## **A TRIBUTE TO MICHAEL GLASSER**

- The Best in the Business

We are deeply saddened to hear the news of the passing of Michael Glasser. At just 59 years young, his departure comes far too soon. Michael was not only a remarkable auctioneer, but a great man who gave so much to our industry - and to us personally. Michael joined the Texas Angus family in 2011 as our Guest Auctioneer, and for the next ten years, he, Maz and Lincoln were an integral part of our journey. His unmatched talent behind the microphone brought energy, excitement, and professionalism to every sale - even during the tough years, when true auctioneers like Michael shine the brightest.

From day one, Michael brought more than just skill - he brought heart, humour, and unwavering support. Whether we were celebratin big wins or navigating harder seasons, he was there, always dependable, always exceptional. The memories of ICEMAN, POWERPLAY and K2 selling under his hammer will stay with us forever. We adopted his ideas of selling bulls as a PICK or PAIR in the bull sales and even held a female sale 24 hours after the 2021 bull sale which was a very successful idea but exhausting!

Michael, thank you for everything - for your excellence, your honesty, and your friendship. We have long believed you were the best auctioneer in the business, and your absence leaves enormous shoes to fill. You weren't just our auctioneer; you were, and always will be, part of the Texas Angus family.

Our thoughts are with Maz and the entire Glasser family during this difficult time. Rest easy mate, you truly were the best in the business.

# TEXAS ANGUS

## NEVER COMPROMISES ON COMMERCIAL RELEVANCE

As global demand for protein continues to rise, beef is in the box seat to supply it. The North American cattle herd is currently at a record low, following some of the worst droughts in history. With many livestock producers transitioning to broadacre cropping, herd numbers are expected to stay low for some time.

Meanwhile, Australian beef prices continue their upward march, with some economists predicting \$7.50/kg by next year. Victoria and South Australia are finally seeing some reprieve with recent rain, and once there's a general break across those regions, the market is only headed one way - up. Just look at lamb prices, they are now at record prices surpassing the record highs of 2022.

Our sale bulls have come through a solid season and are now thriving on lush forage oats and ryegrass. At Texas, we're proud to say we've never locked our bulls up in feedlots and stuffed them with grain. Instead, they transition naturally from summer grazing of sub tropical grasses to early sown winter crops, giving them maximum time on forage crops to develop in a real - world environment.

At the World Angus Expo, visitors were in awe of the commercial relevance of our front cover bull - Texas HANDYMAN R448.

A grassfed, 1,250kg, 5-year-old herd sire who we sold three years ago for \$10,000, he's still fit, sound and ready for our clients next season. His longevity is no accident - it's a result of strong structure, genetics, and the way he was raised here at Texas. He was grown out exactly like this year's sale bulls, because we believe the way a bull is developed directly impacts his working life. Our bulls know how to graze, seek out females, breed, and thrive in some of Australia's harshest environments.

This year we're offering a great mix of sires of the 285 bulls including:

**180 IVF/ET/AI BULLS:** 31 RAWHIDE  
31 NEW GROUND  
19 THE ROCK  
12 CONVERSE  
17 MILLWILLAH JAAL  
& 95 TEXAS SIRES INCL:  
ICEMAN, POWERSHIFT,  
POWERPLAY, QUANTUM LEAP &  
MORE!

- **BULL SCANNED UP TO 8.1 AT 13MTHS!**
- **SEMEN TESTED**
- **BLOODED FOR TICK FEVER**
- **GENOMICALLY ENHANCED EBVS**
- **VACCINATED 7 IN 1, VIBRIO**
- **TESTED FREE OF PESTI VIRUS**
- **NO CATTLE HAVE BEEN BODY CLIPPED OR HAIR BURNT**

Every bull has been genomically tested, scanned, and fully performance recorded. Averaging frame 6.5, they exhibit that signature Texas length, neck extension, and body mass that drives weight gain and profitably.

We can confidentially say there's a bull for every production system. Fertility is tested and proven year after year. Of our 1000 stud breeders, large mobs of 300 breeders are run in the tough Coolatai grass country near Warialda, and these cows must rebreed, raise a strong calf, and do it all without early weaning.

PTIC heifers are managed in one group, often grazing several kilometres from any yards. And no female at Texas is supplementary fed - true paddock performance. And don't miss this special opportunity:

We are offering the 'Pick of the Pen' PTIC heifers in this year's sale. These standout females are due to calve prior to sale day, and 100% of proceeds will be donated to the Angus Youth Foundation - supporting the next generation of beef industry leaders.

Our Open Day is on the 10th July from 10-3pm where all bulls and 3 heifers will be penned, lunch and refreshments will be provided. If you can't make the Open Day we look forward to seeing you at the sale! Once again we will have Spill the Beans Coffee Van at the sale and the coffees are on us! Plus there will be dinner and live entertainment after the sale, guaranteed a great night - please bring a coat!

Warmest regards,  
Ben & Wendy

# PICK OR THE PAIR

Sale bulls from lot 138 are offered under a multi-hammer system, winning bidder can choose to take the pair or the pick of the pair not necessarily in lot order, if only one is chosen the remaining will be offered.

# BUYERS INFORMATION

1. **HEALTH – All have the Texas Tick of Approval, buy with confidence.**
  - Sale bulls only Vaccinated for Red Water (Tick Fever) NOT Heifers.
  - Tested Free of Pesti Virus, But are NOT Vaccinated for Both Pesti Virus or 3 Day Sickness
  - 7 in 1 & Vibrio and routinely drenched and deloused
  - Examined and semen tested
  - J-BAS 8 Johnes Herd - we are free to sell bulls Australia wide including both WA & NT
  - Use bikes, dogs, and horses, and handled with low stress stock handling principles
2. **\*\*TEXAS ANGUS WILL RETAIN 50% SEMEN & MARKETING RIGHTS OF ALL BULLS IN THE CATALOGUE\*\***
  - Buyers must supply their PIC code for all NLIS's to be transferred
  - Bulls registration will be transferred on requested
3. OPEN DAY Thursday 10th July. All sale bulls and heifers will be on display 10am - 3pm.
4. REBATES see Rebates Notice below.
5. Insurance is available from the agents at the sale.
6. Delivery of each animal will be at the buyers risk after the fall of the hammer, but will be cared for by the vendors for a reasonable amount of time.
7. Transport – All transport coordination will be done through acting agent in conjunction with FALLS LIVESTOCK TRANSPORT immediately after the sale. Lachie Falls is the representative (Mobile 0429 826 342). Any client wishing to use their own or preferred transport is more than welcome to do so but MUST be coordinated through Lachie Falls immediately after the sale. Texas Angus recommends Falls Livestock Transport for long distance cartage.
8. Verbal instructions will not be accepted. Please complete the buyers instruction sheet included in the catalogue and present to the agents.
9. Any announcement will take precedence over printed material in this catalogue. Terms and conditions of sale will be read by the agents prior to the sale.
10. The sale will be held at "Doongara" under cover. Warialda APEX will cater and the MACKA's Angus steaks will be for lunch.
11. The owner, employee or other affiliated personal cannot be held responsible for any accidents, but will make every effort to provide for the safety and comfort of those attending.
12. Accommodation is available at the Sunflower Motel Ph: 02 6729 1344 and Royal Hotel Ph: 02 6729 1444 in Warialda and for a unique & luxurious sleeping experience try Faraway Domes which is just down the road call Kate on 0421 935 843. Also, there is an AirBnb south of Coolatai please call Erica 0448 640 551. The Wallaroo Hotel also has cabins, please contact Ange 0428 992 083. Wendy is also very happy to help with booking accommodation, please call her on 0438 376 622.
13. On property air strip is available, contact the vendors for further information. Qantas flies daily to Moree (1hr away), Qantas flies daily to Tamworth (2¼ hrs away by car) and Armidale (2½ hrs away by car).
14. No children shall enter any pens. This is part of our OH&S policy.

## NOTICE TO AGENTS & BUYERS SALE REBATES

1. A rebate of 4% will be paid to all agents who attend the sale with or on behalf of their client(s) and settle in 7 days.
2. A rebate of 2% will be paid to all agents who introduce their client(s) but do not attend this sale and settle in 7 days.
3. A rebate of 1% will be paid to all agents who settle within 7 days but do not introduce their client(s) or attend this sale.

**PLEASE NOTE:** Only **ONE** of the three options can be used on any one lot.

## PARENT VERIFICATION SUFFIXES

**PV** - Both parents have been verified by DNA

**SV** - The sire has been verified by DNA

**DV** - The dam has been verified by DNA

**#** - DNA verification has not yet been conducted

**E** - DNA has been identified that sire and/or dam

may possibly be incorrect but this cannot be confirmed conclusively

RAWHIDE is a super thick, docile, heavy fleshing MAVERICK son that breeds true to type. Texas had the exclusive rights of RAWHIDE for 2 years and sired Australia's all breeds highest priced bull - Texas THUNDERSTRUCK selling for \$360,000. Like THUNDERSTRUCK his brothers display such body mass and fleshing ability that needs to be seen in the flesh. RAWHIDE daughters are in full production and they too have that depth of body, spring of rib with beautiful udder placement and teat size. RAWHIDE'S are true curve benders with calving ease galore, power growth patterns and so so docile. The demand for RAWHIDE sons last year was huge with 84 sons averaging \$20,000 and topping at \$100,000. 31 sons sell.

We are selling the first sons of CONVERSE in Australia and have the largest number recorded in Australasia. This super sound, very slick, soft, deep set, highly proven calving ease bull that is a dead set a true heifer bull. They come early and are showing plenty of style, shape and balance. Progeny in the States are admired for the maternal attributes including fertility, udder attachment, teat size and excellent structure. CONVERSE has worked well over our large framed cows. 12 sons sell.

Once again Texas has the most HERO progeny in the Australasia and they are super slick, high growth with plenty of carcass. HERO certainly breeds true to type and really adds punch in his progeny. One of the bigger framed US bulls to come to Australia, Hero has worked well over our more moderate females. 19 sons sell.

ICEMAN was sold for \$225,000 to Macka's Angus back in 2021 (An Angus Bull Priced record at that time) and has been thoroughly used worldwide. ICEMAN really stamps his progeny with balance, extra softness, length of body, strong toplines and big broad muzzles with an incredible temperament to go with it. His progeny has topped sales throughout Australia and internationally and it was great to meet many of the international Angus breeders who have used ICEMAN whilst out for the World Angus Forum. ICEMAN sons are currently averaging \$20,000 at Texas. There are 2 star lots in the sale - Lot 31 & 47. 8 sons sell.

Sold for \$55,000 in 2021 bull sale, TOP GUN has bred extremely well. A good framed 7 Angus bull (that's now a rarity of the breed) is one of those PROVEN heifer bulls that will produce you a product at the end. All the MAVERICK derivatives have been extremely successful in carcass competitions, hitting market specs and marbling the house down. Little wonder TOP GUN ranks in the Top 1% for Shear Force & MSA Eating Quality. 10 sons sell.

QUANTUM LEAP was sold to Little Meadows in 2020 for \$42,000. He is a soft, stylish, structurally correct and well-balanced sire that throws true to type. He has a really tidy set of proven EBV's that improve every year. His dam is a paternal sister to the front cover bull Texas HANDYMAN R448 and her sons are currently averaging \$20,000. 9 sons sell.

Was the top priced bull for The Rock Angus in their 2022 bull sale. A super quiet, thick, soft, good boned bull that we have a lot of time for. Weighing in at 1,250kgs, nicknamed "The Rock" oozes style, presence and is certainly breeding true to type. His progeny carries the same bone, docility, depth of body, thickness and weight for age. Don't miss the opportunity to see these sons in the flesh, you won't be disappointed. 19 sons sell.

We were looking for a REALITY son that had that bit more stretch and volume decided to dabbled in MAKAHU in our ET program. He certainly connected very well with our large framed donors and produced sons that are very desirable. They are slick, move like cats with a nice set of balanced EBVs.

After travelling around Angus herds across the Eastern seaboard we were impressed with the NEW GROUND progeny and decided to use him heavily. His sons have plenty of growth, slick as seals, good carcass, massive testicles and a good overall balance of traits which heavily aligns with our breeding program. NEW GROUND was used heavily in our ET program. 31 sons sell.

An impeccable pedigree, his dam Texas UNDINE H647 has surpassed her dam the great Texas UNDINE Z183 in progeny sales accumulating \$1.3 million dollars and her 42 sons are currently averaging \$28,000!! Maternal brother to ICEMAN (\$225,000), POWERPLAY (\$108,000), QUINELLA (\$48,000), POWERSHIFT (retain herd sire) just to name a few. Like his brothers SARGEANT is breeding the house down with explosive growth, softness, yield & marbling and not forgetting that all important docility. 10 sons sell.

Paternal brother to the front cover bull, BRAD PITT is a great heifer bull with excellent carcass traits who has the antagonistic traits working together - yield and marbling! A super phenotype bull that always breeds sons that all have that standout "look at me" presence which is why his progeny has done so well in the show rings around Australia. 11 sons sell.

## PICK OF THE PEN

100% OF THE PURCHASE  
WILL BE DONATED TO THE  
ANGUS YOUTH

If you're after a quiet-natured heifer with serious performance, Texas USHERETTE U388 is as good as it gets. She's as quiet as they come, yet built like a tank - boasting exceptional thickness while still carrying that all-important femininity. A true crowd favourite. U388 is a paternal sister to Australia's highest priced bull, Texas THUNDERSTRUCK, and carries the proven genetics of her dam, Texas USHETTTE K125 - a big-bodied, super maternal REPLAY daughter who has never missed a calf, even through the harshest drought on record. K125 has sold sons to \$34,000 and currently averages an impressive \$17,250. At 11 years old, she's been AI'd annually and is now due to drop her 10th AI calf - a testament to her fertility and longevity. U388 has been strategically joined to the big, long, heavy-boned Landfall PHEASANTRY T245, a mating that's set to deliver an exceptional calf packed with performance and EBVs to die for.

Texas UNDINE U313 is a sleek, clean-fronted GAR HERO daughter with a pedigree drenched in the very best of Texas genetics. She's the kind of female that stands out effortlessly—stylish, feminine, and backed by generations of proven performance. Her maternal lineage is nothing short of iconic. Her great grand dam, Texas UNDINE L635, recently sold for \$30,000 into donor duties and has produced one of the lead bulls in this year's sale. Even further back, her bloodlines trace to the legendary Texas UNDINE Z183, who has single-handedly sold over \$1,000,000 worth of bulls - a true matriarch of the breed. Sired by the high-growth, heavy-carcase bull GAR HERO, U313 has been strategically joined to Texas U-BEAUTY, the standout sire who fetched \$55,000 at the 2024 Bull Sale. This elite mating will produce a sexed heifer calf, combining the power of performance genetics with show-stopping phenotype - a rare opportunity for those chasing the future of the breed.

Texas UNDINE U302 is a high-class Texas heifer and easily ranks among the elite of our Spring U-drop. She's a deep-bodied, feminine female who carries herself with presence and style - true front paddock material. Displaying the hallmark fleshing and thickness of Poss MAVERICK, U302 brings power without sacrificing femininity. Her pedigree is rich in high-performance genetics, underpinned by a maternal lineage that traces all the way back to 1936 - offering both modern performance and timeless maternal strength. She represents an incredible breeding opportunity and is currently carrying a sexed bull calf by the \$960,000AUD sire Basin JAMESON, due in July. JAMESON's progeny is already making waves across North America - three daughters at Spruce Mountain recently averaged an astounding \$250,950AUD, and he now stands as ABS's lead AI bull. This is a rare package of elite genetics, backed by legacy, and poised to make an impact.

Just like last year, the first bull of the sale is a Poss RAWHIDE son. U467 is a great example of the qualities Poss RAWHIDE has brought to the Texas program. Genetics that breeds true to type on both sides of the family. 36 kgs born, a heifers first calf and from a very strong maternal cow family that has consistently produced this level of quality and performance year in year out. He is a very thick, deep stylish, long bodied bull that displays a great balance of performance and carcass quality. He's a well-structured, super quiet bull with eye appeal, balance and phenotype. A good all-round bull that can be used on both heifers and cows and add to the profitability of your genetics with extra carcass weight and quality. The demand for RAWHIDE sons last year was huge with 80+ averaging \$20,000 in last year's sale. Top 1% 600 Day, NFI & CWT Top 3-5% 200, 400 Day.

U431 is another great example of how Poss RAWHIDE has produced over the bigger type, long bodied Texas cows. A good even balance of all traits with the phenotype, quality and actual performance to back it up. His full brother made \$26,000 at last year's sale, with his mother on her sixth calf and still going strong. Genetics that are born to perform and add to the profitability of your herd. Top 10% 600 Day, SS & NFI

Different pedigree with all the same characteristics. U341 has that balance in his genetics that gives you the opportunity to use him on both cows and heifers. He is a thick set, heavy bodied, moderate (frame 6.6), long bodied bull being a maternal grandson of REALITY crossed over two of the highly recognised cow lines going back to Texas TOQUE D35 and Texas UNDINE Z183, combined with the proven all round calving ease Sire Texas POWERSHIFT. Just a good, highly flexible, thick based commercial bull.

Similarly bred bull to his brother above, being very similar in type. These REALITY grandsons are all very consistent in style and type. Thick, long, deep, wide base, heavy cattle packed with muscle. Good on their feet, strong heads, slick, soft skinned and quiet. U323 fits this description to a tee who has that added performance of being in the Top 4-7% for 200, 400 & 600 day & CWT and +5.3 for SS (top 1%), plus is also out of an impressive strong, heavily built GEDDES cow.

This is a classic case of Genomics down grading the older base genetics to validate the latest genetics available. Because his pedigree is not linked to the reference population, his growth data has been smashed. With his youngest grandparent being 13 years of age, this shows you just how valuable and important Longevity is to breeding cattle. Blind Fredy can see U320 is a thick, heavy, easy doing, long bodied bull that knows how to pack on the kilos. 34 kgs born, safe on heifers, and will add to the value with weight gains and carcass quality in most herds. His cross of N120 over a HANDYMAN is designed to pack on the kilos not to strip them! The computer must have had a malfunction!! U320 is a good honest highly flexible all-round bull for both heifers and cows design to add kilos and increase carcass quality.

**TOP STUD SIRE.** U454 is a great example of why Texas ICEMAN sons have sold so well topping many sales across Australia. Just look at his photo. It says it all. One impressive, powerful looking, young sire with all the figures to back him up. A good all-round bull that could be used on heifers, but most of all, would take your cows to the next level in presence, performance and profitability. He carries a great gestation, low birth and explosive growth. His dam is a very fertile Texas WESTERN EXPRESS H220 daughter who is about to drop her 6th calf with a calving interval of 363 days. U454 is a super quiet, well structured, stylish, young bull that has a beautiful balance of moderate calving ease, plenty of growth and good carcass values. Definitely another bull to look at! Top 4% for Immunity.

U450 is a great example of the breeding qualities of Texas TOP GUN who sold for \$55,000 to Mundarlo Angus and World Wide Sires. Now with a couple of generations of calves on the ground, TOP GUN is a well PROVEN low birth sire that adds softness, phenotype and carcass quality to his progeny and has become a highly sort after AI Sire. He is a nice, soft, long, heavy fleshing mobile bull with a good Sires outlook. Well structure, quiet and beautifully balanced. Top 2% in Eating Quality Shear force.

**TOP STUD SIRE.** Texas U BETTER BELIEVE IT U995 was also used within the herd as a yearling and is a maternal ET brother to Lot 48. He too is definitely up there with the best of them and has that WOW factor too for Powerful and Presence, and has that exciting combination of genetics with NEW GROUND over a powerful but feminine, long bodied, heavy base donor cow TEXAS UNDINE P10 who has already sold 14 sons to a top of \$80,000 and is a great granddaughter of Texas UNDINE Z183. He is super quiet and slick, structurally very correct and has that ability to finish heavy quickly. With what you can already see in the quality and style of this young sire and this maternal background, you know U995 will mature into a magnificent, big, thick, impressive Sire that's guaranteed to breed true to type. If you chase the data, make sure you check his out - Top 1% DTC, SS, Top 4 - 6% CWT, EMA, RBY 7 Eating Quality Shear Force, Top 8-9% 200, 400, 600 Day.

**TOP STUD SIRE.** It's very hard not to repeat myself here, but U365 is another NEW GROUND son with all the same characteristics that goes back to Texas UNDINE Z183. These strong maternal lines are the No. 1 factor in producing consistency and these brothers are a perfect example of that. So similar in phenotype. Big, Long, Deep, thick and heavy with plenty of muscle, style and power. U365 is a good, slick, all round, impact bull designed to boost performance and add carcass weight. His dam was sold for donor duties in QLD for \$30,000. Top 2 - 5% for 200, 400, 600 day weight, CWT, +13.0 EMA & +1.3 RBY.

# MATERNAL INFLUENCE

## AT TEXAS ANGUS – A LEGACY SINCE 1936

### BORN TO PERFORM, BRED FOR EXCELLENCE

Texas Angus traces its origins back to 1936, when the Scottish Australia Company established the herd at Texas, QLD, with 21 stud heifers and one bull imported from Scotland. Since then, no other female lines have been introduced, ensuring remarkable consistency across our 1,000 breeders today.

This is why our herd breeds so TRUE to TYPE.

To earn the **TEXAS TICK** of **APPROVAL**, our cows must meet the following criteria:

- ✓ **QUIET TEMPERAMENT** – Essential at all times, especially when tagging a newborn calf.
- ✓ **PHENOTYPE & PROFITABILITY** – Must consistently produce high-performance progeny that drive profitability for all sectors of the beef industry.
- ✓ **FERTILITY** – Every female must rebreed annually. A prime example is Texas THUNDERSTRUCK, backed by 26 years of six consecutive generations that never missed a calf—even through the worst drought on record.
- ✓ **STRUCTURAL SOUNDNESS** – Every female is rigorously scrutinized at each yarding, with only those meeting our strict structural standards retained.
- ✓ **UDDER QUALITY** – Teats must be small and easily accessible for the calf to ensure optimal mothering ability.
- ✓ **LONGEVITY** – A combination of structure, temperament, performance, fertility, and udder quality determines how long a cow remains in our herd. Longevity quickly identifies which cows are truly productive—a trait we believe is one of the most undervalued in the Angus breed.

(Photos are a cross section of our cow herd - no special cows)

Perc	23	2	47	14	15	6	3	8	19	95	90	27	14	3	53	12	4	75	90	

**TOP STUD SIRE.** Texas VELOCITY V53 is without any doubt, one young Stud Sire you must see for yourself. He is even better than his photo and is both Wendy's and my favourite of the Autumn drop and quite possibly of the whole sale! Absolute "Power Presence & Performance." 34 kgs born out of a 1st calf heifer and now one of the heaviest of his age group at 15 months being a 650+kg meat machine that has this level of Style and Stature, is truly a must to see in the flesh. He's a Bull who is so fluent and athletic that pulls up with a perfect stance every time and that always tells you he is BALANCED. Big, strong head and outlook, super thick and long with real muscle and a heavy fleshing body, good on his feet and puppy dog quiet. This is where Genomics loses its credibility with the older genetics that are so PROVEN. V53 scanned the 4th largest EMA of 104cms at only 15 months of age with the 3rd highest IMF of 7.8, plus he has 42cm testicles. You would like to think that the genomic information would validate just how impressive his actual measurements are when compared to such a big contemporary of his. He truly is a Stud Sire that TEXAS ANGUS will definitely utilise strongly in our breeding program as his birth to growth is fantastic, huge CWT with positive fats. Top 2-15% CEDT, BW, 200, 400, 600, CWT, Fats, NFI & Eating Quality Shear Force.

V76 is yet another great example of the way THE ROCK breeds. Another 34kg born heifers 1st calf, docile, long, thick, wide based, heavy fleshing body, good, strong head and outlook and structurally correct. He's another good, all round, commercially based bull that would add to the value of a lot of programs. Great calving ease, +3.2 for birth, +13.6 EMA and +4.2 IMF with a nice balance of all other traits. Top 3-13% MK, EMA & IMF.

U359 is a very attractive young bull that has all the same dimensions of his Sire TOP GUN in phenotype, performance and data who also catches the eye of most people. Like his sire, he is a stylish, proud, strong looking young sire that expresses all the style and phenotype we look for in a bull. With his genetic base and structural correctness, U359 is the type of Carcase bull designed to tidy up a herd, boost marbling and add to the quality and profitability of his progeny. His dam, Texas OMNIA R87, is very tidy structurally correct, good looking, deep, long, bodied, phenotype bull. +2.1 Birth Weight, +2.2 for scrotal, +14.7 EMA & +4.6 for IMF. Another young sire well worth a good look at. Top 2% MSA marbling & EMA & 6-11% RBV, IMF & Shear force.

Here is another highly fertile background with longevity that also produces good, heavy, fleshing commercially based progeny. His Dam Texas USHERETTE H269 had 11 calves in 11 years before she retired this year with a calving interval of 367 days. U499 is a high calving ease heifer bull with plenty of softness and quality carcass traits and very QUIET. Top 2% for Immunity.

U340 is so typical of what POWERPLAY breeds; soft, thick, slick skinned, easy doing, quiet cattle with that extra rib. The key to producing consistent, profitable cattle is balance, not just with the numbers you look at, but with what you see in the paddock every day. U340 fits this description to a tee. A stylish, well put together animal with a rock-solid pedigree and a good, even balance of calving ease, performance and carcase data to back him up. Another good all-round bull that can be safely used on heifers, puppy dog quiet and an easy bull to look at. Top 1-14% CEDT, BW, FATS & Eating Quality Shear Force.

An ideal heifer bull is a sire that can promote live calves on the ground and have the same growth, weight, constitution and carcase qualities of the bulls you use on your cows. U310 is exactly that, was only 28kgs at birth, is a nice safe bull to use on heifers and get the best out your cows. He is a QUANTUM LEAP son out of a very thick set MAVERICK cow. QUANTUM LEAP was sold for \$42,000 to Little Meadows WA and has been used throughout our herd. U310 is a stylish, slick skinned, heavy bodied, well-shaped, moderate sized bull with added length that oozes all the carcase qualities you need.

**TOP STUD SIRE.** Power, Performance and Presence. Yet another very impressive, thick, heavy sided DEADWOOD ET son out of Texas UNDINE P10. She currently is one of our most prolific donor cows and has 38 progeny on the books and has already sold 14 sons to a top of \$80,000. P10 is also the great granddaughter of Texas UNDINE Z183. It is hard not to repeat yourself when a Sire line such as these DEADWOOD sons crossed over a cow family like this is so consistent. U973 like his full ET brother LOT 48 is one of the Stand outs of his group. Thick as a brick and weighs like lead and knows he is a SIRE. Top 5- 11% NFI & MSA Marbling.

U960 that has that REAL SIRE APEAL. He is yet another son of the great Texas TOQUE D35 that has produced so many Stud Sires over the last decade and is still breeding today at 17 years of age. U960 is a very stylish, moderate, thick set STUNNER son that is very quiet, very correct who is nicely balanced. He's another low-birth-weight heifer bull with good carcass traits that will definitely add carcass weight. Top 3-4% for DOC & FATS.

**TOP STUD SIRE.** Texas VICTORIOUS V129 has certainly got that WOW factor in Power, Performance and Presence too. He is one of first few MAKAHU sons to be sold at TEXAS and has a very exciting combination of genetics with Texas UNDINE R768 as his Dam who is now a Donor Cow. She is a lovely correct, beautiful looking, deep, long bodied feminine MAVERICK daughter out of Texas UNDINE H638 who is 17 years of age and still breeding. She has been one of our most prolific Donor cows for many years with 107 progeny at Texas alone and selling \$700,000 in progeny sales. She has a very high percentage of her daughters retained in the herd. You can buy with confidence knowing these quality genetics consistently produce the goods. VICTORIOUS is an Impressive, Stylish, Powerful looking, well-muscled, structurally correct young Sire with good feet, big back end, wide across the back with Real phenotype. A young Sire well worth checking out. Top 2 -11% RBV & EMA.

Like his older brothers earlier in the draft, V50 is another THE ROCK son with all the same carcase qualities, power and performance. He is out of a very high powered, strong maternal TOQUE line noted for its added performance and carcase weight. He is also a nicely balanced, powerful looking young Sire. Good structure, and docility plus is +3.2 for IMF. Top 7-15% 200, 600, DOC, CWT, RMP FAT, NFI, Eating Quality Shear Force.

Both Grand Sires PRIME QUARTER and HANDYMAN are both very deep, heavy, long bodied carcass bulls known for their phenotype and his Grand Dams both retired at 14 and 16 years of age. This is another classic case of genomics not recognising the quality of the older genetic bases. V92s Dam Texas OMNIA N271 is now a Donor cow who has already sold 8 sons to \$28,000 with plenty more to come. He is a nice well balance bull all round that has the phenotype and history to know he will breed True to Type.

Perc	93	92	26	94	2	2	2	1	28	72	7	54	2	1	91	70	47	91	56	

As you can see by his photo, these long, heavy, soft and deep bodied JAAL sons come with some pretty handy data across all traits, coupled with Varilek GEDDES on the dam side, you end up with a very attractive animal phenotypically and on paper. U566 is a stylish, heavy fleshing, well balanced, neat package that will certainly boost both carcass quality and add to the performance of most herds. Top 1-7% 200, 400, 600, SS, CWT, NFI.

Even though these are different genetics to the bull above, the repeat button has been pressed in all attributes as you can see in his photo. U494 is also out of a very stylish, deep, thick set, heavy bodied GPS female who is the daughter of the great Texas UNDINE Z183. All these BRAD PITT sons are slick skinned, well-muscled, heavily built with good bone designed to pack on quality kilos. Plus, he is also +3.9 for IMF and could be safely used over heifers with a BW of +2.2. Top 10% Immunity & MSA Marbling.

As you can see by the photo, both Wendy and I thought V148 was the perfect bull to start the Pick or Pair. He is one of the well-structured, super quiet QUANTUM LEAP son crossed over a very tidy looking POWERSHIFT x HANDYMAN daughter who is one of our latest Donor cows with 7 sons in the sale. He is an impressive big, strong, stylish looking, very correct, nicely balanced, fleshy bull with soft, slick skin and good boned to go with his good spread of numbers.

V207 has a nice balance of Data and he is every bit of that in the paddock. One very impressive, larger type, long bodied young bull that catches your eye. He has a nicely balanced pedigree combination of real performance and solid carcass values. V207 is one of these KORPORAL sons that will have a big impact on small short based cattle that need to increase performance to make them more profitable. He is strong featured, slick, soft skinned, super quiet in nature and has a nice cross of MOE over the high-performance SECRET family. Top 3% Eating Quality Shear Force.

U955 is another one of these RAWHIDE sons out of yet another Donor cow and maternal line that has been leading the way for years. Genetics that breed so true to type and have so much to offer. His Dam N551 sold her 1st calf for \$36,000 in 2021 and has 3 sons in the sale. Her dam is Texas TOQUE J605 who has had 69 progeny and sold over \$650,000 in bull sales. Just like all his brothers, he has the Sires appeal with that added quality and performance. Branded incorrectly as U995.

Another very stylish, super quiet TOZER bull at its best here with very similar traits and maternal pedigree to lot 165 being out of a 1st calf heifer who if a full ET sister to ICEMAN. Generations of these traits are about as secure as you can get. Plus, U482 as you can see by his PHOTO is a good, thick barrelled, long bodied well-balanced bull with extra softness who is quick to pack on the kilos.

# Tissue Sampling Unit (TSU)

Allflex® Tissue Sampling Units provide a simple but effective means for DNA testing livestock. Collect a clean, uncontaminated sample in seconds with a single squeeze motion. TSUs are easy to use and yield excellent lab results.

TSUs can be paired with a matching NLIS and visual management tag, creating a simple link between the genetics of an animal and its identification.

Another heifer's 1st calf by RAWHIDE at 34kgs with all the same credentials. One major key to producing consistent profitable cattle is BALANCE, not just with the numbers you look at, but with what you see in the paddock every day. Like all his brothers, U345 fits this description to a tee. A stylish, well put together animal with a rock-solid pedigree and performance data to back him up. Top 2-10% 200, 400, 600 & NFI.

Yes, another RAWHIDE over a 1st calf KATAPULT heifer with even more calving ease blended with his growth and performance. U457 was only 27kgs born too and looks just like same as all his brothers, expressing that heavy fleshing ability and volume. So balanced, docile, stylish, plenty of weight for age and carcass quality. U457 is another good, neat, all round bull perfect for heifers and cows with that added grunt.

U473 is another one of these stylish TOZER sons who has always been a nice, impressive eye-catching beast from the day he was born at only 32kgs. With such a strong head and outlook, that stands proud, with a slick skin, long body, straight back and plenty of meat down the spine, U473 is certainly a bull worth looking at. Structurally correct and very athletic and has the numbers and history to match. His dam R277, is a deep, wide base. long bodied POWERSHIFT daughter with a big butt.

Fertility and Longevity at its Best, his Dam F290 is still breeding exceptionally well with her 14th calf about to hit the ground. It's hard to cull cows like this when they are so consistent in the quality of progeny, she produces no matter the Sire we join her too. U610 is yet another one of these commercially orientated quality NEW GROUND sons that will survive and thrive where ever he goes. Good slick, meaty, well-balanced bull that would add to the value of the heifers and cows you join him too.

U430 is a classic combination we strive to do at Texas blending calving ease and high carcass values with real growth and performance. This adds to the profitability of these genetics for all sectors of the beef industry to make their share. Texas TOP GUN over these big, heavy, long TOQUE cows is exactly that! U430 is a good structured, long bodied bull that expresses plenty of grunt and carcass.

For this Pair, another typical NASA based grandson with balance, flexibility and structural integrity, who is out of another highly fertile UNDINE cow that is on her 9th calf with a 372-day calving interval. Smooth, slick skinned, length of body and athletic describes why cattle like U771 survive and thrive in the Northern and Western environments.

U598 is so typical of what the WINCHESTER breeds, full ET brother to TOP GUN, he is soft, thick, easy doing, quiet cattle with that extra rib and is out of a daughter of Texas KORPORAL K508. The key to producing consistent, profitable cattle is balance, not just with the numbers you look at, but with what you see in the paddock every day. U598 fits this description to a tee. A stylish, well put together animal with a rock-solid pedigree and a good, even balance of calving ease, performance and carcass data to back him up. Another good all-round bull that can be used on heifers, puppy dog quiet and an easy bull to look at.

His Sire ROOSTER is the other full ET brother to TOP GUN that we kept for within herd use, is breeding so true to type. Good long bodied, well-structured athletic bulls the ooze carcass quality. U764 is long, deep, powerful and moves like a cat. Good all-round balanced set of numbers with a strong maternal background. Definitely a bull well worth looking at.

U689 is another one of these SIRLOIN sons that has been an impressive calf from the day he was born. Good strong head and outlook, that stands proud, with a slick skin, long body, straight back and plenty of meat down the spine. Good on his feet, structurally correct and very athletic and has the numbers and history to match. He is a heifer's 1st calf and his Dam S33 is a feminine thick sided BONUS daughter who is out of TEXAS UNDINE H647 ( Dam of ICEMAN ).

U379 full brother sold for \$40,000 at last year's sale. His Dam Texas UNDINE L365 is one of the original standout HANDYMAN females that is breeding exceptionally well. He has a true balance of all traits and phenotypically very impressive with the fleshing ability, efficiency of weight gains, carcass quality and overall style of this bloodline. Like many of his RAWHIDE brothers, he is a big, round butted bull with tremendous depth and thickness, structurally correct and very mobile.

U436 has all the features of all his RAWHIDE brothers. He displays that extra rib in length whilst still maintaining plenty of meat down the spine with a big rounded rump and a deep, heavy fleshing body. This is one of the reasons why the Texas genetics have gone so well for profitability in many of the feeder and carcass competitions we have entered in. Check out U436's a great birth to growth spread and is +4.1 for IMF.

Here we go again with genomics on another JAAL son who was only 32 kgs born out of a very nicely balance moderate HECTOR cow. U567 as you can see, is like his mother being stylish, nicely balance with plenty of quality carcase weight. Just a good all-round bull designed to add to your profitability.

Just like his Full ET brothers Lots 21, 214, 284. U977 is one of the Musgrave STUNNER sons that catches the eye of many people, who is out of one of our most predominant Donor Cows, Texas TOQUE D35, who has produced well over 60 progeny at Texas alone, was sold for \$28,000 to Top shelf Angus as a 14-year-old cow in 2021 and is still being used as a Donor cow today. You only have to look at this young Sire to see the qualities he possesses.

For the last pick or the pair of the day this year, we have two carcass quality JAAL sons. U533 is out of another one of these very attractive, long, roomy well boned NASA females I keep writing about. Just like the last few years, he is a true reflection of the quality and evenness of this year's draft of 286 bulls. He is a smooth, long bodied, good boned well-balanced bull who was only 30 kgs born, perfect for heifers that will put on real weight and quality, He's slick, thick and heavy. Top 2% for GL, +1.8 BW to 103 for 600-day, +4.0 SS, positive fat & top 5% for MSA Marbling at +4.9 for IMF.

As we have always done, every year we save a very high-quality Bull until last. This well-designed JAAL son who is out of a very thick wide based MAVERICK daughter, could quite easily be sold as LOT 1 of the Sale. He is every bit as good as his photo and is a great example of how well JAAL has connected with the Texas cow line particularly the TOQUE cow family. Like his pair, U637 is a mobile, flexible bull with good calving ease, plenty of performance and soft, easy doing, high fleshing carcass quality we look for to produce these highly profitable cattle. He just oozes style with plenty of meat, doing ability and is a big long thick based bull with good structure, quiet and very consistent in type. +3.7 BW to 121 for 600-day, +5.4 SS & +4.1 for IMF, Top 10% MSA Marbling.
