

MS

WELCOME

We present to you a rather unique opportunity to secure genetics that have not been offered for a long time. This is my entire mature herd, a herd sire and some cheeky young show potential weaners. There's more than 20 years of blood, sweat, tears and spilt milk in this herd.

We have come to a season in life where going from one block to another just isn't feasible at the moment, it's time to wind down a little, let others enjoy the girls' personalities. It hurts my heart to say bye to these cows. However, I know whom ever buys them, they are in good hands.

I'll be the first to admit my data recording has been terrible, and at times non-existent. Between working between Perth and Gippsland, along with the impact of border closures, I did not register or enter breed values for any calves I knew would be selling as weaners at this time. I just did not have the time to do it properly. The herd took a backseat while I was coming and going always chasing my tail to keep the weeds down and fences in line. On paper this has hindered the potential I know these cows express. They are commercially functional and productive.

A great big thank you to all involved in making the sale happen. It's appreciated beyond words.

Thank you,
Cheryl, Jack & William

Millennium Springs HERD REDUCTION SALE

6PM AEST, FRIDAY 12TH DECEMBER

THE SALE WILL BE ONLINE ONLY WITH AUCTIONSPLUS

Millennium Springs Herd Reduction Sale will be held as a **Helmsman Auction** online via AuctionsPlus. The sale will be opened at 6pm AEST on Friday 12th December 2025, running until 8pm AEST, from there the timer will take over the auction. Once the sale is open all lots are on the market simultaneously, meaning you can bid on any lot.

MILLENNIUM SPRINGS

The Millennium Springs Story

To be a first-generation cow person is like climbing a mountain of extremes. After having worked for Bilati Limousins, breaking in calves, learning cattle reproduction, feeding and farm skills, I bought my first heifer in 2007, Bilati Brenda. From there a passion for Limousin genetics and everyday knowledge needed to be a stud breeder, took me all over the country. On my barista wage, I formed a base herd of females. Bilati Brenda, Kalrural Valda, Wemelerck Yelena Lee and three Shalone heifers - Candy, Jade and Corn. These females were the basis of what is generations of quiet, soft, modern and most of all functional cows.

In 2011, I tracked to Bendigo Beef with Yelena Lee and her calf, still knowing very little about feeding cows for shows, we won Supreme Exhibit. The judge commented on the beautiful udder and softness in the calf. I went away from this experience and looked at milking ability and length of milking. I wanted to breed Limousins that could feed a calf past 6 months old. Now my emphasis on structure, ie good feet, softness and milking ability is something I'm proud to be offering.

The cow families represented are Bilati Brenda (Donna Valley Pretty Lady), Shalone Candy and Corn, these girls built strong females with loads of milk. Costal View Cover Girl, Bonian Kaitlyn and Kylie are the base of my black females. In the early days of Black Limousin, females lacked the depth I was looking for, however, these cows had the phenotype I was looking for. Sandastre Elite, is a favourite for being annoyingly quiet. The few females she produced are modern, feminine and quiet.

Over the years with A.I. calves came more interest in growing a herd built for commercial buyers, this saw a lot of my cattle sell unregistered.

In 2022 we settled on a farm in sleepy Cowwarr. With the arrival of William in 2023 life is busier than I ever imagined. With this in mind my decision to reduce was a very heavy one, but the right one.

Sincerely thanking you for your interest in Millennium Springs genetics.

TERMS & CONDITIONS

BUYER REGISTRATION

To bid on AuctionsPlus you are required to be a registered bidder, for any first-time users please ensure you complete the buyer registration and induction well in advance to the sale time. Please see page 10 for more details, and contact AuctionsPlus if you have any difficulties.

SALE RESERVES

All lots have a reserve price. If lots do not meet this reserve the unsuccessful bidder will have the opportunity to meet the reserve and make their purchase within 24 hours of the sale finishing. All sale lots are sold exclusive of GST.

INSPECTIONS

We welcome all interested parties to our open day, 30th November 2025. The open day will be held on property - Opposite 225 Burnet Park Rd., Glengarry VIC. Private inspections are welcome anytime. Please contact Cheryl on 0400 905 119 to arrange a convenient time.

SAFETY

The cattle are quiet under normal conditions, consider your safety and the welfare of the cattle during inspections. The owners and representatives of Millennium Springs accept no responsibility for any accidents that may occur while on property.

INSURANCE

At the close of the auction, purchases become the responsibility of the successful buyer. While all care is taken by the vendors, we highly recommend insuring your purchases.

STUD TRANSFERS

Animals are registered with the Australian Limousin Breeders Society and are eligible for transfer at the buyer's request. Young bulls requiring transfers will incur an additional \$250 fee.

DELIVERY

All lots are located at Glengarry, VIC. Delivery can be arranged from the 13th December, 2025. All lots are to be transported by the end of December 2025 unless alternative arrangements have been made with the vendor. Please speak with the selling agents or vendor to assist in getting your purchase(s) to you in the most cost-effective manner.

HERD HEALTH

All lots have been verified as the following -

- Tested negative for Pestivirus (BVD) and are J-BAS score (BJD)
- 7 in 1 vaccinated, and treated with Multimin and Dectomax
- All 2024 and '25 calves, and bulls have been DNA tested for Poll status, coat colour and sire verified.
- We can hold lots heading interstate until required tests have been completed.

FEMALES

All females sold unjoined are guaranteed fertile to a natural joining within 12 months from the sale.

CATALOGUE DISCLAIMER

All reasonable care to ensure the information provided in this catalogue is correct at the time of publication. Neither the vendor or agent makes any representations for accuracy, reliability, or completeness of any information provided in this catalogue and does not assume any responsibility for using or interpreting the information included in this catalogue. You are strongly encouraged to seek independent verification of any information contained in this catalogue before relying on such information.

DETAILS EXPLAINED

UNDERSTANDING EBVS

An Estimated Breeding Value is an estimate of the genetic merit of that animal for each trait measured. EBVs are reported in the units in which the measurements are taken (e.g. kilograms for the weight EBVs). Thus, a value of +12 kg for 400-day weight means the animal is genetically superior by 12 kg at 400 days.

EBVS provided for the following traits:

Calving ease direct: Estimates the difference in the ability of a sire's calves to be born unassisted from a 2-year-old heifer.

Gestation length: Ranks sire for their time between conception and birth of a calf. Shorter gestation is indicated by a negative figure and longer a positive.

Birth Weight: Indicates the genetic potential for birth weight, Positive figures indicate higher birth weights and negative figures indicate lower birth weights of progeny.

200-, 400- & 600-day weight: Gives us an estimation of the animal's genetic potential for growth.

Mature cow weight: Estimates differences between animals in live weights at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd.

Milk: A key indicator of fast growth to weaning is the Dam's maternal performance. A bull with a high milk EBV should produce daughters' which milk well.

Scrotal size: Indicates whether the bull will produce sons with above average or below average scrotal sizes.

Carcase weight: Ranks animals for carcass weight.

Eye muscle area: Ranks animals for eye muscle area measured at the 12th rib on a 300kg carcass.

Rib fat: Ranks animals for rib fat depth at the 12th rib on a 300kg carcass.

Rump fat: Ranks animals for rump fat depth at the P8 rump site on a 300kg carcass.

Retail Beef Yield: Indicates the genetic difference between animals for a retail yield percentage in a standard 300kg carcass.

Intramuscular Fat: Ranks animals for the percentage of intramuscular fat at the 12th rib of a 300kg carcass.

Docility: Expressed as the increase or decrease in the percentage of progeny that will be scored as docile (score 1 or 2). Positive EBV's indicate a higher proportion of progeny that will be scored as docile and a negative EBV indicates a lower percentage of progeny that will be scored as docile.

Breed Average EBVs for 2023 Born Calves

DIR	GL	BWt	200	400	600	MCW	MLK	SS	CWT	EMA	RIB	RMP	IMF	DOC
+0.8	-3.0	+1.4	+23	+38	+53	+54	+8	+1.2	+34	+2.2	+0.0	+0.1	+0.1	+47

Comparing EBVS: The EBVs for Limousins cannot be compared with EBVs for animals of other breeds. They should be compared with the current average EBV for the Limousin breed shown above.

Accuracies: Accuracies are presented with each EBV and given an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal and its relatives.

Disclaimer: The Estimated Breeding Values (EBV's) contained within this catalogue were compiled by the Agricultural Business Research Institute (ABRI) from data supplied by breeders. Neither the Australian Limousin Breeder's Society or ABRI oversee or audit the collection of this data.

DETAILS EXPLAINED

LIMOUSIN SUFFIXES - POLL/HORN STATUS

Homozygous polled: PP DNA test confirmed homozygous polled, or an animal is homozygous polled by pedigree as both parents are confirmed homozygous polled.
Polled: P DNA test confirmed heterozygous polled, or animal is untested, information was provided by the breeder.
Polled with Scurs: Ps unrelated to the horn gene, a scur is a small horn like growth that is not attached to the skull. Breeder information indicates animal shows scurs.
Horned: H identified by the breeder as the animal shows horns.

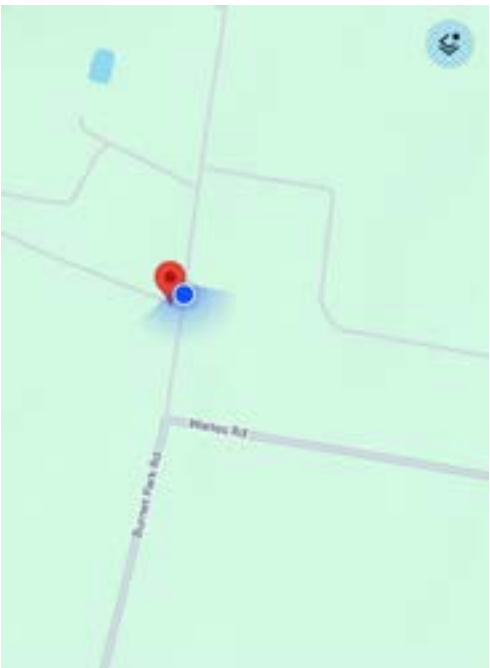

LIMOUSIN SUFFIXES - COAT COLOURS

Homozygous Black: BB Animal is homozygous black by pedigree as both parents are homozygous black or DNA confirms homozygous black.
Black: B information provided by the breeder, or DNA confirms Heterozygous black.
Red: R Identified by details provided by the breeder.
Apricot: A Identified by details provided by the breeder.

LIMOUSIN SUFFIXES - F94L MUSCLE GENES

F94L 2 copies: AA DNA test confirmed carrying 2 copies, or by parentage as both parents carry 2 copies, meaning at least 1 copy is passed onto progeny X with British animals.
F94L 1 copy: AC DNA confirmed animal carries 1 copy. Where animals are crossed with British animals, they may express 1 copy or no copies of F94L.
F94L 0 copies: CC Zero copies of F94L gene present, Confirmed by DNA testing.

We invite you to our Open Day
Sunday 30th November 2025

The open day will be held on property
Opposite 225 Burnet Park Rd., Glengarry VIC.

PRIVATE INSPECTIONS ARE
WELCOME ANYTIME.
PLEASE CONTACT CHERYL ON 0400 905 119 TO
ARRANGE A CONVENIENT TIME.

Nancy isn't the most beautiful cow, but my gosh she is the steer breeding queen. The Dam of Lot 28, she's long, deep, structurally correct with plenty of capacity. Nancy does not have many calves registered to her as they've all been steers. Don't overlook her because of this. AI'ed 18/06 to JYF Gentry, and depastured with MSPPT14 from 08/07-15/08/25. Refer to the supplementary sheet for PTIC status.

Poppy is an embryo cow from a successful implant in 2017 - 5 from 5! She's a larger frame Zambuka daughter, who is structurally sound with a large amount of milk. She was the hardest working cow in the herd this year with the arrival of twins in a very dry season. She poured everything into them and it shows in their weaning weights. AI'd on the 31/10 to JYF Chunk, and depastured with MSPPT12 from 13/11 to 12/12/25.

Myers Gemstone, the impluse purchase on the basis of FOMO at Scott's dispersal. I'm glad I didn't miss out even if she never gave me a heifer, she's done a tremendous job on all her calves, Lot 34 being a fabulous steer. Now, lets get to her incredible square phenotype, she's soft with a neat udder one would expect from a Bank Account cow. Al'ed 31/10/25 to Paynes Dillinger, and depastured with MSPPT12 from 13/11/25 to 12/12/2025.

Raspberry follows a long line of old favourites on the dam side descending from Shalone Candy. She came along right before COVID struck. Her maternal performance has been nothing short of astounding. She is so long, there's two extra ribs. Her milking ability shows in the softness and rapid growth of her calves. MSPPT14, her first calf, is a ripper, He's one of our back up sires, Al'ed 31/10 to JYF Yeildmaster, depastured with MSPPT12 from 13/11 to 12/12/25.

This lady is a unique opportunity for some rare genetics. Watcha is the only heifer to ever be offered from Sandastre Elite. Elite was in great nick, then she calved this sweet girl and the season was against them both. Early weaning this heifer has done her the world of good, however the enviromental damage was done and she's considerably small for age, She will grow into a beautiful, moderate framed cow. She shows great udder development and good Limo shape. She sells unjoined and broken in.
