26th Annual On Property **BULL & FEMALE SALE**

Friday 14th February 2025

CONSISTENCY

PREDICTABILITY

PERFORMANCE

Lot 2

Welcome to our 26th Annual On Property Bull & Female Sale.

After over five decades of selling Charolais genetics to the Australian Market, we feel we are just getting to a sweet spot with regard to our Herd, the quality of our Bull draft, and our infrastructure enabling us to conduct the business of selling bulls.

We are very proud of the draft we will present on February 14th. We recognise all the work that has gone into getting to this point. Contributions from both past and current custodians of the Stud spanning three generations.

What is the core of the Bull selling business? Well, bulls of course: however people and relationships are the fabric that make up the industry and we have forged many lasting friendships over the years.

Our Bulls have come through a tough twelve months with basically drought like conditions, with no Autumn break and a very short Spring. The result is they weigh less than in previous years. In saying this they present well and have scanned as evenly as I can remember any group of Bulls.

This is another indicator of the consistency of this draft. Bull preparation consisted of spending a small period on a late sown Barley and Rye paddock. Other than this the bulls have been on hay and a grain ration feed at a low level over a longer amount of time. Genetically they are our best draft, and visually they back that up.

Whatever the future holds I want to say this; we are grateful for all the support we have received from friends, family and organizations such as Blaze Aid post the Boxing Day bush fires. A special mention to the Westmere Group CFA and our neighbours upstream, without their efforts on Boxing Day the situation could have been so much worse.

Lastly, I would like to mention my late Father who, although he was not a farmer or cattleman, had a passion for horses and was a great visionary when it came to business. I have learnt a lot from him, and he will be greatly missed.

We know Mount William have a great product in our cattle, and we have every confidence they will go and do the job they are intended for.

We wish all our clients a prosperous 2025.

Sincerely,

Rob & Victoria Abbott
Mt William Charolais.

ON PROPERTY BULL & FEMALE SALE

COMMENCING AT 1.00PM, FRIDAY 14TH FEBRUARY 2025

The sale will also be interfaced with AuctionsPlus.
Go to <http://auctionsplus.com.au/>

- **35 Charolais Bulls**
- **29 PTIC Heifers**
- **Semen**

Preview Sale Cattle at our Beef Week Field Day on Thursday 30th of January OR Inspect at any time by appointment.

Mount William is J-Bas 8.

Bulls are semen tested by Nationwide AB.

ACCOMMODATION

SHEARERS QUARTERS / HOMESTEAD

On Property accommodation:

There are 8 refurbished rooms available to rent thru Air BnB plus high end accommodation in the homestead. Please visit Air BnB for details or contact William Abbott on 0448 886 258 or email willabb@gmail.com

RED GUM COTTAGE

On Property accommodation:

Stunning country style modern 2 bedroom cottage fully furnished available to rent. Continental breakfast provided. Please visit Airbnb for details or contact Victoria Abbott on 0499 039 090 or email firetrap22@hotmail.com

ALTERNATIVELY, Ararat is approx 30 minutes away and Halls Gap in the Grampians is approximately 40 minutes away. Both have a wide variety of accommodation. Well worth a visit.

CONDITIONS OF SALE

- All animals will be offered at auction. If not sold, they will be retained by the stud.
- Inspection any time before the sale can be arranged with Rob Abbott.
- Telephone bidding available by contacting Agents Ross Milne or Shelby Howard, prior to sale.
- Registration transfer fees are the responsibility of the vendor.

AUCTIONSPLUS: The sale will be interfaced with AuctionsPlus. Before you can bid in an auction, you MUST be registered. Registration and connection to an auction over the internet is completely FREE! Please ensure you register at least 2 business days prior to the sale. Visit the AuctionsPlus website for more information – <http://auctionsplus.com.au/>

FERTILITY GUARANTEE: Bulls are sold as fertile and capable of natural service. All bulls are semen tested and reproductively structurally assessed by AB Nationwide. Any claim on a bull must be made within 12 months after sale date and be accompanied by a Veterinary Certificate. The Veterinary report must state that, the bull has not suffered any injury or maltreatment which could have affected his breeding ability since delivery to the purchaser. Bulls which do not breed will be replaced by an animal of equal value or a credit less salvage value at the next sale. This clause will be strictly adhered to. Strictly no cash refunds. We are only too happy to assist you with your selection.

All females are sold as guaranteed breeders. Where a Purchaser submits a Veterinary Certificate to the Vendor within 12 months of the date of sale, that a female of joinable age is infertile and in his/her opinion has not suffered any injury or maltreatment which could have affected her breeding ability, the Female will be replaced by an animal of equal value or a credit less salvage value at the next sale. This will not apply where an attempt has been made to transfer embryos from the female. All Heifers will be pregtested via a scan prior to sale day. Certificates available. PTIC does not guarantee a live calf. A small percentage of heifers will absorb a pregnancy and Mount William Charolais are not liable in the event this occurs. An arbitrator appointed by the Auctioneers will settle any dispute.

HEALTH: The Mount William Herd is J-Bas 8. All Animals have been drenched and vaccinated with 7 in 1, Pestiguard and Vibrio in accordance with the Pfizer STAR BREEDER program. The Mount William Herd has been tested negative for Pesti Virus. If you are concerned about the presence of Pesti Virus in your herd we suggest you consult a vet regarding a vaccination programme. All animals derive from an accredited Free T.B. and Brucellosis Herd. Any test required by interstate purchasers will be done at Mount William, at costs to the Vendor.

DELIVERY: Transport will be the responsibility of the Purchaser. Mount William will work in conjunction with McEwan's Livestock Transport to reduce transport costs to purchasers. Please speak to us or our Agents about your transport requirements.

INSURANCE: Insurance is available. We encourage you to consider insuring your purchase. Please speak with either Elders or Charles Stewart Howard.

REBATE: The Vendors agree to a rebate of 3% to outside agents who physically attend the sale and settle within 7 days. We are removing the 1% rebate to outside agents not in attendance at the sale. Agents must register their attendance at the sale with Deb Roche of Elders.

PLEASE NOTE: This catalogue has been compiled with all due care and attention, however we or our agents cannot be held liable for the accuracy, use or interpretation of the information in this catalogue. People entering the property for the purpose of the sale do so at their own risk.

Estimated Breeding Values (EBVs)

Calving Ease EBVs (%) are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

- **CE % Direct = Direct Calving Ease** - The EBV for direct calving ease indicates the influence of the sire on calving ease in purebred females calving at two years of age.

- **CE % Daughters = Daughters' Calving Ease** - The EBV for daughters' calving ease indicates how easily that sire's daughters will calve at two years of age.

Gestation Length EBV (days) is an estimate of the time from conception to the birth of the calf and is based on Artificial Insemination and hand mating records. Lower (negative) Gestation Length EBVs indicate shorter gestation length and therefore easier calving and increased growth after birth.

Birth Weight EBV (kg) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

200-Day Growth EBV (kg) is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

Mature Cow Weight EBV (kg) is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age. This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Steer breeders wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

Scrotal Size EBV (cm) is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age. This EBV is an estimate of an animal's genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

Carcass Weight EBV (kg) is based on abattoir carcass records and is an indicator of the genetic differences in carcass weight at the standard age of 650 days.

Eye Muscle Area EBV (sq cm) is calculated from measurements from live animal ultrasound scans and from abattoir carcass data, adjusted to a standard 300 kg carcass. This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 300 kg dressed carcass. More positive EBVs indicate better muscling on animals. Sires with relatively higher Eye Muscle Area EBVs are expected to produce better muscled and higher percentage yielding progeny at the same carcass weight than will sires with lower Eye Muscle Area EBVs.

Rib Fat and Rump Fat EBVs (mm) are calculated from measurements of subcutaneous fat depth at the 12/13 rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcasses) and are adjusted to a standard 300 kg carcass. These EBVs are indicators of the genetic differences in fat distribution on a standard 300 kg carcass. Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcass weight than will sires with higher EBVs.

Retail Beef Yield EBV (%) indicates genetic differences between animals for retail yield percentage in a standard 300 kg carcass. Sires with larger EBVs are expected to produce progeny with higher yielding carcasses.

Intramuscular Fat EBV (%) is an estimate of the genetic difference in the percentage of intramuscular fat (marbling) at the 12/13th rib site in a 300 kg carcass. Depending on market targets, larger more positive values are generally more favourable.

Selection Indices

Northern Maternal Index [NMI]- Estimates the genetic differences between animals in net profitability per cow joined for a typical commercial self-replacing herd where Charolais bulls are joined with Bos indicus cows in Northern Australia targeting the grass fed Jap Ox market. Selected heifers are retained for breeding and so maternal traits are of importance. Steers target 650 kg live weight (360 kg HSCW and 12 mm P8 fat depth) and heifers 630 kg (340 kg HSCW and 14 mm P8 fat depth), at 26 months of age. In response to industry feedback; positive emphasis has been placed on finishing ability.

Domestic Terminal Index [DTI]- Estimates the genetic differences between animals in net profitability per cow joined for a typical commercial herd where Charolais bulls are joined with a British breed cow base (e.g. Angus) targeting the domestic trade. This index assumes all progeny will be marketed with steers finished in the feedlot for 90 days, and weighing 450 kg (250 kg HSCW and 7 mm P8 fat depth) when marketed at 12 months. Heifers will be in the feedlot for 75 days, and weigh 430 kg (230 kg HSCW and 9 mm P8 fat depth) at 12 months. In response to industry feedback, positive emphasis has been placed on finishing ability.

Accuracy

Accuracy (%) is based on the amount of performance information available on the animal and its close relatives - particularly the number of progeny analysed. Accuracy is also based on the heritability of the trait and the genetic correlations with other recorded traits. Hence accuracy indicates the "confidence level" of the EBV. The higher the accuracy value the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives. Even though an EBV with a low accuracy may change in the future, it is still the best estimate of an animal's genetic merit for that trait. As more information becomes available, an EBV is just as likely to increase in value, as it is to decrease.

Accuracy values range from 0-99%. The following guide is given for interpreting accuracy:

- **less than 50%: Low accuracy.** EBVs are preliminary and could change substantially as more performance information becomes available.
- **50-74%: Medium accuracy.** Usually based on the animal's own records and pedigree.
- **75-90%: Medium-high accuracy.** Some progeny information included. EBVs may change with addition of more progeny data.
- **more than 90%: High accuracy** estimate of the animal's true breeding value.

As a rule, animals should be compared on EBVs regardless of accuracy. However, where two animals have similar EBVs the one with higher accuracy could be the safer choice, assuming other factors are equal.

For further information please contact the Charolais Society or Charolais BREEDPLAN.

DAM: PALGROVE REFINE M1141E (PK M1141E) (H)

PALGROVE REFINE 216 (PK G479E) (H)

COMMENTS: Rain Dance was purchased in 2022 for \$45,000.00 and is our lead sire at Mount William. He is long bodied, big scrotal with plenty of thickness, substance and weight for age. A carcass improving Bull with great constitution. A great natured Bull with the potency of Silverstream and Palgrove bloodlines.

COMMENTS: Our lead Bull for many years a proven performance Sire with a great temperament. Originally bought for \$23,000.00 in 2018 to compliment the base of Hannibal females in the herd. Moderator has surpassed all expectations. The sire of our second top price Bull Rome (\$23,500.00). Semen sold resulting in Moderator embryos topping the Charolais National Sale in 2019. An exceptional breeding Bull who leaves a quality line of females in the Mount William herd.

COMMENTS: Rosedale Puma was purchased in May 2020 for \$11,000. He is an impressive thick, deep soft bull, with a lovely polled outlook combined with an amazing set of EBV's. His sire Ascot Knightly was purchased by Rosedale for his carcass attributes growth and intramuscular Fat. Puma has been used more extensively in the herd and is the sire of some of the best bulls in this draft.

Red Gum Cottage

A cosy, country cottage on a stunning Estate in the heart of the Grampians

WILLURA VIC

4 Guests | 2 Bedrooms | 2 Beds | 1 Bath

You'll have the whole cottage to yourself!

This lovely, cosy old Overseers cottage has been completely refurbished, keeping as much of the charm and 'country' feel as possible whilst having the modern touches where necessary. Red Gum Cottage is located at Mount William Station, an old family farm specialising in breeding Charolais Cattle.

Only 25 minutes drive to Dunkeld, 15 minutes to Grampians National Park and 35 minutes to some of the best wineries in Victoria. Set amidst stunning, Australian countryside of scattered red gums and wildlife.

FOR CATTLE ENTHUSIASTS:
 A personal tour of the Mount William Charolais Stud is available on request for guests of Red Gum Cottage.

We look forward to welcoming you to Red Gum Cottage

Available to rent through Airbnb: www.airbnb.com.au/rooms/39035644

REID STOCK FEEDS

Premium energy feeds for excellent digestibility and feed conversion efficiency.

Offering a range of grain mixes covering all cattle age groups.

Proud supporters of Mt William Charolais.

ROSEDALE HONOR G16 (MR G16E)

WATERFORD LOYAL L52E (WET L52E) (P)

DAM: MOUNT WILLIAM QUEEN ELIZABETH (BS Q184E) (P)

MOUNT WILLIAM MATILDA (BS M6E) (P)

COMMENTS:

Out of Q184, this polled heifer has good depth, good length and a sound constitution.

PALGROVE AVOCA 108 (PK G221E)

PALGROVE GAUCHO (PK G477E) (P)

DAM: PALGROVE FELICITY J1046 (PK J1046E) (P)

PALGROVE FELICITY 74 (PK F189E) (P)

COMMENTS: A one-off opportunity in this lead Sire in our programme. Moderator's Sire Jubilee was the high selling Charolais bull in Australia in 2015 [\$35,000.00]. He is the Sire of two high selling Bulls at Mount William in 2022 - Rome sold for \$23,500.00 and Rhode Island for \$22,000.00. A legacy leaving exceptional females in the Mount William herd. Semen retained.
