BARAMBAH-DALE

CHAROLAIS

2024 BULL SALE

Welcome

Barambah-Dale Charolais is a family owned and operated business that has been breeding Charolais since 1993, with Wayne and Lesley Davis at the helm.

The herd is now run across three southern Queensland properties: "Wingfield" at Dalby, "Horsley Park" at Moonie, and "Scotland Downs" at Westmar.

We have a real passion for the breed with their ability to infuse growth, muscle and thickness when crossed with virtually any other breed. On top of that we are striving to increase the genetic propensity in our herd for softness and fat coverage, which will in turn improve bottom lines down the supply chain.

From the beginning we have been very committed to the whole process of stud breeding to produce the ideal beast that will deliver higher returns for our commercial clients. We continue to use a variety of genetics, including the introduction of more polled genetics, as we strive to be the cattleman's choice and to have a positive impact on the beef industry. We select for growth, structural soundness, fertility, constitution, temperament and importantly – easy-finishing ability.

We have been selling bulls into the South and North Burnett and the Brisbane Valley for over 25 years. It is very satisfying for us to see the results of weaners sold sired by Barambah-Dale bulls.

This year Barambah-Dale will present a selection of 60 sound, well-muscled bulls, which have proven themselves through a rigorous selection process. 50% of the bulls on offer are polled with 9 being DNA tested Homozygous Polled. All sires used are proven to produce high quality progeny.

The bulls have been prepared for the sale at our "Wingfield" bull depot on a pellet specifically designed for bulls, with unlimited access to oaten hay. All the horned bulls have that thickness and softness we strive for, and the polled bulls have thick heads and plenty of softness.

Barambah-Dale Charolais has a website and Facebook page that will provide you with any extra information you require. Wayne and Lesley are happy to host private inspections for you to look over their bulls prior to the sale.

Thank you for your attendance and we look forward to catching up at the sale at Wingfield.

ONLINE BIDDING

Via the AuctionsPlus website

NOTE

All younger bulls have the same breeding as bigger bulls but just had a harder start after weaning that year.

Always have a few cattle in the yards to put new bull with when they arrive at their new home, to help settle him down.

INSPECTIONS

Prior inspection of the sale bulls may be made by appointment with the vendors or selling agents.

ANIMAL HEALTH

All bulls have been semen tested and treated with Pestigard, 7 in 1, Vibrio, 3 Germ Blood and 3-Day Vaccine.

DNA PARENT VERIFICATION

Please note that not all our sale bulls have been DNA parent verified prior to sale.

If you require your bull to be DNA parent verified, we will organise for testing and cover the costs of all laboratory fees, provided you notify us in writing on the buyer instruction sheet on the day of the sale. Please note, we take no responsibility for any discrepancies that may arise for incorrect parentage if buyers do not request DNA parental verification testing on the buyer's instruction sheet on the day of the sale.

REBATE

An outside rebate of 3% will be offered to agents introducing the client in writing up to 24 hours before the sale and settling within seven (7) days.

BUYER'S INSTRUCTIONS & DELIVERY

Written instructions for delivery must be provided upon completion of the auction, using the Buyer's Instruction Sheet at the back of this catalogue. No verbal instructions will be accepted.

SUPPLEMENTARY SHEET

All bulls will be ultrasound scanned prior to the sale for eye muscle area, rump, IMF and rib fat. This and scrotal sizes will be provided on a Supplementary Sheet available on sale day, or prior to the sale by contacting vendors.

REGISTERED BULLS

If a transfer of registration is required for stud purposes, please indicate that on your Buyer's Instruction Sheet.

SALE DAY SAFETY

Persons enter the sale pens at their own risk and no prams or children under 15 are to enter the sale pens.

INSURANCE

Livestock insurance can be arranged if required by the Buyer. The Sellers recommend travel insurance is taken by the Buyer. While all care will be taken by the vendor and the agents the purchases become the responsibility of the buyer at the fall of the hammer.

FREE DELIVERY - TERMS & CONDITIONS

• Delivery at the Seller's cost will be to either Toogoolawah, Murgon, Kingaroy, Biggenden, Gympie, Taroom, Dalby, Roma or Blackall (delivery centres) as nominated by the Buyer on the Buyer's Instruction Sheet. If bulls are to go to more than one centre, separate Instruction Sheets are required.

• The Sellers will use their own trucks or their nominated transport operator. Buyers can't arrange engagement of their own transport operator and charge the Seller for the cost.

• The point of delivery for each delivery centre will be at the Seller's discretion (the delivery location). This will mostly be at sale yards at the delivery centre.

• Timing of delivery to the delivery location will be at Seller's discretion but will usually be within 1 to 7 days of the sale.

• The Seller will feed and water bulls as necessary at their cost until delivery to the delivery location.

• Bulls remain at risk of Buyer from the fall of the hammer, and the Buyer indemnifies and holds the Seller harmless against any loss the Buyer suffers between the fall of the hammer and delivery to the delivery location.

• The Sellers and the Seller's agents will use their best endeavours to inform the Buyer of the delivery location and the anticipated time of delivery to the delivery location. The Buyer or the Buyer's agent must be in attendance at the delivery location at the expected delivery time to receive bulls.

• Any variation to these terms must be agreed to by the Seller countersigning the Buyer's Instruction Sheet setting out the variation. No other variations will be binding on the Sellers.

DIRECTIONS

- Follow Moonie Highway out of Dalby towards Moonie for 18km. Start to slow down when you see the Lake Broadwater sign.
- Turn right down Kupunn Road.
- Go over the railway and turn left at the silos onto Kupunn Duleen Road.
- Follow road until the end to a T section.
- Turn left onto Duleen Daandine Road.
- First driveway on the right is Wingfield.

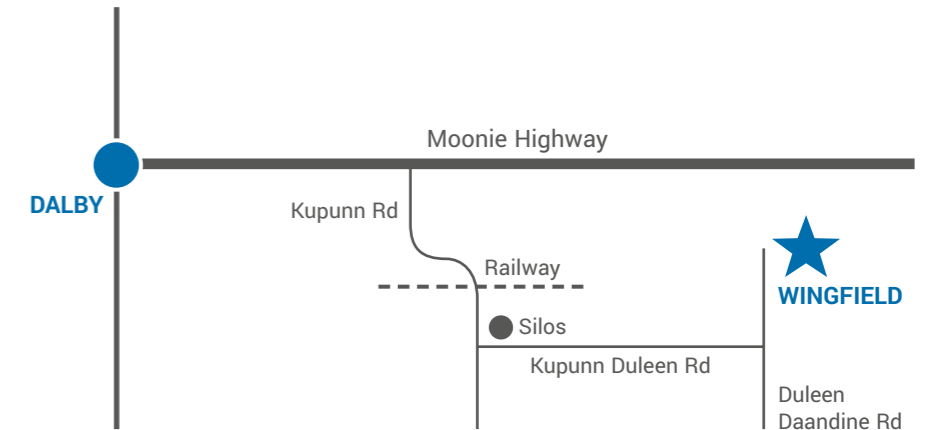

CLOSEST AIRPORTS

27km from Dalby Airport to Wingfield.

105km from Toowoomba Wellcamp Airport to Wingfield.

DISCLAIMER

All reasonable care to ensure that the information provided in this catalogue is correct at the time of publication. Neither Barambah-Dale Charolais, Cattlelog Queen or Agents makes any representations for accuracy, reliability, or completeness of any information provided in this catalogue and does not assume any responsibility for using or interpreting the information included in this catalogue. You are encouraged to seek independent verification of any information contained in this catalogue before relying on such information.

ACCOMMODATION

Accommodation options are all located in Dalby, 27km from Wingfield. We recommend auction visitors requiring accommodation contact:

Drovers Motor Inn, Dalby Ph: 07 4669 0444
Kobber Motor Inn, Dalby Ph: 07 4669 7488
Dalby Fairway Motor Inn, Dalby Ph: 07 4662 2255

WHAT IS AN EBV?

An animal's breeding value is its genetic merit, half of which will be passed on to its progeny. While we will never know the exact breeding value, for performance traits it is possible to make good estimates. These estimates are called Estimated Breeding Values (EBVs).

EBVs are expressed in the units of measurement for each particular trait. They are shown as + (positive) or - (negative) differences between an individual animal's genetic difference and the genetic base to which the animal is compared.

For example, a bull with an EBV of +50 kg for 600-Day Weight is estimated to have genetic merit 50 kg above the breed base of 0 kg. Since the breed base is set to an historical benchmark, the average EBVs of animals in each year drop has changed over time as a result of genetic progress within the breed.

CALVING EASE EBVS (%) are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

CE % Dir = Direct Calving Ease

The EBV for direct calving ease indicates the influence of the sire on calving ease in purebred females calving at two years of age.

CE % Daughters = Daughters' Calving Ease

The EBV for daughters' calving ease indicates how easily that sire's daughters will calve at two years of age.

GESTATION LENGTH EBV (DAYS)

is an estimate of the time from conception to the birth of the calf and is based on Artificial Insemination and hand mating records. Lower (negative) Gestation Length EBVs indicate shorter gestation length and therefore easier calving and increased growth after birth.

BIRTH WEIGHT EBV (KG) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

200-DAY GROWTH EBV (KG) is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam.

This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-DAY WEIGHT EBV (KG) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-DAY WEIGHT EBV (KG) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

MATURE COW WEIGHT EBV (KG) is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age.

This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd.

Steer breeders wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

MILK EBV (KG) is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

SCROTAL SIZE EBV (CM) is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age.

This EBV is an estimate of an animal's genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

CARCASE WEIGHT EBV (KG) is based on abattoir carcass records and is an indicator of the genetic differences in carcass weight at the standard age of 650 days.

EYE MUSCLE AREA EBV (SQ CM) is calculated from measurements from live animal ultrasound scans and from abattoir carcass data, adjusted to a standard 300 kg carcass.

This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 300 kg dressed carcass. More positive EBVs indicate better muscling on animals.

Sires with relatively higher Eye Muscle Area EBVs are expected to produce better muscled and higher percentage yielding progeny at the same carcass weight than will sires with lower Eye Muscle Area EBVs.

RIB FAT AND RUMP FAT EBVS (MM)

are calculated from measurements of subcutaneous fat depth at the 12/13 rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcasses) and are adjusted to a standard 300 kg carcass. These EBVs are indicators of the genetic differences in fat distribution on a standard 300 kg carcass. Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcass weight than will sires with higher EBVs.

RETAIL BEEF YIELD EBV (%) indicates genetic differences between animals for retail yield percentage in a standard 300 kg carcass. Sires with larger EBVs are expected to produce progeny with higher yielding carcasses.

INTRAMUSCULAR FAT EBV (%) is an estimate of the genetic difference in the percentage of intramuscular fat (marbling) at the 12/13th rib site in a 300 kg carcass. Depending on market targets, larger more positive values are generally more favourable.

The absolute value of any EBV is not critical, but rather the differences in EBVs between animals. Particular animals should be viewed as being "above or below breed average" for a particular trait.

The first step when interpreting an EBV should be to compare it to the current breed average EBVs. This will give you an indication of how the animal compares with the current genetic level for the breed for each trait.

Comparison with the breed average EBVs allows you to establish whether an animal is above or below the current genetic level of the breed.

UNDERSTANDING SELECTION INDEXES

There are three standard selection indexes calculated for Australian Charolais animals.

These are:

- Domestic Index (Dom)
- Northern Terminal Index (N Term)

Each selection index has been developed for a different production/ market scenario.

DOMESTIC INDEX

Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd with a British cow base (e.g. Angus) targeting grass-finished production for the domestic trade.

This Index assumes pasture grown and finished steers weighing 430 kg (240 kg HSCW and 6 mm P8 fat depth) at 12 months. Daughters are retained or sold for breeding therefore maternal traits are of importance.

In response to industry feedback positive emphasis has been placed on finishing ability.

NORTHERN TERMINAL INDEX

Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd in Northern Australia (i.e. Brahman cows) targeting the production of grass finished steers for the Jap Ox market.

Steers are sold direct to slaughter at 630 kg (345 kg HSCW and 5 mm P8 fat depth) at 28 months. All progeny are slaughtered. In response to industry feedback positive emphasis has been placed on finishing ability.

All selection indexes are reported as an EBV, in units of net profit per cow mated (\$) for a given production/market scenario. They reflect both the short term profit generated by a sire through the sale of his progeny, and the longer term profit generated by his daughters in a self replacing cow herd (where applicable).

One useful strategy of utilising selection index information is to complete the following steps:

- Identify the selection index of most relevance
- Rank animals on the selection index
- Consider the individual EBVs of importance
- Consider other traits of importance.

How to Register and Bid on AuctionsPlus

You must be a registered bidder to bid online, you cannot bid as a viewer/guest

- 1 Go to www.auctionsplus.com.au to register at least 48 hours before the sale.
- 2 Select "Sign Up" in the top right hand corner.
- 3 Fill out your name, mobile number, email address and create a password.
- 4 Go to your emails and confirm the account.
- 5 Return to AuctionsPlus and log in.
- 6 Select "Dashboard" and then select "Request Approval to Buy".
- 7 Fill in buyer details and once completed go back to Dashboard.
- 8 Complete buyer induction module (approx. 30 minutes).
- 9 AuctionsPlus will email you to let you know that your account has been approved.
- 10 Log in on sale day and connect to auction.
- 11 Bid using the two-step process – unlock the bid button and bid at that price.
- 12 If you are successful, the selling agent will contact you post sale to organise delivery and payment.

Approval may take up to 48 hours

For more information please contact us on:

Phone: (02) 9262 4222

STUD STOCK AUCTION TERMS & CONDITIONS OF SALE

IMPORTANT NOTICE : All bids shall be treated as offers made upon the following Terms and Conditions of Sale and all persons present are admitted to attend the sale on the basis that they have notice of these Terms and Conditions.

- The highest bidder shall, subject to Condition 2, be the Purchaser provided that the Vendor reserves the right to bid either by himself or through his Agent or Auctioneer and should any dispute arise among the bidders for any lot, during or immediately after the sale of the lot, it shall be settled at the Auctioneers absolute discretion who may, should one of the disputants advance, put the lot or lots up again. The bidding from time to time shall be regulated by the Auctioneer and no bid shall be retracted.
- The sale will be conducted on a "Sale" or "No Sale" basis whereby the lot for sale shall be knocked down to the highest bidder, but the sale will be subject to the acceptance of the highest bid by the Vendor who will immediately after the fall of the hammer declare "Sale" or "No Sale". Should the Vendor reject the bid of the highest bidder such bidder will have the right of first refusal of the lot at the Vendor's nominated price for one hour after the lot has been passed out of the ring on the Terms and Conditions herein set forth in so far as they shall apply.
- The details of the Purchaser, the purchase price and the lot sold as recorded by the sale clerk for and on behalf of the Auctioneer shall be equally binding on both Purchaser and Vendor.
- The Auctioneer expressly reserves the right, without giving any reasons therefore, to:
 - Refuse to acknowledge any bid;
 - Withdraw any lot or lots before or during the sale;
 - Exclude any person from the auction venue should it think fit.
- Each lot in all cases shall be at the risk and expense of the Purchaser upon acceptance of his bid by the Vendor or upon acceptance of the highest bidder's offer by the Vendor whichever shall be the earlier.
- Except as expressly provided in these Terms and Conditions of Sale no guarantee or warranty shall be given in respect of any lot sold under these Conditions as to pedigree, sex, age, breeding condition or otherwise howsoever, and no guarantee, warranty or condition whatsoever shall be implied from any affirmation made before or at the time of the sale, or from any circumstances of the sale, but in all cases where a guarantee is intended the same shall attach and be enforceable only if reduced to writing before delivery of the lot and signed by the Vendor or by the Auctioneer acting as agent for the Vendor, and the absence of such writing shall be conclusive evidence in case of dispute that no guarantee, warranty or condition whatsoever was given or implied.
- In the event of any dispute in respect to the sale of any lot:
 - The Purchaser shall nevertheless be obliged to pay to the Auctioneer the full purchase price and any other monies or interest payable by the Purchaser in accordance with these terms and conditions;
 - The Vendor and the Purchaser shall resolve the dispute between themselves;
 - The Auctioneer shall have no liability or responsibility in regard to the dispute; and
 - No lot shall be returned to the Auctioneer and the Purchaser shall indemnify the Auctioneer for all costs, expenses and damages which the Auctioneer is put to or incurs by reason of the Purchaser so doing.
- The name of the Vendor for whom the Auctioneer acts is acknowledged to have been furnished to Purchasers prior to the sale and further particulars will in all cases be furnished to a Purchaser if required. In the case of any disputes the remedy of the Purchaser shall be against the Vendor only and in no case or under any circumstances against the Auctioneer who is to be regarded for all intents and purposes as agent for a disclosed principal.
- PAYMENT** – Unless prior credit arrangements have been made in writing with the Auctioneer the full upon acceptance of the highest bid or the highest bidder's offer by the Vendor and prior to delivery. Notwithstanding that delivery is given to or possession obtained by the purchaser or his representative prior to the payment of the purchase money in full the property in any lot which is sold shall not pass to the Purchaser until the full purchase price and all cheques, promissory notes, bills of exchange, acceptance orders or drafts given in connection with such payment have been paid and liquidated, and until property shall pass, the Purchaser shall hold such lot as bailee, provided that in all cases should such payment not have been made and liquidated within 14 days of the date of the sale the Auctioneer reserves the right to:–
 - Rescind the contract on behalf of the Vendor and repossess and resell any lot;
 - Recover from the Purchaser interest upon the purchase price at a rate per annum which aggregates the AMBA Bill Rate plus two percentum. For the purposes of this condition, the expression "the AMBA Bill Rate" is the rate published by the Australian Merchant Bankers Association in good faith as at the date of the sale as its bill rate for 180 day bills of exchange expressed as a percentage per annum. If at any time the AMBA Bill Rate becomes unavailable for any reason, the Auctioneer shall determine and advise the Purchaser of the interest rate to apply for the purposes of this condition.
 - The Auctioneer is selling as the del credere agent of the Vendor and the full purchase price of any lot sold shall be payable by the Purchaser to the Auctioneer and be fully recoverable by the Auctioneer in its own name.
- If the Purchaser shall neglect or fail to comply with any of the within conditions, any lot purchased by him may be immediately resold by public auction or private contract, with or without notice, at the risk of the former Purchaser, who will be held responsible for all loss and expenses arising out of such resale, and shall not participate in any profit accruing therefrom.
- Any Vendor or Purchaser removing the sale number from any lot after it has been sold will fully indemnify all affected parties for any loss, costs or damage should the lot be wrongly delivered.
- The Purchasers, if any more than one, shall be jointly and severally bound by these Terms and Conditions, and shall jointly and severally carry out and perform same.
- Any person who advances a bid on a lot shall do so on the expressed condition and understanding that should that person's bid be the highest bid and such bid is accepted by the Vendor, then that person will be held personally liable for the price so agreed upon, regardless of the fact that that person may be acting on behalf of another party, either disclosed or undisclosed to the Vendor or Auctioneer, provided however, that this Condition shall not in any way negate the Vendor's right to claim against any principal and in such case the bidder's liability shall be construed to be by way of guarantee.
- The Auctioneer may, should it think fit, make arrangements on a Purchaser's behalf for the feeding, watering, trucking, shipping of and general attendance to any lot after sale but no responsibility will be accepted by the Auctioneer and all such service will be at the Purchaser's risk and expense.
- No lot will be delivered until the sales invoice has been checked and signed by the Purchaser or his duly authorised representative.
- Each lot in all cases shall be sold with all faults, if any, and excepting those conditions and warranties implied by the Trade Practices Act or any applicable State legislation which cannot be contractually excluded and excepting conditions and warranties expressly contained in these Terms and Conditions of Sale, any express or implied condition, statement of warranty, statutory or otherwise, is hereby excluded. The Auctioneer is not liable in respect of any error, misdescription or omission in any particulars appearing or stated regarding the description of pedigrees of any lot offered for sale and no such error, misdescription or omission shall entitle the Purchaser to annul the sale or reject the lot or claim any compensation, damage or abatement in price.
 - Each lot will be sold subject to passing all veterinary tests required by the law of the state or country to which the Purchaser intends to transport that particular lot, such tests to be undertaken at the Purchaser's expense and concluded immediately following the sale. In the event of a lot failing to pass these tests, the sale shall be null and void, any purchase moneys paid by the Purchaser shall be refunded and property in the lot shall revert to or remain with the Vendor.

- Guarantees of Fertility:–
 - BULLS** - Save and except for calves at foot, all bulls are guaranteed breeders and to so prove by the later of:
 - twelve months after the date of sale or
 - the animal reaching the age of 24 months
 - FEMALES** - Save and except for female calves at foot, all females are guaranteed to be in calf or go into calf by the later of:
 - 6 months of the date of sale
 - the animal reaching the age of 30 months
 A positive pregnancy test certified by a qualified veterinary surgeon shall be sufficient evidence that the animal is in calf.
 - Claims under Clauses 17(1) and 17(2). A claim that an animal has failed to satisfy a guarantee of fertility under Clause 17(1) or 17(2) must be made to the Vendor within the relevant guarantee period but prior to the animal entering a quarantine area other than on the Vendor's property.
 - All claims must be accompanied by a certificate from a registered veterinarian surgeon in accordance with the guidelines established by the Australian Association of Cattle Veterinarians which must clearly identify the basis of the claim.
 - Subject to Clause 17(9), infertility resulting from injury or disease occurring after the sale of the animal is not covered by this guarantee.
 - The Vendor retains the right to have the animal placed on a property nominated by him or returned to his own property for further assessment of fertility for a period not exceeding six months. If the animal proves fertile within the period such status must be confirmed by a certificate issued by a registered veterinary surgeon in accordance with the guideline established by the Australian Association of Cattle Veterinarians and costs incurred must be borne by the Purchaser. If the animal is not proven fertile within the period, the costs incurred must be borne by the Vendor.
- LIABILITY OF A VENDOR** - Except for costs defined elsewhere in the conditions of sale, the liability of a Vendor in respect of claims relating to fertility shall not exceed the purchase price of the animal(s) or provide mutually agreed upon replacement animal(s).
- In the event of a claim being substantiated:
 - The purchase price shall be refunded within 14 days unless a mutually agreed upon replacement animal has been provided.
 - The animal/s which are the subject of the claim shall automatically become the property of the Vendor and be returned to him or disposed of according to his instruction at his expense.
- Subject to Clause 17(9), this guarantee is of no effect if:
 - The animal is returned to the Vendor.
 - In poor physical condition or with any injury,
 - Tests carried out on behalf of the Vendor within fourteen days of such return proved positive to any diseases which may affect the animal's fertility or ability to breed naturally, or
 - The Purchaser has collected and stored semen from a bull or
 - The Purchaser attempted any form of embryo collection from a female.
- In the event of a dispute as to whether a lot is a breeder, such dispute shall be resolved by the Vendor and the Purchaser. The Auctioneer, while he will use his best endeavours to assist, shall have no liability or responsibility in that regard. If an animal is alleged or proved not to be a breeder, the Purchaser must nevertheless pay the Auctioneer the full purchase price and any other monies or interest payable by the Purchaser in accordance with these Terms and Conditions.
- EVIDENCE OF FERTILITY** – A Certificate issued by a registered veterinary surgeon at or before the time of sale that an animal is fertile (unless it is a certificate stating in respect of a female that she is in calf at the time of sale) does not, of itself, satisfy or discharge the Vendor's obligations under the guarantee of fertility given under this Clause 17. All animals, except calves at foot, must prove their fertility within the relevant guarantee period.
- RELIEF FROM GUARANTEE** – If the Vendor seeks to be relieved from the obligations which would otherwise be imposed upon him by this clause by virtue of Clauses 17(3)(b) or 17(6)
 - the onus of proof is upon the Vendor to establish that:
 - The animal suffered the injury or disease or is in poor physical condition due to circumstances and events occurring after the sale, and
 - The injury, disease or physical condition is the sole cause of the animal's infertility or failure to prove fertility within the guarantee period.
- DEFINITION** – For the purpose of this Clause 17, the expression "guarantee period" means:
 - in relation to bulls – the period specified in Clause 17(1) as being the period in which the bull must prove his fertility, and
 - in relation to females – the period specified in Clause 17(2) as being the period in which the female must go into calf.
- Each lot shall be at the risk of the Vendor in respect of any damage or injury, whether by disease, accident or otherwise, or whether caused by the negligence of the Auctioneer for the period that the lot be in the custody of the Auctioneer, unless such lots shall have been sold in which latter case such lot shall be at the risk of the Purchaser in all such respects.
 - If any Vendor brings to the sale premises any lot which is dangerous, or infected with any disease, that Vendor shall be liable for all injury, damages, costs, losses or expenses which the Auctioneer may sustain, incur or be put to either directly or indirectly as a result of the Vendor so doing. The Auctioneer reserves the right, at its absolute discretion, to exclude from the sale, or put out of the sale venue or dispose of, any lot which in its opinion shows signs of any disease, whether infectious, contagious or not, or of any serious fault or of being dangerous.
- DELIVERY** – Except at the discretion of the Auctioneer no lot shall be delivered to the Purchaser unless payment of the purchase money together with any additional charges incurred including those expenses incurred by the Auctioneer pursuant to Condition 14 hereof, is first made by the Purchaser to the Auctioneer. Release of lots may be withheld by the Auctioneer until personal cheques are cleared.
- In these Conditions:–
 - References to "Auctioneer" shall be taken to mean as the context so admits, the Selling Agent or any member, subsidiary or related corporation or body, officer, agent or employee thereof, authorised by the Vendor to conduct the sale of the lot;
 - "Purchaser" shall have the meaning ascribed to it in Condition 1;
 - "Vendor" shall mean the person or corporation upon whose account lots are offered for sale and where a stud or farm is named shall mean the proprietor of that stud or farm;
 - "Lot" shall be taken to mean the animal offered for sale and/or sold by the Auctioneer on behalf of a Vendor.

IMPORTANT NOTICE
The Selling Agent/s, its members, subsidiary or related corporations, officers, agents, and employees for themselves and for those for whom they act while exercising due care provide all information without responsibility and give no guarantee whatsoever as to its accuracy. All persons who attend the Sale do so entirely at their risk and the Selling Agent, its members, subsidiary or related corporations, officers, agents, employees and its principals, for themselves and for those for whom they act, do not assume or accept any responsibility or liability of whatever nature for any injury or damage whatsoever which may occur.
