TOP

LOTS

Annalara White Dorpers welcome you, to our 20th sale, over 21 years since our first sale in 2006 and edging closer to thirty years of breeding White Dorpers.

It's with great pleasure welcoming back our long-term clients that have stuck with AWD since those very early first, sale years and to all our other repeat clients that have intrusted AWD since and too new prospective clients that we look forward to providing you with our genetics going forward for the years to come.

How quick did twenty years go by as it feels like it was yesterday at times. Sheep breeders have seen a lot of changes, droughts and flooding rains over those twenty years with sheep market's highs and lows, however we feel the next couple decades will have a positive return for Dorper breeders, overall sheep numbers at a low with current record prices for lambs and mutton and an increasing global demand.

In the last twenty years AWD has broken many records along with our clients in the commercial sheep business and more recently achieved in late October the top ewe price, again on AuctionsPlus for commercial and stud White Dorpers which we have broken many times over the years and not to remind everyone that our commercial AWD lambs have won the Dubbo Show Prime Lamb Hoof & Hook competition, twice.

Our genetics have been sought after in all states and overseas to China, Malaysia, Philippines and India.

The last twelve months have been very challenging with very little growth through winter and around only 50mm since early September and a total of 486mm for 2025 with only several beneficial rainfall events.

Please note that there a number of rams that have a sire prefix SYN001 which have been given a syndicate joining as unfortunately their lambing data was lost and unrecoverable, these are stud bred but cannot be registered. They do have a weaning weight and muscle scanning which will be available prior to the sale.

We wish you well with your purchases and thank you so much for intrusting AWD genetics once again and into the future.

Steve Cresswell and Family

SALE INFORMATION

Sale Time

The sale is scheduled to start at 11am EST, February 18th 2026. The sale is interfaced with AuctionsPlus, so start time must be strictly adhered to.

This year rams will not be put through a sale ring but by video only to guarantee safety of rams and buyers can bid from ram pens or seated area.

No stock will be loaded until after the completion of the sale.

Inspections are welcome from 9am on sale day or any other day prior, by appointment.

Sale Location

On property, "Dungary" 25L Panai Ave. Which is 12kms South of West Dubbo on the right, off The Newell Hwy.

Alternatively follow Google maps to Annalara White Dorpers

Selling Terms

Available at registration desk.

Outside Agents

A 3% rebate will be available to outside agents introducing buyers in writing prior to sale and selling on their behalf within seven days and that are present at the sale.

Auctionsplus bidding

This sale will be interfaced with AuctionsPlus. Prospective buyers who cannot attend the sale can place bids online over the AuctionsPlus system. For any assistance with this bidding method please contact the selling agents on the above numbers or follow instructions included at the beginning of the catalogue. We suggest that your sign up 24hrs prior to the sale.

Health Status

All rams are tested Brucellosis free Accreditation No CW 01/24.

Full On Farm Biosecurity Plan and a closed ewe flock, only buying in sire's when required.

Registrations

Stud Rams only with Sire & Dams can be registered and transferred if required.

Delivery

Free delivery on rams Australia wide. Conditions apply.

Insurance

Animals become the responsibility of the purchasers at the conclusion of the sale. We strongly recommend insuring your animals after the sale. Insurance can be arranged with Elders if required.

Refreshments

Lunch and refreshments will be provided.

SHEEP GENETICS- LAMBPLAN

Sheep Genetics - LAMBPLAN

Sheep ASBV's have been included in this sale. Information explaining ASBV's has been included in the sale information.

SHEEP GENETIC ASBV'S

Australian Sheep Breeding Values are an estimate of an animal's genetic potential to pass on traits to its progeny. It is based on pedigree (genes), performance recorded information (e.g., weights at certain ages, scanning for fat depth and muscle) and the environment in which it is raised (e.g., birth type, old or maiden mother, amount of feed). They are essentially a projection of how that animal's progeny will per-form for a range of traits.

It is important to know that ASBVs are a tool for breeding sheep, they do not provide all the answers. Visual selection is very important to cull sheep that will not be functional in a commercial production system, regardless of how good the ASBVs are. ASBVs provide a measure of the animal's genetic potential independent of environmental influences that can affect the physical appearance.

WEIGHT ASBVs describe the animals' genetic merit for growth rate.

WWT - Animals with a more positive weaning weight (WWT) will on average, produce lambs that grow quicker to weaning – 100 days. Average for Shedding Breeds is 6.65 and the top 10% is > 9.03 **PWT** - Animals with more positive ASBVs for post weaning weight (PWT) produce lambs that grow quicker and reach target weights in a shorter time. Post weaning weight estimates the genetic difference between animals at 225 days of age. Average for Shedding Breeds is 10.53 and the top 10% is > 12.79

CARCASE FATNESS ASBVs describe the value of an animal's genes for fat depth at a constant weight – a negative ASBV means a genetically leaner animal. We recommend a positive PFAT. **PFAT** - Animals with a more negative ASBV for post weaning fat (PFAT), will produce lambs that are leaner, at the same weight. Post weaning fat estimates the genetic difference between animals at 225 days of age. Average for Shedding Breeds is 0.12 and the top 10% > 1. Animals with positive fat will survive better in tough conditions and dry times. Fat increases the ability of breeding ewes to maintain weight and condition, conceive twins, better milking and mothering ability and survivability. Also, increases the eating quality due to intramuscular fat.

CARCASE MUSCLING ASBVs describe the value of animals' genes for eye muscle depth at a constant weight – a positive ASBV means a genetically thicker-muscled animal, and one that will have slightly more of its lean tissue in the higher-priced cuts. **PEMD** - Animals with more positive ASBVs for eye muscle depth (EMD) produce lambs that have a higher lean meat yield. Post weaning muscle depth estimates the genetic difference between animals at 225 days of age. Average for Shedding Breeds is 1.49 and the top 10% > 2.63 A positive PEMD is best as it increases the value of the carcass, by increasing the amount of lean meat it contains and increases dressing percentage. Increases the amount of meat on higher priced cuts. Higher muscling is favourably related to reproductive rate.

MCP INDEX (MATERNAL CARCASS PRODUCTION) AND SRC INDEX A combination of ASBVs into a single value. Each ASBV is weighted to reflect the traits emphasis in the breeding objective. The Maternal Carcass Production (MCP) index ranks animals on their suitability for a self-replacing system with a carcass production focus. This index balances the main economic traits relevant to Maternal breeders. This allows higher gains to be made for growth and carcass traits. The index aims to maintain adult weight at current levels. Average for Shedding Breeds is 134.42 and the top 10% is > 145.75

NOTES

This image shows a single page of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page, leaving small margins at the top and bottom. There are no vertical margin lines, and the page is completely blank except for the lines themselves.
