REGISTRATION

If bidding through AuctionsPlus, please register by Friday 18th for the Monday sale. The vendor will be operating a card registration system so please allow time on the sale day to register your purchasing name and PIC. www.auctionsplus.com.au

HISTORY

In 1950 the purchase of some registered females started the Curracabark Hereford Stud for the breeding of bulls for its commercial herd followed by the sale of registered bulls in 1952 which followed on from some commercial bull sales prior to 1950.

These were selected and overseen by at first H.T. Higgins and then his sons John & Jim until mid-1990 and currently Sandy and James Higgins.

Normally around 700 breeders and followers are run on the shale based ridges with modest rainfall and some challenging temperatures. Virtually all steers are sold as 400 - 500kg feeders and surplus females sold as future breeders or MSA graded bodies.

STUD BREEDING OBJECTIVES AND METHODS

- Increase beef producers' profitability with more beef production from thick, growthy, soft cattle with soundness and a calm temperament from an unassisted birth.
- Easy doing cattle suitable for grass and grain finishing.
- Large body capacity to thrive in tougher grazing conditions.
- Cow and bull longevity with sound legs, feet, udder and teat shape.
- Visible muscularity in forearm and hindquarter thickness, ribeye size and some width and roundness of muscle along the spine.
- Careful use of only higher accuracy Breedplan data to produce a continual lift of progeny standards like calving ease, milk, IMF and feet scores.
- Careful sire selection including researching parentage soundness and longevity, and nationwide inspections of sires or ET donor dams.
- Choosing sires with proven background genetics to breed a more reliable result for bull buyers.

Our approach has always been for a visually balanced type of cattle and careful use of data allows us to aim for balanced genetic data. This is not an easy combination but good for the commercial producers' pockets.

SALE DETAILS

Data

EBV data is printed as received from the breed societies. The vendor recommends visual appraisal of stock with the beneficial use of EBVs with accuracies over 50%.

\$Index values are derived directly from EBVs and their percentage accuracies. \$index values have lower accuracies than EBVs. As more performance information becomes available on an animal (or its progeny, or relatives) then the accuracy of its EBV for particular traits will increase.

Sale

The sale will be open cry auction in consecutive lots using the bid card system in conjunction with AuctionPlus online bidding.

The auctioneer will deem the lot as sold and responsibility of the livestock passes to the purchaser at the fall of the auctioneer's hammer.

GST

Prices for all lots will be GST exclusive and so invoices for sales will have 10% GST added to the invoice.

Inspection

Sale cattle will be on display on the sale day from 10.30 a.m.

NO CHILDREN UNDER 16 IN PENS.

Rebate / commission

Vendors will offer a 5% rebate to agents introducing buyers in writing 24 hours prior to sale and settling on their behalf within seven days of sale date.

Insurance

It will be the buyers' responsibility to arrange insurance for their purchases, if needed.

Buyer's Instructions

Please complete the buyer's instruction slip at the rear of the catalogue. No verbal instructions can be accepted.

Free Delivery

The purchase price includes free delivery within the districts of and to the saleyards at Wauchope, Kempsey, Armidale, Tamworth, Scone, Maitland & Bulahdelah.

Payment

Title to the stock shall not pass until payment in full is received by the vendor.

Herd Health

Curracabark and Myra were in a Bovine Johnes Disease Protected area and have no history of the disease. We are now a JBAS 7 herd. All bulls have been vaccinated with vibrio 7, Bovilus, 7 in 1 and 3 day sickness BEF vaccine and require annual boosters to maintain cover.

Bulls have been tested negative for Pestivirus. Buyers should consult their animal health advisors in regards to exposure, or lack of, to various cattle diseases.

Dr Stuart Knox of Taree Veterinary Hospital has performed a breeding soundness examination of all bulls prior to sale with an internal and external examination of the reproductive tract, palpation and scrotal measurement as well as a semen quality test.

Any claim by the vendor that a female is pregnant or not pregnant shall mean and require only that a signed veterinarian's certificate states that the female in his/her opinion is such at the time of testing, being a date that is not more than six weeks ahead of the sale date.

Bull Guarantee

The vendor warrants that bulls are fertile and capable of natural service for six months from date of sale (Warranty Period).

The vendor will credit or refund the purchase price of the bull if infertile or incapable of natural service. A statutory declaration from the purchaser and a veterinary report supporting a claim during the warranty period must be lodged before the warranty period has expired stating that the bull is defective and has not suffered illness or injury in the warranty period which could have affected his breeding ability.

The purchaser acknowledges that the purchaser does not rely and it is unreasonable to rely on the skill or the judgement of the vendor as to whether the livestock supplied are reasonably capable for any purpose for which they are being purchased.

To the extent permitted by law all other conditions and warranties implied by law in respect of the state, quality or condition of the livestock, which may apart from this clause be binding on the seller, are excluded.

The vendor has no liability (including liability in negligence) to any person for any loss or damage consequential or otherwise suffered or incurred by that person arising from the sale of the livestock to the purchaser.

Privacy Information

The buyer is encouraged to have transferred to his or her membership any bull that is registered with Herefords Australia Limited or Angus Society of Australia. For this to be effected the buyer will have to provide certain personal information to HAL or ASA and consent to collection and disclosure by HAL or ASA of that information in certain circumstances. If the buyer does not want to have HAL or ASA collect and disclose personal information then the buyer must opt out of the option to consent by completing the form which will be available on the sale day and forwarding it to HAL or ASA. If the form is not completed the buyer will be taken to have consented to have HAL or ASA collect and disclose personal information.

Disclaimer

The owners, employees and representatives of Curracabark accept no liability for any accidents that may occur. Although such circumstances are rare any persons attending Curracabark / Myra do so at their own risk.

All reasonable care has been taken by the vendors to ensure information provided in this catalogue is correct at the time of publication. Neither the vendor nor the selling agents make any other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information in the catalogue. You are encouraged to seek independent information for any information in this catalogue before relying on such information.

June 2025 Hereford Australia Group Breedplan Averages EBV's & Index Values for 2023 Born Calves

Traits Observed:

BW, 200WT, 400WT, 600WT, SC, S-can(EMA, IMF), Genomics

Notes: A great bull to start the draft that will really add growth to his calves and get them up to the front pens at sale time. His depth and softness shows in the Mature Body Condition (MBC) and positive fat scores, plus high milk data which really adds value to his females. Not easy to get all these paddock features in a line.

Traits Observed: BWT,200WT,400WT,600WT,SS,FAT,EMA,IMF

Notes: Universal brings an outstanding phenotype with excellent cosmetics and a load of visual muscle. Hard to find a bull with this high CE/ low BW and double the breed average Retail Beef Yield ebv, and that is certainly good for business. Gets a 5 for EMA shape. A lot of longevity in the pedigree, with 4 of the dams on this page having 8 to 10 natural calves each. **Should suit heifers.**

NOTES

DIRECTIONS TO MYRA YARDS

2796 Curricabark Rd, Gloucester NSW 2422

From Gloucester

Take the Scone sign, proceed through Barrington village and over the Barrington River. 400 metres after the river turn right onto Thunderbolts Way. Proceed 10.5 kms, turn left onto the Curricabark Road.

Drive into the hills, either crossing the wet causeway of the Manning River or divert right onto the flood detour which re-joins the Curricabark Road in 5 kms.

If crossing the wet causeway and then a long, low cement bridge across the river again, go straight ahead at the crossroad where the flood detour soon re-joins the road.

If taking the flood detour, then veer right in 5 kms after the cattle grid back onto the main road. Travel another 20 minutes to Myra yards on the right of the road.

From Walcha / Nowendoc

Travel down the mountain towards Gloucester crossing the Barnard River.

Go on to cross the Manning River three times. 3 kms on, turn right onto the Curricabark Road, and follow the above directions for Curricabark Road.

Myra yards is 28 km from Curricabark Road turnoff on Thunderbolts Way. Travelling time from Gloucester 50 min, Walcha 2 hrs, Taree 2 hrs.

BUYER'S INSTRUCTION SLIP

Trading Name: (PLEASE PRINT)

Postal Address: _____

Postcode _____

Delivery Address: _____

Postcode _____

Phone: _____

Email Address: _____

Lot Purchased: _____ PIC number: _____

Do you require stud registration of lot/s purchased to be transferred:
