HEAVY MUSCLING X EARLY MATURITY
CARCASE SHAPE

21st Annual Poll Dorset Ram Sale

Friday 4th October 2024, 1pm

"Corcorans Plains", Boorowa, NSW

SPRINGWATERS

POLL DORSET STUD EST. 1979

Welcome to our 21st Annual Poll Dorset Ram Sale

224 Poll Dorset rams

Inspection from 10:30am ◦ Online auction 1pm

We would like to welcome you to our 21st annual ram sale in Boorowa.

We will be offering 224 rams, and we are very pleased with the type of sheep we have presented. We set out to breed sheep with early maturity and heavy muscling, in a balanced package of carcase shape, structural excellence and doing ease.

Poll Dorset sired lambs have been a shining light in the difficult sheep and lamb market endured over the last 12 months having maintained a market premium, be it in the store or kill market, regardless of the ewe breed. They are unrivalled for injecting cash flow into sheep operations with lambs comfortably saleable within 12 months of putting the rams with the ewes. Our draft of rams this year is made up of rams capable of making a difference to the bottom line of producers with their carcase quality, doing ease and early maturity.

All the rams in the sale this year are presented with Stockscan raw data and a set of LAMBPLAN ASBV's. Our approach to these ASBV's is pragmatic – you won't see any changes to the phenotype of our sheep in their pursuit, rather we will endeavour to work on the numbers over time.

Our stud flock is now entirely genomically tested with over 3000 animals tested in the last 18 months or so. Our 2024 sale team will be the largest group of entirely parent verified, genomically tested Poll Dorset rams to be offered at auction. On-farm practicalities and efficiencies as well as quality assurance are among the major motivators to go this way. We also think it is an investment in the future accuracies of our ASBV's, utilising the most scientific ways to track various traits as opposed to the more ambiguous ways these ASBV's have been derived in the past.

Thank you very much for the interest in our breeding program,
Dane and Lisa, Dennis and Jo-Anne

Scanning for performance traits in animals has become a significant on-farm measuring tool over the last 10 years within the stud industry.

Australian STOCKSCAN Services P/L scanners assess sheep at around 12 months of age for the following:

- Weight (LW)
- Eye Muscle Width (A)
- Eye Muscle Depth (B)
- Fat Measurement (C)

Eye Muscle Area (EMA) is calculated using the eye muscle width and eye muscle depth measurements.

The meat index is based on the Eye Muscle Width, Eye Muscle Depth and Fat Measurement with an adjustment for the age of the sheep.

STOCKSCAN figures as at 26th July 2024

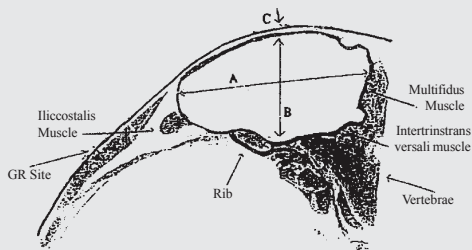

Figure 1: Exposed 12th rib on the carcass cut through the last thoracic and first lumbar vertebrae.

STUD TRANSFERS AND SEMEN SHARES

Springwaters retain the right to collect semen for in-flock use in all rams sold. Semen will be collected at our expense and the buyer's convenience.

ANIMAL HEALTH

All Springwaters sale rams were drenched with Tridectin and given a 6 in 1SB12 on 17th September 2024.

Springwaters in OJD MN2(V) and Brucellosis accredited free.

DNA PARENT VERIFICATION AND GENOMICS

All rams in the 2024 Springwaters Poll Dorset sale have all had a Genomic 50k test and DNA parent verification carried out. On the buyers end, it adds certainty to our pedigree and breeding, while also adds some accuracy to ASBV's.

SIRE SUMMARY

GOLDIE – SW200627

Sold in our 2021 sale for \$20,000, Goldie has been used extensively through AI. He sired the 2023 Poll Dorset Champion of Champions, SW220091. He is an early maturing, powerful ram, while maintaining fantastic shape through the shoulders. He also boasts great carcass data EBV's, sitting in the top 5% for IMF. 11 sons sell.

SW210129

A son of a purchased Punchgrove ram from Tasmania, he offers a new bloodline with the same attributes as some of our more prominent lines. Great muscle expression through the loin and hindquarter with a huge amount of body width and depth. His progeny is stamped in the same mould. 29 sons sell.

SW210770

A home-bred sire who is fitting into our breeding program very well. Softness, body depth and shape, we really love the bone in this ram and its evident in his progeny. He has a couple of outstanding sons in the specially selected section of the catalogue and a good run of sons displaying his commercial attributes right through the sale. He is a ram we will continue to use extensively based on his early breeding results. 31 sons sell.

SW210785

Another home-bred sire with his first drop of rams in the 2024 sale. He has a bit more smoothness in the front with plenty of his progeny suited to lambing ease joining. Sons are displaying good stretch and bone with plenty of punch. 17 sons sell.

SW200065

A more moderate framed ram, retained for his carcass shape from shoulders through to hindquarters. A lot of muscle in the back leg, while providing a laid in, classic wedge shape through the front. 23 sons sell.

SIRE SUMMARY

SW210770

SW200065

SW200389

Another ram descending from Pocock, he adds extra length and bone to his progeny. He has a very good representation right through the sale, including a great young son at lot 6 in the specially selected section. A lot of power through him, he produces sons that weigh heavy and grow into strong sires. 16 sons sell.

SW180075

Has had four impressive groups of sons sell through our ram sales in previous years. Perhaps he's taken a back seat to Goldie as our premier Pocock son this year but breeds so consistently we will have a place for him for a while yet. Near perfect foot and leg structure. 18 sons sell.

SW180365

Perhaps the most moderate framed sire in our stable, but extreme for muscle expression. This group of sons is definitely the best he has produced, largely on account of some complimentary joinings on the ewe front. Produces rams with fantastic shape through the back leg. 18 sons sell.

ARMDALE PARK 210040

Purchased in 2022 for \$11,500. Sired by a Springwaters ram, he fits into our program well. A similar type of ram to those we produce here, his sons display plenty of growth and capacity. 22 sons sell.

PALANA 190058 + PALANA 190103

Purchased together in 2021, both rams are paternal brothers sired by a thicker style Tattykeel ram. Plenty of breed type with good bone and skins. With some great early maturing sons selling this year, both rams were joined heavily to ewe lambs for the spring drop rams represented in the sale. 16 sons sell.

GLENORE 210048

Used as an AI sire, this ram was selected for his structural excellence and similarity to our own type. A feature son sells at Lot 2, who was named the Supreme Exhibit of the 2024 Australian Sheep and Wool Show in July. 8 sons sell.

7	41.40	1576		

Kicking off the sale with a top-class son of Goldie. A ram with outstanding fleshing, bone and grunt, he was first place winner at the 2024 ADC in Bendigo. With lambing ease and very good IMF figures, this ram is a beautiful phenotype and structure package.

LOT 2

9	47.86	1751		

A ram with a hard record to beat, winning the Supreme Prime Lamb Exhibit at the 2024 Australian Sheep and Wool Show, Bendigo. With so much body capacity and power, he is an outstanding carcass ram considering he has a little bit more stretch than most of our other rams this year. An outcross pedigree that will breed well with some of our Pocock and Guinness bloodlines. He is a top shelf stud sire.

A lot of class and balance in this ram. With so much body depth and muscle expression, he is full of meat all the way through. Another first prize winner from Bendigo, we really love his topline and loin shape and have collected semen for in-flock use. He will be used in our autumn AI programs.

9	49.60	1795		

Winner of the ADC 2024 performance class, this ram is an absolute power package. His early maturity pattern will add muscle and thickness to any stud program. Beautiful Dorset type and structure with a hindquarter as good as it gets. Data profile aims at eating quality and lambing ease which is unique in a ram of this phenotype. With semen collected, he will part of our future breeding program.

LOT 5

STOCKSCAN done 26.07.2024				
Fat Depth	EMA	Index		
9	49.97	1896		

A very similar ram to the previous lot. His body depth and hindquarter are exactly where we want it to be. So many of our stud rams this year are great options to add early maturity and carcase shape, and this bloke is no exception. Another ram we have collected semen from to use in our future breeding programs.

LOT 6

Tag	DOB	Birth Size	Birth Type	Sire

7	38.81	1672		

The first spring drop ram for this year's sale, he was crowned Junior Champion Ram at the 2024 Australian Sheep and Wool Show in July. There's a lot of growth and body length in this young ram, while maintaining muscle pattern in the hindquarters. There really is a lot of meat in this ram; it's all the way through the loin and back leg.

STUD RAMS

LOT 7

Tag	DOB	Birth Size	Birth Type	Sire
