BHS
SIMMENTAL

3RD ANNUAL SALE

**WEDNESDAY 12TH MARCH 2025
AT 11.30AM**

BOYANUP SALE COMPLEX

OFFERING

**31 BLACK & TRADITIONAL BULLS
6 COMM. BLACK YRL HEIFERS
1 SEMEN LOT**

COMPLIMENTARY LUNCH 12.30PM

INSPECTION FROM 9AM

SELLING AGENTS

AuctionsPlus

How to Register and Bid on AuctionsPlus

- 1 Go to **www.auctionsplus.com.au** to register at least 48 hours before the sale.
- 2 Select **"Sign Up"** in the top right hand corner.
- 3 Fill out your name, mobile number, email address and create a password.
- 4 Go to your emails and confirm the account.
- 5 Return to AuctionsPlus and log in.
- 6 Select **"Dashboard"** and then select **"Request Approval to Buy"**.
- 7 Fill in buyer details and once completed go back to Dashboard.
- 8 Complete buyer induction module (approx. 30 minutes).
- 9 AuctionsPlus will email you to let you know that your account has been approved.
- 10 Log in on sale day and connect to auction.
- 11 Bid using the two-step process – unlock the bid button and bid at that price.
- 12 If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

BULLOCK HILLS SIMMENTALS

FOUNDED 1995

All bulls are diligently performance recorded and are offered for sale under the star breeder program. Bulls fertility test by Nutrien Breeding Services.

National Bovine Johnes Assurance Score: Bullock Hills Simmental is a JBAS 8 property. Bulls are eligible for entry into all states.

BULL PREPARATION

Yearling bulls (Summer drop 2024), weaned 23rd October. Adlib fed from 18th November. 60% Milne Easybeef and 40% hay/straw.

Rising 2 year old bulls (Winter drop 2023), weaned 7th February.

Fed from 10th of January. 3kg/day Milne Easybeef plus hay/straw.

Delivery: Assistance available if required. A rebate of 50% of the freight will be offered to interstate purchasers.

ACKNOWLEDGEMENTS

We would like to thank the continued support from Tom Granleese, PhD Animal Breeding & Genetics NSW for his valuable assistance in sire research and genetic evaluation.

In early October we were pleased to host Luke Bowman, Director of International Business, International Genetic Solutions (IGS). He was able to inspect our cattle program and farming operation and we shared with him valuable information about the system we now use.

Thankyou to Richard Hall, Golden Arm Genetics for AI and ET work.

Thankyou to Max Bowman for scanning all cattle.

Thankyou to Nutrien Breeding Services for bull testing and breeding support.

Thankyou to our family for ongoing support in a mixed farming operation.

Feedback from Luke Bowman

Director of International Business, International Genetic Solutions

“Over the years, I’ve had the privilege of visiting Australia several times, and one of my most memorable experiences was my visit to Bullock Hills in WA. Brad, Sylvia, and their family are exceptional operators who have done a remarkable job implementing some of the worlds most elite, modern, Black Simmental genetics, rearing cattle that are worthy of the most critical eye. This has elevated their program to a level of achievement reached only by the very best in the world. Their cattle possess an exceptionally balanced, and therefore economical genetic profile, resulting in superior genetics that will undoubtedly reduce input costs and increase profits for any commercial stockmen.

I’m truly excited about the current state of the Bullock Hills herd and its promising future. In these times of extremely tight margins, the global beef industry needs more genetics that produce cows with greater longevity, calves with accelerated growth rates, and carcasses that yield higher profits, and their program delivers just that.”

WELCOME

It's a pleasure to present our catalogue for the Bullock Hills 3rd annual sale.

While phenotypes are foremost in any livestock production, Bullock Hills respect the information of data in the breeding balance and encourage growers to use the information available to fine tune their breeding objectives.

This catalogue is presented as easy as possible to interpret. We utilize IGS through the American Simmental Association to evaluate the performance of every sale lot in this catalogue.

All have been DNA verified and genomic tested for horn, colour and poll status. All lots have three generation identification, have highlighted Estimated Performance Data (EPD) being top 10% blue, top 30% green. In addition, we have been requested to highlight bulls suitable for heifers and those suited for dual purpose operations. For those wishing to fine tune specific traits, please take note of the EPD information explained on the following page or contact us with any queries.

There will be photos and videos loaded on Auctions Plus as well as our website: Bullockhills.com.au.

Once again, all lots will be available for inspection on property the morning of March 7th.

A sincere thankyou to all who have purchased in the past. Our aim is to breed honest and reliable cattle and assist other breeders in their journey to a profitable and rewarding future.

Brad, Sylvia &
Family.

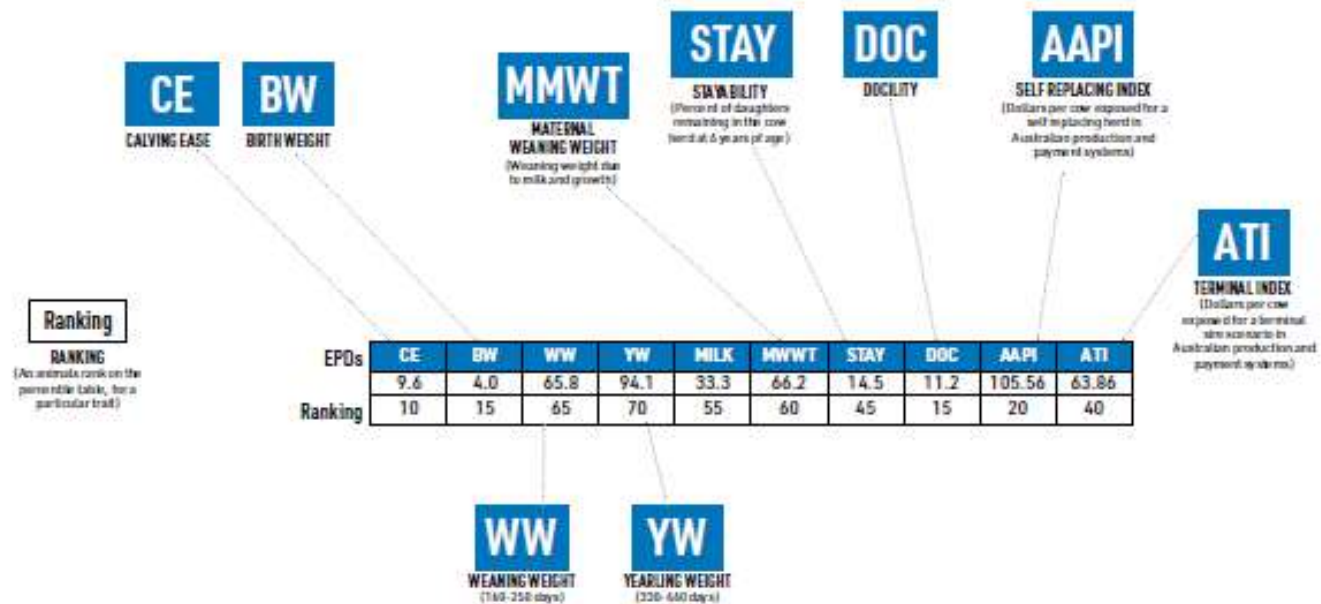

EPD INFORMATION

With the introduction of the IGS performance recording system for Simmental cattle, IGS is the world's largest animal performance recording system.

One of the major changes is the breeding figures being reported as Estimate Progeny Differences (EPDs), rather than Estimated Breeding Values (EBVs). The difference between the two is simple.

Effectively, an EBV is an animal's own genetic value for a particular trait. However, the animal can only pass half of this onto their progeny. EPDs have the "half" already accounted for. That is, an EPD is the genetic merit of an animal's progeny - what they will pass onto their progeny.

IGS can incorporate an animal's genomics into its performance data. All animals in the Simmental Opportunity sale have been 100K GGP-LD DNA profiled.

Simmental - Traditional, Fullblood and Simbrah Register Breed Average

	CED	BW	WW	YW	MILK	MCE	MMWT	STAY	DOC	CW	REA	FAT	MARB	YG	AAPI	ATI	API	TI

Polled and Coat Color Information:

PP - Homo Polled - the bull carries two copies of the polled gene

Homo Polled Homo Polled 100% Polled
Hetero Polled 100% Polled
Horned 100% Polled

Pp - Hetero Polled - the bull carries one polled gene and one horned gene

Hetero Polled Homo Polled 100% Polled
Hetero Polled 75% Polled, 25% Horned
Horned 50% Polled, 50% Horned

Homo Black - the bull carries two copies of the black gene

Homo Black Homo Black 100% Black

Hetero Black 100% Black
Red 100% Black

Hetero Black - the bull is black in color, but carries one black gene and one red gene. Black is dominant to red, so the red color is not expressed when it is paired with a black gene.

Hetero Black Homo Black 100% Black
Hetero Black 75% Black, 25% Red
Red 50% Black, 50% Red

Red - the bull carries two copies of the red gene. This example assumes the bull is diluter free.

Red Homo Black 100% Black
Hetero Black 75% Black, 25% Red
Red 100% Red
