WELCOME TO TATTYKEEL'S ANNUAL ANGUS SALE

The Gilmore family and Tattykeel Team would like to thank you for joining us for our Annual Angus Cattle Sale.

Tattykeel Angus was established in 2014 after falling in love with the Miller Wilson Angus herd, which is based in Canada. Since that day we have continued to import embryos and semen out of the top end of Miller Wilson's program.

Tattykeel bring the same breeding principles to our Angus cattle as our sheep studs, focusing on line breeding animals and condensing positive traits in both phenotype and genotype. Our objective is to breed soft, easy doing animals with good muscle pattern and carcass shape, body depth, moderate frames, with good conformation and the ability to finish on pasture.

The Show Team are exceptional in breed type, shape, scale and depth. This is off the back of limited feed supplement of hay and grain. We are of the opinion that selecting for long grain feeding is less productive and negative to a profitable operation. The remainder of the Sale Team, both bulls and heifers, are pasture raised without any grain feeding.

We are extremely proud to offer an elite line of bulls and females for your consideration.

If you have any questions about the cattle, please don't hesitate to ask one of the Tattykeel Team or our Agents.

Please enjoy the day.

Dam: Tattykeel Blackcap Essence M1

Our lead off bull for this year's sale has impressed us ever since he was a calf, and we couldn't be happier with how he's matured. This bull exudes eye appeal, with a beautiful head, smooth front, and tremendous thickness following through his body and deep into his flank. For a bull carrying so many kgs, he is super balanced and free moving. As a bonus, he also boasts a beautiful temperament. With his pedigree combining the sire power of DMM International 54D and a dam as maternal as it gets, this bull will breed progeny with quality, softness and style. A full sister sells as Lot 30.

We really admire the volume in this female. We have retained several of her full sisters in our herd including TTK23U10 (pictured), and feel V1 is very similar in terms of her depth of body, lovely angles and softness. We believed in this pedigree so much that we IVF'd his dam, M1, to DMM Maximus 18G several times before we sadly lost her last year. A full brother to V1 sells as Lot 7 (TTK23U9).

V17 is an eye-catching female out of our donor Q27, who consistently produces quality bulls and females. This heifer is very attractive on the move, with a beautiful wedge shape and angularity to her. We have retained numerous full sisters in our herd and are excited about what they are adding to our program. Three full sisters sold in last year's sale for \$15,000, \$14,000 and \$15,000 respectively. We flushed this pedigree several times, and it is only due to Q27's very prolific flushing that we are able to part with this heifer. A full sister sells as Lot 26.

Full Sister: Tattykeel Blackcap Essence T5

This heifer is backed with predictable performance. Her full sister topped our 2023 sale at \$14,500. We have two full sisters in our donor program, including TTK22T5 (pictured), who is being shown with a calf at foot at Sydney Royal and Tamworth this year. V6 is an attractive, free moving heifer with lovely neck extension.
