90 Years

This year marks **Texas Angus's 90th year
of breeding Angus cattle in Australia.**

What began in 1936 by the Scottish Australian Company importing 21 stud heifers and 1 bull from Scotland has grown into a herd of 1,000 breeders, built on a simple philosophy - breeding functional, fertile, profitable cattle backed by strong maternal lines year-on-year. It's worth noting every single cow in our herd all trace back to those Scottish heifers imported 90 years ago and no outside maternal line has ever been introduced since.

As we reflect on the past 90 years, we are incredibly grateful to our clients, staff, family members and industry supporters who have contributed to the Texas Angus story.

While much has changed over nine decades, our focus remains the same:
Producing genetics that add value throughout the entire beef supply chain.

THE MARKET

How good is the current cattle market? Recent widespread rainfall across Central and Northern NSW and Southern Queensland has injected enormous confidence into the industry and sent cattle prices on a strong upward trajectory. Combined with the female herd liquidation across Southern Australia over the past two years and the substantial cattle turn-off throughout Northern NSW and Southern Queensland this year, breeding female numbers have tightened significantly. As always, supply and demand will determine the market, and all indicators suggest a positive outlook for producers.

Internationally, the fundamentals are equally strong. The U.S. cattle herd is currently at its lowest level since the 1950s, and economists do not expect a rapid rebuild. During our visit to the United States last year, commercial empty heifers were selling for around \$7,000 AUD, while commercial cow-calf units in the UK are currently worth approximately \$16,000 AUD. These figures highlight the strength of the global beef market and the growing value of productive breeding females.

Global demand for beef continues to strengthen and Australian producers are well positioned to benefit. Feedlots are increasingly identifying and rewarding cattle that gain weight efficiently, marble well, yield strongly and avoid excessive fat cover. With advances in traceability, genomic technology and individual animal performance monitoring, cattle that can deliver these traits are attracting significant premiums. ***This is exactly what our breeding program has focused on for the past 15 years.***

We have deliberately selected for cattle that are bigger, longer, efficient and profitable - cattle that can pack on the kilos, marble, yield and perform without carrying excessive fat. These genetics improve profitability for every sector of the industry, and we believe our consistent success in the RNA Ekka Paddock to Palate Competition continues to validate this breeding philosophy.

RESULTS OF THE 5 YEARS OF TEXAS ANGUS COMPETING AT EKKA'S RNA PADDOCK TO PALATE COMPETITION FOR CLASS 40 HGP FREE

Year	Feeder Pen Result	Feeder Individual Result	Overall Feeder & Carcase Pen Result	Highest Marbling	No of steers

2023	5th 2.283kgs/day	2nd 2.77kgs/day	2nd	2nd	189
2022	4th 2.333kgs/day	3rd 2.78kgs/day	4th	1st	133
2021	2nd 2.180kgs/day	3rd 2.78kgs/day	2nd	2nd	175

THE BULLS

We are proud to present an outstanding offering of 306 bulls this year.

These are bulls bred to work in commercial environments. Bulls that know how to graze, travel, seek out females, breed naturally and thrive under some of Australia's toughest conditions.

Our ongoing investment in elite genetics continues to drive improvement throughout the herd, with over 200 bulls in this year's sale bred through ET, IVF and AI technologies. These programs allow us to rapidly multiply our very best genetics while maintaining the consistency and predictability our clients have come to expect from Texas Angus.

This year's draft includes:

- **35 DEADWOOD SONS**
- **25 THE ROCK SONS**
- **23 INTENSITY SONS**
- **13 BONUS SONS**
- **10 JAMESON SONS**
- **9 ICEMAN SONS**
- **9 EYES ON YOU SONS**
- **8 THUNDERSTRUCK SONS**
- **8 TOP GUN 522 SONS**

Among the highlights of the sale are the first sons of the \$360,000 THUNDERSTRUCK. These Autumn Yearlings have attracted considerable attention and combine softness, structural integrity, body shape, quiet temperament and overall balance. Importantly, they have been raised under the same commercial conditions as the remainder of the draft, allowing buyers to make genuine comparisons across the offering.

We are also excited to introduce several new sires. Australian-bred additions include THOR, EVEREST, LOTTO and a \$46,000 INTENSITY son. We are equally excited to offer the first Australian sons of two highly regarded U.S. sires - Schiefelbein TOP GUN and Basin JAMESON - both recognised internationally for their structural soundness, growth performance and commercial relevance.

For buyers focused on docility, carcase quality and weight gain, the EYES ON YOU progeny deserve close inspection. As always, the sale is strongly represented by ICEMAN, DEADWOOD, CONVERSE, THE ROCK, BONUS and many of our leading Texas herd sires.

Every bull has been genomically tested, scanned, docility tested, framed and fully performance recorded. Averaging a frame score of 6.5, they display the trademark Texas combination of length, extension, body capacity and performance that drives weight gain and profitability.

We are confident there is a bull within this year's offering to suit every production system and breeding objective.

Please note our new sale start time of 11:00am.

Warmest regards,
Ben & Wendy

PARENT VERIFICATION SUFFIXES

PV - Both parents have been verified by DNA

SV - The sire has been verified by DNA

DV - The dam has been verified by DNA

- DNA verification has not yet been conducted

E - DNA has been identified that sire and/or dam

may possibly be incorrect but this cannot be confirmed conclusively

BUYERS INFORMATION

1. **HEALTH – All have the Texas Tick of Approval, buy with confidence.**
 - Sale bulls only Vaccinated for Red Water (Tick Fever) except for 16 Autumn ET Bulls which can be blooded upon request.
 - Tested Free of Pesti Virus, But are NOT Vaccinated for Both Pesti Virus or 3 Day Sickness
 - 7 in 1, Vibrio and Botulism vaccinated and routinely drenched and deloused
 - Examined and semen tested
 - Texas Angus cattle are free to travel across Australia. Under the previous JBAS system carried a JBAS 8 and the highest MN since the early 2000's.
 - Use bikes, dogs, and horses, and handled with low stress stock handling principles
2. ****TEXAS ANGUS WILL RETAIN 50% SEMEN & MARKETING RIGHTS OF ALL BULLS IN THE CATALOGUE****
 - Buyers must supply their PIC code for all NLIS's to be transferred
 - Bulls registration will be transferred on requested
3. OPEN DAY Thursday 08th July. All sale bulls and heifers will be on display 10am - 3pm.
4. REBATES see Rebates Notice below.
5. Insurance is available from the agents at the sale.
6. Delivery of each animal will be at the buyers risk after the fall of the hammer, but will be cared for by the vendors for a reasonable amount of time.
7. Transport – All transport coordination will be done through acting agent in conjunction with FALLS LIVESTOCK TRANSPORT immediately after the sale. Lachie Falls is the representative (Mobile 0429 826 342). Any client wishing to use their own or preferred transport is more than welcome to do so but MUST be coordinated through Lachie Falls immediately after the sale. Texas Angus recommends Falls Livestock Transport for long distance cartage.
8. Verbal instructions will not be accepted. Please complete the buyers instruction sheet included in the catalogue and present to the agents.
9. Any announcement will take precedence over printed material in this catalogue. Terms and conditions of sale will be read by the agents prior to the sale.
10. The sale will be held at "Doongara" under cover. Warialda APEX will cater and the MACKA's Angus steaks will be for lunch.
11. The owner, employee or other affiliated personal cannot be held responsible for any accidents, but will make every effort to provide for the safety and comfort of those attending.
12. Accommodation is available at the Sunflower Motel Ph: 02 6729 1344 and Royal Hotel Ph: 02 6729 1444 in Warialda and for a unique & luxurious sleeping experience try Faraway Domes which is just down the road call Kate on 0421 935 843. Also, there is an AirBnb south of Coolatai please call Erica 0448 640 551. The Wallaroo Hotel also has cabins, please contact Ange 0428 992 083. Wendy is also very happy to help with booking accommodation, please call her on 0438 376 622.
13. On property air strip is available, contact the vendors for further information. Qantas flies daily to Moree (1hr away), Qantas flies daily to Tamworth (2¼ hrs away by car) and Armidale (2½ hrs away by car).
14. No children shall enter any pens. This is part of our OH&S policy.

NOTICE TO AGENTS & BUYERS SALE REBATES

1. A rebate of 4% will be paid to all agents who attend the sale with or on behalf of their client(s) and settle in 7 days.
2. A rebate of 2% will be paid to all agents who introduce their client(s) but do not attend this sale and settle in 7 days.
3. A rebate of 1% will be paid to all agents who settle within 7 days but do not introduce their client(s) or attend this sale.

PLEASE NOTE: Only **ONE** of the three options can be used on any one lot.

DISCLAIMER NOTICE

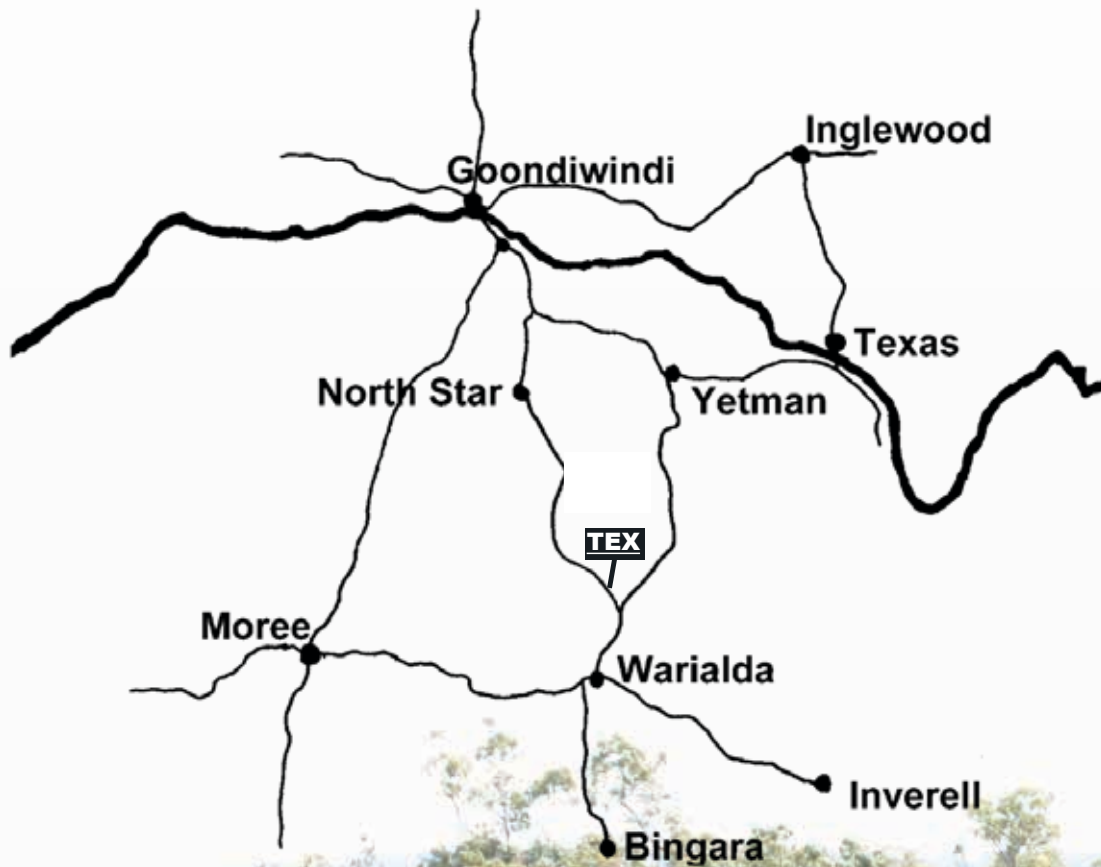

People entering upon this property for any purpose what-so-ever, including attendance of cattle auctions, do so at their own risk. We are not liable to you for personal injury or death suffered by you and/or for the theft, loss of or damage to any personal property caused or contributed to by us or by any other person whether caused or contributed to by our or their negligence, deliberate act or unlawful conduct. "We", "Us" or "Our" refer to the owners, Their employees, contractors and agents and each of them. Every care has been taken in compiling this catalogue to ensure accuracy of information supplied, but no responsibility is accepted for any errors which may have occurred.

Where you'll find us!

Texas Angus is 28kms north of Warialda.

From Warialda; Drive 20kms out on the Yetman/Coolatai Rd and turn left onto North Star Rd/Goondiwindi Rd and travel a further 8kms and then turn right at Texas Angus sign.

From Goondiwindi; Travel straight through Boggabilla and turn right North Star/Warialda (Bruxner Hwy), follow till the North Star sign and turn right, travel to North Star, turn left at T junction, 1km turn right and follow till 55kms to Texas Angus.

PICK OR THE PAIR

Sale bulls from lot 187 are offered under a multi-hammer system, winning bidder can choose to take the pair or the pick of the pair not necessarily in lot order, if only one is chosen the remaining will be offered.

DEADWOOD is Poss Angus's highest price bull, selling for a whopping \$900,000 USD. Sired by the legendary MAVERICK, DEADWOOD maintains MAVERICK's carcass and fleshing traits but carries more frame and length of body. His sons were highly sought after at last year's sale topping at \$75,000 for Texas U-CRACKER. To date we have sold 38 sons that are currently averaging \$19,000. This year there are so many standout sons and well worth a trip to see them in the flesh. We don't think you'll see a line-up of consistent body type, scale, volume and presence than these boys. This will be the last year of DEADWOODS as we only a handful pencilled in for next year. 35 sons sell.

We are one of the first studs to be offering Basin JAMESON sons on the east coast. JAMESON was sold for \$840,000AUD, admired for his phenotype and explosive growth and marbling. His first heifers sold for \$180,000USD, \$160,000 and \$140,000 and his dam was sold for \$110,000USD! With 10 sons in this year's sale and many more in the pipeline we are looking forward to seeing how the JAMESON progeny develop. We saw JAMESON in the flesh in the US and he was very correct, super slick and quiet and he was used throughout North America. There are a couple of standout JAMESON sons in this year's sale.

We have been on the hunt for a NO DOUBT son to cross into the herd and after seeing sons at Prime Angus we used EYES ON YOU in our ET/IV program. If you are chasing a bull that will inject serious weight for age, EYES ON YOU will cater for this easily. The capacity, depth of body and middle section needs to be seen in the flesh. His docility EBV is larger than BONUS and that's saying something! There are some real standouts. 9 sons sell.

Australia's highest priced bull selling for \$360,000 to Macka's Angus, THUNDERSTRUCK sons certainly are among the highlights of this year's sale and they are only autumn yearlings. Considering the very dry summer season these bulls have had to endure, it certainly benchmarked which sire lines could handle the tough conditions and we believe the THUNDERSTRUCK progeny were the top performers. These sons are like peas in a pod, all eye catching, combining softness, quiet temperament, excellent body shape, and overall balance. 8 sons sell.

ICEMAN was sold for \$225,000 to Macka's Angus back in 2021 (An Angus Bull price record at that time) and has been thoroughly used worldwide. ICEMAN really stamps his progeny with balance, extra softness, length of body, strong toplines and big broad muzzles with an incredible temperament to go with it. His progeny has topped sales throughout Australia and internationally and it was great to meet many of the international Angus breeders who have used ICEMAN while they were out for the World Angus Forum. ICEMAN sons are currently averaging \$20,000 at Texas, topping at \$65,000. 9 sons sell.

TOP GUN is a big, long, athletic bull that's very quiet bull. We saw him on centre in the US last year and his volume and capacity was admirable. His calves arrive very early which is reflected in his 10 gestation ebv and once on the ground they explode. His sons are very similar to him, long, plenty of bone, great outlook and presence. He ranks in the top 1% of the breed for growth and gestation length, top 5% for carcase weight, and inside the top 20% for EMA and feed efficiency. 8 sons sell.

This is the second year of selling sons of CONVERSE and after visiting the LT herd last year we are very happy to use genetics from this highly maternal, structurally correct herd. This super sound, very slick, soft, deep set, highly proven calving ease bull that is a dead set a true heifer bull. They come early and are showing plenty of style, shape and balance. Progeny in the States are admired for the maternal attributes including fertility, udder attachment, teat size and excellent structure. CONVERSE has worked well over our large framed cows. 8 sons sell.

Was the top priced bull for The Rock Angus in their 2022 bull sale. A super quiet, thick, soft, good boned bull that we have a lot of time for. Weighing in at 1,250kgs, nicknamed "The Rock" oozes style, presence and is certainly breeding true to type. His progeny carries the same bone, docility, depth of body, thickness and weight for age. Don't miss the opportunity to see these sons in the flesh, you won't be disappointed. 25 sons sell.

After travelling around Angus herds across the Eastern seaboard we were impressed with the NEW GROUND progeny and decided to use him heavily. His sons have plenty of growth, slick as seals, good carcase, massive testicles and a good overall balance of traits which heavily aligns with our breeding program. NEW GROUND was used heavily in our ET program. 14 sons sell.

INTENSITY was purchased for \$46,000 from Bowmont Angus topping their 2023 bull sale. We partnered with Nampara Angus and loved the style, slick skin, capacity and overall structure. A bull that can be used across the herd without any hassle, low birth, ample growth and ideal marbling. He has worked particularly well over our powerful cows and these boys will be ideal for the QLD environment. They will be able to walk, feed and breed just about in all conditions.

An oldie but a goodie. BONUS was used back in our herd 5 years ago and his 60+ sons have consistently sold at the top end of the sale currently averaging \$23,000 topping at \$80,000. You may ask why we returned back to using BONUS? It was off the back of his consistent breeding, a magic heifer bull that is proven to inject huge carcase traits. Progeny are dog quiet, slick skins, plenty of softness and maintenance free cattle. 13 sons.

As we do each year, V952 being Lot 1, is a great example of the performance and quality we strive to deliver at Texas. He displays all the qualities Poss DEADWOOD has brought to the Texas program when crossed over maternal genetics that proven to breed true to type over many generations. His Dam Texas UNDINE P289 is a very stylish thick long bodied HANDYMAN daughter who has become a donor cow on the sheer quality and performance of her progeny. Her 1st calf made \$40,000 in 2022 sold to the Anderson family. Plus her Dam and Grand Dam are Texas UNDINE H638 and Z183 who are some of our most recognised cows in the TEXAS herd. V952 is a big, very thick, deep stylish, long bodied bull who displays that great balance of performance, carcass quality and profitability. He's a well structured, super quiet bull with eye appeal, balance and phenotype. A good all round bull that will suits most environments that will have a big impact on adding extra quality kilos and profitability of your genetics. Top 3-11% for growth, CWT, NFI

True to type out of another very strong Maternal line, the OMNIA family by DEADWOOD expressing the Style , Performance, Carcase Quality. His Dam Texas OMNIA P5 is another example of cows that has earned her ticket as an elite and entered our donor Pen purely off the back of the quality of her calves. She has 5 sons in this year's sale with her 1st bull making \$34,000 and her two daughters breeding to a similar standard. Photo says it all, another stylish powerful DEADWOOD son born to perform where ever he goes with a great balance of both phenotype and EBV's. Top 3-5% DOC & NFI

V931 has all the makings of a TOP STUD SIRE that catches the eye of so many people right from a young age. Style, Power and Performance who is in the top 2% to 6% for GL, 200, 400, 600 day growth, CWT and EMA. He has a great balance of all traits and looks like a Real Angus Bull. He is just so typical of what this UNDINE family produces when crossed with a thick heavy based beefy Sire like DEADWOOD. Definitely one bull to have a good look at. Good structure and feet, phenotype is A1, super quiet, out of another very strong Maternal line.

TOP STUD SIRE. V936 is yet another DEADWOOD son that is definitely one of our Favourites of the Sale. Just look at his photo. It says it all. One impressive, heavy fleshing, long powerful looking, young sire with a beautiful balance of all traits to back him up. V936 is a very good all round bull that could be used on heifers, but most of all, would take your cows to the next level in presence, performance and profitability. Moderate calving ease, Top 2% for 400, 600 Day, huge CWT and +3.9 IMF. His Dam Texas UNDINE P574 is another one of these deep, heavy, long bodied, very fertile cows that is kicking some serious goals with her sons averaging \$21,000. She is the Dam of Texas UNDINE R157 who is a seriously good breeder with many sons in this years sale and the dam of Texas UNDERDOG who sold for the 2nd top price last year for \$65,000 to Lunar Brangus & Ultra Blacks. We believe V936 is one of those bulls that will become a Sire that we will talk about in years to come on the quality and performance of his progeny. Three ticks for this Fellow.

Just like the Bull before him, V1052 has that Eye Appeal with a good balance of traits to back him up. Top 1% for 400, 600 Day & CWT, he is a good, long, heavily built, easy going bull that is super quiet, well structured with a strong history of longevity and producing quality cattle. He has the largest CWT of the sale. His dam, a daughter of the great Texas UNDINE Z183, who was sold for \$20,000 in our 2021 Female Sale to Cottage Creek Angus for purely donor duties. J623's history of being very fertile, feminine, structurally correct female. This profitable maternal line with longevity on her side, has sold 11 sons to average just under \$21,000 and has currently 16 daughters retained in the Texas herd

TOP STUD SIRE V1053 is a full ET brother to Lot 10 and is another very good example of the of the Style, Quality and Performance Texas Korporal K508 has bred into the Texas herd. He is a nice, long bodied, well balanced bull displaying plenty of meat down the spine with a good blend of softness and power. His dam, a daughter of the great Texas UNDINE Z183, who was sold for \$20,000 in our 2021 Female Sale to Cottage Creek Angus for purely donor duties. J623's history of being very fertile, feminine, structurally correct female. This profitable maternal line with longevity on her side, has sold 11 sons to average just under \$21,000 and has currently 16 daughters retained in the Texas herd. This progeny performance certainly displays how important maternal lines are in anyone's herd, as they are the foundation of breeding consistency and profitability.

TOP STUD SIRE. Just like all of his 2 full ET brothers above, V1061 is another one of these long bodied, thick, easy doing, strong featured KORPORAL sons that goes back to very secure high performing maternal lines on both sides of the family with great longevity. The old saying 'What you See, is What you Get' is exactly the case with these proven cow families. 3.4 BW, Top 1% for 400, 600 Day, top 2% CWT & 3.4 IMF, V1061 has a great balance of traits to add to his style and presence.

TOP STUD SIRE. V913 is one very powerful, stylish Sire that is Phenotypically so Impressive! Look at the data on this young Sire, BORN to PERFORM. V913 is one very impressive large, long, deep bodied, PLATINIUM son that catches everyone's eye. Look at this combination, Top 3 - 7 % for 200, 400, 600 day & CWT, +10.2 EMA & +2.3 IMF. V913 was the equal 2nd highest Scanning EMA bull at 104 sq/cm at on 16 months of age. He is definitely one of our picks for phenotype, quality and performance. A bull that will have a big impact on wherever he goes on carcase weight and quality to make them more profitable. He has all the Power, Presence and Profitability you could want with a strong head and outlook, slick, soft skinned and is a super quiet bull with style. His Dam Texas UNDINE R151, is a big, long, heavy bodied BONUS daughter that has become a very influential donor cow like her Grand Dam Texas UNDINE J623 who is the Dam of the three previous bulls. This young Sire ticks all the boxes and is well worth the trip to come and have a look at.

Repeat button here. V900 has very similar dimension to Lot 14, his brother above. As you can see here DEADWOOD is a very dominant breeding bull throwing true to type no matter the cow we put him with. Thick, long bodied, easy doing stylish cattle that fatten at the drop of a hat and weigh like lead. V900 is a very good, all round bull with another super strong maternal based Dam Texas OMNIA P5 who is now in donor duties based off her breeding abilities. His maternal brother was sold for \$34,000. V900 was the highest scanning EMA bull at 107 sq/cm at on 16 months of age

V412 is one of Wendy's and my favourites of this year's Sale. Just look at the Photo. A true STUD SIRE and the first sons of Kunuma THOR. He has all the style, balance, quality and performance we look for in a Bull. 31kgs born, heifer's 1st calf with this size and capacity. Only +1.9 BW to +147 for 600 Day and +3.6 IMF with a good balance of all other traits. Super quiet, good feet and structure, strong head and outlook, slick skinned, easy doing and weighs like lead. V412 is definitely a bull to SEE.

Just like all of his brothers above, V437 is the third one of these long, thick, easy doing, strong featured THOR sons that goes back to another very secure, high performing cow line with great longevity. The old saying 'What you See, is What you Get' is exactly the case with these proven maternal cow lines. His Dam Texas TOQUE R241 has entered the donor pen off the back of her quality breeding. Her first bull sold for \$30,000. Check out this bulls data Top 1-5% 200,400, 600, SS, DOC, CWT with plenty of MK. Has the equal highest Scrotal EBV in the sale.

Now this is one, big, impressive, big volume NASA son with real power and constitution. The strength of head and body is second to none, designed to pack on the KILOs. Out of a REALITY daughter, V449 is a nicely balanced genetic package that will increase the profitability of your cow herd no matter the market you target. His dam Texas PRIDE K112 has sold sons to \$26,000.

V395 is the 1st of the LOTTO sons to be sold at Texas who is a super quiet, good looking, nicely balanced, thick set bull. He is out of one the very stylish, long, thick, heavy bodied MAVERICK daughter, Texas UNDINE R706, who is a full sister to Texas TOP GUN who was sold for \$55,000 as a 14 month old in 2021. R706 goes back to one of our most renowned donor cows, Texas UNDINE H638. He too has the Style and phenotype, with a good balance of all traits with that strong maternal history. 33kgs born. V395 is a highly flexible all round, slick skinned, strong bodied bull that would easily suit both a heifer or cow program.

TOP STUD SIRE. V906 is one of seven young Sires to be used as a Yearling Bull over the Texas heifer last year. He has always been an impressive calf right from the day he was born and look at the size and capacity he displays today. Stands proud, big muzzle, strong head, long bodied, straight back and plenty of meat down the spine. Quiet as a lamb, has got proven calving ease, good feet and structure and athletic. V906 was the equal 3rd highest scanning EMA bull at 103 sq/cm at on 16 months of age and has the 2nd highest CWT of the sale draft. He is a full brother to last year's top priced bull, Texas U CRACKER U983, who sold for \$75,000, Texas U BETTER BELIEVE IT U995 who sold for \$50,000 in 2025 and maternal brother to Texas BONUS R204 who sold for \$80,000 in 2022. With four generations of donor cows behind him, he has a maternal history a mile long. His Dam Texas UNDINE P10 has over 60 progeny now and has become one of Texas's most influential donor Cows. V906 is definitely one of these bulls that is a must to see. Top 1% to 7% for calving ease, GL, 200, 400, 600 Day, CWT & NFI, +3.8 BW and +3.1 for IMF.

TOP STUD SIRE. The exact same comment could be said for this young BONUS son as well who was also used as a yearling bull over heifers. Texas VENTURE CAPITAL V948 is an absolute stand out and is without doubt a favourite of mine. He is one very impressive, stylish, very long bodied, athletic, solid based, easy doing, well muscled bull with a strong head and outlook, slick skin and great structure. He is definitely an exceptionally good all round bull that has a beautiful balance of all traits who will add more length, capacity, body weight and carcase quality to any breeding herd. His Dam Texas OMNIA R259 has become a well sort after donor Cow with over 20 progeny and many more to come. A Bull well worth coming to see in the flesh.

TOP STUD SIRE. As you can see, this NEW GROUND son oozes style and phenotype. He's a very thick, long, deep, wide base, heavy young bull packed with muscle. Good on their feet, strong head, slick, soft skinned and quiet. V337 fits this description to a tee, he has a great balance of all traits and was also used over heifer last year as a yearling bull. His Dam Texas TOQUE S447 is a beautiful long, heavy, deep bodied Powershift daughter that has also become a donor cow on the quality of her progeny. Definite three ticks on this young Sire. Carries the highest fats of the sale draft.

V526 was also used within the herd as a yearling over our heifer program. He too is definitely up there with the best of them and has that WOW factor too for power and presence, and has that exciting combination of genetics with LOTTO over a powerful but feminine, big long bodied, heavy based NASA cow. He is super quiet and slick, structurally very correct and has that ability to finish heavy quickly. With what you can already see in the quality and style of this young sire and also having strong maternal background, you know he will mature into a magnificent, big, thick, impressive Sire that's guaranteed to breed true to type. It's very hard not to repeat myself here, but V331 is another young Sire that caught our eye and used over heifers with all the same characteristics. He goes back to Texas PRIDE N1 who has also been a very influential donor cow. These strong maternal lines are the No. 1 factor in producing consistency and these type of young bulls are a perfect example of that. So similar in phenotype. Big, long, deep, thick and heavy with plenty of muscle, style and power. V331 is a good, slick, all round, impact bull designed to boost performance and add carcass weight. Maternal brother to Texas U-BEAUTY who was sold in 2025 for \$55,000 and, dam Texas PRIDE N1 is currently averaging \$33,000 for her sons and her dam is the great Texas Pride E30 who was sold to 3R Livestock for \$60,000 and has produced over \$1 million dollars of progeny.

eShepherd™

 STRONGBÓ

Precision grazing made easy

Where eShepherd controls where cattle graze, the StrongBó Auto Weigher measures how they respond.

One system manages the inputs. The other tracks the outcomes.

Weight trends surface within days - not after your next muster.

If a mob's growth rate slips, you can identify the cause and act immediately: adjust the rotation, shift the boundary, change the approach. No yarding. No stress. No lag.

It's the difference between managing by instinct and managing by data - continuously, automatically, and without adding labour.

And the data compounds. Over time, you build a clear record of which rotations consistently hit target growth rates, which paddocks underperform in dry conditions, and which mobs respond best to intensive cell grazing. Every season, your decisions get sharper.

SCAN TO FIND

TOP STUD SIRE. V344 is another young Sire we used as a yearling over heifers. Different pedigree with all the same characteristics. He has that balance in his genetics that gives you the opportunity to use him successfully on both heifers and cows. He is a thick set, heavy, long bodied bull being a son of the highly proven all round calving ease Sire Texas BONUS R204 with a maternal cross of two highly recognised cow lines going back to Texas UNDINE Z183 and Texas TOQUE M215. V344 is a stylish, highly flexible, mobile young bull that is well worth a good look at.

Purchaser: _____

\$ _____

At Tieyon Station we operate in a harsh Central Australian environment where cattle have to be functional, resilient and easy to manage.

Over many years, Texas Angus bulls have consistently performed for us. Their progeny are thick, quiet, productive cattle that handle our conditions well and continue to meet the demands of our breeding and commercial programs. While the cattle speak for themselves, the real reason we continue to buy Texas genetics is Ben and Wendy. In the time we have known them, they have never stood still. They have embraced low-stress stock handling, explored, and experimented with pasture improvement, soil health and animal nutrition, and have been generous in sharing what they have learnt with fellow producers both in Australia and overseas.

It takes courage to challenge traditional thinking, to remain curious and to be open to new ideas. If you are going to allow a stud to influence the genetic direction of your herd, you need complete confidence that they are breeding cattle with integrity and recommending the right bulls for your operation.

We trust Texas Angus because we trust Ben and Wendy. Their honesty, knowledge and commitment to continuous improvement give us confidence that the bulls we buy are the bulls we need.

Paul & Jo Smith, Tieyon Station NT

TOP STUD SIRE. He is a full brother to Lot 43 and last year's top priced bull Texas U CRACKER U983 who sold for \$75,000, Texas U BETTER BELIEVE IT U995 sold for \$50,000 and maternal brother to Texas BONUS R204 Sold for \$80,000. With four generations of donor cows behind him, he has a maternal history a mile long. His Dam Texas UNDINE P10 has over 60 progeny now and has become one of Texas's most influential donor Cows. One very impressive, stylish, powerful looking, young Sire with all the figures to back him up. V933 is a great example of why these DEADWOOD sons have sold so well in the last two years. Just look at his photo. It says it all. A good all round bull that could be used on heifers, but most of all, would take your cows to the next level in presence, performance and profitability. He is a super quiet, stylish young bull that has a beautiful balance of moderate calving ease, plenty of growth and good carcass values. IMF +4.0 Definitely one bull to look at!

TOP STUD SIRE. Just look at the Data on this Bull and he is every bit of that and more in the paddock. One very impressive large, long deep bodied, DEADWOOD son that catches everybody's eye. Look at this combination, Top 10-15% for 200, 400, 600 day, & CWT and +3.2 IMF. VEE EIGHT V981 is definitely a favourite of Wendy's for phenotype and is a bull to have a big impact on small short based cattle that need to increase performance to make them more profitable. He has all the power, presence and performance you could want with a strong head and features, slick soft skinned, super quiet bull with style that goes back to another beautiful big TOUR OF DUTY female out of the UNDINE maternal line. His Dam, Texas UNDINE M103, has earned her stripes as a donor with her current sons averaging \$19,500, topping at \$30,000 and his grand dam is Z183, as they say its all in the genes! This young Sire ticks all the boxes and was the equal 3rd highest scanning EMA bull at 103 sq/cm at on 15 months of age. A definite front paddock bull.

Just like all his brothers above, V975 is another great example of the qualities DEADWOOD has brought to the Texas program. Genetics that breeds true to type on both sides of the family. He's out of that ever so strong UNDINE cow family that has consistently produces this level of quality and performance year in year out. He is a very thick, deep stylish, long bodied bull that displays a great balance of performance and carcass quality. He's a well structured, super quiet bull with eye appeal, balance and phenotype. A good all round bull that can be used on both heifers and cows and add to the profitability to your genetics with extra carcass weight and quality. At +15.3 for EMA and +3.8 for IMF. V975 backs up his quality data by being the HIGHEST scanning IMF Bull for this year at a MASSIVE 8.1, which is something you don't see that high very often.

TOP STUD SIRE. A full ET brother to the bull above with all the same attributes. These NEW GROUND sons are all very consistent in style and type. Big long, deep, thick set heavy cattle packed with muscle. Good on their feet, strong heads, super slick, soft skinned with a good disposition. V1032 fits this description to a tee who is up there with the best of them for what you can see in the paddock. His Dam Texas TOQUE R192 is one of the cows promoted to the donor program on the quality and performance of her progeny. She is a beautiful looking cow that's big, long, heavy featured Korporeal daughter that breeds true to type with every Sire she has been joined to. Top 1-9% for growth, SS, CWT, EMA & RBV, and is the highest RBV bull of the sale.

V353 is a classic combination we strive to do at Texas blending calving ease and high carcass values with real growth and performance. This adds to the profitability of these genetics for all sectors of the beef industry to make their share. Texas BONUS R204 over this heavy built, thick, long bodied UNDINE cow is exactly that! As you can see with his photo, V353 is a stylish, good structured, long bodied, calving ease heifer bull that expresses plenty of grunt and carcass.

An ideal heifer bull is a sire that can promote live calves on the ground and have the same growth, weight, constitution and carcass qualities of the bulls you use on your cows. V426 is exactly that, 36kgs at birth, is a nice safe bull to use on heifers and get the best out your cows. He is another THOR son out of a very thick set full sister to Texas ICEMAN. He is a stylish, slick skinned, heavy bodied, well shaped, big scoped bull with added length that oozes all the carcass qualities you need. Check out his birth to growth spread and overall balanced data set.

True to type, V384 is yet another one of these ROCK sons, out of 1st calf heifer Texas UNDINE T676 who is a very thick, deep bodied INVESTMENT daughter, with all the same qualities. There is no guessing in the way these genetics will breed for you. Big capacity, super thick, long, deep set, heavy fleshing all round bull with a good balance of performance and carcass quality.

TOP STUD SIRE. Texas VELVET TOUCH V916 is one very impressive powerful super thick sire that is phenotypically very impressive. Look at the data on this young sire, a great balance of all traits that will add profitability to all sectors of the beef industry. He is, long deep bodied CONVERSE son that catches everyone's eye. He is definitely one of our picks for phenotype, quality and performance. A bull that can be safely used on heifers and cows who will have a big impact on wherever he goes on carcass weight and quality to make them more profitable. He has all the power, presence and profitability you could want with a strong head and outlook, slick soft skinned and is a super quiet bull with style. His Dam Texas OMNIA R157, is a beautiful big long heavy bodied NASA daughter that has become a very influential donor cow that is the Dam of Texas UNDERDOG U1000 who sold for \$65,000 to Lunar Brangus and has 6 sons in this years sale. This young sire ticks all the boxes and is well worth the trip to come and have a look at. Three ticks

Here a classic older genetic package that has proved its value at Texas for a long time. V1003 is from some 10 year old embryos we decided to use to compare with the new generation genetics packages, and has proven they are up with the best of them. This GENERATION 2100/ Z183 cross has once again shown their value with the quality they present. He is a good, stylish, all round bull that will do the job on both heifers and cows to add those extra dollars onto the progeny. V1003 was the equal 3rd highest Scanning EMA bull at 103 sq/cm at on 15 months of age.

V932 is the only RAWHIDE son in this year's sale. Blind Freddy will spot a RAWHIDE every time. We have sold 128 sons of RAWHIDE through the last 3 bull sales and they are averaging \$18,000. phenotype, power, performance and quality are just some of the words to describe V932. Good, strong head and outlook, thick, wide based, heavy fleshing body, quiet and well structured. He is a good, all round commercially based bull that would easily suit most breeding programs. V932 was the equal 2nd highest scanning EMA bull at 104 sq/cm at on 16 months of age. His Dam Texas PRIDE N545 is proven to be a very valuable donor cow producing 35 calves selling to \$47,500, that consistently produce a similar product no matter the sire we put her to. Top 2-13% for growth & CWT

V912 is another impressive looking CONVERSE son with very similar characteristics of volume, weight for age and depth of body. He has grown into this very thick, big, volume bull this is what we believe PROFITABILITY is all about. Being out of a thick, heavy based KORPORAL cow that has joined the donor program, V912 has a nice balance of low birth at +2.4 and calving ease, plenty of growth at +122 for 600 days and ample carcass quality and softness. Long, thick, slick, well muscled bull bred to survive and thrive with real balance. He does have one blue eye.

Similarly bred bull to his brother above, being very similar in type. These CONVERSE sons are all very consistent in style and type. Thick, long, deep, wide base, heavy cattle packed with muscle. Good on their feet, strong heads, slick, soft skinned and quiet. V997 fits this description to a tee who has that added performance that comes from his Dam Texas UNDINE L621 who is one very impressive, big volume, strong, heavy built TOUR of DUTY cow who is also in our donor Program. She is currently averaging \$20,000 for her 11 sons, topping at \$58,000 for Texas QUALITY TIME Q529 selling to Little Meadows Angus.

This young Sire has always been an impressive calf from the day he was born. By GAR ASHLAND, he stands proud, big muzzle, strong head, long bodied, straight back and plenty of meat down the spine. Quiet as a lamb, has got proven calving ease, good feet and structure and athletic. V1027 is one of these older generation ET calves out of our most recognised donor cow, Texas UNDINE Z183, who has produced well over a million dollars in bulls alone including many Stud Sires. He is maternal brother to Texas UNDINE M508 who sold for \$65,000, Texas UNDINE N555 selling for \$60,000, Texas UNDINE M113 selling for \$45,000, Texas Mount K2 selling for \$45,000 and Texas Kaputar M100 selling for \$44,000.

Just like his full ET brother above, V1014 is a young sire, has always been an impressive calf from the day he was born by ASHLAND. Stands proud, big muzzle, strong head, long bodied, straight back and plenty of meat down the spine. He too is one of these older generation ET calves out of our most recognised donor cow Texas UNDINE Z183 who has produced well over a million dollars in bulls alone producing many stud sires. A bull born to perform with plenty of carcass quality.

V1051 is another one of these well proven older generation embryos we use that has once again proven its value. He has a highly proven, profitable, fertile, maternal background with longevity with Texas UNDINE J91 as his dam. He is yet another one of these soft, well shaped, thick easy doing 2100 son with a good even balance of calving ease, growth and good carcase traits. A nicely structured, good all round bull that is quiet and fattens easily.

Definitely hitting the repeat button here with these PRIME QUARTER sons that are all so similar in phenotype and the traits they possess V1041 is out of another predominant donor cow Texas TOQUE J602. Having this much size and capacity, only +1.9 for BW and +3.1 for IMF shows you just how well balanced this young bull is that can be successfully used over a wide range of heifers and cows to improve carcass quality and performance. Good structure and super quiet. His dam Texas TOQUE J602 has sold 18 bulls for an average of \$22,500 topping at \$70,000.

This is another very successful older generation pedigree combination of BEASTMODE over Texas UNDINE Z183 that has connected well producing a stylish, well balanced, high performing son with no extremes. When Z183 always weaned an exceptional calf and you get a milk EBV of only +2 for this young Sire, we find Genomics can get a bit radical especially with these older generations when comparing to the latest genetics. With such a big history behind this pedigree, these extremes were eliminated many years ago.

+4.0 Birth weight, +5.2 for IMF and to look at this stylish and powerfully built bull is something to see. PLUS he is a full ET brother to Texas U CRACKER who sold for \$75,000 last year and Lots 43, 55 and 70, plus a maternal brother to Texas BONUS R204 who sold for \$80,000 . With four generations of donor cows behind him, he has a maternal history a mile long. His dam, Texas UNDINE P10 has over 60 progeny now and has become one of Texas's most influential donor cows. With this history, phenotype and data, V1036 is a bull well worth a good look at.

The DEADWOOD sons were definitely one of the highlights of last year's sale, and you can see why with the qualities V926 possesses. One very stylish, powerful well put together young sire with a beautiful balance of all traits to go with his phenotype. His dam, Texas UNDINE Q57 is now another highly value donor cow that continues to produce plenty of high quality progeny . V926 is another one of these bulls well worth having a good look at.

Texas WAR MACHINE W39 is the 1st of the Autumn Yearlings bulls to sell with good reason. He's got that WOW factor and is a perfect example of what THUNDERSTRUCK is known for, and that is STYLE and PHENOTYPE. 35 kgs born out of a beautiful long bodied POWERPLAY cow, WAR MACHINE certainly displays that power and presence. Good powerful head and outlook, structurally correct with a great balance of traits, he is certainly a good safe, very stylish young SIRE that has a strong maternal background that is the key to breeding TRUE to TYPE. A super safe heifer bull with softness, carcase and marbling combined with 40cm scrotal makes him a very attractive young sire.

Texas WAR LORD W40 is also one very attractive young SIRE that has that WOW factor and all the same dimensions of his sire THUNDERSTRUCK in phenotype, performance and data who also catches everyone's eye. Like his sire, he is a stylish, proud, strong looking young sire that expresses all the style and phenotype we look for in a bull. With his genetic base and structural correctness, W40 is the type of carcase bull designed to tidy up a herd, boost performance and add to the quality and profitability of his progeny. His dam, Texas OMNIA S80, is a very tidy structurally correct, good looking, deep, long bodied, phenotype plus BONUS cow . Top 2% to 8% for 200, 400, 600 Day, CWT, EMA and RBY. Another young sire well worth a good look at.

Same dam, different sire to Lot 125 with similar phenotypic attributes and qualities. W1216 is a typical heavily built CONVERSE son out of Texas UNDINE Q57 that is consistently bred to the highest standard no matter who we join her to. He is a good strong headed very thick deep bull with muscle, doing ability and mobile. Super quiet, good slick skin and ready for work. Top 2-10% CED, growth & SS

Just look at the qualities of this young DEADWOOD Sire. W1223 looks even better in the flesh than what he does on paper. The phenotype and eye appeal he has with this good even combination of performance and carcass attributes is what we look for when breeding highly profitable genetics for any future program. Plus he has Texas MOUNT K2 and ADMIRAL A2 in his maternal background who are the very recognised in the Texas herd for their type, body shape and capacity. Strong head and outlook, slick skin, structurally correct, athletic and big, deep, thick, heavy body describe this bull to a tee. Maternal brother to Texas U-BEAUTY who was sold in 2025 for \$55,000 and his dam Texas PRIDE N1 is currently averaging \$33,000 for her sons. Her dam is the great Texas Pride E30 who was sold to 3R Livestock for \$60,000 and has produced over \$1 million dollars of progeny.

TOP STUD SIRE. V940 is yet another great example of these DEADWOOD sons. Just look at his photo. One impressive, powerful looking, young sire with the figures to back him up. A good all round bull that could be used on heifers, but most of all, would take your cows to the next level in presence, performance and profitability. He is a super quiet, well structured stylish young bull that has a good balance of moderate calving ease, plenty of growth and good carcass values. His Dam is Texas UNDINE M103, who earned her stripes as a donor with her current sons averaging \$19,500, topping at \$30,000. She is a third generation donor cow that has 7 sons in this year's sale all of the same quality and performance level and not forgetting she is the dam of one of the best donors - P010! V940 is definitely another bull to look at!

V947 is an attractive, big, power sire that is phenotypically pretty impressive. Look at the data on this young sire, BORN to PERFORM. V947 is a impressive large, long, deep bodied DEADWOOD son that catches the eye. A bull that will have a big impact on wherever he goes on carcass weight and quality to make his progeny more profitable. He has the power, presence and profitability you could want with a strong head and outlook, slick, soft skinned and is a super quiet bull. His dam, Texas TOQUE M235, is a very thick, heavy long bodied ELEMENT daughter the has become a very interesting donor cow. This young sire ticks the boxes and is well worth the trip to come and have a look at. Maternal brother sold for \$60,000. Top 1-4% growth & CWT

V1063 is another one of these older genetic base bulls, whose pedigree has had a massive influence in the Texas herd for many years. He is a good, solid commercially focused, stylish bull that has a good balance of all traits. He is a son of the great Texas TOQUE D35 who has sold sons to \$44,000 and was sold at our Female Sale in 2021 for \$28,000 as a 13 year old cow. She is still a donor at a grand old age of rising 18 years old!

Same thing could be said about this stylish wide bodied THUNDERSTRUCK son. V19 is a nicely put together, neat package that is a thick, heavy fleshing bull, bred to survive and thrive in most environments. His Grand Dam Texas USHERETTE F290 is a 16 year old cow that has only just retired this year having had 14 progeny in 14 years with a calving interval of 371 days despite enduring the worst drought on record! Longevity at its best and one of her daughters is now a donor cow. Balance, the key for success in any breeding operation.

Like his older brothers earlier in the draft, W43 is another THE ROCK son with all the same carcase qualities, power and performance. He is out of a very thick, high powered HANDYMAN cow noted for her added performance and carcase weight. He is also a nicely balanced, powerful looking young sire. Good structure, and docility plus is +3.1 for IMF. Maternal brother was sold for \$30,000. Top 4-11% 200, 600, DOC, CWT & NFI

Full ET brother to Lot 140, W1224 is another impressive Stylish DRIVE son out of Texas UNDINE Z183 who will grow into a big, heavily built cow bull with plenty of carcass quality. Like his brother, he is very correct, long, wide based young bull, expressing good muscle, softness and style. Just another nice, all round nicely balanced bull designed to cover the country that could be used successfully over a wide range of cows.

Style, strength, structure, and phenotype is what to expect with JAMESON bull over a super thick heavy bodied MAVERICK cow who is a full sister to Texas ICEMAN. With generations of breeding true to type, W149 will just keep getting better with age. He's a very correct stylish bull that could safely be used on heifer and add value to your cows.

YES, the photo says it all. W1229 is another eye catching well built PACIFIC son with real phenotype like his dam, Texas UNDINE Q57 who is getting goals in our donor program with two of her sons being kept at Texas for stud duties. He is a proud, upstanding, wide based moderate bull that you would be proud to have in the front paddock with a great balance of numbers. He certainly will add to the performance and quality of the cows you joined him too. Three ticks on this young fellow.

Tissue Sampling Unit (TSU)

Allflex® Tissue Sampling Units provide a simple but effective means for DNA testing livestock. Collect a clean, uncontaminated sample in seconds with a single squeeze motion. TSUs are easy to use and yield excellent lab results.

TSUs can be paired with a matching NLIS and visual management tag, creating a simple link between the genetics of an animal and its identification.

V453 is another great example of the quality and consistency that ICEMAN continues to breed. His dam, Texas UNDINE R239, is one of those thick, heavy-bodied, long-sided HANDYMAN daughters. Her first calf was Texas TNT, who sold for \$100,000 at the 2024 Bull Sale and is very closely related to V453. R239 is now a heavily used donor cow within the program. Just look at his data: +4.7 Birth Weight, +136 for 600-Day Growth, a massive +17.7 EMA and +2.8 IMF, a very impressive set of figures to complement the type and style he displays. With the strength and consistency of the genetics on both sides of his pedigree, combined with his outstanding phenotype and performance data, V453 is well worth serious consideration as a breeding sire.

This stylish young heifer bull is a POWERSHIFT grandson out of a deep, heavy base UNDINE cow who's on her 10th calf and still going strong with a calving interval of 370 days. W75 has tremendous calving ease data -1.1 birth weight who was only 32kgs born. He expresses plenty of fleshing ability and carcass quality. W75 is a moderate, structurally correct young bull that can walk out well, is quiet and displays length of body with a nice rounded back end. 2nd lowest BW of the sale and the perfect heifer bull.

Try and pick the difference between this pair? Another stylish, super quiet LOTTO bull at its best here with very similar traits to lot 225 out of another very consistent breeding maternal line. Generations of these traits are about as secure as you can get. Plus, V586 as you can see by his PHOTO is a good, thick barrelled, long bodied well-balanced bull with extra softness who is quick to pack on the kilos.

Only fitting to start this pair is to have another stylish young brother by INTENSITY out of a 1st calf RAWHIDE base heifer who was only 34kgs born. There is a lot to like about this slick, meaty, long bodied young fella. He is a beautifully balanced bull in both phenotype and all traits and has that strong maternal background that is mobile, correct and ready to do his job on heifers. Top 3% for GL, +1.8 BW & +4.1 for IMF

Look at this for a stylish very correct meaty young bull. Good calving ease, Top 10% for GL, low birth weight of +3.6 to +125 for 600 Day, EMA of +10.5, positive fat and +4.1 for IMF is a great balance of all traits. This pedigree cross of THOR over UNDINE K525, is a very successful combination of balance breeding on phenotype and on paper. K525 is a rising 12 year old, still in the herd, never missed a calf with a calving interval of 374 days, not a bad record when she had to endure the worst drought on record. She has sold sons to \$22,000. A good safe heifer bull designed to pack on the kilos. The perfect example of what the Texas breeding program is about, and that is PROFITABILITY - that grow and hit market specs so all sectors of the beef industry make money.

Being a maternal bother to Lots 19, 60 and 65, there is no question on the qualities this EVEREST son has. His dam, Texas UNDINE P623 is a donor cow for good reason with all of her progeny being of this high standard. Just look at this spread of numbers, A very nice balanced bull with plenty of softness, fertility, carcase quality, calving ease and performance to know his calves will weigh and grow.

V548 is yet another totally different pedigree combination that is breeding true to the Texas type both in the paddock and on paper. So typical of the INTENSITY sons, he is a moderate, thick, long, heavy bodied young bull with good bone, slick skin, fleshing ability and muscle. At +0.6 for BW to +140 for 600 Day, he is a good all round bull, safe on heifers and will add to the weight gains of your cow herd.

36 kgs born, heifers 1st calf, +3.9 BW out to +156 for 600 Day, Top 1% CWT. V682 is another nicely balanced, good shaped, stylish, moderate, thick set son of INTENSITY out of yet another POWERPLAY daughter. True to type with these genetics, V682 is another good, all round bull that will infuse added performance and carcass quality into his progeny and suit most breeding operations and environments.

POWERPLAY over a HANDYMAN female is a combination that has worked very well at Texas for quite a few years and you can see why with young fella. V818 is a stylish, well muscled, super slick, thick, long bodied, commercially based bull design to enhance the carcass quality, add softness and performance to your cattle. He is a nice quiet, well balance, good structured, easy doing bull with a very proven history on both side of the family. He has plenty of growth, fertility and carcass.

For the last pick or the pair of the day this year, we have two quality carcass quality NEW GROUND sons. V459 is out of another very attractive, long, roomy well boned SECRET female that is about to have her sixth calf with a calving interval of 376 days. Just like we endeavour to do each year, he is a true reflection of the quality and evenness of this year's draft of 300+ bulls. He is a smooth long bodied, good boned, well-balanced bull who was only 30 kgs born, perfect for heifers that will put on real weight and carcass quality, He's one good looking, well muscled, slick, thick, heavy bodied bull. -7.5 GL, +3.4 BW to 148 for 600-day, +4.1 SS, positive fat and +9.6 EMA.
