performance measurements for assisting in the selection of breeding stock. Raw data in some cases can be misleading due to environmental factors. Raw measurements should not be compared unless the cattle are in the same contemporary group.

Whilst in the calculation of EBVs all available pedigree, genomic and performance information on each animal and its relatives (parents, ancestors, siblings, progeny, etc.) is combined to provide a single best estimate of an individual’s genetic merit for each trait. In addition, allowance is made for environmental differences between properties, seasons and management groups on each animal’s performance. Differences in heritabilities between traits and genetic associations between traits are also accounted for in the calculation of EBVs.

261 Quality Bulls to Sell

A resilient, functional fertile cow herd

- Quiet temperament
- Integrity, Commitment, Reliability and Innovation
- Veterinary Bull Breeding Soundness Evaluation (includes Morphology)
- Coat Type, Structure, Temperament and Frame Assessed
- Vaccinated for vibriosis, 7in1, 3DAY, botulism
- PI Free and vaccinated against pestivirus
- Progeny Recognition in the marketplace
- Sire Assured and Use of Genomic Technology
- Research into Building Better Breeders
- Progeny Testing through Angus Sire Benchmarking
- Phenotype, Pedigree and Genomic Data collection

BULLS READY TO WORK FOR YOU !!

Understanding the TransTasman Angus Cattle Evaluation (TACE)

What is the TransTasman Angus Cattle Evaluation?

The TransTasman Angus Cattle Evaluation is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. The TransTasman Angus Cattle Evaluation uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

The TransTasman Angus Cattle Evaluation is an international genetic evaluation and includes pedigree, performance and genomic information from the Angus Australia and Angus New Zealand databases, along with selected information from the American and Canadian Angus Associations.

The TransTasman Angus Cattle Evaluation utilises a range of genetic evaluation software, including the internationally recognised BLUPF90 family of programs, and BREEDPLAN® beef genetic evaluation analytical software, as developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

Using EBVs to Compare the Genetics of Two Animals

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20

kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals recorded with Angus Australia.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes.

For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

Considering Accuracy

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

Description of TACE EBVs

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

UNDERSTANDING ESTIMATED BREEDING VALUES (EBVS)

Calving Ease/Birth	CEDir	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	CEDtrs	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	GL	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
	BW	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
Growth	200 Day	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
	400 Day	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
	600 Day	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
	MCW	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
	Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
Fertility	DtC	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
	SS	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
Carcase	CWT	kg	Genetic differences between animals in hot standard carcase weight at 750 days of age.	Higher EBVs indicate heavier carcase weight.
	EMA	cm ²	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate larger eye muscle area.
	Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more fat.
	P8 Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcase.	Higher EBVs indicate more fat.
	RBV	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcase.	Higher EBVs indicate higher yield.
	IMF	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more intramuscular fat.
Feed/Temp.	NFI-F	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
	Doc	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
Structure	Claw Set	score	Genetic differences in claw set structure (shape and evenness of claws).	Lower EBVs indicate a lower score.
	Foot Angle	score	Genetic differences in foot angle (strength of pastern, depth of heel).	Lower EBVs indicate a lower score.
	Leg Angle	score	Genetic differences in rear leg structure when viewed from the side (angle at front of the hock).	Lower EBVs indicate a lower score.
Selection Index	\$A	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems.	Higher selection indexes indicate greater profitability.
	\$A-L	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems. The \$A-L index is similar to the \$A index but is modelled on a production system where feed is surplus to requirements for the majority of the year, or the cost of supplying additional feed when animal feed requirements increase is low. While the \$A aims to maintain mature cow weight, the \$A-L does not aim to limit the increase in mature cow weight as there is minimal cost incurred if the feed maintenance requirements of the female breeding herd increase as a result of selection decisions.	Higher selection indexes indicate greater profitability.

Structural Assessment

Accredited Independent Structural Assessment

The Booroomooka Sale Bulls have been independently structurally assessed by Liam Cardile (Accredited Assessor 1033) on 5/6/2024. This is to increase the quality and reliability of the bulls. Any animals deemed inadequate have been removed from the sale draft.

The beef class structural assessment system uses a 1-9 scoring system for feet and leg structure.

An animal scoring 4, 5 or 6 would be acceptable in any breeding program. A score of 3 or 7 shows greater variation but would be acceptable in most programs.

A score of 2 or 8 should be looked at closely before purchasing, in most situations would not be suitable

A score of 1 or 9 are considered culls.

CODES FOR STRUCTURAL ASSESSMENT

FC: Front Feet Claw Set

RC: Hind Feet Claw Set

FA: Front Feet Angle

RA: Rear Feet Angle

RS: Rear Legs (Side View)

RH: Rear Legs (Hind View)

LM: Muscle Score

TEMP: Temperament (note: scores 1 to 5, lower the score - more favourable)

SN: Sheath/Navel (note: scores 1 to 5, higher the score - more favourable)

COAT SCORE (CT)

Visual Coat Scores were assessed. Selecting animals for a sleeker coat may increase their tropical adaptability. Coat Scores are recorded on a 1-7 scale, with 1 being sleek and 7 being woolly. Coat Score 1 is extremely short and found in some *Bos indicus* and some of their crossbreds.

CT	Type
2	Very Short
3	Fairly Short
4	Fairly Long
5	Long
6	Hairy

FRAME (FRM)

The Sale bulls were assessed for frame. The height or 'frame' of cattle of a given age is closely related to maturity type. Smaller Framed cattle generally have an earlier maturity pattern than larger framed cattle. The bulls have been classified into four frame groups – small (S), medium (M), large (L) and very large (VL).

REFERENCE SIRES

High Quality Sons

Rennylea L519 (NORL519) – 25 sons to sell.

L519 is such a flawless bull with high accuracy and reliability. He is breeding very quiet progeny (top 15%) with impeccable structure (top 3% claw). L519 is positive calving ease with good growth. He has high marbling (top 10%). His daughters are highly fertile, have lovely udders and hold condition well, with a high Mature Body Condition (MBC) (Top 3%).

Landfall New Ground (TFAN90) – 44 sons to sell.

Long, deep bodied bull possessing fabulous sire appeal and inspiring presence. Short sleek COAT TYPE and females in production with high mature body condition (Top 3%). Moderate birth weight with explosive growth, very quiet and high muscle (Top 5%) with finishing ability.

Booroomooka Paragon P96 (NGMP96) – 28 sons to sell.

Awesome sire with real eye appeal, shape, B- muscle, Short sleek COAT TYPE (Top 14%). Sound, easy moving bull, with moderate birth weight and explosive growth (top 2%). High carcass weight (top 1%), High muscle (top 3%). Paragon comes from an outstanding functional maternal line with his half brother topping 2023 bull sale. Increased profitability along the supply chain with top 1% \$ABI.

Millah Murrah Paratrooper (NMMP15) – 15 sons to sell.

The \$160,000 2019 Australian record priced bull. Superb carcass shape, muscle and a moderate maturity pattern. Low Birth weight with explosive early growth.

GB Fireball (USA18690054) – 22 sons to sell.

Exciting calving ease sire with high marbling (top 3%) and muscle (top 2%). He is breeding thickness and shape, with short sleek COAT TYPE (Top 4%). Increased profitability along the supply chain with top 1% \$ABI.

Lawsons Rocky (VLYR4010) – 11 sons to sell.

Rocky was the record breaking, highest priced yearling bull across all breeds within Australia selling for \$130,000. Has sire appeal and balance, that stands square to the ground with added muscling. Natural thickness, and base width. Low birth weight with good growth and high muscle (Top 7%) and high marbling (Top 8%). Short sleek COAT TYPE – (Top 1%).

Angus Australia Disclaimer and Privacy Information

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV: both parents have been verified by DNA.

SV: the sire has been verified by DNA.

DV: the dam has been verified by DNA.

#: DNA verification has not been conducted.

E: DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

Buyers option to opt out of disclosing personal information to Angus Australia

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following idents _____

from member _____ (name) do not consent to Angus Australia using my name address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.

Authorised Name: _____ Signature: _____

Date: _____

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350
