

Spring Bull Sale 2026
Friday, 18 September at 3pm

 **Nutrien**
Ag Solutions®

WELCOME

Nutrien Ag Solutions would like to welcome you to the Tasmanian Angus Spring Bull Sale to be held at TLX, Powranna Saleyards, 73 Powranna Road, Powranna.

Featuring

New River Angus

Tolivar Angus

Londavra Angus

Island Angus

The vendors have put together a great selection of bulls, on offer for your bidding and competition both online and in person on Friday, 18 September at 3pm

Yours sincerely,

*Cooper Lamprey & Warren Johnston
Nutrien Ag Solutions Stud Stock Agents*

SALE INFORMATION

Inspections

All bulls will be penned from 10am on sale day and available for inspection. For private viewing prior to sale date please contact the vendors directly to schedule a date/time.

GST

All Bulls are sold exclusive of GST.

Rebate

A rebate of 3.5% is available to outside agents who attend the sale with the buyer and introduce in writing 24 hours prior to the sale commencing. Please email introductions to studstocktas@nutrien.com.au.

Insurance

Insurance representatives will be available on sale day to discuss insurance options. Insurance is the responsibility of the buyer at the completion of the sale.

Freight

Free freight statewide and to Flinders Island, King Island & Port Melbourne for bulls sold at auction.

Supplementary Sheets

Available on sale day and online via AuctionsPlus.

Catering

Complementary tea, coffee & light refreshments will be available.

Disclaimer

Sale to be conducted under Nutrien Ag Solutions & the ALPA Terms and Conditions. Whilst all due care and attention has been made in the accuracy of the information within the catalogue, neither the vendor, nor selling agent or representatives thereof assume any responsibility for the correctness, use or interpretation of the information on the animals included in this catalogue.

MEET THE VENDORS

NEW RIVER ANGUS

At New River Angus, we believe the strength of every breeding program begins with its females. Exceptional maternal genetics form the foundation of our herd and remain at the heart of every breeding decision we make.

Our philosophy is simple: to produce sustainable, high-quality livestock as efficiently as possible, without ever compromising on quality. Above all, we remain commercially focused, with the needs of the commercial producer always front of mind.

This spring, we are proud to offer 11 eighteen-month-old bulls and 10 yearling bulls. We believe this draft truly represents what we strive to breed at New River Angus—sound, functional cattle with exceptional temperaments and plenty of eye appeal.

The offering includes sons of Gilmandyke Prime Minister T171, Landfall Lorenzo S1704, Adamaulca Slingshot S50 and Millah Murrah Trigger T308.

Health & Guarantee

New River Angus guarantees all bulls for a period of 12 months from the date of purchase against loss of fertility due to structural failure, including conditions such as corkscrew penis or significant structural unsoundness (e.g. severe foot issues).

This guarantee does not cover injury, misadventure, or conditions resulting from physical damage after the sale, including broken penises or broken legs.

Purchasers must contact us directly in the first instance should any issue arise. A full veterinary report must be supplied for any claim to be considered, and the veterinary assessment must be conducted within the 12-month guarantee period.

All bulls have been:

- Drenched with Cydectin Platinum
- Fully vaccinated with 7-in-1, Selovin LA, Pestigard and Vibrovax

Semen Rights

New River Angus reserves the right to collect any bull sold for use in the New River herd. Collection will be at New Rivers expense and at the convenience of the purchaser.

Kind regards,
Michael & Sarah Mather

TOLIVAR ANGUS

This year at the 2026 Tasmanian Angus Spring Bull Sale, we are proud to present our largest and most exciting offering to date, comprising 31 quality bulls including 16 rising 18-month-old bulls and, for the first time, 15 yearling bulls. This draft is a powerful and consistent line-up, featuring docile, long-bodied, deep-ribbed, strong-topped bulls with natural thickness through the hindquarter. They combine structural integrity, genuine muscle expression and commercial functionality, delivering the genetics required to improve profitability throughout the supply chain.

The expanded offering reflects the planned growth of our breeding program, supported by the success of our embryo transfer (ET) program, with 83% of this year's draft the result of ET or AI matings, together with the strength of our proven maternal cow families. We continue to invest heavily in the future of our breeding program by sourcing elite genetics, ensuring Tolivar Angus remains at the forefront of modern Angus breeding.

Leading the yearling draft are sons of Tasmania's record-breaking \$275,000 **Cluden Newry Uppercut 15**, a sire that has already generated significant industry interest. These bulls display exceptional eye appeal, outstanding muscle expression, structural quality, offering calving ease, growth and docility.

Also represented are sons of **Ezar Step Up**, recognised for premium carcass quality and exceptional structural soundness with added muscle thickness and depth of body offering extreme 200-400 day growth and EMA.

Sons of **Alpine 38 Special S021** continue to be highly sought after throughout Australia for their breed-leading structural correctness, reliable calving ease and impressive, deep-bodied phenotype. Included in this year's catalogue are two full brothers to Tolivar Vision V5, the \$19,000 top-priced bull from the 2026 Tasmanian Angus Autumn Bull Sale, purchased by Granite Ridge Angus Stud, South Australia.

Progeny by **Kenny Rogers** complete the AI/ET offering, consistently displaying exceptional feed efficiency, deep body capacity, wide-chested phenotype and elite carcass merit. An easy calving sire with explosive 200,400 and 600 growth all in the top 1%.

Our breeding philosophy centres on balanced, commercially relevant genetics that combine calving ease, fertility, growth, carcass quality and maternal strength without compromising structural integrity, temperament or longevity. Every sale bull is backed by productive, functional cow families selected to thrive in commercial environments and deliver long-term profitability.

Genomics and comprehensive performance recording are fundamental to our breeding program. Together they significantly improve the accuracy of Estimated Breeding Values (EBVs), particularly for economically important traits such as fertility, longevity and structural soundness. By identifying superior genetics earlier in life, we continue to accelerate genetic progress while giving our clients greater confidence that the bulls they purchase will deliver measurable genetic improvement within their own herds. Every animal in the Tolivar Angus stud is genomically tested, Parent Verified and performance recorded, providing complete confidence in the integrity and accuracy of the genetics behind every bull we offer.

Whether your objective is to increase growth, improve carcass quality, lift marbling or strengthen maternal performance, this draft offers proven genetics backed by accurate data and generations of disciplined selection.

Every sale bull has:

- Successfully passed a BULLCHECK breeding soundness examination and fertility tested by accredited veterinarian Dr Matt Izzo, Apiam Genetic Services.
- Tested Pestivirus free.
- Been vaccinated with Pestigard, Vibrovax and Ultravac 5 in 1.
- Been genomically tested and Parent Verified.
- Been treated with Moximax Pour-On and Multimin.

Guarantee: If, within 12 months of purchase, a bull is deemed infertile or incapable of natural service (excluding injury or illness) and this is supported by a valid veterinary certificate, Tolivar Angus will provide a suitable replacement where available or issue a credit equal to the purchase price less salvage value, redeemable at the following year's sale. Any assessment will be conducted by a veterinarian nominated by Tolivar Angus.

We look forward to welcoming you to the TLX Saleyards this September.

We sincerely appreciate the continued support of our clients, friends and the wider beef community including the Nutrien sale team for their service and support. The success achieved by those using Tolivar genetics is the greatest measure of our breeding program, and we look forward to discussing which bulls will best meet your breeding objectives.

Warm regards,
The Tolivar Angus Family

LONDAVRA ANGUS

This year Londavra Angus are offering a draft of 12 two year old bulls at the Tasmanian Angus Spring Sale. We are trying to give you some indication of the size and growth of our bulls. They are all well grown but haven't stopped yet.

After selling yearling bulls in the spring of 2025 which was a one off for us, we have returned to our normal pattern of September/October calving. This makes getting yearling and younger bulls ready for sale in spring, in our cold climate, very difficult, therefore we are offering two year olds.

Bulls are by four sires – all of which have proven to be herd improvers.

Banquet Top Deck T020 has reached a weight of 1250 kg – he passes this structural soundness and softness onto his progeny.

Banquet Torney T008 –A taller bull whose progeny show the same growth pattern, he is out of the renowned Banquet Dream G489 cow.

Texas Beast Mode Q725 - his sons are soft and easy fleshing with doing ability.

Circle 8 Paratrooper R553 produces quality middle of the road calves that grow out.

We run a herd of medium to large frame cows that breed calves that stand up in the pens at store sales with a carcass that weigh heavily when they go through the meat works.

Remember heavy cows bring the high price per kilo and give maximum return with the same applying to cull bulls.

This winter has been a particularly hard winter with no surplus feed. The bulls have responded well to their minimum rations.

Our aim in to breed easy doing, functional cattle that suit the industry without chasing fads that come and go.

The photos in the catalogue are a cross selection of our bulls not necessarily the best bulls.

All sale bulls were drenched with Cydectin. Vaccinated with 5 in 1 and Pestigard twice, plus a booster, and have had a Multimin.J-BAS 6. Londavra guarantee all bulls fertile. Any claim against fertility must be made in writing accompanied by a Veterinary certificate and forwarded to the vendor no later than the 28th February 2027. Any bull proven to be not fertile will be replaced if available, or purchase price (less salvage value) credited for use at the following sale.

David Young

ISLAND ANGUS

Following a successful debut at the 2025 Nutrien Tasmanian Angus Bull Sale, we are excited to return for our second year with another quality lineup of 4 HBR & 2 APR genomically tested & parent verified Angus bulls for your consideration at this year's Nutrien Tasmanian Angus Bull Sale < Friday 18th September 2026 >.

We are incredibly grateful for the support received and humbled by the positive feedback from commercial producers since last year's sale. It has only strengthened our commitment to breeding practical, functional cattle, and we are excited to present what we believe is an even stronger lineup this year.

At Island Angus, our focus is simple — breeding productive, profitable cattle without losing sight of the fundamentals:  Shape  Structure  Type  Growth  Fertility

There's plenty of discussion about eating quality EBVs, but let's not forget the simple economics of the beef industry. As producers, we're paid for kilograms of beef—not kilograms of figures. While eating quality is an important piece of the puzzle, an EBV should never come at the expense of growth, capacity, fertility and productivity. At Island Angus, we believe the best cattle are those that combine commercially relevant data with the phenotype, structure and performance to consistently produce more kilograms of high-quality beef. Because in the real world, profitability starts with weight, and every extra kilogram counts.

We aim to produce cattle that work across every part of the supply chain—from cow/calf producers to backgrounders, finishers, feedlots and processors. We believe there is a real and growing need for practical, balanced cattle that fit commercial operations, and our cattle are bred to meet that need, with the frame, capacity, weight and structural integrity to consistently meet market specifications while delivering profitability.

To ensure our bulls perform in real-world commercial environments and stand the test of time, they have been raised entirely on dryland pasture and grass silage—without grain or pellet feeding. This management system produces fit, functional, structurally sound bulls that are ready to go to work.

While we recognise the growing demand for genetic data, our breeding focus has always been on phenotype, structural correctness and raw performance. In particular, we emphasise shape (length of body and neck extension), weight for age, and carcass weight.

This emphasis can negatively impact calving ease figures on paper. However, the real truth about calving ease is more about the shape of the calf than the weight. A long-bodied calf with good neck extension and smooth shoulders will naturally weigh more than a short calf giving it a higher birth weight EBV, but that extra weight is in its length and doesn't require any more pelvic area there for will not cause anymore calving difficulties than the shorter, lighter calf.

A real master of the beef industry Doug Tozer of Onslow Angus explained this exact theory with a slightly different approach. When you compare three bottles, port, red wine and white wine, the three bottles are all the same volume containing 750mls, clearly showing the importance of shape not weight.

These bulls have been an absolute pleasure to work with. They are quiet, well-handled and respectful around dogs, horses, bikes, ute and on foot, including with our two young sons, aged 9 and 11, who regularly help move and yard them.

12-month guarantee on bulls - we will offer a replacement or credit (less salvage costs) if the bull proves infertile or incapable of natural service within the first 12 months after purchase, provided the issue isn't due to injury, illness, or misadventure after the bull was delivered. Vet check must be performed within 24hrs.

All bulls vaccinated - UltraVac 7 in 1, Vibrovax, Pestigard. Drenched with Cydectin Platinum.

Semen tested & morphology assessed. Physical evaluation and examination of reproductive tract along with structural soundness & general health by Apiam Genetic Services.

Every sale catalogue is full of photos, figures and pedigrees—but nothing compares to standing in the paddock and looking at the bulls for yourself.

Before making your buying decisions this spring, we'd love to welcome you to Island Angus to inspect our 2026 sale team. Come and see how they've been raised, assess their structure, temperament, capacity and performance under genuine commercial conditions, and decide for yourself.

We believe the best way to judge a bull is in the paddock. We provide the figures, you judge the bull.

We'll be holding a pre-sale inspection day, Saturday 12th September 11am - 2pm.

If you'd prefer a private inspection, you're always welcome to contact us to arrange a visit.

We look forward to catching up with fellow producers and talking cattle.

We sincerely thank everyone who supported us in our first year and look forward to catching up with both returning and new buyers at this year's Nutrien Tasmanian Angus Bull Sale.

LIVESTOCK AUCTION TERMS AND CONDITIONS OF SALE

CHAPTER ONE - PRELIMINARY

1. (a) A vendor is bound by these terms and conditions by offering livestock for sale by auction.
- (b) An agent (which includes an auctioneer) is bound by these terms and conditions by conducting an auction sale.
- (c) A buyer is bound by these terms and conditions by bidding at auction.
- (d) **Competition and Consistent Act (CCTA) 2008**
It is unlawful for parties that are, or otherwise would be, in competition with each other to make, or give effect to, a contract, arrangement or understanding that contains a provision relating to:
i. price-fixing; or
ii. restricting outputs in the production and supply chain; or
iii. allocating customers, suppliers or territories; or
iv. bid rigging; or
v. collusive bidding.
Large fines and other sanctions may be imposed for unlawful conduct.
2. (a) In these terms the expression auctioneer, agent, buyer and vendor respectively includes the persons, contractors and agents of each of them. The auctioneer, agent, buyer and vendor shall be jointly responsible for the sale and consignment of their respective animals, contractors and agents. The term "auctioneer" includes, as well as the law and contract permits, the vendor's agent.
- (b) When used in these terms the expression "companion animals" means all animals originating from the same property on a particular day. Where lots are split and sent to multiple subdivisions, then all of these animals shall be regarded as companions.
3. The following applies in interpreting these terms and conditions:
(a) The following words have the following meanings:
Free means all items, charges, fees, costs and other expenses incurred in relation to these terms and conditions and the sale and purchase of livestock including, without limitation, transaction fees, yard and weigh charges, cartage, advertising and relation, and relative paid fee, or incurred, by the agent.
Livestock means animals auctioned pursuant to these terms and conditions and
Price means the amount at which the lot has been sold to the buyer referred to in clause 7 of these terms and conditions.
(b) plus any fees and other expenses incurred in relation to the purchase of livestock that are payable by the buyer; and
(c) plus any GST added in accordance with clause 10.
- (d) These terms and conditions are subject to legislation or regulation in the State in which the auction is conducted and in the event of any conflict between the legislation or regulation will prevail. The provisions of these terms and conditions are in addition to, and do not derogate from, the duties and rights of vendors, agents and buyers set out in legislation and regulation in the State in which the auction is conducted.

CHAPTER TWO - STANDARD TERMS OF SALE

4. Subject to any reserve price, and to the right, prior to the fall of the hammer, of the vendor to withdraw any lot without declaring the reserve, the highest bidder shall be the buyer.
5. The auctioneer has the right to bid on behalf of the vendor provided that right is notified prior to the commencement of the sale and is subject to State law.
6. A lot cannot be made or accepted after the fall of the hammer unless, as a condition with clause 6, the auctioneer decides to put the lot up again.
7. Prior to the fall of the hammer the auctioneer shall announce the lot bid and reserve any further bids. The lot price called by the auctioneer at the fall of the hammer shall be the amount at which the lot has been sold.
8. In the event of a disputed bid, the auctioneer is the sole arbiter of the successful bidder or the auctioneer may decide to put the lot up again. The auctioneer's decision is final.
9. The auctioneer may refuse to accept any bid which, in the auctioneer's opinion, is not in the best interest of the vendor and need not give reasons for doing so.
10. A bidder shall be deemed to be a principal bidder, prior to bidding, the bidder has given to the auctioneer a copy of written authority to bid for or on behalf of another person.
11. The successful bidder at a livestock auction sale must give to the auctioneer at the fall of the hammer:
(a) the purchaser's name; or
(b) the bid card number which identifies the purchaser; or
(c) the name of the person on whose behalf the successful bid was made; and
(d) the Property Identification Code (PIC) of the destination.
12. The auction shall be conducted on the basis that the bid price shall be recorded in Goods and Services Tax (GST). GST shall be added after the fall of the hammer for those sales subject to GST.
13. The vendor warrants:
(a) That the vendor has the full power to sell the livestock of the lot; and
(b) That the purchaser will obtain title on completion of the purchaser's obligations under this contract including payment.
14. If a buyer does not comply with any of these terms and conditions, which includes the requirement of State law, any livestock tendered down to that buyer may be resold by public auction or private contract in whatever lots and manner the auctioneer decides. The resale may be with or without notice and shall be at the buyer's risk. The buyer is responsible for all loss and expense arising out of a resale and is not entitled to any refund or profit.
15. The buyer of livestock must pay the agent the full amount of the purchase price to the agent on receipt of a tax invoice. Payment is required prior to delivery unless some other time for payment is specified in an agreement between the buyer and the auctioneer that was made before the fall of the hammer. If, before delivery, payment has not been made then clauses 26 to 27 apply.
16. No person may bid unless, prior to the commencement of the sale, that person has made arrangements satisfactory to the auctioneer for payment for livestock purchased. If bids in breach of this condition are made, the auctioneer, delivery shall not be given until the purchaser money is paid and any law, rule or practice to the contrary is accordingly regulated as far as possible.
17. (a) Cattle sold on a live weight basis that are weighed prior to sale are at the risk and expense of the buyer upon the fall of the hammer.
- (b) Cattle sold on a live weight basis that are weighed post-sale are at the risk and expense of the buyer immediately after weighing.
- (c) All livestock other than cattle sold on a live weight basis are at the risk and expense of the buyer upon the fall of the hammer.
18. Subject to this clause the sale is complete on the fall of the hammer.
19. The time for inspection is the time commencing at the fall of the hammer and ending at the first of:
(a) delivery is taken by a representative of the buyer;
(b) departure of the animal from the purchaser's delivery point; or
(c) one hour after the last animal is:
i. in the case of pre-sale weighing, sold; or
ii. in the case of post-sale weighing, weighed.
20. During the time for inspection the buyer may reject any animal which is lame, blind or diseased where that condition existed prior to the fall of the hammer but could not be reasonably observed when the animal was in the selling pen.
21. If the purchaser rejects an animal during the time for inspection then the sale of that animal is cancelled and the animal is returned to the vendor at the same time as any buyer and the agent may agree, after the agent has closed the money received from the sale of the animal.
22. This subclause applies only to cattle which are sold in Government at auction for slaughter. The agent has responsibility for the prevention of loss or escape (that not death, sickness or injury) of these cattle from the time of the fall of the hammer, for delivery to and in the seller's scales, to the buyer's delivery pen and onto the buyer's nominated transport. This responsibility ends at the point of these cattle boarding the buyer's nominated transport or moved on the day after the sale. This

- subclause does not apply if the agent makes an announcement to that effect prior to sale.
19. (a) Subject to the right of rejection in Clause 18, all conditions and warranties expressed or implied by law are hereby excluded from the sale to the extent that the law allows. All lots are open for inspection prior to the commencement of the sale and are sold with all faults, if any. No compensation shall be given for any faults, imperfections, errors of description, number in or of any lots or other faults.
- (b) Any claim or objection arising out of an error or misdescription in the provision of relevant information in terms of legislation or regulation concerning the National Livestock Identification Scheme (NLIS) must be made by 5.00pm on the seventh day after the fall of the hammer. An objection or claim against the vendor or agent in respect of such an error or misdescription can be made after that time.
- (c) Any statements made by the vendor or the auctioneer whether in writing or orally to the effect that any animal has been previously tested or screened positive shall mean and require only that a certificate in writing shall be supplied to the buyer signed by a qualified veterinary surgeon or certified surgeon (referring that the said results have been tested or screened on the date specified in the certificate and that in the opinion of the surgeon or surgeon was present on that date).
- (d) For slaughter cattle, the agent undertakes to make every reasonable effort to ensure that any NLIS cattle device number is transferred from the relevant PIC to the purchaser's PIC on the NLIS database no later than midnight on the day of the sale.
- (e) For other slaughter livestock the agent undertakes to make every reasonable effort to ensure that the NLIS information is transferred from the relevant PIC to the purchaser's PIC on the NLIS database no later than midnight on the day of the sale.
- (f) Where livestock from a food safety or market eligibility status derived from the National Vendor Declaration (NVD) under the NLIS 500 database, the agent will inform the buyers by providing a colour-coded animal movement status prior to the offering of these lots.
26. If delivery is made to, or possession obtained by, the buyer or its representative before full payment of the Price, then until full payment is received, the buyer:
(a) does not acquire title to the livestock;
(b) holds the livestock as bailee on behalf of the vendor;
(c) must act in a fiduciary capacity in its relationship with the vendor;
(d) must store the stock separately so as to keep it really distinguishable from other livestock owned by the buyer;
(e) is responsible for the safety and well being of the livestock;
(f) may make a bona fide sale for market value of any or all of the livestock. As between the buyer and the subsequent buyer, the sale shall be made by the buyer in its own name and not as agent for the vendor, however as between the vendor and buyer, the sale shall be made as bailee and agent for the vendor; and
(g) must keep and account for the proceeds of any subsequent sale separately from its other money and hold those proceeds, together with the benefits of any rights against subsequent buyers, on trust for the vendor.
26. The purchaser agrees that:
(a) Clause 26 creates a legally enforceable security interest under the Personal Property Securities Act (CPSA) 2009 (PPSA);
(b) the Purchaser acknowledges the rights of the seller (and the Agent if Clause 21 applies) to register a financing statement under the PPSA with respect to the security interest created by this clause;
(c) the Livestock are collateral for the purposes of the PPSA;
(d) to the extent permitted, the Purchaser waives any right the Purchaser has under the PPSA to render notices; and
(e) the date upon which the security interest created by this clause comes into force is the first date on which livestock are delivered pursuant to this contract.
27. The buyer may not make any claim against the vendor for actions by the vendor or its agent under clauses 26 or 27 and indemnifies the vendor and its agent against any loss, damage, costs, expenses, penalties, fines or claims suffered by the vendor, the agent or any person or entity arising from the vendor exercising its rights under clauses 26 or 27.
- 27.1. Clause 27 applies whenever the agent pays the vendor before being paid by the buyer, which the agent is not bound to do. The agent is then the debt creditor of the vendor at law.
- 27.2. The vendor hereby gives notice to the buyer of the assignments referred to in clause 27.1.
- 27.3. When this clause applies, in addition to any rights of the agent that arise by operation of law the parties agree that, subject to clause 27.1, the agent is subrogated to all rights of the vendor under these terms and conditions against the buyer.
- 27.4. The vendor acknowledges that the agent may take enforcement, repossession or other action to recover any livestock for which the buyer has not paid in full, or the Price of such livestock, owing by the buyer under these terms and conditions:
(a) when this clause does not apply, as agent of the vendor (including by reselling the livestock); and
(b) when this clause applies, on the agent's own behalf exercising the rights of the vendor by advertisement or assignment under these terms and conditions (including in the vendor's name or sold), where title to the livestock has not passed to the agent, by selling the livestock as agent of the vendor without the agent having to account to the vendor for the proceeds of sale.
- 27.5. The agent may at any time, assign, transfer, encumber or otherwise dispose of all or any of its rights under these terms and conditions and any debts created pursuant to it (including, without limitation, the rights assigned to it under clause 27.1).
- 27.6. The vendor hereby irrevocably appoints the agent as the vendor's attorney to:
(a) do at any time and in any manner as the agent thinks fit all such necessary or desirable to perfect or improve the rights and interests attached, or intended to be attached, to the agent under these terms and conditions; and
(b) appoint one or more sub-attorneys to do anything that the agent may do as the vendor's attorney.
- 27.7. These terms and conditions do not render the agent liable to the buyer as vendor nor entitle the buyer to set off against the agent any right the buyer may have against the vendor or otherwise.
- 27.8. The buyer acknowledges that the provisions of this clause 27 are intended solely for the benefit of the agent (and its assigns) and the vendor. The liabilities and obligations of the buyer will not be in any way affected:
(a) by this clause 27, other than as it expressly provides; or
(b) by the failure of the agent or the vendor or either of them to comply with the terms of this clause 27.
- 27.9. The buyer must pay all amounts payable to the vendor or the agent under these terms and conditions without any deduction, withholding, set off or counterclaim whatsoever, whether the benefit of a deduction, withholding, set off or counterclaim is alleged to exist in favour of the buyer or against the vendor or the agent in any capacity whatsoever or any other person including any assignor of the vendor's or the buyer's interests under these terms and conditions.
- 27.10. The agent agrees that he is liable to pay to the vendor the Price, less such commission as is agreed between the vendor and the agent, and to the extent of any agreement such amount as is reasonable, and to the extent that it is payable by the agent to the vendor or the agent on behalf of the vendor in relation to the sale of the livestock.
- 27.11. In the event that the buyer pays the Price or part of it direct to the vendor then the agent has no liability to the vendor for the amount of such payment. Further, if the agent pays the vendor any amount which the buyer also pays direct to the vendor in respect of the same livestock, then the vendor must repay the agent that amount and the agent may debit the amount to an account held in the name of the vendor by the agent.
- 27.12. Regardless of whether or not a sale has occurred the agent may, but is not under obligation to do so, instead of deducting payments owed to it by the vendor, debit the amount of the commission and fees to an account held in the name of the vendor by the agent.
- 27.13. The auctioneer has been retained by the vendor as auctioneer for the purpose of selling the livestock comprised in the lots. The terms of

engagement between the auctioneer and the vendor do not extend to the provision of advice by the auctioneer to the vendor in relation to the safety or otherwise of the sale ring, the sub-sale and the surrounding environment.

- (b) The vendor, the agent and the buyer agree to comply with their mutual duties under the Australian Animal Welfare Standards and Codes for the Care and Transport of Livestock and further to comply, manage, monitor, transport and handle livestock in accordance with any other or additional requirements of animal welfare legislation specific to the practices in which livestock are consigned, managed, received, transported and handled in the course of the auction process.

CHAPTER THREE - VENDOR WARRANTY FOR CORRECT PRESENTATION AND DECLARATION

28. This chapter applies only in the case of livestock and their companion animals sold at auction for slaughter when the lot is the slaughter and the livestock are transported direct from the sale yard to the meatworks at which they are slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells the livestock to a slaughterer. A slaughterer is any person who pays the AMFC Fee more levy.
29. The warranty of the vendor is that livestock and their companion animals offered for sale at auction:
(a) pass government and other regulatory authority requirements and inspections at the time of slaughter;
(b) are of one shand quality;
(c) carry an NLIS device in accordance with State law;
(d) in the case where a representation has been made in the pre-sale catalogue that the livestock have particular characteristics or are fit for a particular purpose or market, and such representations are based on information in any document, the livestock will have those characteristics or will be fit for the particular purpose or market; and
(e) all information in any document provided by the vendor is true, complete and correct in all material respects.
30. In the event of a breach by the vendor of the vendor's warranty and provided such breach is notified by the buyer to the agent by 5.00pm on the 1st day after the fall of the hammer then the buyer is not liable to pay the purchase price of such of the vendor's livestock to which the breach applies.
31. However if the breach by the vendor is such that the livestock are not rejected, the buyer is not liable to pay the purchase price of such of the vendor's livestock to which the breach applies.
32. In the case of a breach by the vendor of the vendor's warranty then the vendor will also be liable to the buyer for any further losses which the buyer might sustain that the buyer will take all reasonable steps in co-operation with the agent and vendor to mitigate both the effect of the breach and the amount of any loss.
33. Where a genital animal of a lot tests positive for chemical residues, or foreign material contamination and provided such lot is certified and labelled as required by these vendor warranty terms, then:
(a) the buyer will be entitled to delay payment for the price of all livestock in that lot only; or
(b) the vendor has the option, at the vendor's cost, of collecting the companion animals, if allowed by law or if having the livestock slaughtered in which event the risk of further contamination will be that of the vendor. Where practical integrity is potentially preserved, the vendor may have the right to resell the slaughter and send the livestock back to the consigning property of the vendor's lot.
34. The auctioneer is liable to the buyer in respect of any breach of the vendor's warranty arising out of:
(a) any error, by the auctioneer, of transcription of information from the NVD completed by the vendor to the pre-sale catalogue or the buyers' post-sale summary;
(b) any failure by the auctioneer to notify the buyer, prior to bidding, of any breach by the vendor of the warranty of the vendor if the buyer establishes that the agent knew of such breach prior to the sale; and
(c) any failure by the auctioneer to announce prior to bidding, or disclosure in the pre-sale catalogue, that the vendor has failed to provide a NVD that is complete in all material respects.

CHAPTER FOUR - OWNERS RISK FOR CONDITION OF CATTLE

35. This chapter applies only in the case of cattle and their companion animals sold at auction for slaughter when the lot is the slaughter and the cattle are transported from the sale yard to the meatworks at which they are slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells the cattle to a slaughterer. A slaughterer is any person who pays the AMFC Fee more levy.
36. Owners risk affects the producer's responsibility to provide slaughter cattle for sale that are fit for human consumption. Cattle are fit for human consumption if they are not condemned as unfit by government. Owners risk applies if the condition is due to a condition in the animal which the buyer establishes, by the relevant government certificate, existed prior to the fall of the hammer.
37. A buyer with the benefit of owners risk protection is not liable to pay the Price of the animal to the vendor. The buyer remains nonliable for all costs incurred after the fall of the hammer in transport, slaughter, testing and disposal of the animal.
38. Owners risk protection is available to the buyer of cattle to which this chapter applies if all of the following are satisfied:
(a) a certificate is issued by government which states the relevant NLIS 500 tag number and PIC, the date of the certificate, the reason for condemnation and that the reason for condemnation existed prior to the fall of the hammer;
(b) the certificate is received by the selling agent after the animal has been weighed by 5.00pm on the 7th day after the fall of the hammer; and
(c) if the condemnation is due to chemical residues the certificate follows testing in a government approved laboratory which establishes maximum residue limits in excess of the Australian limit.
39. Owners risk does not apply, and the buyer must pay for the cattle, if the reason for condemnation is any of bruising, fever, partial condemnation or emaciation.

CHAPTER FIVE - NOTICES REQUIRED BY LEGISLATION

- Notifying Property, Stock and Business Agents Act 1981 (NSW)**
Provision for collective practices. It is an offence against the Property, Stock and Business Agents Act 1981 for a person to do any of the following as a result of a collective practice, or to induce or attempt to induce another person by a collective practice to do any of the following:
(a) to abstain from bidding; or
(b) to bid a limited number only; or
(c) to do any other act that might prevent free and open competition.
Severe penalties may be imposed on persons convicted of collective practices.
- The auctioneer has the right to make one bid on behalf of the vendor if the auctioneer clearly and properly announces that bid prior to the sale.**
- Insurance Legislation.** An auctioneer conducting a public auction must not appear to acknowledge the making of a bid if he or she is not insured. A person must not participate in collective practice by way of making or receiving or entering a contract to abstain from bidding, or to bid a limited number only, or to do any other thing which may prevent free and open competition.
- WA Auction Sales Act 1973 (WA) (ASRA)**
It is an offence to:
(a) induce or attempt to induce another person to abstain from bidding by means of a promise, agreement or implied, that the other person will have the right to bid to take over as buyer or to have or direct lots to establish who is to become the owner;
(b) induce or attempt to induce another person to abstain from bidding as a result of such a promise;
(c) knowingly enter or permit or cause to be entered in the auctioneer's record or any other record that of the actual successful bidder;
(d) enter in the auctioneer's record the name of the buyer other than that of the actual successful bidder; or
(e) in the case of successful bidder supply wrong information as to the name of the buyer to the auctioneer or to any person, firm or corporation on whom reliance is placed.

The vendor, or any person on behalf of the vendor, or the auctioneer have the right to make no claim for these bids.
