WELCOME

Welcome to the 2026 Woonallee 19th Annual Elite Production Bull Sale. It is amazing how quickly things can change!

With an above average Spring we now have abundant feed, fat cows and certainly a more positive outlook than the past 2 years. On the back of the seasonal change, the cattle market has also responded positively with weaner sales just starting in South Australia, it is great to see our clients being rewarded financially for quality calves.

The past two years have certainly reminded us of the importance of fertility, feed efficiency and doing ability in your females. Our cow herd has performed amazingly well considering the lack of feed and challenging conditions but have still managed to get back in calf with above 90% pregnancy rate. When looking back at these results it proves to us that rigorous selection pressure annually on the cow herd together with strict mating periods certainly sets your herd up to perform in the tougher years.

Our bull draft is one we are extremely proud of. They have seen some tough times and the Spring calves especially had very little grass until September this year. They have managed to get through really well and although maybe a fraction less weight than normal, they will be better bulls for it in the long run. Once again, only the bulls with the best performance, doing ability and genetic merit have made it to the sale. These bulls are prepared on a corn silage TMR diet which is specifically designed to prepare them for sale in a sensible manner keeping in mind our motto of "We feed to set them up for their whole life not just sale day" will see them present well and have longevity on their side.

The traditional draft is one we have been closely monitoring and we are really pleased with how they have developed. New sire lines include the

first progeny of the \$49,000 Willandra Sebastian PP, Hartfield Salvatore PP and Woonallee Secret Service PP. The entire draft is either polled or Homozygous polled and we are confident they will perform in whatever application needed.

The Black Simmental bulls are again a great set of industry focused bulls with consistency through-out the entire draft. There are plenty of new sire lines on offer including KBHR Global, Woonallee Show Stopper and Gibbs Essential as well as some imported embryos calves from the USA. A high-quality draft of bulls that are continuing to impress us with their performance, doing ability and carcass quality.

The SimAngus bulls are always a feature with many finding it a great way to add a Simmental infusion into their herd. Huge weight for age and with some of the leading sires in the Angus breed being used, these bulls are an impressive group. Heifer options will again be listed in the catalogue from this group with outstanding results achieved by many clients when using these on heifers.

We will be offering 30 females and genetic packages on Wednesday the 11th of February the night before the bull sale. The catalogue will be online only and available on Auctions plus mid-January. We have some special females selected for this sale which will include purebred Black Simmentals, some polled Traditional females as well as some exclusive semen packages.

We look forward to welcoming you to our 2026 sale and please let us know if we can assist in any way.

Regards

Tom and Lizzy

AuctionsPlus

How to Register and Bid on AuctionsPlus

1

Go to **www.auctionsplus.com.au** to register at least 48 hours before the sale.

2

Select **"Sign Up"** in the top right hand corner.

3

Fill out your name, mobile number, email address and create a password.

4

Go to your emails and confirm the account.

5

Return to AuctionsPlus and log in.

6

Select **"Dashboard"** and then select **"Request Approval to Buy"**.

7

Fill in buyer details and once completed go back to Dashboard.

8

Complete buyer induction module (approx. 30 minutes).

9

AuctionsPlus will email you to let you know that your account has been approved.

10

Log in on sale day and connect to auction.

11

Bid using the two-step process – unlock the bid button and bid at that price.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

Email: info@auctionsplus.com.au

SALE INFO

HEALTH

Woonallee Simmentals has a JBAS score of 6 and eligible for all states in Australia including WA. All Bulls have received two shots plus a booster of 7 in 1, drenched with Eprinex Pour On and ear notched tested negative for pestivirus. Bulls have received two shots of Pestiguard with a booster due in November 2026. Bulls have all passed a semen and morphology test conducted by Nationwide Artificial Breeders.

DNA, COLOUR AND POLLED TESTING

All sale bulls have been tested for poll status, a 100K genomic test, sire verified and black bulls tested for colour aswell. This information is in the catalogue.

TRANSPORT

Falls transport will be in attendance and is the recommended carrier for interstate deliveries. Transport costs are the purchasers responsibility. Woonallee will deliver free of charge within a 250km radius of Woonallee.

TRANSFERS

All animals are registered with the Australian Simmental Breeders Association and are eligible for transfer. Please indicate on the buyer's instruction sheet if you would like your purchases to be transferred.

BUYER REGISTRATION

Buyers are requested to register with the selling agent prior to commencement of the sale and to display their registration number at the fall of the hammer. This sale will also be interfaced with Auctions Plus. Please see information on page 5 of this catalogue to register.

INSPECTION AND SALE TIMES

Sale animals will be yarded and available for inspection from 10:30am on sale day Thursday, 12th February. Selling to commence at 1.00pm sharp. Supplementary sheets available on sale day. Private inspection before sale day can be arranged by contacting Tom Baker on 0428 475 066. All times quoted are SA daylight savings time.

GST

All lots are sold exclusive of GST.

PHONE BIDDING

Please contact the selling agent to arrange phone bidding. Sale Complex number (08) 8734 3118 or contact Tom Dennis on 0427 975 207.

REBATES

A rebate of 2% is available to outside agents introducing buyers in writing to the selling agent prior to the sale and settling within 7 days.

INSURANCE

Woonallee recommends insuring all purchases at the fall of the hammer. An insurance representative will be available on sale day to help with this.

GUARANTEE

All cattle sold at Woonallee come with a two year structure and fertility guarantee. In the rare case a bull is found to be infertile or incapable of natural service, Woonallee will refund or replace the bull provided the problem is not caused by injury or disease incurred after taking delivery.

EPD INFO

With the introduction of the IGS performance recording system for Simmental cattle, IGS is the world's largest animal performance recording system.

One of the major changes is the breeding figures being reported as Estimate Progeny Differences (EPDs), rather than Estimated Breeding Values (EBVs). The difference between the two is simple.

Effectively, an EBV is an animal's own genetic value for a particular trait. However, the animal can only pass half of this onto their progeny. EPDs have the "half" already accounted for. That is, an EPD is the genetic merit of an animal's progeny – what they will pass onto their progeny.

Simmental - Traditional, Fullblood and Simbrah Register Breed Average

	CED	BW	WW	YW	MILK	MCE	MWWT	STAY	DOC	CW	REA	FAT	MARB	YG	AAPI	ATI
EPD	5.3	5.6	72.1	101.2	26.6	3.7	62.5	13.6	8.9	20.1	.78	-0.112	-0.09	-0.48	46.19	36.13

Black, Red, SimAngus and SPR Register Breed Average

	CED	BW	WW	YW	MILK	MCE	MWWT	STAY	DOC	CW	REA	FAT	MARB	YG	AAPI	ATI
EPD	10.2	2.3	76.7	115.7	21.2	5.6	59.4	15.4	12.4	28.4	0.82	-0.077	0.10	-0.38	62.19	55.19

Polled and Coat Color Information:

PP - Homo Polled - the bull carries two copies of the polled gene

Homo Polled Homo Polled 100% Polled
Hetero Polled 100% Polled
Horned 100% Polled

Pp - Hetero Polled - the bull carries one polled gene and one horned gene

Hetero Polled Homo Polled 100% Polled
Hetero Polled 75% Polled, 25% Horned
Horned 50% Polled, 50% Horned

Homo Black - the bull carries two copies of the black gene

Homo Black Homo Black 100% Black

Hetero Black 100% Black
Red 100% Black

Hetero Black - the bull is black in color, but carries one black gene and one red gene. Black is dominant to red, so the red color is not expressed when it is paired with a black gene.

Hetero Black Homo Black 100% Black
Hetero Black 75% Black, 25% Red
Red 50% Black, 50% Red

Red - the bull carries two copies of the red gene. This example assumes the bull is diluter free.

Red Homo Black 100% Black
Hetero Black 75% Black, 25% Red
Red 100% Red

Top 25% EPD

PLEASE NOTE THE EPD FIGURES DO CHANGE REGULARLY AS MORE DATA IS SUBMITTED. THIS DOES CHANGE THE RANKING ON CERTAIN ANIMALS. PLEASE VISIT THE ASBA WEBSITE FOR UP TO DATE FIGURES.

WHERE OUR HERD IS TRENDING.

When we looked at these graphs, we thought they would be an interesting addition to show our clients where our female herd is heading from a genetic standpoint. Although we base the majority of our selection and decision making on phenotype, we found it interesting to see the genetic trend heading in the same direction as the females themselves!!!

The key points:

Maternal Calving ease – more than doubled over an 8-year period.

Birth Weight - decreased from +6 to +3 on average.

Weaning Weight – increased steadily over the period.

Carcase Weight – significant improvement.

Marbling – huge jump in this trait.

API & TI – both have improved and API has improved considerably.

We have only highlighted a few of these points however these are also some of the more important traits when looking at a profitable beef herd.

We have been pretty clear in what we are trying to achieve at a seedstock level and that is to produce an animal that is born easily, grows fast and meets market specification at any age.

When you look into what these graphs tell you, it is exactly what we are aiming for. A simple and balanced approach to breeding cattle can sometimes be the best way to go about it!

Donation Lot

WOONALLEE STEVE V099 P

Hi, I am Sarah, Lizzy's sister and like Tom's late father Dale, I have Motor Neurone Disease (MND).

Unfortunately, the average life expectancy after diagnosis is just 27 months. However, like former Essendon footballer, Neale Daniher and with the support of my family and friends I have chosen to fight the disease. Flinders hospital is one of Australia's key research and support sites where I have had blood drawn for testing up to 6 times a day. The research nurses are amazing and their job would be made a lot easier with a specialised blood draw chair as opposed to the pillow on a table we have been using. As farmers we all know how much easier it is if we have the right tool for the job!

Fight MND, run by Neale's daughter Bec, is in her words "a disrupter" that actively spends 80% of their funds on real research to find a cure as opposed to making you comfortable while you die. We have all seen the blue beanies at the football and the "big freeze" fund raisers they have. With the very generous donation of a bull from Tom and Lizzy, we would love to support Fight MND's excellent work too. Just know, your winning bid not only secures you a Woonallee sire with excellent genetics, it also gives hope to MND sufferers and their families that we will find a cure and that in Neale Daniher's words we will "tame the beast" that is MND.

Thank you, Sarah Haslett

The weaning to sale approach of feeding bulls at Woonallee

Eight years ago, Woonallee Simmentals sought our advice at Hills Farm Supplies to look at reshaping the way bulls are prepared for sale.

With this in mind there has been a move away from feeding bulls higher levels of grain in the lead up to sales and instead a much stronger focus on improving pasture, silage and hay quality across the entire year through a committed investment in both time and money grow more grass.

With the outstanding quality of silage and pastures achieved this year, this group of bulls is now entering the pre-sale feeding program with the need to only feed 2kg of barley per head per day as part of sale preparation. That can only be achieved with high quality forages replacing what was once grain in diets. We are proud to say the bulls are exceptionally well fed and well presented, but even prouder to say this is primarily the result of getting better at growing grass.

Bulls are now presented, fit and ready to work, structurally sound, and proven under forage-based systems.

As we work with Woonallee, we are not afraid to feed grain throughout the year if required, but what we do not want to do is feed it unnecessarily in place of the forages we should have grown.

Responsible feeding strategies, ensuring that lifetime production is never compromised.

All bulls have been fed a customised performance mineral and vitamin package throughout the year based on the results of tissue testing pastures and known animal requirements.

We correct any deficiencies and incorporate feed additives that are known to improve rumen function, immune function, hoof integrity and fertility. We are about health and longevity when addressing ruminant nutrition in the seedstock industry and this is why we are very confident that we have just made what has always been a great article even better.

Anthony Pearce

%RK	70	60	3	2	50	60	10	60	15	20	15	60			

NOTES: Black & Homo Polled

An incredible power bull sired by Show Stopper who is fast becoming one of the must have sire options. Extra length and thickness with a little more bone will attract those wanting to add more performance to their herd. A strong headed young sire that has everything needed to fast track your Black Simmental program. Top 2% for yearling, top 3% for weaning & top 15% for docility.

SimAngus Bulls

The SimAngus programme is one that we have been steadily building over the past 10 years.

It's well documented that we have left no stone unturned buying the very best Angus genetics available to help develop this side of our programme and the results have been outstanding. These bulls show explosive growth and performance in a sound, easy doing package that offers so much market flexibility.

An outstanding group of bulls that can be used on cows or heifers.

MultiBoost™ WITH B12

Five-way power to perform.

Copper Manganese Selenium Zinc Vitamin B12

Cattle with high energy demands need all the nutritional support they can get.

MultiBoost with B12 delivers four essential trace minerals and Vitamin B12 in a convenient, low-volume injection. Contact Elanco or your rural supplier today and find out how MultiBoost with B12 can support the health, fertility and performance of your cattle when they need it most.

Elanco

farmanimal.elanco.com/au
1800 995 709

Always read and follow the label directions. Results may vary based on current mineral status and additional sources of trace minerals. 1800 995 709

Always read and follow the label directions. Good agricultural practice is essential for optimal worm control. Reference: 1. Monepantel is a member of the amino-acetonitrile derivative (AAD or 'orange') family of anthelmintics. Zolvix Plus contains 25 g/L monepantel and 2 g/L abamectin. Zolvix™, Elanco and the diagonal bar logo are trademarks of Elanco or its affiliates. ©2024 Elanco or its affiliates. EAH24482 PM-AU-25-0119.

Livestock insurance that fits

In the livestock business, we understand it takes years to breed and produce your stock, which is why it pays to make sure you're protected if the unexpected occurs.
