About us...

Welcome to our family...

Knowla Livestock is a family owned and operated livestock enterprise situated on the Mid North coast of NSW. The property is located on the headwaters of the Barrington River at Moppy, one hour west of Gloucester. Run by James and Annie, alongside Ted and Alison, Knowla Livestock is very much a family affair, with the next generation, Sandy, Doug, Rob, Jack, and Georgia, all sharing a passion for the land. They all work off farm except for Georgia who is mostly full time in the work force at Knowla with the day-to-day operations. Our undulating to steep grazing country is ideal for cow calf production. We manage 2,200 hectares and lease a further 600 hectares. In 2007 we purchased 130 hectares at Kia Ora, Gloucester, where our annual production sale is held.

Traditionally we were Devon/Shorthorn cross breeders, with progeny from the Kholwha Devon stud sold at the Gloucester bull sale from 1981. A decision was made in the early 90's to transition to breeding Angus cattle, and in 2024 we celebrated 30 years of breeding registered Angus cattle, with the foundation bloodlines purchased from Dulverton, Forres and DSK Angus studs.

Today, the family manages 280 registered Angus females and approx. 500 commercial cows and progeny. Our commercial breeding program drives the selection pressures that shape our seedstock herd, with all selection decisions based on proven commercial attributes. All walking sires used within our seedstock herd are also exposed to equal numbers of commercial cows, ensuring our genetics remain directly aligned with the requirements of commercial producers. Our commercial females are joined to produce feeder steers for the EU grain fed market, or the heavy grassfed MSA market. Our annual pasture improvement program allows for this, with approx. 250 hectares each year producing winter feed and high-performance pastures. Our total kilograms produced has near doubled in the last 20 years due to this program, and a move away from set stocking.

We are firm believers in the importance of recording every measurable trait, and we actively participate in recording traits for research breeding values, like mature cow body composition. As early adopters of genomic testing, our entire seedstock herd is sire verified with genomic enhanced breeding values. In addition to this, all bulls and breeding females are independently structurally evaluated.

We are pleased to present this year's sale draft to you. We feel they offer the complete range of attributes that has led to the Angus breed dominating saleyards throughout the southern Australian beef industry. These bulls offer moderate birthweight and calving ease, through to market applicable growth and the carcass characteristics that allow feedlots and processors to provide a sought-after product in the marketplace, and ultimately a satisfied consumer.

Whilst we continue to offer our proven genetics that have performed so well in our clients' herds, we also need to continue to introduce new genetics and this year's team is no exception. US semen sires Hoover About It and Connealy Way Maker have their first drafts presented and they bring exceptional early growth and carcass shape which is ideally suited to weaner production herds.

Returning this year is So Right S48. He brings softness and capacity, with his daughters proving to be outstanding young matrons. So Right has established himself as a leading industry sire and has featured prominently in many sale catalogues in the past twelve months. Likewise, Lawson's Rocky R4010 has another draft this year as does his son Knowla Territory T133, delivering excellent carcass attributes and maternal strength. Revolution R190 sons last year attracted plenty of interest, and whilst he has limited numbers this year his son at Lot 4 is very easy to recommend.

Baldrige Versatile also features this year after producing the top seller last year. In particular, the five flush brothers from Designer Q90, who are all in the front pens and will attract plenty of attention. High carcass merit sire, Landfall Signature S1755 has another draft, many of which are ideally suited to mating heifers. After his debut last year, Dulverton Smart Missile S068 has larger draft this year, and they are well grown with outstanding temperaments.

First time sire, Glenisa Moe S154 has a strong draft catalogued, and they will impress for their growth potential and carcass yield. Another with his first draft is the Prime Minister son, Knowla Statesman S105 who sold at our 2023 sale to Hewitt Cattle Co. His sons exhibit extra growth and attractive skins and very placid temperaments.

For those people looking for bulls to use over heifers take note of the 'Heifer Tick' system in the catalogue. Whilst each bull in the catalogue has had birth weight collected and recorded, plus the TACE analysis (which does a good job of identifying those bulls best suited for heifer joining's) we also like to add our extra knowledge to the assessment. For example, we know which pedigrees often produce larger calves, and we visually assess the shoulder shape on each bull. The outcome is a three-tiered system as follows –

- √√√ Sleep easy at night heifer bull.
- √√ Under most circumstances a very safe heifer bull.
- √ Use on well grown heifers with good management up until calving.

Over half the catalogue has a positive recommendation as suitable for mating to heifers.

At the completion of the bull lots are six PTIC stud heifers, to be sold in single lots. They have been selected straight out of our joined "keeper" stud heifers. Four will be right on the point of calving at the sale, whilst two are from our autumn herd and will be PTIC for an Autumn 2027 calving. As in previous years we will offer 100 unjoined commercial heifers in pens of 14 to 16 head, that represent the bloodlines used in both our stud and commercial herds and will sell as EU accredited.

Sale Details

HOW TO GET THERE

From Gloucester travel 3.5 kms towards Barrington and turn right into Bowman Farm Road, (from the north turn left 2 kms on southern side of Barrington) for 1km over Barrington River then turn right onto Kia Ora Road for 2km and on top of hill continue straight on into Old Kia Ora Road for 2 km to Sale complex.

FARM BIOSECURITY

All persons attending the property will be required to register and record contact details.

INSPECTION

Sale bulls and sale commercial females may be inspected by arrangement with either vendors or the agents. All lots will be penned on sale day by 10 am at the sale complex, Kanangara. NO CHILDREN ALLOWED IN SALE PENS.

ADDITIONAL INFORMATION

A supplementary sheet will be produced for sale day.

REBATE

The vendors will provide a 4% rebate to outside agents introducing buyers in writing 24 hours prior to the sale and settling on their behalf within seven days.

PHONE BIDDING

Mobile phone bidding on the day can be arranged prior to the sale through the Agents, Elders Walcha, on 6774 2600 or Shane Rule 0427 456 878. The sale will also be on Auctions Plus. To register contact (02) 9262 4222 or visit www.auctionsplus.com.au

REGISTRATION

The selling agents will be using the card registration system so please allow yourself time to register prior to the sale and be able to nominate your PIC number.

GST

Prices for all lots sold will be GST exclusive at the fall of the hammer and 10% will be added on the invoice.

GENETIC CONDITIONS

The bulls will be deemed either free by pedigree or tested and nominated in the catalogue of their status for AM, NH, CA, & DD.

Jack, Georgia,
Alison and Ted

Annie, James, Rob,
Sandy, and Doug

Sale Details

CATERING

Morning tea, light refreshments and lunch will be provided with all proceeds going to the Gloucester Pony Club.

INSURANCE

It will be the responsibility of the purchasers to insure their bulls if required which can be arranged through Achmea representative at the sale.

BUYERS INSTRUCTIONS

Please complete the buyer's instruction slip at the rear of the catalogue. No verbal instructions will be accepted.

DELIVERY

The vendors will provide delivery on all bulls to all major centres in NSW at their expense, as soon as possible following the sale.

TAKING DELIVERY

Upon taking delivery of your purchase it is very important to realise that our bulls have been run in large mobs since weaning. If you are a single bull purchaser the day he arrives at your property can be quite traumatic as it will be the first time he is away from his contemporary group, and into a strange environment. Have some other cattle in the yard to ease him into his new surroundings, a few steers or a pregnant cow will do. Our bulls are handled with horse and dogs all their life and whilst we educate them to be comfortable with people on foot or motorbike, they have only been moved on horseback. Again it is important that the first time you move your new bull that it is in the company of other cattle that are comfortable with your methods.

HERD HEALTH

All the bulls have been fully vaccinated for 7 in 1, Vibrio, Pestivirus, IBR, and 3 Day sickness but require boosters in autumn 2027 and a broad spectrum drench would be advisable at the same time. They have been tested free of Pestivirus. Both properties involved in the sale, Knowla and Kanangara were in Bovine Johne's disease protected areas, and have had no history of the disease. Biosecurity plan implemented, JBAS 7. A National Cattle Health Declaration will be supplied to all purchasers. Stuart Knox of Taree Veterinary Hospital will subject the bulls to a breeding soundness examination on 23rd June, 2026. This will include internal and external examination of the reproductive tract, palpation and scrotal measurement, as well as a semen quality test.

PRIVACY INFORMATION

The majority of the animals included in this catalogue are registered with the Angus Society of Australia. The buyer is encouraged to have transferred to his or her membership any animals purchased. In order for the transaction to be effected, the buyer will need to provide certain personal information to the Society and consent to the collection and disclosure of that information by the Society in certain circumstances. If the buyer does not wish for his or her personal information to be collected and disclosed by the Society, the buyer must opt out of the option to consent by completing the form which will be available on sale day and forwarding it to the Society. If the form is not completed, the buyer will be taken to have consented to the collection and disclosure of that information by the Society.

DISCLAIMER

The owners, employees and representatives of Knowla Livestock accept no liability for any accidents that may occur. Although such occurrences are rare, any persons attending the Knowla Livestock sale do so at their own risk. All reasonable care has been taken by the vendor to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendor or the selling agents make no other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information included in this catalogue. You are encouraged to seek independent verification of any information contained in this catalogue before relying on such information.

ATTENTION BUYER

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

PARENT VERIFICATION SUFFIXES

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.

SV : the sire has been verified by DNA.

DV : the dam has been verified by DNA.

: DNA verification has not been conducted.

E : DNA verification has identified that the sire

and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

FOR THIS SEASON AND THE NEXT

Our second draft from the 2022 sale topper where he sold for \$190,000. Moderate framed with outstanding carcase attributes, they display placid temperaments, extra body capacity and visual thickness. His first daughters are standouts in the keeper mob and his sons have been topping sales across the country. 6 sons sell.

Another sale topper when we bought him in conjunction with Buri West Walcha for \$50 k at the Glenisa 2023 sale. Very nicely made and from a Monty female that gives that bit of extra performance. 9 sons sell.

We were part of a syndicate that purchased Rocky for \$130,000 as a yearling. With over 2000 progeny recorded, plus many more in commercial programs, he has proven himself as a calving ease sire, but still with above breed average growth and breed leading carcass merit. His first daughters in production are excellent mothers. 6 sons sell.

Uppercut created a lot of attention when he set a new Tasmanian record selling for \$275,000 in the Cluden Newry sale. Upon inspection he ticks a lot of boxes, and his dataset makes him a unique individual in the breed. We have used him heavily and his weaners look very good.

Velocity attracted a lot of interest on his way to selling to the season high \$235,000 at the Granite Ridge sale in March. He has a nicely balanced data profile and on inspection he is notable for his structural soundness.
