# SALE INFORMATION

## STARTING TIME:

Sale Commences at **2.00 pm** with Commercial heifers followed by the Bulls

## VENUE:

This Bull Sale will be held at Banquet, 184 Steeles Lane, Mortlake, Victoria.

## INSPECTION:

We encourage buyers to inspect the bulls prior to Sale Day. It allows us to discuss your program and assist you in selecting bulls to suit your requirements.

Lots catalogued are available for inspection prior to Sale Day at our Bull Walk Day from 1.00pm to 4:00pm Thursday 19th February.

Or at another convenient time, please phone us to make an appointment.

Sale day inspection from 11.00am.

## CATERING:

Light lunch will be available and refreshments after the Sale.

## FREE DELIVERY:

Banquet offers free delivery to the buyer's nearest town on route to Adelaide, SA and Emerald, QLD and to the property within Vic.

## BULL TESTING:

All bulls have passed a comprehensive fertility test conducted by Dr. Craig Wood and Dr. Libby Summerell of Terang Mortlake Veterinary Clinic including – examination for structural soundness, examination of reproductive organs, measurement of scrotal circumference. They were also checked for semen motility and morphology.

### Semen Motility

Sperm cells need to be motile. At about 60um long, they've a way to travel to get the job done. Following collection of a semen sample, a drop is placed on a microscope slide and examined, 'crush side', to assess the percentage of sperm cells moving forward.

### Semen Morphology

Morphology is the anatomy or structure of the sperm. It cannot be tested 'crush side' requiring a large specialised laboratory microscope to examine a preserved semen sample, assessing the % normal and % abnormal sperm cells. It can pick up defects in the sperm that 'crush side' testing cannot. The most serious of these defects can see the sperm start to fertilise an egg but fail to result in a viable embryo and the female will fail to fall in calf. Note that Semen Morphology can differ in subsequent samples from the same bull. Stress can cause this and putting a bull through a sale will generally cause some stress.

## SEMEN RETAINED:

Banquet will retain semen from some of the bulls in this Sale for within herd use only. These bulls will be nominated on the supplementary sheet.

## THE BANQUET BULL GUARANTEE:

All bulls are backed by a 3 YEAR GUARANTEE. In the event of a bull proven to be incapable of natural service the vendor can either offer a suitable replacement if available or issue a credit for future sales. The credit is a pro-rata value of the bull minus the salvage value. The guarantee can only apply if the bulls' incapacity is not caused by injury or disease since taking delivery. Any claim must be accompanied by a relevant veterinary certificate. The vendor retains the right to obtain independent veterinary confirmation of any claim.

It is important to understand that normal care must be taken, and good husbandry practices observed, as we cannot replace a bull that is injured or dies for any reason. As such, we recommend you insure animals against injury. A representative of an insurance service organisation will be available on Sale Day.

# SALE INFORMATION

## NATIONAL CATTLE HEALTH STATEMENT:

Banquet has its own Biosecurity Plan prepared in conjunction with our local vet Dr Craig Wood. We are a J-BAS 6 herd. See page 71 for our National Cattle Health Declaration.

## STOCK HEALTH:

All bulls have been tested negative for Pestivirus. They have also been vaccinated with Pestiguard vaccine (pestivirus), Vibriovax (vibriosis), 7 in 1 Vaccine (leptospirosis) and drenched with Dectomax. Any animals purchased for Queensland will be vaccinated against 3 day sickness and receive the 3 germ tick vaccine upon request.

## RECESSIVE GENETIC CONDITIONS

All animals in this Sale are free of AM, NH, CA and DD by parentage, or have been tested free.

## NO CARRIER ANIMALS ARE BEING OFFERED FOR SALE

## REBATE TO OUTSIDE AGENTS:

Outside agents accompanying a purchaser to the Sale are entitled to a 5% rebate. Please refer to page 4 for further detail.

## AFTER SALE SERVICE:

Banquet is renowned for excellence in providing after Sales service. If in doubt, speak with us or with any one of our many satisfied clients.

## FURTHER INFORMATION:

Contact Stephen, Noeleen or Hamish Branson

Phone: 0419 884 839, 0437 029 992 or 0427 164 031

Email: [banquetangus@westvic.com.au](mailto:banquetangus@westvic.com.au)

# OUTSIDE AGENT COMMISSION REBATES

5% rebate will be paid to all agents that attend and who purchase with or on behalf of their clients and settle within seven days of sale date.

2% rebate will be paid to all agents introducing clients that purchase but not accompanied by them to the sale. A written introduction must be received by the vendor 48 hours prior to the sale and accounts must be settled within 7 days of the sale date.

# SIGHT UNSEEN PURCHASING PROGRAM

100% satisfaction guarantee.

Available to buyers who cannot attend the Sale.

For those purchasers who have discussed their requirements with us prior to the Sale we offer a 100% money back guarantee if the purchaser is not completely satisfied with their purchase. We must be notified within seven days of taking delivery. However the purchaser will be responsible for return transport costs.

# WELCOME

## Welcome to our 2026 Autumn Bull Sale Catalogue.

I greet every New Year with a mixture of excitement, optimism and "Old Man" pessimism. This time last year we had experienced a below average rainfall season. Luckily Mortlake managed a couple of rain events that allowed us to sneak through with reasonable pasture and were able to conserve good quality feed. For our many friends further West in Victoria and in South Australia 2024 was dire. Considered more devastating than 1967. For an old S.A farmer 1967 was legendary as the "greatest" drought year ever witnessed.

In January 2025 dry feed was rapidly disappearing, but I was optimistic of an "early break" in the season. Oops, wrong again!! By the time we received good rain in June, Mortlake had endured the driest 24 month period since records began. Everyone suffered physical, emotional and financial hardship to some degree. Our hearts go out to those families who had an empty chair at Christmas.

As has always been the case in Ag, things keep changing! In Southwest Victoria the Spring of '25 will be long remembered as a great one. Pasture, silage, hay and grain yields have been unprecedented. Of course, a Spring like that can only be followed by a very dangerous Summer. Sadly, large areas of Victoria have suffered the cruel devastation of wildfires. Our heart goes out to all those who have lost so much or have risked so much to help our fellow Australians. I urge you all to tell your stories of the devastation, the terror and the aftermath. Tell your stories so others can learn and prepare.

### OPTIMISM:

Even I get optimistic at times. For the last few months, I have really enjoyed the Red Meat Market. Trade cattle, cows, lambs and mutton are selling so strongly. And the predictions for the future are staggering. Some commentators are suggesting Angus feeder steers will attract \$6.50kg this Spring and \$7.40kg in 2027. \$3,500 for 480kg feeder, Wow! Too good to be true I hear you say. Might be, after all some Politician or dictator will probably do something to stuff it up. But even so I would take \$2,500 or \$5.20 for feeders for the next few years.

Caring thoughts and best wishes  
Stephen, Noeleen and Family

# Nana & Papa's Brag Page

Over the last six years this welcome could be rebranded as "Papa's Brag Book".

This year is no exception

#6 Millie Claire Meulendyks joined the team on the 18<sup>th</sup> of August 2025.

The fourth daughter for Josh and Dianna.

#1 Tessa Meulendyks - progresses to Grade One

#2 Ava Meulendyks - starts Primary School

#3 George Branson - starts 4yr old Kindergarten

#4 Ellie Meulendyks - starts 3yr old Kindergarten

#5 Matilda Branson - starts Day Care

Noeleen and I love our three kids deeply  
but Grandkids, that is a whole different level

*To anyone who is considering  
Grand children, just do it.  
Whether you breed 'em,  
borrow 'em or steal 'em  
just get on to it.  
For Papa, grandchildren  
are the "meaning of life".*

70 COMMERCIAL ANGUS HEIFERS  
RISING TWO YEARS - PTIC

Banquet Yendi D351

Banquet Duncan D412  
Sire: BANQUET JAMBEROO J507  
Forres Wilcoola D107

It is the consistency of the progeny of Nuttella that makes him such a super sire. Bulls that produce consistent lines of progeny are so much more valuable. N462 consistently adds thickness, depth and do ability to his progeny. He also improves structure and temperament. We rate Nuttella as the best sire we have used at Banquet. N462 sons achieved top prices at our Autumn 2022 Sale at \$62,000 and \$60,000. In our Spring 2022 Sale a son topped at \$65,000. In our 2023 Spring Sale a son topped at \$42,000. Sons sold to \$40,000 in our Autumn 2024 Sale. Another Nuttella son topped our 2025 Autumn Sale at \$64,000 to Camp Creek. Most recently a Nuttella daughter topped the World Angus Expo Sale at \$134,000 to Ballawinna Angus. A half share in another daughter was sold for \$50,000 to Jones Farms. 15 sons will be offered in this Sale.

Anvil Emblynette E199

Banquet Jamberoo J507  
Sire: BANQUET NUTTELLA N462  
Banquet Yendi K224

Statesman S154, was retained and used at 15 months of age over first calvers. He was selected for his powerful head, strong spine, wide top, big loin, tight sheath, huge hindquarter, lovely docility and a great pedigree. He has stamped all his progeny with all these great traits. His first sons featured in our Autumn 2025 Sale. S154 is breeding very consistent just like his sire, Nuttella N462. We rate N462 as the best sire we have ever used. Now his main sons S005, S154 and S439 are close to his status. Dam of S154, Emblynette P177, was purchased as a calf at foot from the Anvil Dispersal. P177's sons have sold to \$40,000 twice and averaging \$33,500. 9 sons will be offered in this Sale.

Banquet Quiet A172

Sufficient S231 is a longer, larger framed and fine shouldered son of Jamberoo J507. S231 is smooth bodied and maternal while still displaying adequate muscle expression. His sire J507 has bred extremely well at Banquet, we have used ten sons in the herd and his daughters are magnificent. S231's dam, H492 comes from the great Quiet cow family. H492 was a fantastic long, clean fronted and maternal cow. S231's maternal half brother Placid P009 sold in 2020 for \$22,000 to Fernleigh Angus, Another maternal half brother, Uplifted U008, topped our Autumn 2025 Sale for \$64,000 to Camp Creek. S231 has added length, frame and muscularity into his progeny. 5 sons will be offered in this Sale.

Sensation S005 was the star of our Spring 2022 Sale. He made a new record when he sold for \$65,000 to Mountain Valley Angus. He was admired for his magnificent head and jaw, huge top, muscularity and width. Then to add he is sired by the super sire Nuttella N462. S005 shows everything we love about our Nuttella progeny. Dam of S005, Quiet Y091, lived until she was nearly 18 years old and was still super sound until the day she died. Y091 was a sensational breeder with 8 daughters already making it into the donor team. Another son topped our Autumn 2023 Sale at \$55,000. We have retained semen from 7 sons. S005's docility EBV of +69 needs to be admired. S005 and his three flush brothers are the highest for docility in the Angus breed. 5 sons will be offered in this Sale.

Banquet Quiet J397

This sale features the first progeny to be offered by the \$230,000 Victorian Record Price bull Tom Cruise, purchased by Ballawinna Angus. Tom Cruise is a unique and powerful combination of pedigree, phenotype, performance and docility. T220 is very muscular, big loined, wide topped, rugged, extremely thick and exceptionally quiet. His sire, Rambo R230 was purchased in partnership for \$70,000. Tom Cruise's dam Quiet R329, granddam Quiet J397, great granddam Quiet Y091 and great great granddam have been star donors at Banquet. All J397's daughters have been retained and all her sons have been sold for breeding. Great granddam, Quiet Y091, was a breeding machine! She has eight daughters and eight granddaughters in the donor team. 2 sons will be offered in this Sale.

VERMONT DREAM Y301<sup>PV</sup>

Vestabull V349, has an exciting pedigree. His sire Sufficient S231, was sold in our Autumn 2023 Sale for \$19,000. His first sons featured in our Autumn 2025 Sale and sold to \$18,000. A half brother to S231, Uplifted U008, topped our Autumn 2025 Sale at \$64,000. Dam of V349, Dream G13, doesn't need any introduction. Her sons have sold to \$40,000. For more notes on G13 refer to Lots 5 and 27. Now, with a pedigree like that it's no surprise that he is at Lot 4. V349 needs to be admired for his clean front, strong spine, length of body, growth for age and extra neck extension.

Now where do I start with Ventabull V206. He is strong spined, wide topped, deep flanked, round hindquartered and easy doing. With extra volume, capacity, depth and softness. Yes, he would have to be a Nuttella son. Nuttella is one bull that should not need any introduction within the Banquet program. He's rated as the best bull ever used here at Banquet. The consistency of type, docility, structure and longevity is unmatched. His sons have sold to \$65,000 with another three sons selling for over \$60,000. Dam of V206, Dream G13, is a star donor at Banquet. V206's only two older flush brothers have sold for \$40,000 and \$26,000. A flush sister to V206, Dream V005 topped the World Angus Forum Female Sale at \$134,000 to Ballawinna Angus W.A. Flush brother to Lots 15, 27 and 50. **Semen retained.**

VONJ397 BANQUET QUIET J397<sup>PV</sup>

BANQUET QUIET Y091<sup>SV</sup>

An interesting pedigree in Vanstone V374. Combining one of Millah Murrah's favourite sire lines with one of the most proven Banquet dam. Quartz Q29, has had sons sell to \$180,000 and daughters sell to \$100,000. Dam of Q29, Flower N30, sold for \$140,000 for a half share. Dam of V374, Quiet J397, is a breeding machine, with six of her daughters already joining our E.T programs. A grandson of J397, Tom Cruise T220 sold for \$230,000 in our Autumn 2024 Sale. V374's type is exactly what you would expect from this cross with a powerful head, hooded eye, smooth front, extra neck extension, strong spine, loose and silky fine skin.

Venture V310, is smooth shouldered, strong spined, long and muscular. V310 has got his muscularity and fine skin from his sire, T269, and his length and style from his dam, Quiet S230. S230 joined our E.T team in Spring 2024 for her presence, strength of spine and structural correctness. Her first drop of embryo calves are looking very exciting. A flush brother to S230, Sufficent S231, was sold for \$19,000 in our Autumn, 2023 Sale. Then was used in AI and ET and has eleven sons offered in this Sale.

An outcross power bull to start the first run of Heifer Bulls'. Verify V119, is smooth, shouldered, strong spined, long bodied, sleek skinned and maternal with added neck extension for ease of calving. His sire, Ratify R368, was purchased in utero. His dam Paris P52, was selected for her length, frame, power and performance. R368, was retained to use on heifers as a yearling then was used later on cows and lightly in E.T. Dam of V119, Kerry S19, was purchased as our favourite female from the Millah Murrah Female Sale for \$44,000. S19 was selected for her phenotype, clean skin, udder and longevity of her dam. S19 joined our donor team straight away. Her first 3 sons featured in our Spring 2024 Sale averaging \$18,000. V119 was used on stud heifers in the Autumn and Spring joinings, finishing his Spring joining in December. An interesting package with phenotype, pedigree and data. Half brother to Lots 22, 31 & 32. **Should be suitable for joining maiden heifers. Used at Banquet and semen retained.**

Now now, now, where do we start with Valuabull V172? His sire, his dam, his sister or his brothers. Wow, what a package. Phenotype, pedigree and as some would say a bloody fantastic bull. If you want sire appeal, structural correctness, docility, thickness and softness you need to inspect Valuabull V172. V172 is also broad muzzled, smooth fronted, fine shouldered, strong spined, wide topped, deep flanked and easy doing. He is produced from one of the most sought after genetic combinations at Banquet. His sire, Nuttella N462 is one bull that should not need any introduction within the Banquet program. He's rated as the best bull ever used here at Banquet. The consistency of type, docility, structure and longevity is unmatched. His sons have sold to \$65,000 with another three sons selling for over \$60,000. Dam of V172, Dream G13, is a star donor at Banquet. V172's only two older flush brothers have sold to \$40,000. A flush sister to V172, Dream V005, topped the World Angus Forum Female Sale at \$134,000 to Ballawinna Angus W.A. Flush brother to Lots 5, 15 and 50. **Should be suitable for joining maiden heifers. Semen retained**

Style, docility, pedigree and structure with real eye appeal. Here is a bull to get excited about. Valtra V293, is a bull you could look at all day, to admire his clean front, strong spine, wide top, length of body, clean skin and structural correctness. Now let’s talk about something really exciting, his pedigree. Sire of V293, Statesman S154, is a standout Nuttella son and was retained and used as a yearling for his extreme muscle pattern, sleek skin, length of body and doing ability. His first sons featured in our Autumn 2025 Sale where they sold to \$20,000 twice. Dam of V293, Quiet S221, joined our donor team as a three year old female for her superior style, softness, doing ability and milk production. Her first calf, Quiet U199, is one of our top Spring drop U females. Maternal grandam of V293, Quiet Q339, is another easy doing, hard working and maternal cow, that is breeding the house down. Her only two daughters, Quiet S221 and Quiet T338 have already joined our E.T team. Her third calf, Ultimate U304, sold for \$34,000 in our Autumn 2025 Sale to Callandoon Angus, QLD. Her fourth calf, Version V431, is a star at Lot 46. I could talk about every generation in this pedigree, including the legendary Quiet Y091. With the sire apeal and a pedigree like this it is no surprise he was used on stud heifers for the Spring joining, finishing in December. Should be suitable for joining maiden heifers. Used at Banquet and semen retained.

It would not be hard to believe that this bull could be from another planet. Venus V309, is powerful headed, broad muzzled, strong spined, very muscular, deep flanked, wide topped and wide based. You need to appreciate his width of rump and hindquarter, expressive muscle pattern including his huge jump muscle. Did I mention he is MUSCULAR! To make this bull more unique is he has still got neck extension, softness, doing ability and is super correct. His sire, Sunrise S236, was retained and used on heifers as a yearling. Dam of V309, Quiet S307, is a sound, maternal, thick, muscular and easy doing young cow. Her flush brother, Specialist S353, topped our Autumn 2023 Sale at \$55,000 to Fernleigh Angus. Her half brother, Sensation S005, topped our Spring 2022 Sale at \$65,000. S307’s first son sold in our Autumn 2025 Sale for \$18,000. With a type and pedigree like this it is no surprise he was used on stud heifers for the Spring joining, finishing in December. Should be suitable for joining maiden heifers. Used at Banquet and semen retained.

**WOW what an opportunity, the first sons of Tom Cruise T220 to be offered**  
**Offering a 'Pick of the Pair' with these two flush brothers**  
**The remaining bull will be retained at Banquet.**

If you want style, spunk, sire appeal and a fresh red hot pedigree you better wake up. The first sons to be offered anywhere from the \$230,000 Victorian record breaking sire Tom Cruise T220, and what a pair to introduce him. T220 was admired for his length, width, thickness, muscularity, docility and pedigree. The future of the Tom Cruise progeny is something to get excited about!

Dam of this pair, Yendi Q394, joined our donor team for her length, frame, grunt, style, performance, progeny results and a great maternal pedigree. Q394 is a half sister to super sire Nuttella N462 and Privilege P357, who topped our Autumn 2020 Sale at \$27,000.

Very Cruisy V497, is powerful headed, strong spined, wide topped, thick, muscular and very correct with real sire appeal for a young bull.

Very Classy V501, is again strong spined, wide topped, thick, muscular and very correct with real sire appeal. You also need to admire his lovely refined front, smooth shoulder and style.

Please appreciate that these two are the youngest bulls in this sale at only 16 months

These brothers are similar with slight differences.

We couldn't decide which one to keep, so the choice is yours

Whether you want a power bull for cows or a sleep easy heifer bull with style.

A very exciting early opportunity in this pair not to be overlooked.

**Semen retained from both V497 and V501.**

We now follow with a Nuttella grandson. And no surprise, he’s got the same Nuttella type. You should now know by what that type is, but in case you have forgotten. V260 is powerful headed, thick and muscular with bone and grunt. He has extra length from his sire Sunrise S236. S236 was retained and used on heifers as a yearling. V260 is another example of a good bull with a great maternal pedigree. Two half sisters to S302 have already joined our ET team. Her only half brother sold in our Autumn 2022 Sale for \$24,000.

Vincent V439, has got the same great traits from Nutella with a powerful head, strong spine and muscular. V439 also offers a later maturing type. This is from the contribution of his dam, Quiet Q447, who joined our E.T program in Spring 2023 for her pedigree, length, frame and style. A young bull that should mature into a great sire.

SUITABLE FOR JOINING MAIDEN HEIFERS

Lot 68 to Lot 92 have been selected on:

Type – long necks, fine shouldered and moderate bone.

Pedigree – They are sired by proven calving ease sires that have been used by Banquet.

Birth Weight – All these bulls are in the low to moderate actual birth weight range.

EBV – EBV’s of these lots are in the low to moderate range for birth weight EBV.

Remember – Management of the heifers has the greatest impact on calving difficulties.

BANQUET QUIET J679<sup>SV</sup>

His sire, Sensation S005 topped our Spring 2022 Sale at \$65,000 to Mountain Valley Angus. S005 excelled for docility, thickness and style. Dam of V365, Quiet Q447, joined our E.T program in Spring 2023 for her pedigree, length, frame and style. There is no doubt that V365 has thrown to both parents when you admire his length and muscularity. Should be suitable for joining maiden heifers.

## Recessive Genetic Conditions

This is information for bull buyers about the recessive genetic conditions, Arthrogryposis Multiplex (AM), Hydrocephalus (NH), Contractural Arachnodactyly (CA) and Developmental Duplications (DD).

### Putting undesirable Genetic Recessive Conditions in perspective

All animals, including humans, carry single copies (alleles) of undesirable or “broken” genes. In single copy form, these undesirable alleles usually cause no harm to the individual.

But when animals carry 2 copies of certain undesirable or “broken” alleles it often results in bad consequences. Advances in genomics have facilitated the development of accurate diagnostic tests to enable the identification and management of numerous undesirable or “broken” genes.

Angus Australia is proactive in providing its members and their clients with relevant tools and information to assist them in the management of known undesirable genes and our members are leading the industry in their use of this technology.

### What are AM, NH, CA and DD?

AM, NH, CA and DD are all recessive conditions caused by “broken” alleles within the DNA of individual animals. When a calf inherits 2 copies of the AM or NH alleles their development is so adversely affected that they will be still-born.

In other cases, such as CA and DD, calves carrying 2 copies of the broken allele may reach full-term. In such cases the animal may either appear relatively normal, or show physical symptoms that affect their health and/or performance.

### What happens when carriers are mated to other animals?

Carriers, will on average, pass the undesirable allele to a random half (50 %) of their progeny.

When a carrier bull and carrier cow is mated, there is a 25% chance that the resultant calf will inherit two normal alleles, a 50% chance that the mating will result in a carrier (i.e. with just 1 copy of the undesirable allele, and a 25% chance that the calf will inherit two copies of the undesirable gene.

If animals tested free of the undesirable gene are mated to carrier animals the condition will not be expressed at all. All calves will appear normal, but approximately half (50%) could be expected to be carriers.

### How is the genetic status of animals reported?

DNA-based diagnostic tests have been developed which

can be used to determine whether an individual animal is either a carrier or free of the alleles resulting in AM, NH, CA or DD.

Angus Australia uses advanced software to calculate the probability of (untested) animals to being carriers of AM, NH, CA or DD. The software uses the test results of any relatives in the calculations and the probabilities may change as new results for additional animals become available.

The genetic status of animals is being reported using five categories:

AMF	Tested AM free
AMFU	Based on Pedigree AM free - Animal has not been tested
AM_%	_% probability the animal is an AM carrier
AMC	Tested AM-Carrier
AMA	AM-Affected

For NH, CA and DD, simply replace AM in the above table with NH, CA or DD.

Registration certificates and the Angus Australia web-database display these codes. This information is displayed on the animal details page and can be accessed by conducting an “Database Search” from the Angus Australia website or looking up individual animals listed in a sale catalogue.

### Implications for Commercial Producers

Your decision on the importance of the genetic condition status of replacement bulls should depend on the genetics of your cow herd (which bulls you previously used) and whether some female progeny will be retained or sold as breeders.

Most Angus breeders are proactive and transparent in managing known genetic conditions, endeavouring to provide the best information available. The greatest risk to the commercial sector from undesirable genetic recessive conditions comes from unregistered bulls with unknown genetic background. The genetic condition testing that Angus Australia seedstock producers are investing in provides buyers of registered Angus bulls with unmatched quality assurance.

For further information contact Angus Australia (02) 6773 4600.

Buying a bull is an investment. This investment should contribute to the genetics and sale income of your herd for many years. If you are to get the most from your new bull, it pays to look after him well, especially in the first season of use. This report discusses management strategies to maximise the productive life of your bulls.

Arrival:

New bull buyers are often concerned about the apparent bad temperament of a bull that seemed quiet enough when purchased. Bulls can become upset and excited in the sale and delivery process. They are subjected to strange yards, different noises, loss of their mates, different people, different handling methods, trucking, unloading, new paddocks and different water and feed. This can upset animals which are normally very quiet.

When the bull arrives home, unload him at the yards into a group of cows or steers. Never jump the bull from the back of a truck into a paddock. Bulls from different origins should be put into separate yards with other cattle, steers or cows, for company.

Provide hay and water, then leave the bull alone until the next day, before giving routine health treatments.

Mating New Bulls:

Newly purchased young bulls should not be multiple joined with older herd bulls. They will not be allowed to work much and in keeping them away from the cows, the older, dominant bull will knock them around.

Use new bulls in either single sire groups or with other young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have fewer problems later.

The Australian Association of Cattle Veterinarians (AACV) defines a normal, fertile bull as “expected to get 90% of 50 normal, cycling, disease free females pregnant within 9 weeks, and 60% of these should become pregnant in the first three weeks of joining”. This expectation would apply to 2 year old bulls, but not to younger bulls.

During Mating:

Check bulls at least twice each week. Watch them work if possible and pay particular attention to any sign of abnormal serving problems like “corkscrew penis” or too many cows returning to heat.

Have a spare bull or bulls available to replace any that break down. If you have to replace a bull, get the bull checked by your vet. Sometimes prompt treatment for small problems can avoid culling. Vendors that provide guarantees on their bulls will usually require a veterinary certificate indicating the problem with unsatisfactory bulls.

Rotate bulls in single sire groups to make sure that any bull infertility is covered. Single sire joining works well but it has risks. The bulls must be checked regularly and carefully or the bulls rotated every one or two cycles.

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.

SV : the sire has been verified by DNA.

DV : the dam has been verified by DNA.

# : DNA verification has not been conducted.

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following idents.....

from member.....(name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.

Name: ..... Signature: .....

Date: .....

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350.

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email [office@angusaustralia.com.au](mailto:office@angusaustralia.com.au)

# WORLD ANGUS FORUM *Australia*

The 2025 World Angus Forum attracted participants from 26 Countries and every State and Territory of Australia. It was truly an event to remember – an unforgettable celebration of Australian Angus genetics, innovation and Community.

We were thrilled to be part of the WAF. It has given us lifelong memories and friendships. Congratulations and thanks go to everyone who made the global showcase possible, especially the dedicated team at Angus Australia, The Board and the WAF organising Committee.

The World Angus Expo, part of the WAF, was held at the Aelec Centre at Tamworth. Over two jam packed days there was so much to take in. Many trade sites and almost 500 Angus cattle on display. The World Class Elite Female Sale was a standout along with the “Angus On Ice” Frozen Genetics Sale. There was also a Campdraft Competition, Barbeque Competition and of course many people to meet. Over 3000 visitors viewed the displays and enjoyed the educational speakers.

### ***Thank you***

We transported twelve head of cattle from Mortlake to Tamworth and back. A big thank you to Macdeb and Son Livestock Transport for their wonderful care and dedication. We were also accompanied by a wonderful working and supportive team while we were there.

## Banquet had a Dream trip to the World Angus Expo at Tamworth

A new benchmark was set for Elite Angus Females when Mick and Jenny Pratt of Ballawinna Angus, W.A purchased Banquet Dream V005 for \$134,000.

Dream V005 in the packed sale Auditorium

Dream V005 after her sale topping achievement

“She is the type of female we can build around” Mick Pratt said after the sale.

“She brings everything we are chasing – genetics, structure, presence and a proven maternal line”.

V005 is a daughter of Banquet Nuttella N462 and Premier Dream G13. She has flush brothers in this sale at Lots 5 and 27.

## We supported the 'Angus on Ice' Frozen Genetics Sale

Banquet Quiet R329

Four embryos from Banquet Quiet R329 sired by Banquet Nuttella N462 were purchased by Maccas Beef, NSW for second top price of \$4600 each. Quiet R329's first calf, Banquet Tom Cruise T220 set a Victorian Angus record when he sold for \$230,000 in our Autumn 2024 Sale.

Banquet Quiet Q540

Four embryos from Banquet Quiet Q540 and sired by Banquet Nuttella N462 were purchased by Hills View, Colac Vic, for \$3,200 each.

## As a follow on from the World Angus Forum

Jones Farms, Moorooduc, Vic. Purchased a half share of Banquet Lowan V012 for \$50,000.

V012 is a daughter of Banquet Nuttella N462 and Anvil Lowan H126.

H126 was purchased with Bannaby Angus as the \$52,000 top price female at the Anvil Dispersal Sale. Sons of H126 feature in this sale at Lots 2 and 8.

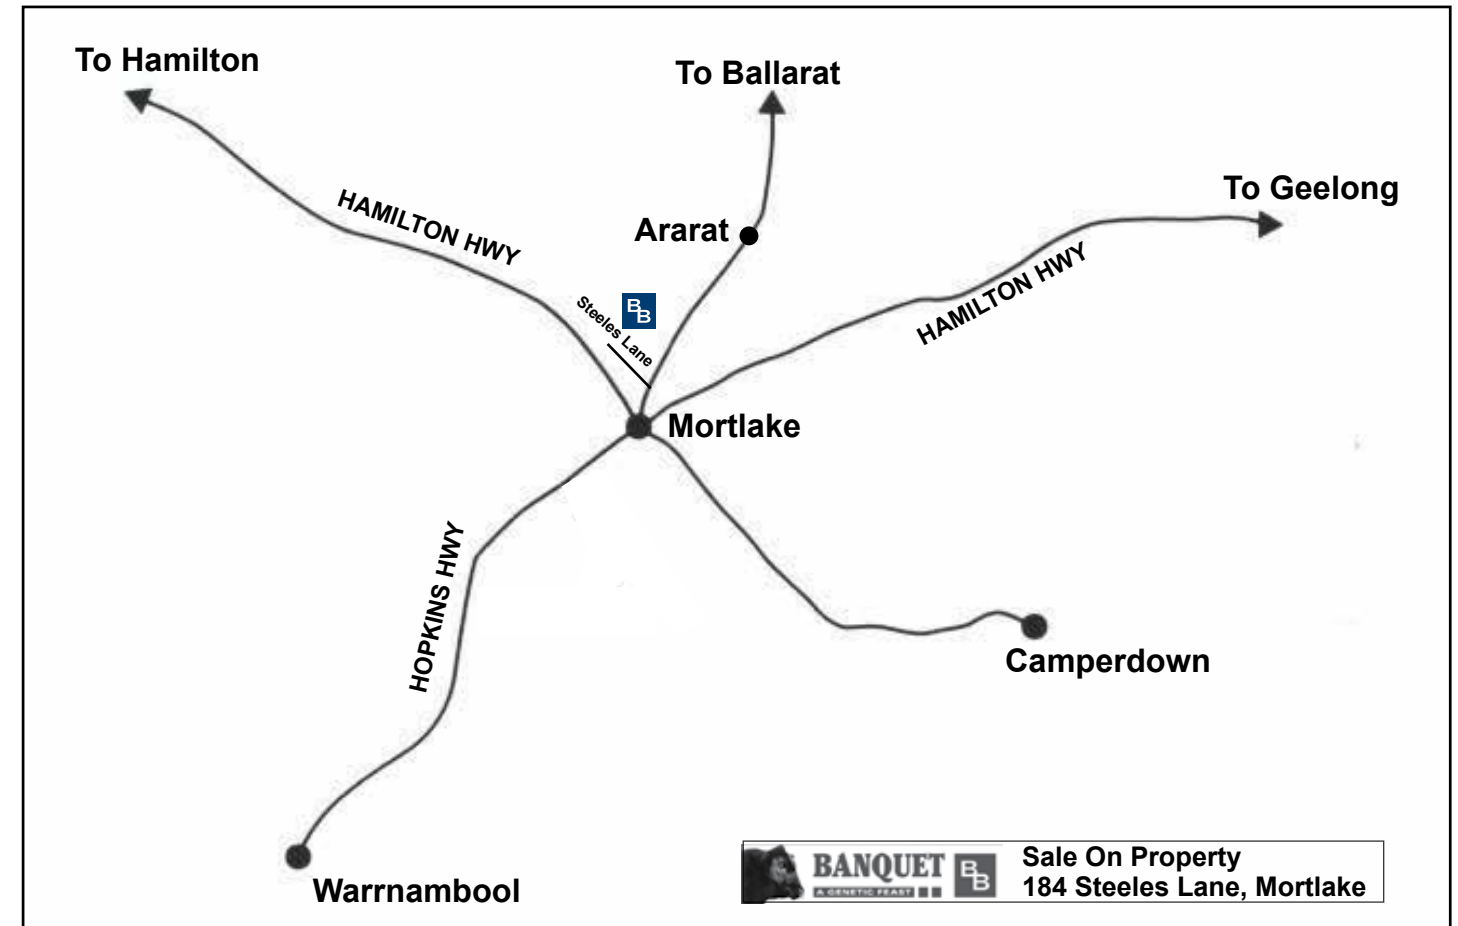

Siblings Chase and Sheddie Jones
