90 ULTRABLACK | 10 BRANGUS

Friday 11th September 2026, 12pm

ON PROPERTY

'GLEN WILGA'
HOPELAND SCHOOL RD
CHINCHILLA

LOT 101

Welcome to the Palgrove Bull Sale!

Our Ultrablack and Brangus program continues to go from strength to strength, with its influence across Australian breeding herds now firmly established.

This year's sale draft is a reflection of the depth, consistency and maturity of our breeding program. Bred with a clear focus on commercial relevance, these bulls combine proven genetics with the traits that drive productivity and profitability in real-world production systems.

Notable additions to the sire list this year include Palgrove Safehouse, who sold in the 2023 sale for \$65,000 as well as CRC Alliance and GACC Data Bank both sires out of the US.

Renowned R-drop sires from the record-breaking 2022 sale including Palgrove Revolution and Royston feature once again. Alongside these proven genetics are long-time program leader Quality Time and retained Brangus sire Palgrove Trendline. Their influence continues to be evident throughout the draft, with sons displaying the structure, muscle expression and constitution we have worked hard to achieve.

As the program continues to expand, our focus remains unchanged: breeding cattle that make a positive contribution to the profitability of our clients. The performance of Palgrove Ultrablack and Brangus genetics in stud and commercial operations across Australia continues to validate their place in the future of Australian beef production, and we are proud to present this outstanding group of bulls in the 2026 sale.

Regards,

George Stacey

(on behalf of the Palgrove Team)

OUTSIDE AGENT REBATE:

The vendors agree to a 3% rebate to outside agents who attend the sale with, or buy on behalf of, their clients and settle within 7 days. 1% rebate to outside agents introducing approved buyers to the vendor prior to the sale and settling on their behalf within 7 days of the sale. (This clause will be strictly enforced by the vendor).

Inspection:

Cattle may be inspected any time prior to the sale by arrangement. If you can't make it on sale day, we encourage you to inspect the bulls at a time convenient to you and bid via phone or AuctionsPlus. Please discuss your bull requirements with our team, we enjoy being a part of the decision making process.

Sale Day Safety:

We pride ourselves on the excellent temperament of our bulls, however, there are risks associated with bull behaviour on sale day and it is our responsibility to keep you safe. If you wish to enter the pens please be aware that bulls may fight with each other or they can be playful. We cannot accept responsibility for your safety if you do not follow the instructions of our staff. If you are limited in your mobility or if you have children/ prams accompanying you, **please do not enter the sale pens.**

AuctionsPlus:

AuctionsPlus is an alternate bidding option if you can't attend the sale in person. However, it is only available to registered users. We recommend registering online as soon as possible - at least 24hrs prior to the sale.

Register at www.auctionsplus.com.au

Breeding Soundness:

All sale bulls offered for sale have passed a semen test by Veterinarians from Ced Wise ABS.

All bulls offered for sale have been examined by the stud's Veterinary consultant for structural and physical soundness to Australian Veterinary Association standards. A Bull Breeding Soundness Evaluation Certificate will be available.

Guarantee:

All stock are guaranteed breeders. Any claim against the breeding ability of an animal purchased should be made in writing and accompanied by a Veterinary Certificate within six months of the date of sale. In the event of a bull failing to breed, it may either be replaced with an animal of comparable value or credit to the full purchase price will be given at the following sale or on a private sale animal.

Health:

Palgrove maintains a J-Bas 7 status, so bulls are free to move to anywhere in Australia.

Sale bulls have been inoculated twice with 7-in-1; Pestigard, Vibrio and 3 Day Sickness along with a single dose of 3 germ tick blood.

Delivery:

We take personal interest in the efficient delivery of all stock after the sale. George & Fuhrmann and Nutrien will be handling the delivery of sale cattle.

We offer Freight Assistance to several major centres including Emerald, Roma, Inverell and Glen Innes. Please talk to Ben Noller M:0427 700 949 prior to the sale.

The Sale Bulls:

A bull's career begins rather than ends on sale day - so be cautious about comparing bull weights and fat scans between the various sales. Comparison of bulls in a contemporary group is a far more reliable indicator. It is in your best interests to purchase bulls that have had a moderate long term feed ration rather than one that has been 'pumped up' for sale day.

Palgrove Stud:

After decades of building one of the largest and most respected Charolais herds in the country, Palgrove made the strategic decision to sell the stud to new ownership.

The move allows us to sharpen our focus on the continued growth and innovation of our Ultrablack program. Developed since 2009, our Ultrablacks are purpose-bred to meet the evolving needs of commercial beef producers—delivering market adaptability, hybrid vigour and consistent performance. Backed by data, discipline and a commitment to profitability, we're proud to be driving the next chapter of genetic progress with cattle that work where it counts—on the ground, in real herds, across Australia.

Our Approach:

Even though the scale of the registered herd has increased substantially in the last twenty years, our breeding objectives haven't wavered. We aim to drive performance through our genetics to improve profitability and efficiency in beef production, while maintaining customer satisfaction.

Palgrove buyers expect the best from our cattle - whether it's one stud sire or a draft of 100 commercial bulls. Our job is to deliver cattle and service that is beyond our clients' expectations.

Palgrove Properties:

The Palgrove herd is run across a diversified group of properties in Queensland and New South Wales. This enables us to run our breeding herd and grow out our sale bulls under commercial conditions. Our breeding properties are located at Ben Lomond and Inverell, with our bull depot and Sale Complex at Chinchilla, QLD. These properties allow us to provide our clients with a year round supply of bulls that are easily accessible at a number of locations.

EBV'S

In this sale, there are two separate BREEDPLAN figures presented:

b) UltraSelect Breedplan (June 2026)

c) Brangus Group Breedplan (July 2026)

Each breed runs a separate Breedplan evaluation. As the genetic base for each breed is different, only EBVs for animals within a particular breed can be directly compared.

Putting this in practical terms, a 600 day weight EBV of +41 on an Ultrablack is not equivalent to a 600 day weight EBV of +41 on a Brangus bull.

Our Ultrablack bull EBV's are provided to us as registered animals on the Angus Multi Breed Register (MBR). Only pure Angus cattle are recorded on HBR/APR registers.

Ultraselect Breedplan Averages 2024 born calves

ULTRA SELECT	BWT	Milk	WW	YW	MCWT	SC	REA	Fat	IMF	HP	FI\$	TI\$
EBV	0.4	5	21	36	2	0.8	3.3	0.5	0.4	6.9	1.04	1.94

Brangus Group Breedplan Averages 2024 born calves

MBR	BW	Milk	200	400	600	SS	EMA	Rump	IMF%	RBY	Exp\$	Dom\$
EBV	0	-2	11	22	23	0.7	1.2	0.2	0.3	0.4	21	22

What is UltraSelect?

Palgrove have been working with Angus Australia to determine a more robust genetic evaluation for Ultrablack cattle.

UltraSelect is a collaborative genetic evaluation initiative conducted in partnership with International Brangus Breeders Association (IBBA) and Angus Australia. It includes data from Australia and the United States to produce Estimated Breeding Values (EBVs) and is available to Angus Australia members recording animals in the MBR system.

The linkage of pedigrees through Angus MBR and IBBA provides a larger reference population of genomic records, which will significantly enhance the accuracy of our EBV data and assist you in making breeding decisions.

Traits Analysed

This analysis includes a similar suite of EBV's currently available, with the addition of Heifer Pregnancy (HP). We are currently working with Angus Australia to enhance this further and expect more fertility traits and indexes to be captured in the future.

For a full explanation of the traits analysed follow the following QR code

Indexes

UltraSelect provides two Indexes, which are bio-economic indexes consisting of 6 traits each, selected and weighted on heritability and economic importance per production system (includes traits in no specific order);

Fertility Index (FI)

A selection tool aimed at a self-replacing breeding operation.

Traits: Milk, Fat, Scrotal Circumference, Mature Cow Weight, Heifer Pregnancy, Number of calves (note; this trait is not published in UltraSelect yet, but is currently included in the index).

Terminal Index (TI)

A selection tool aimed for a terminal, feedlot finishing system.

Traits: Birth Weight, Weaning Weight, Yearling Weight, Milk, Rib Eye Area (i.e. Eye Muscle Area), Fat & Intramuscular Fat (IMF).

CALCULATIONS

ULTRABLACK REFERENCE SIRES

CRC ALLIANCE (P)

- The first Alliance sons to be offered. These Ultrablacks present with slightly higher Angus content (most around 86%), providing greater market flexibility for producers running higher-content females.
- When we inspected Alliance in the USA, his muscle, width, substance and overall sire appeal made him an obvious fit for both our Ultrablack and Brangus programs. With UB2 status in the USA, we also believe his daughters will work exceptionally well when joined back to Brangus sires.
- Represented by 12 sons in this year's draft, including three in the first 15 lots and an outstanding group of autumn ET bulls from donor females purchased from the Coonamble Angus herd in WA.

ULTRABLACK REFERENCE SIRES

PALGROVE QUALITY TIME (P) ET

- An imported embryo retained by Palgrove, Quality Time has become the most successful Brangus sire we have used.
- At 6 years of age, he remains 'sound as a bell' and continues to add weight for age, carcass and bone without compromising fertility. He ranks top 1% for Heifer Pregnancy, top 2% Fertility Index and has now surpassed \$1.55M in progeny sales.
- We admire the way he consistently produces deep, square, easy-fleshing progeny with extra bone and performance. The more Quality Time genetics we use, the more we appreciate what he adds to our program.

PALGROVE REVOLUTION (P)

We considered Revolution the complete package when he sold for the then Australian record of \$70,000 in 2022. Phenotypically, he was hard to fault, combining natural balance, structural soundness and exceptional carcass shape.

With 181 progeny recorded, his sons have topped at \$30,000 and generated more than \$615,000 in sales. He ranks in the top 1% for Growth and Terminal Index, and the top 5% for Eye Muscle Area (EMA) and Intramuscular Fat (IMF).

Represented by nine sons in this year's draft, including four in the first 16 lots.

PALGROVE SAFEHOUSE (P)

Another Brickhouse son, carrying the ideal sheath design and strong carcass traits for which the sire line is renowned.

Safehouse sold for \$65,000 in 2023 and combines top 5% rankings for Terminal Index and Growth with top 10% Intramuscular Fat (IMF) and positive fertility data.

His dam boasts a perfect calving record and has since been promoted to the donor pen. She is a moderate framed, easy-doing female with an exceptional udder. She continues to make a valuable contribution to our breeding program.

LOT 101

PALGROVE VENTURE CAPITAL (P) ^{SV}

Tattoo: QHB24V1760

Calved: 31/08/2024 (24 1/2 mths)

S: TJM THREE D

S: PALGROVE QUALITY TIME ET

D: CB MS NORTH STAR 415Z

D: GLENROY UMA N246

Fittingly, we kick off our 2026 sale with a proven combination - Quality Time over the Glenroy female line. It's a big call, but we believe Venture Capital is his best son yet.

At 6 years of age, Quality Time remains sound and continues to add weight for age, carcase and bone without compromising fertility. He ranks top 1% for Heifer Pregnancy, top 2% Fertility Index and has now surpassed \$1.55M in progeny sales.

Venture Capital displays a touch more Bos Indicus character while retaining an ideal sheath, sleek skin and a strong sire's head.

His tropical adaptation is exactly where we want it. A complete sire with all the credentials to make a lasting impact in a stud or commercial bull breeding program. Semen Retained.

BRANGUS.

The search for the complete Brangus sire ends here. Elite phenotype, proven pedigree and the sheath design commercial producer's demand.

Out of a proven dam with a DCI (Daily Calving Interval) of 373 under Palgrove's ownership. She's produced three cracking bulls in a row - A Quick Release son was retained and last year a Blueprint son reached \$34,000.

Long-bodied with a touch more frame, he strides freely and is built to cover the miles. From behind, his exceptional carcase volume and powerful hindquarter really set him apart.

Semen Retain (565 straws in one collection)

Shockwave's an imported Foundation embryo and has already produced sons selling to \$36,000.

Vettori's EBV's are positioned with positive growth, EMA and Heifer Pregnancy and his maternal strength is confirmed with a Milk EBV in the top 1%.

He's long and smooth in his pattern with an ideal sheath design that is a desired trait from his sire Shockwave.

A great skin type for a bull leaning a touch more towards the Angus, this is why we feel he would be best suited over higher content females.

BRANGUS

We love the extra stretch and dimension Alliance has added to his progeny. He is represented by 11 sons in this draft, including five outstanding bulls in the Autumn drop section.

Dam is a proven donor female with 9 recorded progeny and embryos retained. Her Brangus sons have sold to \$38,000.

Performance data highlights top 11% Calving Ease traits, positive growth, moderate mature cow weight and top 20% Milk, Scrotal Size and Yield.

A typical Alliance son with excellent temperament, depth, smooth muscle pattern, big scrotal and ideal sheath design. He offers the doing ability commercial herds demand.

An impressive Data Bank son stacked with calving ease genetics through Signal, Data Bank, Lookout and Global.

Born unassisted at just 32kg, he was successfully used as a yearling over stud heifers, giving us every confidence to recommend him as a genuine heifer bull.

Medium framed bull that doesn't compromise on weight for age, he will improve sheath design and add early maturity to your herd - Confirmed by a heifer pregnancy EBV in the top 5%.

Scanning with a huge EMA of 105 square centimetres at 400 days, ranks him in the top 10% for EMA and top 11% for his Terminal Index.

Homozygous Polled, Homozygous Black.

By our leading Brangus walking sire Trendline, combining Business Line with the proven Miss Csonka donor female, he ranks in the top 12% for both Fertility and Terminal Index.

Trendline marks his progeny with the extra length, big scrotal, great skin and a strong head.

Performance data confirms his diversity with Fertility Index in the top 11% and Terminal Index sitting in the top 30%. He has high positive growth with EMA in the top 15%.

An outstanding pedigree blending some of our very best genetics— Safehouse, Brickhouse, Foundation and a Glenroy donor on the top side, with TJM Three D and the proven Raff Burnette female on the bottom.

His dam is a highly productive female, recording five calves in five years with a DCI of 366.

By Safehouse, a sire injecting outstanding carcase performance while maintaining top 10% IMF, a positive Fertility Index and a top 4% Terminal Index.

A moderate-framed, easy-doing bull with an ideal sheath design and a phenotype that leans towards the Angus end of the Ultrablack spectrum.

Homozygous Polled, Homozygous Black.

Tissue Sampling Unit (TSU)

Allflex® Tissue Sampling Units provide a simple but effective means for DNA testing livestock. Collect a clean, uncontaminated sample in seconds with a single squeeze motion. TSUs are easy to use and yield excellent lab results.

TSUs can be paired with a matching NLIS and visual management tag, creating a simple link between the genetics of an animal and its identification.

SAFEHOUSE
LENROY CINDY G1070
S: TRIPLE B NETWORTH N284
PALGROVE MISS MORGAN R1297
D: PC MISS MORGAN C117

Just like his full brother at Lot 148, he is an impressive sire prospect with the pedigree, phenotype and structural quality to make a valuable addition to any progressive Brangus stud program.

Very much in the mould of his sire Safehouse, he offers the same body shape, thickness and ideal sheath design that have made Safehouse and Brickhouse such an influential breeding bull.

His granddam, Miss Morgan C117, has produced outstanding females and six auction bulls, selling to \$24,000 and averaging \$17,667.

Don't overlook the potential in these younger bulls.

Homozygous Polled, Homozygous Black.

An impressive young ET sire prospect, his three full brothers sell at Lot's 144, 145 and 146, highlighting the strength and consistency of this proven mating.

A touch more moderate in frame to his full brothers but makes up for it with his extra thickness and carcase shape.

These are the first Alliance progeny to sell at auction, he combines outstanding growth (top 2%) with top 1% EMA and Fat Thickness.

Blueprint progeny will be highly suited to programs looking to moderate frame, add early maturity and doing ability for quick turn off. Blueprint himself ranks in the top 2% for his Terminal Index and top 12% for his Fertility Index.

Very typical of Blueprint progeny - He carries huge amounts of thickness, great sheath, strong doing ability, great skin and big scrotal.

Warrane himself hits the top percentiles (10%) for Growth, Heifer Pregnancy, EMA and Terminal Index all while his Fertility Index still sits in the top 25%.

D: GLENROY G1122

Year after year, Quality Time continues to produce elite sires, and Wheelhouse is no exception.

At 6 years of age, Quality Time remains 'sound as a bell' and continues to add weight for age, carcass and bone without compromising fertility. He ranks top 1% for Heifer Pregnancy, top 2% Fertility Index and has now surpassed \$1.55M in progeny sales.

Wheelhouse carries that same maternal strength, combining positive Heifer Pregnancy and Scrotal Size with a top 4% Fertility Index. An impressive young sire with a deep, square hindquarter, natural muscle and genuine stud sire appeal.

Homozygous Polled, Homozygous Black.

D: ANVIL JESTRESS J294

No matter which angle you view him from, this is an impressive young sire whose performance data suggests he is an ideal heifer bull option.

His dam, a first-calf heifer, remains in the herd and recorded an outstanding 336-day DCI between her first and second calves.

You'll admire his extra depth of flank and hindquarter, thickness across the topline, smooth shoulder design and the quality skin type we have selected so heavily for.

BRANGUS.

High Brangus content bull but not eligible to be registered in Brangus Australia for stud registrations.

He's by the Bellview Trojan sire who is breeding cattle with a touch more frame, clean sheaths, plenty of length and plenty of thickness and butt shape. He is also the sire of feature Lot 102.

Ideal bull looking to maintain a higher Bos Indicus content without compromising on fertility - His Fertility Index ranks in the top 25%.

Homozygous Polled, Homozygous Black.

BRANGUS

We continue to be impressed by the consistency of the Trendline sons. Represented by nine bulls in this sale, Trendline adds extra length, carcass shape and ideal sheath design while maintaining the softness and fleshing ability we value.

Awesome carcass shape, temperament and sheath design in this higher content Brangus package.

The type of bull we would expect to improve carcass, yield and growth traits in his progeny - This is backed up with positive growth EBV's and EMA in the top 15% and Retail Beef Yield in the top 4%.

You could buy this bull with your eyes closed on pedigree alone. He combines the proven influence of Networkh and Foundation with the outstanding donor females Millah Murrah Abigail and PC Miss Morgan.

His sire, Rafiki, was retained for his exceptional volume, capacity, softness and fleshing ability. He ranks in the top 5% of the breed for Fat Cover and the top 20% for Intramuscular Fat (IMF), reinforcing his ability to add doing ability while maintaining carcase quality.

A smooth-fronted bull with extra depth of body, excellent hindquarter shape and outstanding doing ability, he offers an impressive combination of phenotype and proven genetics.

There is a lot to admire in this young sire. He should be at the top of the list for anyone seeking a reliable heifer bull that will add doing ability, carcase shape and early maturity to their breeding program.

His sire, Data Bank, was selected from the USA specifically for our heifer program. Combining calving ease, growth, carcase merit and maternal strength. Data Bank has consistently produced easy-doing progeny that mature early and finish efficiently.

This bull was naturally joined in the stud program as a yearling before entering our fresh AI program, where he achieved excellent results. His heifer bull credentials are further reinforced by a pedigree stacked with proven calving-ease sires, including Suhns Signal, Quickstep and Triple B Global.

BRANGUS.

We finish this year's draft with two impressive Transformer sons from a full flush imported embryo. Both ideally suited for use over heifers.

A Quality Time son, Transformer was used successfully as a yearling before being retained in the stud. While represented by only a small group this year, we expect his progeny to feature prominently in the front end of future sale catalogues.

His moderate Birth Weight and short Gestation Length EBVs are complemented by strong positive growth, with Carcase Weight and Retail Beef Yield ranking in the top 20% of the breed—a combination rarely found in a calving ease sire. He completes the package with both \$Indexes ranking in the top 8%.

BRANGUS.

A Transformer son ideally suited for use over heifers and for producers wanting to retain higher Bos indicus content.

Transformer, a retained Quality Time son, was used successfully as a yearling and, despite a small first offering, looks set to feature prominently in future sale drafts.

His productive dam has produced all male calves, with her first two sale sons topping at \$30,000 and averaging \$23,000.

A fitting way to finish the draft, he combines an imported embryo donor dam with one of our most exciting young sires. We believe Transformer has a very bright future.
