About Us

David, Tara, Austin & Henry Brewer welcome you to our 10th on property sale, we have 30 outstanding Black Simmental and SimmAngus Bulls on offer alongside 16 of the best Angus bulls we have bred to date.

We are located in beautiful North East Victoria across 3000 acres at Tallangatta Valley and Koetong. Our combined family operations run 900 stud Simmental and Angus females and commercial SimAngus females. We are invested in breeding seedstock that perform under commercial conditions and find the best way to benchmark that is have the commercial herd run alongside the studs.

Our focus is breeding bulls to produce grower cattle to go into grass fed markets, we concentrate on growth, as our clients will attest to the weight for age of BrewerBeef blood cattle are exceeding expectations. Our other focus is increasing fat and IMF in our cattle to guarantee your progeny finish better and earlier. Lastly our strict focus on structure and temperament, will guarantee longevity of your bulls.

Sale details

LOCATION: 401 Soldier Settlers Rd,
Tallangatta VIC

From Tallangatta, head towards Corryong for 13k turn right into Tallangatta Creek Rd, in 3.3k right into Soldier Settlers Rd. 'Lynn Ridge' is 1.1k, 1st driveway on right. BrewerBeef signs are located on each turn.

SALE DAY SAFETY: All the sale bulls have been screened for temperament and are quiet to handle under normal circumstances.

Visitors Enter the cattle pens at their own risk.

Children must NOT enter the yards.

People entering the pens are at risk of injury. Be especially alert for bulls fighting.

Please do not crowd the bulls or loiter inside the pens.

We do not expect the bulls to be aggressive with people, but sale day places extraordinary pressure on them as they experience an entirely foreign environment.

Remember the quietest bull is in fact an unpredictable animal.

Safety Disclaimer: The owners, employees and representatives of BrewerBeef accept no liability for any accidents that may occur at the BrewerBeef sale complex.

SELLING SYSTEM: Sale of animals will be conducted under the Open Cry System via video auction and fully interfaced with Auctions Plus.

All animals are sold exclusive of GST.

PHONE BIDDING: Phone bidding can be arranged prior to the sale by contacting Michael Glasser 0403 526 702.

REBATES: A rebate of 4% will be paid to all agents who introduce their client in writing AND attend this sale with or on behalf of their client(s) and settle within 7 days. A letter of introduction must be sent to Corcoran Parker
khegarty@corcoranparker.com.au or
brewerbeef@yahoo.com at least 24 hours before the sale

HEALTH: All bulls have been vaccinated with Pestigard[®], Vibrovax[®] and Ultravac[®] 7in1

They have been drenched with Cydectin. All have been pestivirus tested Negative. Holbrook Vet Centre has assessed each bull for semen motility, reproductive and structural soundness. Bulls are from a JBAS6 property

INSURANCE: We strongly recommend you insure all animals purchased against injury and death.

DELIVERY: Free Delivery within 200km of Tallangatta. Stock awaiting delivery will be held free of charge for up to 14 days of the sale at the buyer's risk. Please complete your delivery instructions and arrange transport with David at the conclusion of the sale.

CATERING: Lunch and refreshments will be available.

GUARANTEE: We always provided full replacement guarantee against fertility and genetic faults. It is important that we are contacted as soon as possible to rectify any problem.

Disclaimer: All reasonable care has been taken by the vendor to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendor, selling agents or publisher make no other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation on the information included in this catalogue.

Caring for your new bull

On arrival at their new home, it is important that you have a suitable mob of animals to greet the bull to minimise the bull's stress. Remember they are leaving the security of a large mob, they have never been alone and will be arriving in unfamiliar surroundings. Steers or pregnant cows would be suitable, certainly not other bulls.

At BrewerBeef, we handle our cattle quietly and strongly subscribe to calm cattle handling methods, we always give our cattle respect, and our cattle respect us.

They are used to being handled using ATV/side by side vehicles, The bulls have never been handled by dogs or horses. Please gradually introduce them to dogs or horses with your existing cattle so they are not spooked by the new situation.

Handle your new bull quietly, confidently and with respect and he'll settle into his new home well and will be easy to handle whenever the need arises.

Our temperament guarantee will NOT apply to bulls who have not been handled within these guidelines or to bulls delivered where there are not any quiet cattle to go straight into.

Can't make the sale?

Purchase online in eight simple steps!

Log on to AuctionsPlus and bid on your phone, tablet or computer.

- 1 REGISTER ONLINE**
Free once off registration for all auctions.
- 2 COMPLETE BUYER INDUCTION**
The buyer induction will help you understand the roles and responsibilities of everyone on the AuctionsPlus system.
- 3 VIEW CATALOGUE**
View photos, videos, pedigrees and more.
- 4 ENTER AUCTION**
Log into the auction anytime, anywhere and bid on your mobile, tablet or computer.
- 5 AUTO BID**
Can't stay for the whole sale? Set your maximum bid on the lot that you want to purchase and let the computer bid for you.
- 6 CONTACT SELLING AGENT**
If successful, contact selling agent to arrange payment and delivery. The agent contact details will be available in the catalogue header.
- 7 PAYMENT**
Via the selling agent's terms and conditions.
- 8 DELIVERY**
Arrange transport of livestock at your expense.

UNDERSTANDING ESTIMATED BREEDING VALUES (EBVs)

Calving Ease/Birth	CEDir	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	CEDtrs	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	GL	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
	BW	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
Growth	200 Day	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
	400 Day	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
	600 Day	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
	MCW	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
	Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
Fertility	DtC	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
	SS	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
Carcase	CWT	kg	Genetic differences between animals in hot standard carcase weight at 750 days of age.	Higher EBVs indicate heavier carcase weight.
	EMA	cm ²	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate larger eye muscle area.
	Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more fat.
	P8 Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcase.	Higher EBVs indicate more fat.
	RBV	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcase.	Higher EBVs indicate higher yield.
	IMF	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more intramuscular fat.
Feed/Temp.	NFI-F	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
	Doc	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
Structure	Claw Set	score	Genetic differences in claw set structure (shape and evenness of claws).	Lower EBVs indicate a lower score.
	Foot Angle	score	Genetic differences in foot angle (strength of pastern, depth of heel).	Lower EBVs indicate a lower score.
	Leg Angle	score	Genetic differences in rear leg structure when viewed from the side (angle at front of the hock).	Lower EBVs indicate a lower score.
Selection Index	\$A	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems.	Higher selection indexes indicate greater profitability.
	\$A-L	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems. The \$A-L index is similar to the \$A index but is modelled on a production system where feed is surplus to requirements for the majority of the year, or the cost of supplying additional feed when animal feed requirements increase is low. While the \$A aims to maintain mature cow weight, the \$A-L does not aim to limit the increase in mature cow weight as there is minimal cost incurred if the feed maintenance requirements of the female breeding herd increase as a result of selection decisions.	Higher selection indexes indicate greater profitability.

Example: Expected Difference in Progeny Performance

Quick Reference to IGS Simmental EPD's and \$ Indexes

Expected Progeny Differences (EPD): EPD are the most accurate and effective tool available for comparing genetic levels. In using EPD, the difference between two sires' EPD represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPD of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPD is knowing what units they are expressed in. For example, if the above case referred to weaning weight EPD, A would be expected to sire 15-pounds more weaning weight than B. If calving ease were the trait, A would be expected to sire 15-percent more unassisted births in first-calf heifers; in other words, if B sired 30 assists in a group of 100 heifers, we'd expect A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPD rank him relative to other bulls in the breed.

Listed below are the units EPD are expressed in:

Birth Weight (BW): Pounds of birth weight.

Calving Ease (CE): Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-D is relative to the direct Calving Ease of the animal. Higher values are more favourable.

Carcass Weight (CW): Reported as pounds of Carcase Weight relative to the average.

Fat (Fat): Inches of backfat. Higher values are usually more favourable

Maternal Calving Ease (MCE): Percent of unassisted births in first-calving daughters. CE-M is relative to the Calving Ease of the daughters of the animal. Higher values are more favourable.

Milk (MLK): Pounds of weaning weight due to milk. Values are relative to the environment of the production system. Low input environments should be very conscious of introducing too much milk due to the increased nutrient requirements that it can place on cows.

Marbling (MRB): Marbling score. Reported as the differences in actual carcass marble scores relative to the average. This is different to IMF% which is used as an indicator trait in Marble score. Higher values are more favourable.

Maternal Weaning Weight (MWW): Pounds of weaning weight due to milk and growth.

Ribeye Area (REA): Square inches of ribeye. Higher values are usually more favourable.

Stayability (STAY): Percent of daughters remaining in the cowherd at 6 years of age. Stayability is a measure of reproductive longevity. Higher values are more favourable.

Weaning Weight (WW): Pounds of weaning weight. Higher values are usually more favourable.

Yearling Weight (YW): Pounds of yearling weight. Higher values are usually more favourable.

Yield Grade (YG): Yield grade score. Lower values are usually more favourable, however because of the negative correlations between fat and yield it is important to maintain some balance in the selection.

All-Purpose Index (API): Dollars per cow exposed under an all-purpose-sire scenario. All-Purpose Index (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

Terminal Index (TI): Dollars per cow exposed under a terminal-sire scenario. Terminal Index (TI): Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield. Using API and TI: First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPD, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 hd. x 4 yr. = \$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed

2024/25 Weaner & Steer Sales

Congratulations to our clients who are producing outstanding lines of weaners, steers and heifers year after year.

2024 Highlights

Ryan Emerson Award - Best Bull
2024 Simmental Victoria On-farm Challenge
Senior Champ Bull - T203
1st SimAngus Senior Bull - S068

1st heifer under 12 mths Bred & Owned
Melbourne Show Feature Heifer Show - U292

Future Sires

Purchased in 2024 for an Aus record SimmAngus price.

Woonallee Rembrandt T461

Sired by Millah Murrah Rembrandt R48. T461 offers the perfect data set and phenotype to go into our ever growing SimmAngus program. The best of both the Angus and Black Simmental worlds, his temperament, structure and muscle pattern are second to none. Former manager Andrew Chapman regarded his dam as possibly the best female ever produced at Wombramurra, bred specifically to produce SimmAngus bulls.

Hazeldene Power Up R274

We have been chasing a Beast Mode son for some time to boost our maternal traits. Through the generosity of the Lawson family at Paringa, we took up the offer to purchase R274. He already has 250 calves on the ground at Hazeldean and Paringa and his sons have averaged \$15 000. R274 has the most amazing temperament, great feet and legs, just our type of Angus offering calving ease, growth, marbling and structure.

Heifer specialist bull

Bowmont R019 Intensity U137

Selected as the standout bull at 2024 Bowmont Angus sale by Micheal Glasser, he offers phenotype, structure, and balanced data to go over our Angus heifers

N NABIAC LIVESTOCK
