SPRINGWATERS

POLL DORSET STUD EST. 1979

Welcome to our 22nd Annual Poll Dorset Ram Sale

215 Poll Dorset rams

Inspection from 10:30am ◦ Online auction 1pm

Welcome to the 2025 Springwaters Poll Dorset ram sale.

We have 215 rams catalogued for your inspection, representing some new genetics to our flock as well as some extensions of the bloodlines our regular clients are familiar with.

2025 has been a drastic contradiction in the fortunes of all sheep producers. On one hand, we have witnessed unmatched price highs for our product with quality and production excellence rewarded like never before. On the other hand, I have heard this year referred to as the hardest year in memory for sheep farmers.

Extreme dry and cold winter weather definitely challenged us all in southern New South Wales, Victoria and South Australia.

As for 2026, one sure thing is that market optimism is justified. We think the rams we have available this year are going to produce lambs that can really capitalise on the prices available going forward. Widely sought after in any store market, our rams mature and grow rapidly for early sucker production and have the ability to grow out into heavy lambs.

This years draft are all Genomically DNA tested, as is every animal in our stud flock. They all come with a set of ASBV's to give you all as many tools as you need to help selection. With an ever increasing number of technologies available to us, we still strive to produce rams with type, early maturity, muscle and consistency.

Thank you for taking an interest in our sheep,
Dane and Lisa, Dennis and Jo-Anne

Scanning for performance traits in animals has become a significant on-farm measuring tool over the last 10 years within the stud industry.

Australian STOCKSCAN Services P/L scanners assess sheep at around 12 months of age for the following:

- Weight (LW)
- Eye Muscle Width (A)
- Eye Muscle Depth (B)
- Fat Measurement (C)

Eye Muscle Area (EMA) is calculated using the eye muscle width and eye muscle depth measurements.

The meat index is based on the Eye Muscle Width, Eye Muscle Depth and Fat Measurement with an adjustment for the age of the sheep.

STOCKSCAN figures as at 15th July 2025

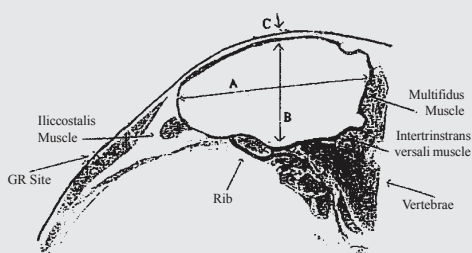

Figure 1: Exposed 12th rib on the carcass cut through the last thoracic and first lumbar vertebrae.

STUD TRANSFERS AND SEMEN SHARES

Springwaters retain the right to collect semen for in-flock use in all rams sold. Semen will be collected at our expense and the buyer's convenience. Any ram requiring transfer to a stud must have a minimum purchase price of \$5,000.

ANIMAL HEALTH

All Springwaters sale rams were drenched with Trifecta and given a 6-in-1 SB12 on 10th September 2025. Springwaters is OJD MN2(V) and Brucellosis accredited free.

DNA PARENT VERIFICATION AND GENOMICS

All rams in the 2025 Springwaters Poll Dorset sale have all had a Genomic 50k test and DNA parent verification carried out. On the buyers end, it adds certainty to our pedigree and breeding, while also adds some accuracy to ASBV's.

SIRE SUMMARY

BASALT - SW220091

BASALT - SW220091

2025 represents the first drop of sons by our homebred sire, Basalt. With big capacity and volume, Basalt possesses a lot of sire appeal and class for a ram with so much power. His sons are strong boned with a lot of muscle and length. Basalt has a seriously impressive show resume, being awarded Grand Champion Ram at the ASWS in Bendigo, Supreme Exhibit at the NSW Dorset Championships and the Australasian Dorsets Championships as well as the Ram of the Year for 2023.

SW210129

WARBURN 220470

We selected Warburn 470 as an AI sire for his combination of structure, type and carcase attributes. His sons are very clean pointed with strong bone and good muscle expression through the hindquarters. His draft of rams is headlined by a couple of outstanding rams at the front of the catalogue, which pair well with a couple of sons we have retained in stud.

YENTRAC 220002

We purchased this ram in 2023 from the Yentrac stud in Victoria. He is an outcross sire for us, but the genetics are very familiar as he has a Springwaters ram as his grand sire. We love his moderate frame and outstanding muscle expression. He has thrown great carcase shape into his offspring with sons represented right from the top of the catalogue.

SW210770

SW210129

A son of a purchased Punchgrove ram from Tasmania, he offers a new bloodline with the same attributes as some of our more prominent lines. He has great muscle expression through the loin and hindquarter with a huge amount of body width and depth.

SW210770

A home-bred sire who is fitting into our breeding program very well. With softness, body depth and shape, we really love the bone in this ram and its evident in his progeny. He has a couple of outstanding sons in the specially selected section of the catalogue and a good run of sons displaying his commercial attributes right through the sale. He is a ram we will continue to use extensively based on his early breeding results.

SW200065

SW200065

A more moderate framed ram, retained for his carcase shape from shoulders through to hindquarters. A lot of muscle in the back leg, while providing a laid in, classic wedge shape through the front. His first draft of rams is being offered this year.

A powerful young ram to start – huge body capacity and length with a bit of outlook. Backs up his phenotype with some handy ASBV's, being in the top 10% for weaning weight and top 20% post weaning weight. We used him naturally for five weeks as a lamb in March/April.

The first son of Basalt to sell and, we must say, this ram reminds us so much of his decorated father. So much power and muscle in him, but maintaining class. Fantastic loin and hindquarters. His early maturity is represented in his data as well – another ram in the top 10% for weaning weight.

We think this ram has a very wide appeal in the stud industry. He is put together beautifully, absolutely full of meat and carries himself with balance and class. Add that to his ASBV's, which put him in the top 10% for weaning weight and 20% for post weaning weight, and you have a rare package. He will be used in our future AI programs.
