SALE INFORMATION

GST:	GST is to be added onto the purchase price at the fall of the auctioneer's hammer. You will be invoiced purchased price plus GST.
REBATE:	2% rebate to outside Agents introducing buyers in writing 24 hours prior to the Sale.
AUCTIONSPLUS:	This sale will be interfaced with AuctionsPlus. Register online at auctionsplus.com.au or call 02 9262 4222. Or bid through your preferred agent.
TRANSPORT:	All transport to be co-ordinated through Peter Kratz Livestock Transport unless you have your own truck.
CATTLE HEALTH:	All bulls were semen Tested by Nathan Krudinear (Bovine Breeders) on the 26th June and a report will be available following the sale. All bulls have been treated for internal & external parasites and given an annual booster vaccination for 7 in 1 & Vibrovax on the 25.03.2026.
JOHNES:	We are accredited J-BAS 7.
INSPECTION:	Bulls may be inspected prior to the sale or on the morning of the sale. Open day 8th July 2026.
INSURANCE:	A Representative from Achmea Insurance will be at the sale for your convenience. We recommend bulls are insured against injury and death.
ACCOMMODATION:	Motels are situated in Armidale, Uralla and Inverell.
REFRESHMENTS:	Sale day refreshments will be supplied by the Grace Munro Ladies Auxillary.
DISCLAIMER:	The owners, employees, sale staff and representatives accept no liability for accidents that occur, although these are rare at cattle sales, any person attending does so at their own risk. While all care has been taken in the preparation of this sale catalogue, Glenwarrah principals accepts no responsibility for any errors or omissions contained in this publication.
CATALOGUES:	Catalogues can be viewed online at www.glenwarrah.com.au or the Breed Society websites.

Angus Society of Australia Suffix DNA Key

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA

SV : the sire has been verified by DNA

DV : the dam has been verified by DNA

: DNA verification has not been conducted

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

UNDERSTANDING EBVS

A BRIEF GUIDE TO BREEDPLAN

BREEDPLAN is a performance valuation program that describes the genetic profile of bulls for a number of commercially important traits. This profile is given as an Estimated Breeding Value (EBV), expressed as a figure (+/-) relative to the breed benchmark of zero (0) for each trait.

Accuracies - The accuracy provides a measure of the reliability of the EBV. The higher the value, the less likelihood of the EBV changing with the addition of more performance records on the animal.

Birth Weight - is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

200 Day Weight - is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to an animal's genetic merit for growth to early ages.

400 Day Weight - is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600 Day Weight - is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

Milk - is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200 day weight of their calves.

Scrotal Size - is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age. This EBV is an estimate of an animal's genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

EMA - estimates the genetic difference in carcass weight at a standard age of 650 days.

RIB - estimates the genetic differences in fat depth at the 12/13th rib in a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

Rump - estimates the genetic differences in fat depth at the P8 site of a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

IMF% - is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13th rib site in a 300kg carcass. Depending on market targets, larger more positive values are generally more favourable.

**Armitage & Buckley is one of the New England's most long standing
and reputable Stock, Station & Real Estate Agents, with over 50 years of operation.**

We have extensive experience in the Agency field, conducting sheep, lamb and cattle sales at the Guyra and Armidale Saleyards. We also conduct our own Weaner Sale each year, participate in the Combined Agents Weaner Sales, Auctionsplus Sales, Annual Bull and Ram Sales, and conduct Clearance Sales.

We regularly assist clients with assessment and marketing of livestock, both in the physical and digital space, assist clients with animal husbandry; joining advice; sourcing livestock and bulls; general compliance; and provide help in all matters relating to our client's livestock enterprise.

*Give us a call,
So we can help you!*

Welcoming our newest little stockman

♥ Rory Collins ♥

This year, our family is blessed with a special arrival: Rory, the newest member of the team. Kate and David and big brother Carter are excited to have him join the farm life, and we look forward to future days spent together.
