# WELCOME TO WEERAN ANGUS

Dear Cattle Breeders and Friends

Happy New Year to you all. Firstly, our thoughts are with everybody who has been affected by the horrendous fires and flooding that's going on now as we put together our catalogue. We are thinking of you all and trust that you are getting the support and help needed.

Having just attended a number of weaner sales in Colac, Hamilton, Casterton and Mortlake, it was a real highlight to see the quality of the cattle and the weight in the cattle. For a tough autumn and winter, and a good spring, it is a credit to the cattle and the management to have got them to sale with so much weight and bloom. It was exciting to see the buyers on the rail with animated bidding and enthusiasm from start to finish.

56 sales coming up for the Weeran Angus Team! An exciting time at Weeran! Lucy and Peter Brooker were married on the farm in November, which was a very special celebration with family and friends. We have an outstanding team with Leah, Pete, Luc, Soph, Alec and Jo.

Our herd and program has been significantly enhanced by using our leading yearling bulls to mate our leading yearling heifers. We have stopped ai'ing our yearling heifers, as we feel we can get them in calf quicker, using the tops of the drop each year, and an opportunity for them to shine in our program and sales. They deliver trouble free calvings, and as you can see from this catalogue, the mating outcomes from these multi sire heifer matings have been outstanding. 39 bulls in this catalogue are from homebred sires belonging to 12 clients and some retained for use in the Weeran program.

Our herd focus is unwavering . . . with a focus on calving ease and carcase with as much growth and maternal traits that we can make use of in our own environment. Adding outstanding temperament, goes a long way for increased production and work safety. This catalogue is packed with calving ease, with 57 heifer bulls.

A catalogue full of Sire Verified and Parent Verified bulls is something we are very proud of. This means the bulls we are selling you are 100% guaranteed to be the sire we say they are! To achieve this, extensive genomic testing is undertaken to make our data accurate. Make sure you look for the verification symbols.

Our bull sale will be held on property and online with AuctionsPlus for this sale. All bulls will be on display and our auction will be run by video in our Woolshed beside the display yards.

We invite you to come and inspect the bulls at our Beef Week Field Day on Wednesday 4th February. Even if you are not in the market for a bull this year, we would love to see you for a steak sandwich, coffee and chat. It will be a good opportunity to get everyone together to catch up.

We look forward to welcoming you to our 56th On Property Bull Sale on Tuesday 24th February.

Kind regards  
Alec & Jo Moore and the Weeran Team!

## HEIFER BULL SELECTION CRITERIA

**There are 57 heifer bulls in this catalogue.** Heifer bull recommendations are the combination of Calving Ease EBV's, Birthweight EBV, pedigree history and actual birthweight, which gives us confidence to recommend them for heifer matings!

It is not an exact science, but a recommendation!

## DELIVERY REBATE

**WE HAVE MADE CHANGES TO THE DELIVERY OF ALL SALE BULLS AND THIS HAS WORKED VERY WELL OVER THE LAST COUPLE OF SALES.**

We would like to offer all purchasers a **rebate of \$100** per bull to organise pick up of their own bulls within one week. For those who don't organise their own transport, there will be a charge of \$100 per bull up to 500 kms, for transport to be organised. It is our intention that all bulls will be delivered within two weeks.

**We will organise loads to the same districts to make it cost effective.**

**ALL SALE BULLS COMPREHENSIVELY  
GENOMICALLY TESTED**

Dick Whale 0427 697 968

Brady Hicks 0419 776 606

Gary Webb 0429 615 059

# HEALTH STATUS FOR ALL SALE BULLS

- 1. Semen Quality Tested by Nationwide AB – crushside tested for motility and morphology, alongside with erection examination**
- 2. Two Pestigard Vaccinations and Two Vibrovax Vaccinations to all sale bulls**
- 3. Drenched and 7 in 1 vaccination**

## SEMEN RIGHTS

Weeran retains semen rights on all sale bulls for use in our Weeran Herd. If required, Weeran will organise and collect semen at our expense and at your convenience.

- 4. One Rhinogard IBR Intra-Nasal Spray**
- 5. One Bovi-Shield MH-One**
- 6. All Trace Bolus**
- 7. Backlined with Vetmec Pour On**
- 8. PI Tested Negative**

## GENETIC CONDITIONS

Genetic Defect tested or pedigree free for AM, NG, CA and DD.

## COMPREHENSIVE GUARANTEE & SUPPLEMENTARY CATALOGUE INFORMATION

**IF YOU EXPERIENCE ANY PROBLEMS, PLEASE MAKE SURE WE ARE THE FIRST CONTACT TO ENSURE WE CAN HELP YOU!**

Visit [www.weeranangus.com.au](http://www.weeranangus.com.au) for full details

## IBMS GTS GRADING

### IBMS GENETIC TYPE SUMMARY (GTS)

All Weeran bulls have been assessed on the GTS Type/Structure system. All the bulls in the catalogue are considered acceptable for soundness and muscling. The GTS system has been broken up into two distinctive trait groups.

#### DESCRIPTIVE TRAITS

**Stature** - Evaluation of bulls for maturity pattern and frame size. A maturity pattern 25 is an average frame bull. This score may be influenced by age of dam, nutrition, etc. Scores greater than 25 indicate larger framed, later maturing cattle.

**Capacity** - Bull evaluation combines depth of fore rib along with spring of rib and width of chest floor, as well as depth of flank. Scores greater than 38 indicate larger capacity.

**Body Length** - Evaluation of body length from point of shoulder to pin bone. Scores greater than 25 indicate longer body length.

**Doing Ability** - Ability of an animal to deposit fat in fat depots, relative to their peers under a common management regime.

**Dociity** - Is the temperament of the animal. 1- Very quiet, 2- Slightly fractious, 3- Would rather not be there, 4- Climbing fences, 5- Charging you

**Muscle Score** - Is the muscularity of the bull devoid of subcutaneous fat. Higher scores indicate animals with higher yield and dressing percentage attributes. Scores: 30 = C, 35 = C+, 40 = B-, 45 = B.

**Sheath** - To maximize a bulls effective servicing of cows the sheath needs to be 'tight' and parallel with the underline. The navel must not be too expressive.

Scores:

5 = Excellent: very tight, parallel with underline, very little navel.  
4 = Very Good: tight, almost parallel with underline, slight navel.  
3 = Acceptable: not so tight, angle increasing, some navel.  
2 = Undesirable: pendulous, increased angle, navel very evident.  
1 = Very Undesirable: very pendulous, too much angle, too much navel.

### OVERALL GRADE

**7 excellent, 6 very good, 5 good, 4 average,  
3 and below are not acceptable to be in sale.**

#### Rear Leg Hind View

Bow legged rear leg (BL) Cow hocked rear leg (CH)  
Reference: Direction of the feet when viewed from the rear.

### STRUCTURAL SOUNDNESS TRAITS

The system is aimed at being as simple as possible. All structural traits (front and rear feet, rear leg angle and pastern scores) are presented in the same format. A score of 5 is optimum. Scores of 4 or 6 represent a slight variation from ideal.

**Feet** - Evaluation of the shape and evenness of the front and rear feet, with 5 being ideal. Scores greater than 5 exhibit some scissor claw in feet. Scores less than 5 are open clawed.

**Pastern Angle** - Evaluation of strength of the pastern, depth of heel, and length of foot, with 5 ideal. Scores greater than 5 tend towards weaker pasterns and shallower heel, less than 5 towards being stubbed toe.

**Rear Leg Angle** - Evaluation of the angle through the hock joint. Scores greater than 5 indicate more sickle hocked, less than 5 indicate animals tending toward being straight (post legged).

**Rear Leg Rear View** - Whether the animal is cow hocked or bow hocked. 5 is ideal.

Structure scoring is only given to give potential purchasers a guide, it is not a guarantee of the lifetime structure soundness of an animal. Many thanks to Dick Whale for assessing all sale bulls. WEERAN GUARANTEES!

#### Rear Leg Side View

Straight rear leg (ST) Sickle hocked rear leg (SI)  
Reference: Angle measured at the front of the hock.

Recharge progeny have taken the industry by storm with Cluden Newry Upper-cut selling for \$275,000 in early 2025. Upper-cut has a data profile you could not paint a better picture, with his first calves having hit the ground at Weeran last Spring, there is alot to like. Recharge offers massive calving ease, coupled with a very nice growth curve and outstanding carcass and structure. He is not a one trick pony, with a full list of industry needs. With 7 EBV's in the top 10% and an additional 6 EBV's in the top 20%, he is in demand. He has been used in 97 herds with 2,225 progeny.

The Witherswood Dispersal sale in 2018 gave the industry access to some top genetics. We have been delighted with the donors selected to join our program and to see one of our donors progeny in our reference sire list, Witherswood Bronc! He was 8 weeks old when we spotted him at the dispersal sale and he has grown into a magnificent sire. Bronc has a very balanced ebv graph for calving ease, growth, carcass, indexing and structure. A great allrounder who consistently delivers! His sons always sell very well, and he sired the second top priced bull in the Autumn 2025 sale and top priced bull in the Spring 2025 sale. He has 284 progeny in the Weeran herd.

Sisco was a special purpose breeding project. He was bred to give real impact to our heifer joining needs. Industry leading traits of IMF top 1%, calving ease top 7%, rib top 5% and scrotal top 2%. The results from this two step breeding initiative has been very pleasing. Massive calving ease sire, with calves arriving unassisted and sound, combined with top 1% marbling is a huge bonus.

Mainland was purchased in 2021 in syndication with Bull Oak Well & Mandayen Angus studs. He has an outstanding phenotype with faultless structure, a real athlete. His data set is outstanding combining calving ease with a top 7% growth curve, top 2% scrotal and top 6% eye muscle area. 13 EBV's in the top 20% of the breed. Mainland sired the top priced bull at our 2024 Autumn bull sale and his sons sold well above average in our 2025 sales. Dick Whale has also had him tested genomically using the 10 trait igenity beef profile system where he has excelled for Tenderness with a top score 10/10 along with very good results for Marbling and Carcass Weight. He has been used in 15 herds with 711 progeny.

Myers Fair-N-Square was brought into the program to improve body shape and feed efficiency. He has produced cattle which are as thick as a bluestone block and yield for carcass weight which surpasses expectation. He has a growth curve in the top 4% of the breed and indexing in the top 5%. He was also tested using the igenity genomic test and has excelled for tenderness, marbling, and carcass weight. He has been used in 97 herds with 951 progeny.

ADDITIONAL REFERENCE SIRE INFORMATION CAN BE FOUND ON  
WWW.ANGUSAUSTRALIA.COM.AU

# Recommendations for the introduction and management of your new bull:

## 1. UPON ARRIVAL:

- Ensure your new bulls socialise with a group of animals, (anything except other bulls) in the yards, when they arrive.
- Run the new bulls with a small group of empty females, (he has come from a different herd and may not have had exposure to some of the normal pathogens present in your herd – see further information below).
  - This MUST be done with the empty females, for a period of 2 to 4 weeks.** Ideally the bull can then be rested for 6-8 weeks prior to joining.
  - Ideally give the cows prostaglandin every 2 weeks so they continue to cycle.**
- Ideally bulls should be insured for their first year as standard.

## 2. PRE-JOINING:

- We recommend a breeding soundness examination (BSE), including structural assessment, testicular palpation, service ability testing and semen testing (essential in single sire matings). This is mandatory for second joining and older bulls each year. It will improve the fertility performance of the herd, by removing infertile bulls from the joining group. If bulls are not service tested it is essential that you observe the bulls serve in the first week of joining.
  - These bulls will be given a risk rating and mating potential which will influence joining bull teams.
- Keep vaccinations up to date;** Vibrovax, Leptospirosis 7-in-1, Pestigard and an annual drench, 4-6 weeks prior to joining.

## 3. JOINING - new bulls have the highest risk of breakdown in the herd, this risk can be reduced by:

- PROTECT a new bull by not over-joining, 30 females per virgin bull maximum.**
- Recommended to multi-sire join.**
  - Ideally mixing bulls of different age groups, experience levels and risk ratings.
- It is recommended, IF single sire joining with a new bull, to rotate him with a proven bull for at least one cycle. Also, it is good practice to rotate proven bulls for the last cycle with all new bulls.**

**“Most new bull fertility issues develop or are acquired during the joining period, rather than being pre-existing problems.” This means that bull observation during the joining period is essential!**

### ONCE THE JOINING PROGRAM IS SET UP, MONITORING IS ESSENTIAL TO IDENTIFY ISSUES AS THEY DEVELOP.

Your new bulls need to be run in mobs that are easily monitored, keep them close to promote observation, check them 2 to 3 times a week for the first three weeks and then weekly thereafter. This involves looking for,

- The bull serving, (this has not been successful until the bull thrusts). If bulls are continually mounting without serving it is often a sign the bull has developed a penile infection and needs to be rested and replaced immediately. Sound bulls should serve every 1 to 2 mounts.
- Lameness.
- Evidence of penile or preputial swelling or inflammation.
- Signs of ill health, lethargy, etc.
- Estimate the number of females cycling, (for every 20 females, one cycles each day at the commencement of joining). After three weeks of joining, there should only be one cow cycling every three days in 20 females.

## 4. POST-JOINING:

- Annual breeding soundness evaluation is a non-negotiable procedure.**
  - Good management of bulls is a year-round procedure.
    - Keep bulls in working body condition – they should be in body condition score 3/5 at the start of mating, which will involve removing weight following the joining period.
    - Manage bulls in groups of joining teams to establish stable social hierarchies and minimise bull fighting.
- ✓ Bulls need to be removed from the cows at the same time, to help create their bull mobs. This will limit the number of potential injuries by reducing the number of bull interactions.
  - ✓ Bull paddock management is very important to minimise injury between joinings. The bulls need enough room to reduce fighting, restricted feed and water will increase interaction. Paddocks will require co-grazing with sheep, or crash-grazing by other mobs to manage feed quality and quantity on offer for the bulls.
  - ✓ The target between joining is to restrict weight gain in older bulls to prevent breakdowns. Ideally young bulls have access to a higher level of nutrition as they continue to grow.
  - ✓ Early pregnancy testing is essential for good female management and detection of failures. The earlier the pregnancy testing is undertaken, the more likely the cause of the problem will be identified. This will not only give you early notice of the problem but also help in formulating a plan to help reduce the chance of the problem occurring again in the future.

### PENILE INFECTIONS IN BULLS – “Balanoposthitis”:

Penile infections are a common disease in young bulls during their first joining season in any new herd. Mitigating the risk of this disease as outlined above is essential to reduce the number of breakdowns and optimise bull cost per calf.

These infections are caused by a range of bacterial, viral, and other organisms (“pathogens”). The genital form of infectious bovine rhinotracheitis (IBR; herpes virus) is commonly implicated. The issue is that any given property has its own population of reproductive tract pathogens and if the new bulls make their first contact with these pathogens at the time of high workload (such as joining) they are at a high risk of developing a penile injury.

These injuries typically involve a reddened inflamed penis, developing to ulceration and pustules. Some bulls will stop serving due to pain (will continue to mount, but not serve), but other high libido bulls will continue to serve and create significant inflammation commonly leading to preputial tears, abscesses and prolapses. These are often perceived to be a “broken penis”, and **IF treated promptly may regain normal function!**

Treatment involves prompt removal of the affected bull from the joining mob, sexual rest (typically for the remainder of the joining) and treatment with antibiotics and anti-inflammatories. Preputial prolapses require surgical reduction.

If undetected these injuries commonly cause a significant decrease in pregnancy rate and commonly result in permanent infertility in the bull. **Observation and intervention are essential!**

Prevention of this condition is best achieved as outlined above, by deliberate pre-exposure of new bulls to a small number of females (low workload) well before the joining so that they are exposed and can develop immunity to the herds’ pathogens prior to the high workload of the joining period.

Positive fertility outcomes are a significant driver of profitability in beef breeding enterprises, but this requires informed and active management!

HVC Production & Breeding.

## How to register as an AuctionsPlus user/buyer

BIRTH			
Calving Ease Direct	(%)	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
Calving Ease Daughters	(%)	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
Gestation Length	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
Birth Weight	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
GROWTH			
200 Day Growth	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
400 Day Weight	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
600 Day Weight	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
Mature Cow Weight	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
FERTILITY			
Days to Calving	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
Scrotal Size	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
CARCASE			
Carcase Weight	kg	Genetic differences between animals in hot standard carcass weight at 750 days of age.	Higher EBVs indicate heavier carcass weight.
Eye Muscle Area	cm <sup>2</sup>	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate larger eye muscle area.
Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more fat.
Rump Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcass.	Higher EBVs indicate more fat.
Retail Beef Yield	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcass.	Higher EBVs indicate higher yield.
Intramuscular Fat	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more intramuscular fat.
FEED EFFICIENCY			
Net Feed Intake (Feedlot)	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.

Buyer ..... Price \$ .....

The first of the Recharge sons and we are super excited with his progeny. We have a number of cracking bulls by Recharge in this sale. He is not a one trick pony. He ticks many boxes. He was the top selling sire in the 2025 Spring Bull Sale. V75 is an excellent HBR son of Recharge, out of donor dam P101 who has already produced sale quality bulls. Grand dam goes back to the well known Coolana Angus Stud. A top grade of 7 by Dick Whales GTS grading, with very good feet and leg structure. A calving ease bull with balanced data. Used at Weeran!!

An awesome HBR Recharge son. V70 is the natural calf by Donor Dam R65, and goes back to grand dam Witherswood Wilcoola L0186 who has produced 22 progeny, with some ripping sale bulls already through the system. Look at the data profile . . . 10 ebv's in the top 20% for the breed, and with that comes excellent feet, legs and pasterns. His structure ebv's are top 1 and 2% for the breed. A top GTS grade 7. Used at Weeran!

V123 is a HBR Recharge son out of our donor dam R56 who goes back to our lead donor dam Witherswood Wilcoola L0186 who has so many runs on the board. Very consistent breeding by Recharge. A top GTS grade 7 backed by very good structure ebv's. V123 has a large frame who will grow on, and very good forward of the shoulder. All growth ebv's in the top 5% for the breed, with very good carcase weight top 7% and fantastic indexing all in the top 10% for the breed across all ten indexes. Used at Weeran!

Witherswood Bronc needs no introduction. A sire that has been so successful at Weeran over many years, with many sons in our lead sale bulls. He topped the 2025 Spring Bull Sale, along with Sterling Pacific. 30 bulls by Bronc already out breeding on for clients. He is a great allrounder. V179 is out of a Boonaroo Gravity daughter with this being her first male calf. He is a long bodied large frame bull, with excellent feet, and dead dog quiet. Calving ease with very nice growth, carcase weight top 2% for the breed and excellent indexing. Used at Weeran!

Landfall Mainland has made a huge stamp already on the syndication herds breeding so consistently. Client feedback is fantastic on his progeny. A calving ease HBR son of Mainland who is well muscled with good capacity. Going back to the Weeran Lady family with the Grand Dam producing 6 sale quality bulls herself. Calving ease perfect for your heifers, with a huge EMA being the best in the catalogue and in the top 2%. Used at Weeran!

Weeran Significant S331, a Quarterback son, purchased by the Osbourne family, who have purchased bulls from Weeran over many years. V12 is out of a first calf heifer and is the second sale bull by 5 year old Grand Dam . Unbelievable calving ease with b/w in the top 1% and EMA top 11%. Well muscled with very good feet. A good set of canon balls under him with a good Scrotal EBV to back it up. Used at Weeran!

Weeran Sisco S142 was retained to add calving ease, structure and elite marbling. We are looking forward to seeing more progeny coming through. Out of a Mainland daughter, they have produced a son with fantastic calving ease. Look at those canon balls . . . 44cm...no wonder he has a top 1% scrotal ebv for the breed! He is an early maturing type, very sound footed, fat positive and excellent IMF in the top 5% for the breed. Used at Weeran!

A very nice data set for this Bronc son, who has an above average frame with good structure and a very good muscle pattern. Dam Q159 has 5 progeny with V148 being the second of three males to reach bull sale quality. The 3rd male is a yearling also by Bronc. Excellent calving ease for your heifer calving, with good growth, excellent Carcasse weight, EMA and Retail Beef Yield. Excellent GTS grade 6.

Wow there is some power here, let alone that set of coconuts under him!! He will be strutting his stuff at 43cm! By our homebred sire Weeran Sisco and out of a first calf heifer. He is an absolute power house with 200, 400 and 600 day weights all in the top 1% for the breed. Large framed, excellent capacity and very good body length. No surprise Scrotal is in the top 1%, along with carcasse weight top 1%, throwing in good IMF as well. Very nice nature with good docility. A top grading 6.

Massive calving ease in this son of Weeran Significant out of a Myers Fair N Square daughter, being a first calf heifer. Birthweight is top 1% for the breed along with very good Calving Ease Daughters and Direct. A good growth curve with such a low birthweight. Heavily muscled and very strong down the backline with a very good loin. Positive fats for both Rib and P8 being top 1% and 3% respectively.

Massive calving ease with this son of Weeran Sisco out of a first calf heifer who's dam is one of our donors, Anvil Wilcoola L032, who has 19 progeny through our program. A number of L32's sons have reached sale quality. Very good structure and milk, with an extremely impressive IMF in the top 1% for the breed and is the highest in this catalogue.

The first of the spring drop bulls to be offered in this sale. A line of bulls we are very excited about. Myers Fair N Square combined with Musgrave Big Sky have produced a young bull with very good muscle expression, with good body length and excellent capacity. A lot to like about him. This is the third male calf out of N442 to reach sale quality. Very good growth, particularly 400 and 600 day weight in the top 9%, very good carcase weight, and excellent structure with ebv's to support it. Very quiet. A very high grading 7 from Dick Whale.

V451 goes back to Coolana on the sire side and Landfall on the dam side. An impressive pedigree. Out of a first calf heifer, he has a beautiful skin, very nice body length and capacity, and good forward of the shoulder. A good set of coconuts with an ebv to back him, with an excellent Retail Beef Yield at top 4%. Good temperament and a high grading 7.

Plenty of grunt here with V486 out of a first calf heifer. We have to say across the catalogue there are many first calf heifer sons who have made it to bull sale quality. You can't get any better growth than this... 200, 400 and 600 day weights all in the top 1% for the breed!! Look at that 600 day weight... 178!! Wow! He has excellent feed efficiency with nfi in the top 7% and a carcase weight in the top 3% and retail beef yield top 7%. He is very quiet and a top grading 7.

Vermont is by Quidditch who has had a number of bulls through the sales recently who have sold very consistently. V623 goes back to grand dam H225 who had 8 progeny with 3 out of 4 male calves reaching bull sales. Bronc also on the dam side. A nice bull, long bodied with good capacity. Very good feet with a high GTS grade 6. Calving ease, good feed efficiency and an excellent Retail Beef Yield in the top 4% of the breed.

Recharge is breeding very well for us and making his stamp. V346 is another very good example of his breeding. On the dam side, N411 has had four male calves with three reaching bull sales and the fourth a yearling. Excellent calving ease for your heifers with an actual birthweight of 32kgs for V346 at birth. NFI very good top 12% with positive fats and good IMF. Very good feet and legs grading an overall top 7.

A very nice young gun by Weeran Tooma out of a first calf heifer. Great to see so many bulls by our first calf heifers. Weeran Vibrant has a nice soft muscle pattern with good capacity. Very good feet grading an overall 6. Fantastic calving ease and a great heifer bull. An actual birthweight of 32kgs at birth, and a birthweight ebv in the top 3% for the breed. Gestation length also very good. A nice growth curve when you consider the 0.1 birthweight ebv. Milk top 7% with a fantastic EMA in top 10% and Retail Beef Yield top 6%. Plenty to like here with V448.

Buyer ..... Price \$ .....

Grand sires Connamara P64 and Barwidge Q Jackman combine to produce a nice moderate frame bull with an excellent data profile. Calving ease with an actual birthweight of 31kgs, with a very nice growth curve with 600 day growth in the top 10%. NFI and Carcase weight both very good, and fat positive.
