# Tullinga

- No ram has been poddied or assisted at birth.
- Feet are not trimmed and may look longer than show ram.
- All rams shorn on July 1st to show structure yet allow wool growth to show shedding pattern type.
- All Rams are genomics tested to get full parentage verification.
- All Rams run in large flocks to simulate commercial conditions.
- All lots are muscle and fat scanned by Trevor Pearce, a LambPlan qualified scanner, on the 8th of August 2024.
- All lots are individually bled for ovine brucellosis. All rams have a negative result which is available in folder from agent stand on Sale Day.
- All rams have been inspected/typed by Wicus Cronje a qualified breed inspector using the breed standards.
- All rams were paddock raised and have not had any supplement.
- Half the catalogue are young rams around hogget age. Please take care of them as it is their first joining. They are fit and ready to work and will not stop to take care of themselves. A rest period to recover will ensure that they have a long productive life. They are a valuable resource that is difficult to produce, a little care will be rewarded.
- We like to hear feedback good and bad and will endeavour to assist you in achieving your goals with your flock.

## The Tullinga Flock

The Tullinga flock has progressed considerably since it was founded by Anne Coffey & Robin Sanderson with six ewes and a ram in 2005. By concentrating on structure and fertility from the beginning, through the millennium drought, the ewes base was built to 350 high quality ewes. This culminated in their successful last sale in 2021, before the Wald family took stewardship the same year.

We have continued the same focus, breeding strategy to aim at producing efficient ewe flocks for profitable sheep production. We aim for fertile fast-growing sheep and to fill this goal, we source the best genetics available to suit our operation through direct purchase and ET/AI programmes to accelerate genetic gain to provide elite genetics.

We have purchased an additional 180 White Dorper ewes. The stud ewes have excellent conformation, femininity and are a great addition to our ewe flock. The addition of the ewes along with an annual ET program of 200/250 lambs per year which means we now have a stud flock of 1200 ewes. We aim to stabilise at 1000 White Dorper ewes and 250 Dorper ewes while maintaining the ET program for flock improvement.

### **Online Purchases**

The sale is interfaced with Auctions Plus and audio will be livestreamed, conducted in real time with online bidding.

### **Sale Agents**

Forbes Livestock Agency are the selling agents and settlement will occur through them. Usual sale terms and conditions apply and will be available on sale day, both at the sale and on Auctions Plus.

### **Rebate**

A 3% rebate is allowed for outside agents, introducing buyers in writing, 12 hours before the sale starts, and settling within 7 days of receiving the invoice.

Introductions should be in writing and sent to either the vendor

[hpwald@activ8.net.au](mailto:hpwald@activ8.net.au)

Or to agents

[info@forbeslivestock.com](mailto:info@forbeslivestock.com)

### **GST**

The auction will be GST exclusive, the GST will be added to the sale price.

### **Purchase pickups and deliveries**

Free delivery runs to major centres in the Eastern States.

## Independent Typing

All sale rams were inspected individually by Wicus Cronje, an international breed inspector. Wicus's classing on each ram is represented by their 'Type'.

The type of each individual ram is based off several traits. Conformation, Size, Fat Distribution, Colouring, Covering and Pigment.

### The below is the *Breed Standard* summary of each type

**Type 5 (T5)** – (Stud) is a superior, elite animal. (Breed Standard) is a very small group, therefore it is only a superior animal that fits in this group

**Type 4 (T4)** – (Stud) is a very good animal. (Breed Standard)

**Type 3 (T3)** – (Commercial) is a good animal classified as a first select.

## Health and Status

To ensure all animals are at peak health all rams are up to date with 6-in-1 and were last vaccinated on the 30/07/2024.

Drenched with Startect on the 30/07/2024.

Scabby Mouth Scratch (Scabigard) and Hideject ADE at lamb marking.

## **Fertility**

We are an Ovine Brucellosis Accredited flock (OB AR 77088). Additionally, all rams are palpated by vets from Lachlan Valley Vets, Forbes. All rams have a negative blood test for Ovine Brucellosis and will be available to view on sale day.

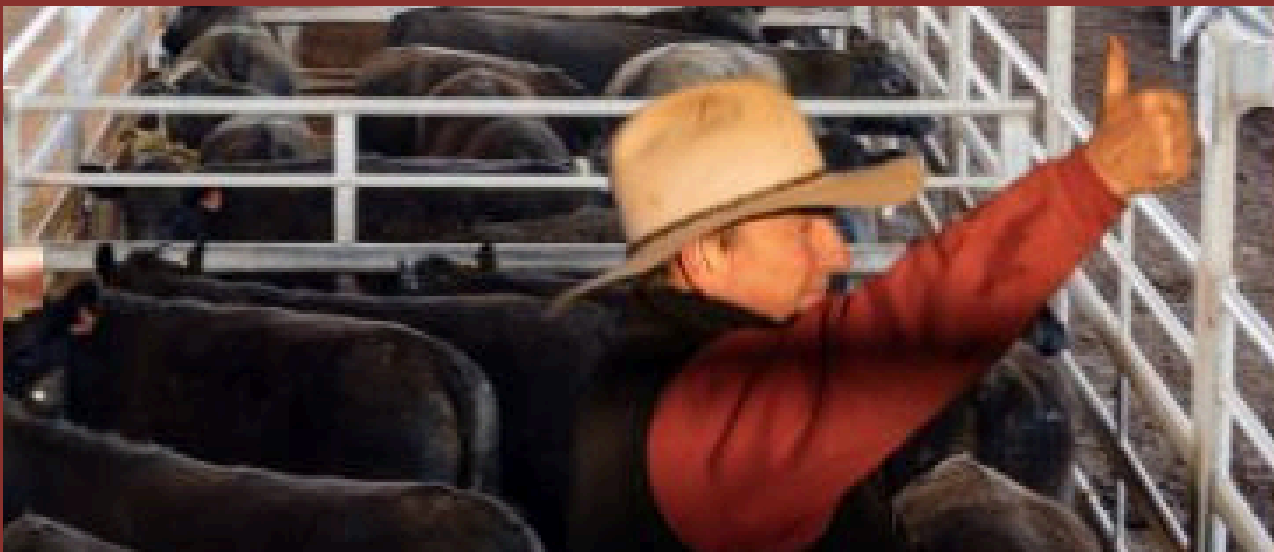

## **Performance Measurements**

The Eye Muscle Shape score, Eye Muscle Depth and Rib Fat measurements were measured by Sheep Genetics approved and qualified scanner, Trevor Pearce on the 8/08/2024. The age recorded in the catalogue is the true age of rams at scanning.

Eye Muscle Depth (EMD) is important, as research from MLA and the Sheep CRC indicate that selecting a ram with a more positive eye muscle depth can produce lambs with greater muscling and the potential for higher yielding carcasses.

Eye Muscle Shape (EMS) score is a score between 1 and 3, with three indicating the best shape and one being a poor shape, this indicates the spring of rib of an individual.

Rib Fat measurements, recorded in millimetres indicate fattening patterns of progeny as it has a high heritability and has a positive influence on fertility rates in ewes.

## Our Sire's of the Sale

**Animal** Fat Yak

**Sire** Burrawang Draft 200992

**Dam** Burrawang 151327

**Prefix/Name** Tullinga FatYak  
223645

**Birthdate** 09/07/2022

**Conception** Embryo Transfer

**Type** 5

A robust Embryo Transfer son of Draft, who is a very long, strong ram. His strong head connects through his neck and clean front shoulders, into his long, wide body which carries a lot of meat very easily.

**Animal** Road Train

**Sire** Burrawang B-Double  
160004

**Dam** Burrawang 191493

**Prefix/Name** Tullinga Road  
Train 223599

**Birthdate** 07/07/2022

**Conception** Embryo Transfer

**Type** 5

Road Train has an ideal, masculine ram's head, accompanied with a masculine shape encompassing width and a deep barrel just like his Grandfather Burrawang Barrell. Barrell was one of the great foundational Burrawang White Dorper Sires. Road Train is a very special ram from a unique bloodline.

## Our Sire's of the Sale

**Animal** George  
**Sire** Burrawang King Kong  
200083  
**Dam** Tullinga 199054  
**Prefix/Name** Tullinga George  
223423  
**Birthdate** 20/02/2022  
**Conception** Natural  
**No. in Birth** 1  
**Type** 5

Tullinga George is a son of Burrawang King Kong. He has terrific growth weighing 35 kgs at weaning at 14 weeks, then 47 kgs post weaning, 6 weeks later. In addition to an EMD of 32mm at just 5 months old.

**Animal** Jack Russell  
**Sire** Burrawang Latham  
210825  
**Dam** Tullinga 213288  
**Prefix/Name** Tullinga Jack  
Russell 223799  
**Birthdate** 15/10/2022  
**Conception** Natural  
**No. in Birth** 1  
**Type** 5

A Latham son who is a very good type of ram. He has bred on his grandfather, Burrawang Carlton's, attributes. A very well-balanced ram with great feet and fantastic structure. He has terrific cover and carries a lot of meat with his length and back end.

## Our Sire's of the Sale

**Animal** Latham  
**Sire** Carlton  
(Burrawang 190245)  
**Dam** Burrawang 160485  
**Prefix/Name** Burrawang  
210825 Latham  
**Birthdate** 15/10/2022  
**Conception** Natural  
**No. in Birth** 1  
**Type** 5

A very well-balanced ram with an excellent structure. He walks easily with good shoulders, a masculine body shape and a strong head.

**Animal** Donny  
**Sire** Trump  
(Burrawang 191472)  
**Dam** Burrawang 160038  
**Prefix/Name** Burrawang  
211231 Donny  
**Birth Date** 20/04/2021  
**Conception** Embryo Transfer  
**Type** 4

A very, very robust ram. He has strong loins and carries a lot of meat, with a deep barrel and deep flank.

## Our Sire's of the Sale

**Animal** Dusty  
**Sire** Thomas (Burrawang 171258)  
**Dam** Burrawang 171312  
**Prefix/Name** Burrawang 190507 Dusty  
**Conception** Natural  
**Birth Date** 01/05/2019  
**No in Birth** 2  
**Type** 5

Dusty is a fast growing, easy walking ram. His EMD as a 2-year-old was 48mm. Furthermore, at just shy of 6 months old he weighed in at 61.5kg, an additional 28kgs from his weaning weight just 3 months earlier. He is very long and very wide and carries his weight (118kg on 15/03/2021) well.

**Animal** Battleship  
**Sire** Schooner (Burrawang 181673)  
**Dam** Burrawang 170282  
**Prefix/Name** Burrawang 200122  
**Conception** Natural  
**Birth Date** 25/05/2020  
**No in Birth** 2  
**Type** 5

Considered the “star lot” amongst the young rams of his sale, we purchased Battleship in March 2021. Since then, he has continued to grow into a cracking ram proving himself as a sire. With his outstanding depth, length, carcase, and balance passing on to all his progeny.

## Our Sire's of the Sale

**Animal** Kenworth  
**Sire** Pistol (Burrawang 181150)  
**Dam** Burrawang 181213  
**Prefix/Name** Burrawang  
211909 Kenworth  
**Conception** Natural  
**Birth Date** 01/09/2021  
**No in Birth** 2  
**Type** 5

Kenworth was the highest priced ram at Burrawang's Charleville sale in November 2022. He was used as a backup ram in the Tullinga Dorper Embryo Transfer program. He has a deep barrel and strong head.
