All bulls suitable for heifers/cows

# WELCOME...

## to the 2026 Spring Bull Sale.

We are pleased to present this exciting line-up of elite, modern-day genetics. Year on year, the performance data of the sale offering continues to rise, with three-quarters of the draft now above breed average for the Angus Breeding \$Index Value. For those looking to drive their herds harder, seventeen sires are ranked within the top 20% of the breed. A highlight of this group is having 30 bulls suitable for heifers/cows. We believe this gives buyers greater flexibility for joining options as we strive for 'curve-bending' attributes.

We believe this genetic gain, and utilising this important tool for selection, is important for two reasons. Firstly, the science is real! So much work has been done with Angus Australia and associated organisations proving the direct correlation between objective measurement, Estimated Breeding Values and genomic testing. For the sake of a simple sire selection on paper, you could improve the overall outcome on an MSA-graded carcass by \$400. Secondly, genetic improvements accumulate over time. The compounding effects are enormous! When a producer breeds animals with superior traits, those valuable genes are locked into the herd's DNA permanently. These traits affect everything from faster growth, eating quality, calving ease, docility, structural soundness, disease resistance and parasite defence.

Bowman Performance Genetics is committed to this genetic gain by now genomic testing over 600 animals per year. This gives us both exact parent verification and improved EBV accuracy, improving the resulting outcome for the commercial producer. Not only does this improve profits for the cow/calf operator, but it benefits the whole supply chain.

Along with the science, a high level of cattlemanship is involved in the running of our operation. Cattle are rigorously tested for structure, temperament, fertility and doing ability. We have a hands-on approach, whereby all this work is done in-house, giving us the best knowledge and understanding of the herd.

Throughout this catalogue, you'll notice many references to high-profile breeding females in pedigrees. We believe the female is the most important part of bull breeding, and by stacking layers and layers of these high-class females in pedigrees, we achieve consistent, first-class results.

As we move closer to spring, the livestock industry is in a very robust position. We are confident grass fever will kick in, due to solid rains throughout Victoria and Southern NSW over the past month. Global protein shortages will ensure export prices remain firm, along with domestic herd rebuilding keeping strength in that market. With bull slaughter prices touching \$5/kg at the saleyards, this is a fantastic time to trade in your old bull for the latest, more powerful genetics. This is one of the best changeover periods in decades.

The 2026 Spring draft is fully vaccinated, semen tested, fit and ready to go out and drive profit into your herds. Please contact us if you'd like a private inspection or have any other enquiries.

Kind regards,

Glenn Bowman.

# SALE INFORMATION...

## INSPECTION

Bulls may be inspected prior to the sale by contacting vendors or selling agents. Cattle available for inspection from 10am on sale day.

## REBATE

A 3% rebate will be paid to those agents who accompany buyers in person at the sale. A 1% rebate is available to agents not attending but introduced their client in writing to glenn@bowmangenetics.com 24 hours prior to the sale.

## GST

GST is to be added onto the purchase price at the fall of the auctioneer's hammer. You will be invoiced purchased price, plus GST.

## AUCTIONS PLUS

Auctions Plus will be available on sale day. Please register 24hrs before the sale.

## HEALTH QA

The bulls are ready for immediate use.

We have treated them as follows:

- Double Vaccinated with 7 in 1
- Double Vaccinated with Vibrovax
- All bulls comply with immune ready guidelines
- Double Vaccinated with Pestiguard
- DNA tested to prove they are not PI (Persistently Infected) with Pestivirus.
- Bowman Performance Genetics are EU accredited.
- Bowman Performance Genetics has a J-BAS 6 certification under the supervision of the Maffra Veterinary Centre. All bulls are clear to enter Victoria, New South Wales, Tasmania, South Australia, Western Australia, Queensland and Northern Territory.

## INSURANCE

Bulls are like any other piece of valuable farm equipment and it is wise to insure them, especially for the first six months of working life. There will be a number of options available through Elders Insurance at the venue.

## GENOMIX AND SINGLE STEP BREEDPLAN

The EBV's on each bull incorporate their genomic analysis. Referred to as "Single Step", the inclusion of genomic analysis reduces the pedigree dependence of the Breedplan model. Single Step tends to

spread the data on each bull and it is possible for full brothers (flush brothers) to have very different post Single Step analysis EBV's, despite their raw data being quite similar.

## PARENTAGE ASSURED

Our entire herd has been DNA verified to both the sire and the dam. We are one of the few studs in Australia that can accurately assure parentage.

## SEMEN RIGHTS

All bulls are sold with 80% semen rights attached. In doing this we leave the great majority of any potential semen revenue in the buyer's hands. However by keeping a 20% share, it gives us, as a breeder and party with the greatest knowledge of the bull's background, a seat at the table, in any possible negotiations with semen companies and other parties. It should be noted that instances of bulls becoming big revenue spinners from semen sales are rare. By keeping the vendor involved, the 80/20 semen ownership split is designed to give the purchaser the greatest opportunity for semen sales on the top sires in the sale. Should any purchaser wish to operate at the sale on the basis of 100% semen ownership, please contact the vendor at least 24 hours prior to the date of the sale. Under all circumstances, the vendor retains the right to collect up to 200 straws of semen from any bull in the sale for use within herd. Any semen collection would be at vendor's expense and purchaser's convenience.

## DISCLAIMER

Every care has been taken during the compilation of the catalogue to ensure accuracy of information supplied. However, no responsibility will be accepted for any errors that may have occurred.

## FERTILITY

All bulls have been semen tested by Ian Moreland of Studcare Genetics.

## CATERING

Please join us for complimentary morning tea, lunch and after sale drinks.

## FREE FREIGHT

Victoria - Free Freight Across Victoria.

NSW, SA, QLD, Tasmania, King Island and Flinders Island - freight assistance of \$300 per bull purchased

## BULL HANDLING

On arrival at their new home it is important a suitable mob of animals is yarded to greet the bull and minimize the stress on the bull. Suitable animals include pregnant cows, steers, certainly not other bulls.

The bulls are in good joining condition at point of sale, but it is imperative to ensure good condition for the bull during the joining period. You should check the bulls regularly to see they are working, especially in the early stages of joining when the majority of problems can occur and early intervention can minimize the damage to the bull and to conception rates.

When joining is complete, bulls should be drenched and placed on good pasture to get back into first grade health without being allowed to get over-fat.

## REGISTRATION

Ownership transfer of the bulls will be registered by the vendors with Angus Australia, provided accurate transferee details are supplied with the Buyer's Instruction Form. With this form, please be sure to provide: NLIS number, Angus Herd ID (if applicable) and specify if the purchasing herd is EU accredited.

## FEEDING AND MANAGEMENT

The bulls have received pasture and hay only throughout their lives. At no stage have any of the bulls received grain or substitute of any description.

The bulls have been handled with dogs, UTV's, horses, utilities and on foot. None of the bulls have had their feet trimmed.

## WARRANTY

The vendor warrants that:

1. Bulls are fertile and capable of natural service within 6 months of date to the purchaser ("Warranty Period"); and

The vendor will either:

1. Provide a satisfactory replacement or
2. Provide a credit for use at the next Bowman Performance Genetics Bull Sale equal to the purchase price (excluding any costs and expenses of the purchaser in taking delivery) minus the salvage value:

Where:

1. The purchaser claims a bull is infertile, upon purchaser submitting a veterinary report after the expiration of the Warranty Period stating that the bull is infertile or incapable of natural service, and a Statutory Declaration by the purchaser to the effect that the substance of the report is true and

correct. The veterinarian must state that in his/her opinion there is no evidence that the bull has suffered any injury or illness during the Warranty Period which could have affected his breeding ability. The veterinary report and Statutory Declaration must be forwarded to the seller within 14 days of the Warranty Period expiring.

The purchaser acknowledges that the purchaser does not rely and it is unreasonable for the purchaser to rely on the skill or judgment of the seller as to whether the bulls supplied are reasonably fit for any purpose for which they are being acquired.

To the extent permitted by law all other conditions and warranties implied by law in respect of the state, quality and condition of the bulls, which may apart from this clause be binding on the Seller are excluded.

The seller has no liability (including liability in negligence) to any person for any loss or damage consequential or otherwise suffered or incurred by that person arising from the sale of the bulls to the purchaser.

## HEALTH & SAFETY OF VISITORS TO OUR SALE (RULES & ADVICE)

All the sale bulls have been screened for temperament and are quiet to handle under normal circumstances. However there are inherent risks associated with cattle handling.

**VISITORS ENTER THE CATTLE PENS  
AT THEIR OWN RISK  
CHILDREN MUST NOT ENTER THE YARDS**

People entering the yards are at risk of injury. Be especially alert for bulls fighting and if one is playful with you, do not respond by patting his head. A playful nudge can be quite harmful. We do not expect the bulls to be aggressive with humans, but sale day places extraordinary pressure on them as they experience an entirely foreign environment. Remember the quietest bull is in fact an unpredictable animal.

Do not overcrowd the bulls or loiter inside the pens. We cannot cover every example of the dangers of cattle handling, so please use common sense and be alert at all times. Don't enter the pens unnecessarily. Please call upon any of the agents for an escort through the bulls if required. The days of bravado with stock have passed under current OH&S legislation.

**Can't make the sale?**  
**Log onto AuctionsPlus to bid from**  
**anywhere on your phone, tablet or desktop.**

1

#### REGISTER ONLINE

Simply click 'Sign Up' to begin your free registration. To register as a buyer for livestock, you will need to provide us with a few more details.

2

#### COMPLETE BUYER INDUCTION

The buyer induction will help you understand the roles and responsibilities of everyone on the AuctionsPlus system.

3

#### VIEW CATALOGUE

Photos, videos, pedigrees and other information will be available in the online catalogue.

4

#### ENTER AUCTION

Log into the auction anytime, anywhere and bid on your mobile, tablet or computer.

5

#### AUTO BID

Can't stay for the whole sale? Set your maximum bid on the lot that you want to purchase and let the computer bid for you.

6

#### CONTACT SELLING AGENT

If successful, contact selling agent directly after the sale to arrange payment.

7

#### DELIVERY

Arrange transport of livestock at your expense.

## IT'S A SIGN OF BETTER PRODUCTIVITY AND ANIMAL HEALTH

'Immune Ready' is a guideline for the care of sale cattle. It helps protect cattle in the preparation, transport and arrival post sale.

### FOR BUYERS

- It reduces the risk of disease in purchased cattle
- It improves farm biosecurity
- It improves animal health and welfare

### FOR SELLERS

- It prepares your cattle for potential disease challenges
- It allows you to promote and sell premium cattle
- It helps safeguard against disease and improve productivity

Comstock is as thick as they come and one of the highest-use bulls in Australia in 2024. If you're looking to increase carcase content, moderate mature cow height, add calving ease and milk (top 2%) - these sons will be the go-to sires. A whopping +17.5 EMA and Leg Angle structural scores, rank him in the top 1% of the breed. His sons are easy-doing and as docile as they come. One of the first chances to secure progeny in Australia this autumn. Top 5% Angus Breeding Index.

Murdeduke Quarterback derives from a prolific stud-producing cow family. We were keen to add the maternal power of Barunah K304, with Bowman Performance Genetics being the underbidder at the 2020 Murdeduke Matrons Sale. His calves are docile with brilliant data sets behind them. Quarterback is now one of the highest-use bulls around the country, leading the field (top 6% or better) in Gestation Length, Scrotal Size and IMF.

The \$120,000 Sitz Intuition has seen almost exclusive Australian use at Bowman Genetics. A Bull is described by Jim Sitz as wide-based, long-bodied, and super-footed, from a highly proven dam. Intuition has seen heavy use in the Sitz program, with his U.S. EPD's placing him at the forefront of the industry in Calving Ease, Birth Weight, Claw Shape and Marbling.

Maternal strength is one of the most important traits at Bowman Performance Genetics. Generations of donors sit behind Knowla So Right, tracing back to the best cow ever bred at Knowla, in Designer V96. Add the consistency of his sire, Baldrige Alternative E125, and you have an extremely powerful pedigree. Phenotypically, he displays a tremendous spring and depth of rib, smooth shoulder, free flowing gait and massive hind quarter. His breed-leading IMF, will assure you hit those lucrative MSA targets. Top 8% IMF and top 20% Calving Ease.

38 Special combines outstanding low birth weight, calving ease, growth and first-class structural scores. His first season at Bowman Performance Genetics saw a 100% calving rate on both heifers and cows. This true curve bending sire will add strong tops, great depth of rib and muscle expression backed by the prolific Isabel Y69 as his dam. 38 Special ranks in the top 7% of the breed for the Angus Breeding Index Value!

Expect progeny of Bowman Smith & Wesson S104 to display extra thickness, with breed greats SAV Renown, Baldrige 38 Special and Te Mania Emperor as pillars in his pedigree. On the maternal side, two of the most prolific cows in the breed, Isabel Y69 and Princess W38 will inject first-class females into your breeding operations. With growth in the top percentages of the breed, expect added pounds on the scales of every calf by this bloodline.

Statistics: Number of Herds: 1, Prog Analysed: 9, Genomic Prog: 9

The 38 Special progeny continue to deliver the goods, with moderate frame scores and powerful EBV's. Tomahawk is a grandson of one of our finest matrons, Wilcoola N167. With the added punch of Isabel Y69 and the outcross of Joe Canada, T43 has tremendous thump, with a huge topline and B+ muscle score. Top 12% Gestation Length, top 4% Rib and Rump Fat.

A sleep easy heifer calving option with a first-class data set. V99 is a super thick, butterball, choked full of red meat. The maternal pedigree is littered with prolific donors, tracing back to Millah Murrah matriarch Flower G20. Pedigrees stacked with this maternal power breed consistency and add natural doing ability. Top 10% Birth Weight, top 3% Docility, top 10% Angus Breeding \$Index Value. **Bowman Joining Sire. Suitable for heifers/cows.**

The Champagne family were one of the cornerstones of the renowned Vermont Stud. Rock solid on paper here with Jane L37 and Isabel Y69 deeper in the pedigree. The Quarter Pounders have been consistent, structurally correct and true to type, leaving behind fantastic easy doing females, that milk the house down. Top 15% Milk, top 16% Retail Beef Yield, top 14% Claw Shape. Suitable for heifers/cows.

The old expression, 'it's length that weighs and length that pays', is quite apt here. If you're looking to add frame and stretch out those compact, stout females, V110 is the sire for the job. Top 5% Mature Body Condition, top 1% Foot Angle.

A grandson of our prominent Yankee Queen G257, with over \$100,000 in progeny sales and 100 calves to her name. This in addition to several joining sires used in herd puts her in a rarefied air. Add Y69, H113 and L1 and you have a brilliant foundation to build on. Top 13% 600 Day Weight, top 11% Milk, top 8% Carcase Weight.

This heifer's first calf would make an awesome heifer bull himself! Progeny will rocket up MSA grading system, with exceptional marbling and eye muscle. Longevity is also the key here with the great granddam and donor L16, still producing stellar calves at 11 years of age. **Suitable for heifers/cows.**

## DISCLAIMER AND PRIVACY INFORMATION

### Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

### Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.

SV : the sire has been verified by DNA.

DV : the dam has been verified by DNA.

# : DNA verification has not been conducted.

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

### Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.
