Livestock Photography by StudStock Sales

Welcome to the 2025 Tumbledown Wagyu Bull Sale

Since 1997, Tumbledown Wagyu has been dedicated to breeding premium black Fullblood Wagyu along the pristine Severn River at Ashford. From humble beginnings—starting with just three female embryos—we have grown to one of the largest Fullblood herds in the country, with over 1,500 registered females. This year, we will join 1,400 Fullblood cows across our three properties: Tumbledown at Ashford, The Springs at Wellingrove, and Brooklyn at Bonshaw.

Our expansion has been driven by a strong focus on genetic advancement through Embryo Transfer programs. In addition to our Fullblood herd, we implant around 100 embryos annually into purebred recipients to accelerate progress and maintain genetic diversity.

Over the past 28 years, we have developed a deep understanding of the entire Wagyu supply chain—from breeding through to feedlot performance and carcass outcomes. This has allowed us to supply highly sought-after Fullblood cattle to both domestic and export markets. Our cattle are renowned for their adaptability, carcass quality, and feedlot performance.

Tumbledown bulls have long supported other Wagyu breeders around Australia, with genetics reaching as far as Tasmania and North Queensland. This year marks our third on-property production sale, and we're excited to welcome you to our home base at Ashford.

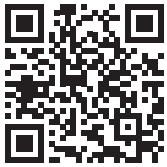

This draft of bulls reflects the strength and diversity of our program. The average Marble Score EBV of this year's sale team is 2.7—placing them in the top 8% of the breed. Several bulls also offer standout EBVs for carcass weight, growth, and maternal traits. Whether you're targeting high-marbling F1 production or seeking larger-framed bulls with balanced performance, we have bulls to suit your program.

All bulls have passed veterinary inspections, semen evaluations, and are fully vaccinated—including Vibrovax, Pestigard, Piliguard, and 7-in-1—along with treatment using Ivomec Plus and Paramectin Pour-On.

Our bulls are sired by 11 different sires, including three ET sires and eight homebred Tumbledown sires, providing a wide range of high-performance genetics.

We look forward to sharing this exciting offering with you and thank you for your continued interest and support.

MARBLING.....FERTILITY.....RESILIENCE

SALE INFORMATION

BUYERS REGISTRATION

The Buyers number system will be in operation. All prospective purchasers are asked to register prior to the sale.

ONLINE & PHONE BIDDING

If you are unable to attend on the day, the sale will be conducted in conjunction with AuctionsPlus. Please refer to the inside cover for further information. Phone bidding can be arranged through BJA Stock and Station Agents or your preferred agent.

VISITOR SAFETY

All of the sale animals have been screened for temperament and are quiet under normal circumstances, *however visitors enter the cattle pens at their own risk. Children/Prams must not enter the sale pens.*

OUTSIDE AGENT REBATE

A rebate of 2% is payable to all agents who introduce their clients in writing prior to sale day and settle their account within 7 days.

GST

All animals are sold exclusive of GST. GST is added to your invoice.

INSURANCE

Bulls are a valuable and vulnerable asset to your business. We highly recommend insuring your new purchase at the completion of the sale. Insurance will be available on site.

TRANSPORT

It is the purchaser's responsibility to arrange their own transport from farm cattle yards at their own cost. There will be a livestock carrier on site on sale day.

HERD HEALTH

All our bulls are vet checked, semen tested and ready to work. They have received a full vaccination treatment schedule including Vibrio Vax, Piliguard, Pestigard and Ultravac 7in1. They have been drenched with Ivomec Plus and Paramectin Pour On.

DISCLAIMER

All reasonable care has been taken to ensure that the information provided in this catalogue is correct at the time of publication. However, the vendor and the selling agents do not assume any responsibility for the correctness or accuracy of the information provided. It is advised to seek independent verification of any information contained in this catalogue before relying on such information.

The vendors and agents are willing to provide assistance for those seeking guidance on the sale animals. However, the final decision is that of the purchaser and it is recommended that the purchaser either inspect the cattle thoroughly on sale day or at private inspection before the sale.

SALE DAY

EBVs EXPLAINED

EBVs

An animal's breeding value is its genetic merit, half of which will be passed on to its progeny.

FERTILITY AND BIRTH

Scrotal Size EBV (cm) is an indicator of male fertility in regard to semen quality and quantity in Western breeds of cattle. Higher (positive) EBVs indicate higher fertility. There is also a small negative correlation (desirable) with age of puberty and fertility in female progeny. The relationship between scrotal size and fertility in Wagyu is assumed, but not proven.

Gestation Length EBV (days) is based on AI records. Lower (negative) GL EBVs indicate shorter gestation lengths which generally relate to lighter birth weights and easier calving.

Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

GROWTH

Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-day weight of their calves.

200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-DayWeight EBV (kg) is calculated from the weight of animals taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-DayWeight EBV (kg) is calculated from the weight of animals taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

CARCASE

Carcase Weight EBV (kg) is based on abattoir carcass records and live weight measurements (particularly 600 Day weight) and is an indicator of the genetic differences in carcass weight at the industry average slaughter age of 990 days. Larger positive values are more favourable.

Eye Muscle Area EBV (cm²) estimates genetic differences in eye muscle area at the 12/13th rib site of a 420kg dressed carcass. A higher positive EBV indicates larger eye muscle area and therefore higher retail beef yields. Ultrasound, Aus-Meat and Japanese Digital Image Camera measured Eye Muscle Areas from slaughter animals contribute to this EBV.

Rump Fat EBV (mm) estimates the genetic differences in fat depth at the PS site of a 420kg dressed carcass. A higher positive EBV indicates more subcutaneous fat and earlier maturity.

Retail Beef Yield Percent EBV (%) estimates the genetic differences in total (boned out) meat yield as a percentage of a 420kg dressed carcass. A higher positive EBV indicates higher percentage yield for the 420kg carcass weight.

Marble Score EBV (Aus-Meat Marble Score) is an estimate of the genetic difference in the Aus-Meat Marble Score in a 420kg carcass. Marble Score EBV utilises Aus-Meat Marble score on a scale of 1 to 10 where 10 is equivalent to an Aus-Meat Marble Score grading of 9+. Where results from the Meat Image Japan digital carcass camera are available, Camera Marbling Percentage and Marble Fineness are also used to calculate Marble Score EBV as the genetic correlations between these measures and Aus-Meat Marble Score are very high. Larger positive values are more favourable.

Marble Fineness EBV (Marbling Fineness Index) estimates the genetic differences in the Marbling Fineness Index (degree of fineness of marbling fat) as measured by the Japanese Digital Image Camera. A higher more positive EBV indicates higher levels of marbling fineness.

BREEDER FEEDER INDEX (BFI)

Introduced in 2024, the Breeder Feeder Index (BFI) is a balanced selection index designed to help Wagyu breeders select the most profitable animals for a self-replacing herd while effectively managing birth weight, milk production, and mature cow weight. The BFI estimates genetic differences between animals in terms of net profitability for cows joined, based on the production of 435kg for steers and a 385kg carcass from heifers at 28 months of age. The BFI places the following emphasis on key traits: 40% Marble Score, 19% Carcass Weight, 5% Eye Muscle Area, 12% Birth Weight, 6% 200-Day Gain, and 8% Milk.

FULLBLOOD TERMINAL INDEX (FBTI)

The Fullblood Terminal Index (FBTI) places increased weighting on the Marble Score EBV and is used to select bulls for producing profitable slaughter progeny, with none retained for breeding. The FBTI estimates genetic differences between animals in terms of net profitability per cow joined, based on producing slaughter stock only, with a 435kg carcass from steers at 32 months of age and a 385kg carcass from heifers at 29 months of age. In terms of relative economic importance, the FBTI emphasizes the following main traits: 64% Marble Score, 11% Residual Feed Intake (RFI) feedlot, 9% sale liveweight, 7% meat yield, 5% dressing percentage, and 3% on other animal traits, with 0% on maternal traits.

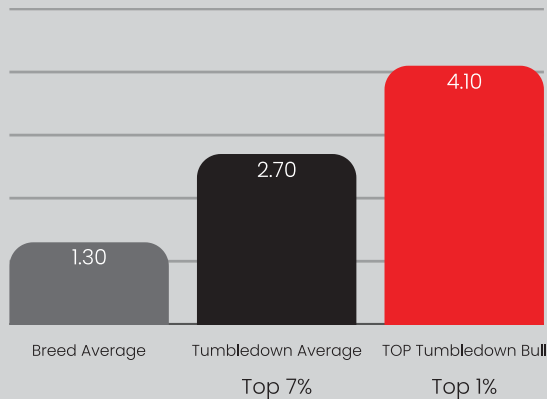

F1 TERMINAL INDEX (F1TI)

The F1 Terminal Index (F1TI) gives significant priority to the Marble Score EBV and is intended for selecting bulls to produce profitable F1 slaughter progeny without retention for breeding. The F1TI evaluates genetic differences in terms of net profitability per cow joined, focusing on producing a 420kg carcass from steers and a 385kg carcass from heifers at 28 months of age. Economically, the F1TI emphasizes the following main traits: 68% Marble Score, 9% Residual Feed Intake (RFI) feedlot, 4% sale liveweight, 6% meat yield, 4% dressing percentage, and 9% on other young animal traits, with 0% on maternal traits.

TUMBLEDOWN WAGYU BREEDING PROGRAM

Tumbledown has a rich history of breeding high-marbling cattle, with marbling remaining the primary focus of our breeding programs. The 2023–2024 crop of bull calves showcases exceptional marbling genetics, boasting an average marble score of 2.7—double the breed average.

In addition to marbling, Tumbledown emphasizes carcass traits such as Marble Fineness and Eye Muscle Area to maximize profitability. Our sale bulls have averages for Marble Fineness and Eye Muscle Area that are twice the breed average.

Each year, we naturally join 1400 Fullblood cows and also utilize 100 Purebred cows as recipients for our Embryo Transfer (ET) Programs. These ET programs, undertaken by The Repro Group, keep us at the forefront of Wagyu performance. Notable bulls used in our ET work include MYMFP0342, MYMFQ007, WPPFP00011, DSWFN4431, IGWFS0129, PSKFQ0540, ADBFL0010, BULFS7013, SMOFFO154 and SMOFF0126.

GETTING STARTED WITH WAGYU F1 PRODUCTION

Historically, most of our sale bulls have been joined with Angus females and integrated into F1 Wagyu programs. If you're considering entering this market, here are some key points to keep in mind:

Relationships: Less than 10% of F1s are traded through public markets like AuctionsPlus. Most cattle are sold directly into supply chains. If you're new to F1s, we recommend contacting a supply chain to discuss your breeding plans. They may want to know the type of females you'll use and have specific requirements for the bulls suited to their F1 programs.

Marbling is King: In F1 programs, the first metric to consider is the marble score EBV. Supply chains typically look for a marble score EBV average of over 2.0.

Growth: While marbling is crucial, producers are still paid based on live weight. Therefore, consider the growth figures of the animals. Keep birth weight in mind—though Wagyu are generally smaller, they can produce larger calves. We recommend a birth weight EBV of under 2.5 for heifers. For cows, there is more flexibility to push for higher birth weights.

A common question is the growth rate difference between F1s and straight Angus. Considering various factors, including specific Wagyu bull growth figures, the average discounted growth rate is about 10%.

Replacement Females: While our focus is on the bulls, equal attention should be given to the female side of your breeding program. We recommend selecting females from studs that emphasize carcass traits.

PUREBRED AND FULLBLOOD PRODUCTION

An increasing number of Wagyu producers are entering the industry focussing on Purebred and Fullblood production. They are attracted by the premium prices on offer and a more stable market.

Marbling: In Purebred and Fullblood programs feedlots remain focussed on marbling EBVs but also place a much higher importance on Carcass Weight and Growth Weight EBVs than in F1 production. Purebred and Fullblood supply chains typically look for a marble score average of over 1.8.

Growth and Carcass Weight: Most strains of Wagyu are smaller framed than Angus cattle and it is important

to keep size in the animal. Bulls selected for these sorts of production should have growth rate EBVs and carcass weight EBVs above breed average.

Replacement Females: The majority of Purebred and Fullblood breeders are keeping their females for replacement heifers. It is important that female production traits such as Milk EBV and Calving Weights be considered in selecting your bulls.

BULL SELECTION PROCESS

All our bulls are DNA tested using the 100k SNP test. They are parent verified and registered with the Australian Wagyu Association. The genomic evaluation provides us with an accurate prediction of the animal's breeding merit based on 14 different areas of performance. Of course, all bulls are phenotypically assessed, they are then vet checked and semen tested, including morphology testing by Inverell Vet Clinic.

In addition to the genomic evaluation, we have 28 years of carcass data on our cattle which helps inform our bull selection process.

CARCASS DATA ON THE PROGENY OF OUR BULLS

Feedlots have traditionally been very reluctant to share carcass data on the performance of our steers, they consider that information to be 'commercial in confidence', we are however starting to get some data on our steers in feedlots.

It takes a number of years to get carcass data on the progeny of a bull. Bulls are usually about 24 months old when joined to cows, it takes 9 months for a calf to be born. Another 18 months for the calf to enter the feedlots. They spend another 15 months in a feedlot and another 3 months for the data to be provided to us.

That means the bull is nearly 6 years old when we have carcass data on the progeny. The majority of our bulls which we are using in our herd are younger than that, however we do have data for our Tumbledown bred bulls with sons in today's sale. The data provided gives marble scores of carcasses ranging from 1-9, with 9 being the highest possible. When comparing marble scores on carcasses, it is important to note that we are using AusMeat scale which has a maximum of 9. MIJ camera scanned marble scores have a different scale, which goes up to 18, so is not comparable to the AusMeat scale.

- 74% of Tumbledown carcasses were graded 9
- The herd average marble grading was 8.5
- Both of these figures put Tumbledown amongst the industry leaders

That performance is all the more impressive, given the fact that our best 100 male calves are kept as bulls and don't enter the feedlot system.

FEATURE BULL: **LOT 13**

TUMBLEDOWN OCTAGONAL (MPLF23U9195)

Tumbledown Octagonal is an elite sire prospect with the genetic power to influence any breeding program. He boasts a Marble Score of 4.1, placing him firmly in the top tier for marbling. Ranked 3rd for F1 Terminal Index (489) and 12th for Breeder Feeder Index (653) across all 2023-born Wagyu bulls, Octagonal offers a rare combination of marbling excellence, growth, and overall profitability. His Carcase Weight EBV of +40 places him well above breed average, delivering added value through heavier, higher-yielding progeny.

Sired by the influential PSKFQ0540, Octagonal inherits outstanding carcase traits and adds more carcass weight. His dam, *Macybee Diva (MPLFR6748)*, is a high-marbling female with a proven production record, adding maternal strength and depth to his pedigree. With bloodlines including Coates Itoshigenami G113, Mayura Itoshigenami Jnr, and Sumo Michifuku F154, Octagonal is built on decades of performance breeding. He is a powerful, high-impact sire for both F1 and Fullblood herds.

Comments: A very well-balanced son of United out of Macybee Diva (MPLFR6748), one of our star performing cows. He boasts a Marble Score in the top 4% of the national herd and Carcase Weight more than double the breed average. His growth EBVs for 200 and 400 days are exceptional, with Marble Fineness in the top 2%. All indexes — Breeder Feeder, Fullblood Terminal and F1 Terminal — sit in the top 2%. An exceptional sire suited to all production systems.

TUMBLEDOWN BREEDING DIRECTIONS

At Tumbledown Wagyu, our breeding program has long maintained an unwavering focus on carcase quality. Our primary goal is to produce industry-leading sires for F1 producers—specifically targeting feeder production from Angus-based cows. This has led us to consistently prioritise traits such as **Marble Score**, **Marble Fineness**, and **Eye Muscle Area** across our herd.

To drive genetic improvement in these key traits, we have heavily invested in **Embryo Transfer Programs** featuring some of Australia's top-performing sires. One is **PSKFQ0540**, affectionately known as the Carcase King within our program, thanks to his outstanding EBVs across all three major carcase metrics. The second is **MYMFQ007 (Arubial Bond)**, another standout bull with elite carcase credentials. Bond has now passed the baton to his sons—**BULFS7013** and **IGWFS0129**—who not only carry forward his carcase strengths but also deliver significantly improved **Carcase Weight**.

With an increasing number of our clients moving toward **Fullblood and Purebred feeder production**, **Carcase Weight EBVs** have become an even more critical selection criterion. To meet this demand, we introduced **MYMFP0342 (Arubial United)** into our ET program three years ago. Widely regarded as The King of Carcase Weight, he boasts a staggering **+83kg EBV** for this trait.

Our commitment to genetic excellence doesn't stop at the embryo program. All 41 bulls used in natural paddock joinings are carefully selected for **Marble Score**, **Marble Fineness**, **Eye Muscle Area**, and **Carcase Weight** EBVs—ensuring consistent quality at every level of the herd.

Behind every great bull is a great cow, and that's where the real strength of Tumbledown Wagyu lies. We are proud to have **36 elite females ranked in the top 1%** of the national herd for the **F1 Terminal Index**, and another **34 ranked in the top 1%** for the **Breeder Feeder Index**. We also have 57 females with Marble Score 3 or above. These superior females are the cornerstone of our donor cow herd and form the genetic foundation of our ET program.

When top-tier females are joined to Australia's best Wagyu sires, the result is simple: **exceptional carcase genetics with proven commercial value**. That's the Tumbledown difference.

MACYBEE DIVA

OUTSTANDING FEMALES

MPLFR6748 – MACYBEE DIVA

Since 2022 she has produced 35 MOET embryos and raised a naturally conceived calf.

Her 13 calves that have been born so far are outstanding!

She has 3 sons in this year's sale.

Average Marble Score	3.4	2.6 x better than breed average

2024 WAGYU BRANDED BEEF COMPETITION

The 2024 Wagyu Branded Beef Competition saw a record number of 72 entries from 44 brands, representing 23 companies from across Australia.

The winning carcass was sired by Tumbledown Trophy Boy, MPLFP5893, a distinguished bull whose impressive genetics have contributed to the quality of the winning entry. The dam of the winning carcass, MPLFN5712, was also owned and bred by Tumbledown, further emphasizing the excellence of this breeding program.

THANK YOU

Thank you to everyone who joined us for our on-farm sale at Tumbledown Wagyu. We hope you enjoyed the day and the quality of cattle on offer. We're truly grateful to all buyers, underbidders, and supporters—your involvement made the day a great success

Mick & Pauleen Lewis
