

AMARULA

DORPERS & WHITE DORPERS

**23RD ANNUAL ON-FARM
RAM SALE**

Friday 6th February 2026 1.00pm

WELCOME TO AMARULA DORPERS

Dorpers became part of our lives while travelling South Africa in 1999. A farm visit to leading South African Dorper breeders, Tien and Margaret Jordaan, changed the direction of our lives. Tien's enthusiasm and passion for dorpers was contagious. It quickly became apparent that Dorpers were not only robust and fertile, but also exceptionally well-suited to challenging environments - qualities that held great promise for Australian conditions. We were hooked!

Amarula Dorper Stud was established in 2000, beginning with just six foundation ewes. Over the past 25 years, the stud has grown steadily through disciplined selection for structure, growth, carcase qualities and fertility. Combined with practical decision-making, and a clear focus on commercial relevance to the lamb industry.

Like many producers, our journey has included droughts, industry scepticism toward a new breed and the challenges of raising a family alongside building a stud enterprise. The progress achieved today has been earned through persistence, a long-term commitment and belief in a breed, that has changed the evolution of sheep in Australia.

The past 12 months have marked a significant phase of expansion, driven by increasing demand for **Amarula Dorper and White Dorper rams**, across a wide range of production systems. To support this growth, Amarula Dorpers has scaled and now operates across two locations:

📍 GLENAVON, GRAVESEND, NSW, 2401 - North Western Slopes and Plains

📍 SANDHURST, QUAMBONE, NSW, 2831 - Central West

This growth has enabled an increased supply of high quality, fullblood rams, run under commercial conditions. Our aim is to provide Dorper breeders across Australia, large or small scale, with genetics they need to succeed.

Amarula Dorper and White Dorpers invite progressive sheep producers to our 23rd Annual Ram Sale, offering a carefully selected draft of high-performing Dorper and White Dorper rams bred for fertility, growth, carcass yield, and adaptability under commercial conditions.

PROVEN GENETICS. COMMERCIAL PERFORMANCE. STUD INTEGRITY.

2026 AMARULA RAM TEAM

At Amarula, our program is built around one clear objective: **to produce rams that deliver measurable commercial outcomes**. For over 25 years, we have focused on breeding Dorpers and White Dorpers that thrive in real-world Australian conditions - rams that work hard, last longer, and add value across the supply chain.

The rams offered in this catalogue are the result of disciplined selection for **fertility, carcass balance, growth, structural soundness, fat cover, and longevity**. Amarula rams are designed to work across a wide range of environments. They are bred and run under commercial conditions to ensure they are fit for purpose from the day they are joined. Our emphasis on non-seasonal fertility and functional conformation ensures Amarula rams are reliable breeders, capable of producing consistent lambs for both domestic and processor-driven markets, to suit both grass-based and mixed systems.

This year's offering of **200 Dorper and White Dorper rams** represents the depth and maturity of our breeding program. The depth of quality allows buyers to source uniform lines of rams with confidence, whether restocking, expanding, or upgrading flock genetics. Whether you are a long-term client or attending for the first time, you can buy with confidence knowing these rams are backed by experience, proven performance, and a strong commitment to our commercial customers. We welcome all buyers seeking proven Dorper genetics that perform where it counts—in the paddock and on the hook.

The last month there has been some tough conditions with very high temperatures, but Amarula dorper rams are bred for heat tolerance and continue to thrive.

To assist buyers with ram selection, we provide both **visual assessments and genetic breeding values**.

All rams are assessed using the **Dorper Typing System** and **ClassiMate scoring**, giving buyers clear insight into each ram's conformation, balance, and functional strengths. These traits underpin **structure, capacity, performance, and longevity**.

Amarula rams are also **performance recorded through LambPlan, genotyped**, and most **DNA parent-age verified**, delivering more accurate genetic information, including eating quality traits. Ongoing data collection remains a priority as we continue to improve key economic traits such as **fertility, growth, and muscling**.

Our breeding objective is a **well-balanced Dorper type** that delivers consistent performance across all traits—not selection driven solely by high growth or high ASBVs.

We look forward to welcoming you on sale day and assisting you in selecting rams that will move your breeding and production system forward.

The Amarula Team

SALE INFORMATION

SELLING AGENT

Nutrien Narrabri, 12 Frances St, Narrabri
Matt Collett 0427 311 415
Email: matthew.collett@nutrien.com.au

AUCTIONEER

Nutrien Stud Stock Dubbo
John Setttee 0408 297 368
Email: john.setttee@nutrien.com.au

REBATES

2% Rebate to outside agents registering RAM BUYERS, in writing 24 hours PRIOR to the Sale or in person on sale day and settling on their behalf within seven days of the date of Invoice.

To claim a rebate, a letter of introduction needs to be emailed to Matt Collett, Nutrien Narrabri.

SELLING SYSTEM

Sale of rams will be conducted on site under normal auction conditions and also interfaced with AuctionsPlus. Each Lot will be sold separately. There is live streamed video and audio.

Please register online at <https://auctionsplus.com.au/register> at least 48 hours prior to the sale.

Please check with the Selling Agents to obtain a buyer's number if you are considering making a purchase. Successful purchasers are requested to give written advice to the Selling Agents regarding transport arrangements at the conclusion of the Sale.

VISUAL EVALUATION

Amarula Dorper and White Dorper rams chosen in the Ram Sale Team, have been selected by Justin and Lorroi.

DORPER TYPING SYSTEM - Christo Harmse, a DSSA Dorper Inspector, visually assessed rams under the Dorper Breed Standards, for correct conformation and carcass traits, on 19/01/26.

CLASSIMATE - Visual Data Assessment App, was also utilized to give you specific information on the rams' conformation. This is presented with a score and a visual graph to identify where the strengths and weaknesses are of each individual ram. Justin performed the Classimate scores.

Both systems used together give the purchaser confidence they are making the right choice.

ANIMAL HEALTH AND QUALITY ASSURANCE

LAMBPLAN RECORDED - Performance recording

DNA GENOTYPING - Parentage test and eating quality trait information

OVINE BRUCELLOSIS ACCREDITED FLOCK, OB-TR CERT 76671 EXPIRY - 30/09/28

ON FARM BIOSECURITY PLAN

VET CHECK

VACCINATION PROGRAM

GLANVAC 6in1 - 20/12/25

SCABBYMOUTH

BARBERVAX - 20/12/25

DRENCHED - ZOLVIX PLUS 20/12/25

SEMEN RIGHTS

AMARULA DORPERS reserves the right to collect semen from any ram offered, for use within own flock (unless otherwise stated). This collection of semen is to be done at the convenience of the purchaser and at the cost of Amarula Dorpers.

OWNERSHIP & INSURANCE

Ownership of the ram/s falls to the buyer at the fall of the hammer. Insurance of rams against injury or death including during transit is the responsibility of the purchaser. Please insure your rams against loss of use and transit insurance from the fall the hammer on sale day. For information on Nutrien Insurance please see the Nutrien Livestock Specialist at the Sale.

DELIVERY

We take care in the efficient delivery of all stock after the sale. Nutrien agents will be handling the delivery of rams after the sale.

NO STOCK WILL BE LOADED UNTIL AFTER THE SALE IS COMPLETED!

FREIGHT AND TRAVEL

We are willing to hold animals for a reasonable period to allow for coordination of transport to their new home. We can provide recommendations of suitable stud stock carriers and will assist wherever we can for a safe and efficient transport of animals to your home property.

All due care will be taken for the safety and health of your purchased rams prior to pick up or delivery, however, to protect your purchase, you may wish to consider insuring your rams from the conclusion of the sale.

FREE DELIVERY RUNS TO MAJOR CENTRES IN NSW AND QLD AND ON ROUTE

GUARANTEE

Any ram which proves to be structurally unsound, infertile, or incapable of service (not resulting from an accident), is guaranteed. The guarantee shall apply providing the rams incapacity is not caused by injury or disease contracted since leaving AMARULA.

The guarantee covers the purchase value of the ram. **This does not cover infertility due to injury, misadventure or disease contracted since the sale of the ram or ewe. Insurance covers this.**

The ram shall be returned in the event of an animal failing to breed and either be replaced with an animal of comparable value or credit to the full purchase price will be given at the following sale or on a private sale animal (if available).

NO COLOUR GUARANTEE - Due to the genetic makeup of the White Dorper, some rams may throw red colour. It is usually light and fades with maturity. They will have no issues with cancer due to excellent pigment

LUNCH & REFRESHMENTS

All refreshments and drinks are provided by Amarula Dorper Stud. We have smoked Amarula Dorper Lamb on the menu, handed out by Westpac Helicopter rescue service volunteers. Stay and join us after the sale for refreshments sponsored by Suncorp Bank.

Disclaimer Every effort and all reasonable care has been taken by the vendor to ensure that the information provided in this catalogue is correct at the time of printing. However, neither the vendor or selling agents take responsibility in regards to the accuracy, reliability or completeness of the information provided, and do not assume any responsibility for the use or interpretation of this information. You are encouraged to seek independent verification of any information contained in this catalogue.

LAMBPLAN - SHEEP GENETIC ASBVS

Australian Sheep Breeding Values (ASBVs) are an estimate of an animal's genetic potential to pass on traits to its progeny. ASBVs are calculated by predicting the genetic merit of economically important traits. The important information accounted for:

- ◆ Pedigree (genes) - genetic relationships between animals, including sire and dam.
- ◆ Performance recorded information (weights, scanning for fat depth and muscle, birth type)
- ◆ Contemporary Groupings - All compared animals must be raised in the same conditions to minimise environmental influence. Also takes into account birth type, old or maiden mother.
- ◆ Genetic linkages - data from related animals across different flocks make the ASBVs a more accurate prediction.
- ◆ Heritability and correlations - adjusts for known genetic correlations.

They are essentially a projection of how that animal's progeny will perform for a range of traits. ASBVs provide a measure of the animal's genetic potential, independent of environmental influences, that can affect the physical appearance.

It is important to know that ASBVs are a tool for breeding sheep, they do not provide all the answers. Visual selection is very important to cull sheep that will not be functional in a commercial production system, regardless of how good the ASBVs are.

Key benefits of using Lambplan in a commercial flock:

Genetic evaluation - Lambplan provides a comprehensive genetic evaluation system, allowing producers to analyze a ram's genetic potential across multiple traits like growth rate, carcass quality, and through ASBVs

Improved selection - Utilizing Lambplan data allows for informed ram selection, choosing rams with the most desirable genetic traits for the specific **production goals of the flock**.

Market suitability - Commercial producers can use Lambplan to identify rams that will produce lambs meeting specific market requirements.

Genetic Progress - By consistently selecting rams with high ASBVs, producers can accelerate genetic improvement within their flock over time.

A balanced set of selection criteria is essential. It is critical not to chase excessive traits such as high growth, if your environmental conditions and feed availability do not suit. It is better to have good muscling and positive fat cover for when times are tough, than animals that are too big and can't cope when it gets dry.

TRAITS MEASURED

There are a variety of traits can be measured and recorded. Data we collect includes:

Parentage - Sire and Dam, Date of Birth, Birth Type, Birth Ease, Rearing Type to weaning

Weights - Weaning (WWT), Post Wean (PWT), Yearling (YWT)

Carcase - Post Wean Eye Muscle depth, Fat - Post Wean Fat Depth

Scotal Circumference, Faecal Egg Counts - resistance to internal parasites.

Shedding and Cover Score - Birth, Weaning, Post Wean & Adult

WEIGHT ASBVs describe the animals' genetic merit for growth rate.

WWT - 100 days PWT - 225 days YWT—365 days

Rams with more positive ASBVs produce lambs that grow quicker & reach target weights quicker.

CARCASE FATNESS ASBVs describe the value of an animal's genes for fat depth at a constant weight. We recommend a positive PFAT

- ◆ survive better in tough conditions and dry times.
- ◆ Fat increases the ability of breeding ewes to maintain weight and condition, conceive twins, better milking and mothering ability and survivability.
- ◆ Increases the eating quality due to intramuscular fat.

CARCASE MUSCLING ASBVs describe the value of animals' genes for eye muscle depth at a constant weight – a positive ASBV means a genetically thicker-muscled animal, and one that will have slightly more of its lean tissue in the higher-priced cuts.

PEMD - Rams with more positive ASBVs for eye muscle depth (EMD) produce lambs that have a higher lean meat yield.

- ◆ Increases the value of the carcass, by increasing the amount of lean meat it contains and increases dressing percentage.
- ◆ Increases the amount of meat on higher priced cuts. Higher muscling is favourably related to reproductive rate.

WORM EGG COUNT (WEC) ASBVs describe the value of animals' genes for carrying worm burdens a combination of being genetically less likely to pick up worms and being better at getting rid of them. Resistance can result in fewer drenches being required each year. The best way to increase the genetic resistance of your flock to worms is to use rams with better than average worm resistance.

Worm Egg Count (%) - Rams with more negative WEC ASBVs produce progeny who have a higher genetic potential to resist worm burdens.

MCP INDEX (MATERNAL CARCASS PRODUCTION)

MCP is designed for a self-replacing maternal flock, with a carcass production focus. Both carcass traits (ie muscling and fat) and reproductive efficiency are key priorities. It balances growth rate (for early growth rate), muscling (improved carcass yield), fat depth (for body condition & survival in dry times) and reproduction (maintain fertility).

The index aims to maintain adult weight at current levels. It tries to achieve an optimal balance across all these traits to improve your profitability

GENOTYPING—DNA COLLECTION

Collecting DNA from our ewes and rams is allowing for accurate parentage and to assess their genetic makeup. This in turn increases the accuracy of ASBVs.

Genotyping reports on the key drivers of sheep meat eating quality with values for lean meat yield, intramuscular fat and shear force.

We join ewes with lambs on them in multi-sire groups for ease of management and to mimic commercial reality. DNA parentage testing can relieve some management constraints from multi-sire lambing to obtain accurate parentage.

How to register as an AuctionsPlus buyer

01.

- ✓ Create an account on AuctionsPlus
- ✓ Verify your email and phone number

02.

- ✓ Enter your PIC number, ABN, and business details if applicable
- ✓ Read and accept the user rules and responsibilities

03.

- ✓ Finalise registration by completing the user quiz

THANKS FOR YOUR PURCHASES.
NOW ENJOY SOME DRINKS ON US!

Let your PASSION
be your reason
for EXISTENCE
and your SUCCESS
the product of
PERSISTENCE.

Our annual sale would not be as successful, without our amazing team around us. A massive thankyou to all our family, friends and helpers that make this sale possible. We could not do it without you.

A heartfelt thankyou to the Nutrien Team that has been with us from the beginning. Their unwavering support of our genetics, has been crucial in the advancement of our Stud and having successful sales year after year.

Welcome to all new clients, starting their journey with us. We pride ourselves in providing help and guidance when it is needed. Justin does like a conversation about all things Dorper.

Lastly thankyou in advance to all our existing clients that have stuck with us through thick and thin. We would not be where we are today without you. Our objective is to bring you along our journey of breeding the best dorpers in Australia, with high fertility, non-seasonal breeding, fantastic mothering and the ability to adapt and perform in our variable environments.

THANK YOU TO ALL WHO ATTENDED OUR 2026 SALE

**We wish successful purchaser's all the
best with your Amarula Rams!**
