

# TELPARA HILLS

THE PURSUIT OF PERFECTION  
Paddock to Plate

---

BRANGUS | ANGUS | ULTRABLACKS SALE  
SATURDAY, SEPT 19, 2026

---

# WELCOME FROM TELPARA HILLS

We are pleased to welcome you to our 2026 on-property sale – and what a landmark sale it has become for the Brangus and UltraBlack breed. This year marks the first that we will sell a small but elite offering of Angus sires in Far North Queensland.

The story of Telpara Hills runs deep. I began Telpara Hills with my father Eddie and brother Phil back in 1964, and the farm has prided itself on breeding all types of livestock over the years, including purebred sheep, chickens, dogs, and of course, cattle.

Our initial imported USA genetics span back some 80 years, part of the legendary Brinks herd, where ultrasound scanning itself was pioneered at Kansas State University back in the 1960s.

That infusion of world-class genetics into the AU herd has super-charged genetic progress in Australian Brangus, across both seedstock and commercial operations. Telpara Hills has become a true benchmark herd for performance and marbling in AU.

And every year, we raise the bar. Each year we present a sale bull line-up showing greater consistency in type, stronger muscle patterns, and breed-leading performance and carcass data.

Integrity drives everything we do. At Telpara Hills we place high standards of integrity in our data recording and in our business dealings with our wide range of clients – and we believe this is exactly why we have built our 60-year history within the stud industry.

The world around us is unpredictable – as producers, we have little control over international politics, trade tariffs, and climate. But make no mistake: we can, and do, drive real influence over the quality and consistency of performance in our product through genetics.

That's where Telpara Hills genetics deliver. They can produce for you superior black, flat-backed, polled, heavy-weighted, fast-growing calves with high carcass merit – genetics built to eventually give a truly special eating experience.

There really is both a difference and an advantage to producers who choose Telpara Hills seedstock.

Thanks again for your support over the years, and for being part of this exciting 2026 Sale!

Sincerely,

Trevor Pearce

for the Pearce family of Telpara Hills

Brittany, Stephen, Maureen, Trevor and Fiona Pearce. Telpara Hills is a true family run farm, and we are passionate about great cattle!

# SALE DAY INFORMATION:

## SALE ADDRESS:

Telpara Hills Bull Depot, 157 Marnane Rd, Tolga, QLD

**TERMS AND CONDITIONS** - All lots will sell under the Australian Livestock & Property Agents Association Ltd Standard Stud Stock Auction Terms and Conditions of Sale. If unfamiliar with these Standard Terms and Conditions, please obtain a copy from Telpara Hills or Elders. Additionally, consent must be granted in writing from Telpara Hills before any genetics from this sale are cloned.

**GUARANTEE** - Telpara Hills will guarantee bulls and heifers to be fertile via natural service. This guarantees the purchase value minus salvage value, without interest, costs, or damages as a credit. In the event of a bull or female failing to breed, it may be replaced with an animal of comparable value or a credit to the purchase price on a replacement lot in the next sale or on one animal by private negotiation. Claims will not be valid if an incapacity is caused by injury, illness, or neglect since leaving Telpara Hills. Animals must be returned to Telpara Hills at the cost of the purchaser. Please contact us as soon as possible and within six months of the sale date.

## RETAINED SHARE

All bulls sell with 80% semen marketing rights, giving the buyer the majority share in any potential semen revenue. If the buyer chooses to do so, we believe there is a great opportunity to market these bulls through our semen company, TGC. In our experience these genetics are outperforming many imported sires. Should any purchaser wish to operate on the basis of 100% ownership, please contact Telpara Hills at least 24 hours prior to the Sale. Under all circumstances and all bull lots, the vendors retain the right to collect semen at a later date at our expense. The buyer takes full possession of the bull.

**INSPECTION & OPEN DAY** - Inspections are open on sale day from 8 am. Inspections prior to sale day are welcomed by arrangement with Telpara Hills. Please note children are not permitted to enter sale pens under WPHS regulations.

Telpara Hills will also participate in the Tablelands Better Beef Open Day on Sunday, August 23rd 2026. We invite you to visit then as it is a great, relaxed, low-pressure way to view the entire sale team without time constraints and at your own pace.

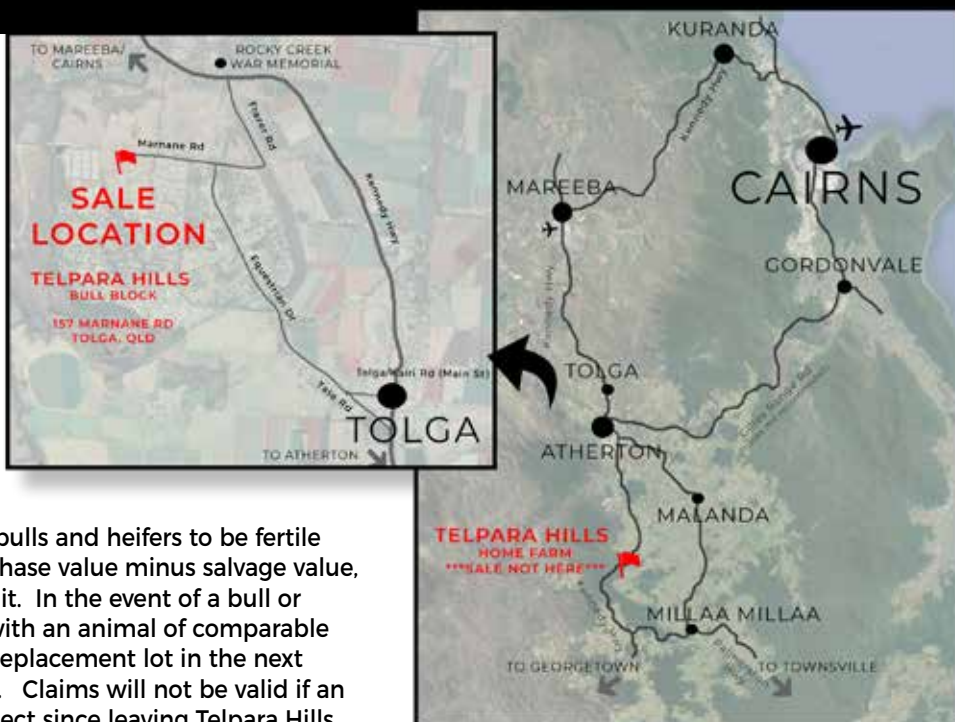

**REGISTRATION** - All buyers are required to register prior to the commencement of the Sale. This can also be done online on our website or in person at the Sale. Online bidding instructions can be found on the next page.

**SUPPLEMENTARY INFORMATION** - In order to make the most informed decisions about your bull, we will provide a Supplementary Sheet prior to the Sale with full scan data, DNA, and semen testing results. We highly encourage you to look at the IMF % in particular. It measures marbling which the Telpara Hills herd is renowned for. A guide to reading scan results is included on page 5.

**INSURANCE** - All lots become the property of the buyer at the fall of the hammer therefore we highly recommend insurance. As the Sale is on a Saturday, we recommend speaking to your chosen representative prior to the Sale if possible. Elders no longer provide this service at sale time.

**TRANSFERS** - All animals are registered with the Australian Brangus Cattle Association and are eligible for transfer upon request. Please ensure this is clearly marked on your Buyer's Instruction Sheet after the Sale. Transfer requests made after 30 days post sale will be the buyer's responsibility and cost.

**CATERING** - Hot breakfast will be provided by Telpara Hills (kindly sponsored by NAB bank) at approximately 8:30-9am. We proudly support local businesses and have invited local food & hot beverage vendors to sell lunch during the Sale. You are invited to stay after the Sale for drinks, refreshments, and dinner, provided by our family. We hope you stay and join us.

# FREE FREIGHT

## - AND FREIGHT SUBSIDY -

Delivery of Sale Cattle will be FREE OF CHARGE to the following major centres including:

|                 |                 |             |        |
|-----------------|-----------------|-------------|--------|
| Blackall        | Cloncurry (NEW) | Ingham      | Roma   |
| Charters Towers | Emerald         | Richmond    | Sarina |
| Clermont        | Hughenden       | Rockhampton | Winton |

**SUBSIDISED FREIGHT** - For Gympie & Non-QLD clients, we will offer a \$150 freight subsidy per lot from our last delivery centre listed. We hope that this is a better, more flexible option in these areas.

Lots will be delivered as soon as possible following the Sale. However, please allow time (2-3 weeks) for coordination and tick clearance, if needed. Any animals left at Telpara Hills beyond this time will be ineligible for free freight.

Onward freight arrangements from the delivery centres or intermediary points will be the buyer's responsibility.

Freight is to be arranged by Elders, and we will send updates via text messages. Please ensure your mobile number is included on the buyer's instruction sheet as we send group texts with updates for each truck.

### AFTER SALE PICK UP

All lots may be collected from Sunday, Sept 20. Telpara Hills and Elders will organise delivery as soon as possible to major centres as outlined above.

**HERD HEALTH**- Telpara Hills is a family operation and we pride ourselves on our professionalism and animal care. We go above and beyond industry best practice to ensure your cattle are healthy and ready for a long, productive life.

Animals are:

- Reproductively Sound - Bulls are Veterinarian Assessed
- Bulls are Semen Tested, including morphology
- Raised in a Tick Area - Pre-Clearance Treated before the Sale
- Bulls: 7:1, 3 Day, Botulism, Vibrio x 2
  - 3 Day booster due November 2026
  - 7:1 & Botulism booster due March 2027
  - Vibrio booster due July 2027
- All Heifers: 7:1, Botulism
  - 7:1 & Botulism boosters due Dec 2026
  - PTIC & Joined Heifers 3 Day Booster due Dec 2026
- Animal Health Declarations Provided

## DON'T LET ANYTHING KEEP YOU FROM THE CATTLE YOU NEED:

Nothing is as good as being at the Sale in person. You get the opportunity to see the cattle, catch up with friends, meet new people, and enjoy the sale atmosphere. We hope you can join us, but if you can't make it we have made it convenient for you to participate from wherever you may be.

### 1: GIVE US A CALL

We are all here to help you. We can talk with you about the cattle that interest you, logistics, and if you like, we can even offer an opinion. We have listed our contact numbers on page 1. Furthermore, we have enlisted an independent respected cattleman, Chad Posselt if you would like an unbiased opinion or help buying on Sale day. Chad: 0408 876 313

**2: PHONE BIDDING:** It's low tech, but it works. You can call any of us, Elders, or an agent of your choice. It gets a bit loud during the sale, so if you can call ahead of time we'd appreciate it. We will list extra phone contacts on our website, just in case.

### 3: BID AND VIEW ONLINE

You can participate from almost anywhere with an internet connection. From your computer or your phone, you can be part of the Sale. You can bid and/or watch it all live. We recommend registering at least 48 hours prior to the Sale on the auction website: [www.auctionsplus.com.au](http://www.auctionsplus.com.au)

We recommend you access another sale and familiarise yourself with the system prior to sale day. Contact for AuctionsPlus: Main office (02) 9262 4222, On site: Paul Holme 0437 119 530

As farmers, your relationship with your banker is a vital one. We have trusted NAB to help us build our dreams and secure land in order to keep Telpara Hills sustainable long into the future. Our local NAB team have stepped up once again to offer fresh bacon and egg rolls for breakfast on Sale day, so make sure to say hello.

## TRAVEL TIPS:

### DRIVING

- We've included a map on page 2. The Sale venue is midway between the towns of Atherton and Mareeba, QLD, with the closest city being Cairns. The Sale address is 157 Marnane Rd, Tolga QLD

### FLYING

- Cairns Airport is just over an hour's drive. Be mindful of overnight closures on the Kuranda Range.
- Mareeba Airport (paved) and the Atherton Aerodrome (grass) are both only 10 minutes away if travelling by private aircraft

### ACCOMMODATION

Fortunately, there are plenty of options for accommodation in the nearby areas. Atherton, Yungaburra, Malanda, and Mareeba are all close, as well as Cairns and the Northern Beaches. However, we recommend booking early due to the school holidays. This part of the world is absolutely beautiful, especially during September. We encourage you to make a holiday out of your visit. The Atherton Tablelands, Cairns, Palm Cove, Port Douglas, and Mission Beach areas are all at our doorstep.

Thank you to Honeycombes for always being supportive of both our sale and the Tableland Better Beef Open Day. Simply put, they have great gear and give great service. Honeycombes will have a selection of John Deere machines on display at the Sale for your perusal.

# ART MEETS SCIENCE:

Cattle breeding is first and foremost an art. Nothing can replace evaluation with your eyes. We never choose an animal based purely on data. They always have to look the part, and at a bare minimum, any genetics we use in our herd have to come from cattle who have the basics of functionality and fertility.

If you breed exceptionally good phenotype cattle as a priority, the numbers should and will follow.

That's why Telpara Hills genetics or closely related animals make up 90% of the top 60 animals in the Brangus breed for 600 Day Weight EBVs. Our cattle are bred to put on weight fast!

We use all the tools, EBVs, scan data, DNA, and of course, our eyes. Just as importantly, we pass along that information to our customers so you can make informed decisions. It's all important.

## A BASIC GUIDE TO EBVS:

EBV stands for estimated breeding value. It's purpose is to predict the performance of an animal and takes into account the weights, measurements, genomics, scan data of each animal, the performance of animals in their pedigrees, and tries to remove differences in environment and feeding.

We find that looking at the ranking of animals is most helpful, which shows how an animal should perform when compared to other Brangus stud animals that are enrolled in the EBV system.

The rankings of animals in this sale are simply outstanding and predict that these Sale lots will inject huge weight gains into your herd.

## SCAN DATA SIMPLIFIED:

Ultrasound Scan Data of the meat quality of a living animal is still extremely valuable information. In fact, our Brangus herd was based on "Brinks" bloodlines out of the USA; pioneers starting in the 1960s for using scan data to select animals with superior carcase qualities, especially marbling. Because of this, our scan data often rivals the very best Angus herds, and the meat quality is outstanding.

A very general guide to reading scan data:

IMF- stands for inter muscular fat, aka marbling. This is a huge factor in giving meat tenderness and flavour. More is better. Anything over 5% is a good score for the industry, 6% is top quality, 7% or more are breed leaders.

After 80 years of selective breeding for carcase excellence, Telpara Hills sired steaks are showing significant increases to meat quality, especially marbling. This photo was provided by Tablelands Farm to Fork, by grass feed steers sired by a Telpara Hills bull.

EMA- stands for Eye Muscle Area. This is a measurement of the muscle along the spine of an animal, a premium cut of beef, and is a good indicator of the overall amount of muscle and yield. More is also better, but in moderation. For bulls, a very general guide is a 110cm<sup>2</sup> EMA for a bull that is less than 2 years of age is good, 120cm<sup>2</sup> EMA for a 2-year-old bull, a 130cm<sup>2</sup> EMA for 3-year-old bull. Bulls that have been used will see a slight reduction. Heifers will have much lower scores, but you can still compare animal to animal.

Fat Thickness: This is a measurement of the fat that is along the outside of the muscle. There are two measurements, rib measured between the 12th and 13th ribs, and P8 which is along the rump. What we like to see here is an animal's ability to put on fat, but not be overdone. For Rib Fat 5-10mm is ideal, and Rump 7-15mm. If an animal is out of this range it will skew other measurements.

## BALANCE IS THE KEY TO SUCCESS:

We advise to not chase extremes in any trait, but always keep in mind the overall animal. For example, a high EMA can be a wonderful way to put more muscle into your herd, but chasing higher and higher EMA scores can lead to coarseness, lack of fertility, and can cause sizing issues in the restaurant trade. We like to never chase extremes and always consider matching strengths to the needs of a cow herd.

DESIGN: Catalogue design and lot photos by Brittany Pearce, with words from Trevor and help from the entire Pearce family. Copyrights Reserved.

DISCLAIMER: Whilst every effort has been taken to ensure that all details are correct, the descriptions contained in this catalogue are often opinion only. We cannot be responsible for the consequences of any actions taken or not taken as a result of these opinions. Safety: The owners, employees and representatives of Telpara Hills accept no liability for any accidents that may occur at the Telpara Hills sale venue. Although such occurrences are rare, any persons attending the Telpara Hills Sale do so at their own risk.

# BRANGUS VS ULTRABLACKS:

Simply put, an UltraBlack is the result of Registered Brangus crossed with Registered Angus, creating an animal with excellent eating quality but with a touch of Brahman survivability and hybrid vigor. An UltraBlack is ideal for those wanting to try pure Angus, but still need some resistance to the challenges of a hotter climate.

Over the years we have found that the “sweet spot” in Brahman percentage in our Brangus cattle is 37.5% (that’s 3/8 Brahman: 5/8 Angus). This produces an animal that is extremely versatile. This ‘Telpara Type’ of Brangus has been proven to work well in even the toughest conditions, often over all Brahman cow herds, yet has enough Angus content to have a major impact on the resulting calves.

They have been bred at this percentage for generations, making them stable and predictable.

UltraBlacks’ Brahman percentage can range from 8%-25%, depending on generations since the first cross, sometimes referred to as UB1, UB2, etc. UltraBlacks can be registered with the Australian Brangus Cattle Association from 8-25% and UltraBlacks over 25% can usually qualify for full Brangus registration status.

## DNA RESULTS:

All Brangus and UltraBlack lots in this sale have DNA profiles on file with the Australian Brangus Cattle Association (some are pending). With both our Telpara Type Brangus and new UltraBlacks, these bloodlines have 2 copies of the polled gene as well as black coats. However, with the introduction of higher Brahman content options, some of those animals have a small scur and can breed with less consistency than our classic Telpara bloodlines. Angus animals are registered and DNA profiled with Angus Australia.

### PREDOMINATELY POLLED:

Telpara Hills animals are predominately polled, with zero horned animals, which is a huge achievement and advantage to those who use Telpara Hills bulls. PcPc = Homozygous Poll | Hpc = Heterozygous Poll | No result of homozygous horn in this sale

### DOUBLE BLACK:

The vast majority of Telpara Hills type lots have 2 copies of the Black Coat gene, as well as our UltraBlack options. With the high Brahman content animals, they are all still dominant black, but may have less consistency depending on the females they are mated to. Still, they are excellent options for those who are in especially harsh environments.

ED/ED = Homozygous Dominant Black

ED/E+ = Dominant Coat ED/E+

ED/e = Dominant Black/recessive red

No result of homozygous wildtypes in this sale

## MAXIMISE YOUR BULL'S POTENTIAL:

The after-sale care of your new bull is one of the most critical in his life. He must transition into a new environment and a new herd, and the care and consideration you give him can make all the difference.

A few tips:

- The truck ride can be stressful. When he unloads, place him with a few females or steers as companions, not rival bulls. This will help him settle into his new home.
- Cattle learn best from one another. If you are working them with horses or dogs, keeping your new bull with a small herd is a simple and effective way to incorporate them into the normal workings of your farm.
- Keep bulls on a rising or steady plane of nutrition. Also ensure your females are on a rising plane of nutrition to give them the best chance of cycling.
- Ensure you continue his recommended regime of vaccinations.

An absolute prime set of performance figures, with top 1-5% of the breed ratings for weight gain and steer indexes. Scored highly in the paddock, this powerful, wide-topped, strong-boned bull is a top Milwillah Reality Q170 son. His siblings topped last year's sale averages. The dam is by the powerhouse TH Kenworth's son, TH Cornerstone, who did so well for long-time clients Wetherby Station at Mt Molloy in FNQ and topped the 2020 Sale. TH 541V56 is certainly a prime cut of our 2026 bulls. *Semen collected.*

ULTRA  
BLACK

"It's not just one reason why we love our Telpara Hills calves:

- Weight for Age - Our Brangus calves avg 50kg heavier than straight Brahms
- Fertility - Average of 400 extra calves each year since using Brangus (Previously 2000 calves/year)
- Premiums Paid - Black calves getting 30 cents/kilo over Red calves, and \$1/kg over Brahms
- Plus a Polled head makes it much easier at weaning time and they are so quiet and easy to handle"

-Jon Griffiths, Allandale Pastoral

A standout bull with his extreme length, width of body, slick hide, deep-filled hindquarter and super-clean underline; a classic TH herd sire. The Suh'n's Ultimate bull is fast proving one of the hottest AI sires we are using, with some extra-special progeny in his early calf drops.

You can't get much more consistent than top 10% of the Brangus breed for five profit-making EBV comparisons. TH Texas Style is truly our style of exceptional Brangus cattle.

at our inaugural sale. Co-owned with Lunar Brangus

A Full sister to Lot 3: Telpara Hills Miss Ultimate 541V70 was awarded Supreme Female at the Atherton Show, judged by Steph Laycock. She is a stunningly beautiful heifer. She was also awarded first prize Tropical Female 21 months and under 24 months at the Malanda Show.

Telpara Hills was also awarded Supreme Male of the Atherton Show, with a junior bull, Telpara Hills Prime Minister 15W7.

A sincere thank you to both the Atherton and Malanda Show Societies for supporting our local industry.

ULTRA  
BLACK

The first of a very special line-up of MM Santiago sons; consistently super heavy-made, with great weight for age, length of carcass and strong sire appeal. This bull is eye-catching in the mob, his phenotype closely resembling his illustrious maternal grand sire, TH Ace of Spades. TH Barrel Smoker's dam, TH 541R7, is still a standout at six years of age for visitors on inspection, with her excellent Brangus phenotype. An outstanding data profile with top 5-10% for growth, with both his steer indexes in the top 10% of the entire breed's EBVs. A no-holes, stylish bull to chase hard. As an added bonus, he's also has a gentle disposition.

John Cole Motor Group has gone from strength to strength here on the Tablelands and Innisfail. Shop around, their prices are always extremely competitive. Our family all drives vehicles from John Cole.

A hard to fault bull maybe pick of the sale, with his presence, strong head, sleek coat, excellent topline and feet. An incredible genetic blend featuring TH Mach 5 over an older donor cow, 468L7. Our original USA donor, JAK 468P6, came from Camp Cooley Ranch's manager, the late Ken Hughes, a legendary breeder of the Brinks herd. This line just keeps on producing the top ones. Seven indexes in the top 5-10% of the breed. A red-hot, top-of-the-drop sire to take your herd to the top. *Semen Collected.*

A very appealing sire - stylish in outlook, strong-boned, very clean-sheathed, with excellent skin and hindquarter. Newer sire CB Masterpiece is putting style and growth into his calves. The dam has bred show champions for us in 2026, including a junior bull that was awarded the Supreme Champion Bull at the highly-competitive Malanda Show and Atherton Show. A mind-blowing data set, absolute top of the breed figures. At only 22 months of age, we have identified him as a Rising Star

Maternal Brother: TH Prime Minister 15W7  
At only 12 months of age,  
Supreme Bull of both Malanda and  
Atherton Shows

Hard to walk past this eye-catching BWCC Blackwater son, with his weight for age, volume, strength of bone and correct underline. Being out of a classy daughter of the legendary MM Paratrooper adds further appeal to TH Firestone; a true rising star in the sale. A red-hot data set- Top 1% of the breed for growth, top 5% for carcass, top value for export steer, and just one point below the top value of the breed for domestic steer. Blackwater is a new sire to the Telpara herd, but has already produced a paternal sister to Firestone that was awarded Junior Champion Tropical Female of both the Malanda and Atherton shows. What could TH Firestone do to your herd? Rising Star at just 21 Months of Age

Here's a son of the famous MM Rocket Man - a record-setting Australian Angus sire who has had a profound impact on herds. It's hard to believe how much power and muscle he imparts to his progeny.

The maternal line is equally as strong, with the 10-year-old Salacoa Valley Eisenhower-sired dam 468N6 on the bottom line of his pedigree. Ticks all the boxes for phenotype, plus huge IMF and growth data. Cutting-edge genetics that really perform. Chase him.

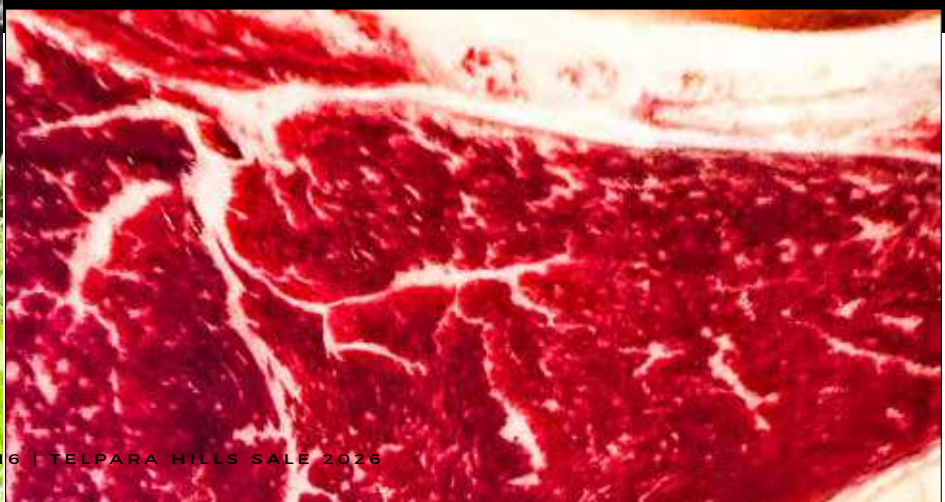

*Rising Star at just 21 months of age*

ULTRA BLACK

"Bulls with the breeding to add Muscle and IMF. Telpara-sired cattle have always been a standout within my business and premiums paid on."

A younger, silky-hided, attractive UltraBlack. Prime Rib is clean-profiled, well balanced, with real paddock presence. An impeccable pedigree, with breed-leading classic genetics on both lines. No wonder these UB cattle perform for our clients. His sire, Benchmark is one of our favourite Angus sires we have used, but he is no longer available in Australia.

Study his amazing set of high EBV recordings, ranking at the top 5% or better across the board.

Prime Rib is a special sire. Used naturally over heifers at Telpara Hills.

A pedigree in which both his sire and dam have set new benchmarks for the breed in Australia. He shows super docility, an excellent outlook, tidy sheath, well-muscled topline and much appeal.

This genetic combination is a real winner. Elevate is a full brother to two heifers we chose for our show team last year, who currently have newborn calves that are very special. Look for them in our donor lineup in years to come.

Paddock Photo of Full Sister:  
2 Full Sisters were selected for our show team and donor pen. Exceptional shape, temperament, and milk.

An impressive, well-boned, classic Brangus type bull with a strong spring of rib and a masculine, sirey head. His sire, BP Resource, adds higher Brahman character for clients in tougher environments. The "302" cow family was one of the famous Camp Cooley Ranch (Texas) most elite bloodlines when we started our USA importations two decades ago.

Grand Dam: Oaks Ms Patton 302X3  
Also the Dam of the internationally famous Three D 302A sire

More Brahman type is showing in this bull. BBQ Baron is stacked with plenty of power; bigger-framed, heavy-boned, deep-barrelled and strong in the head. His mother is by the Hudgins Brahman ranch sire New Blood, whom we introduced to Australia. New Blood 50H was a first-generation bull of immense stature.

Maternal Sire: Mr New Blood 50H  
 Brangus bull from the famous Brahman Hudgins herd, known for the Manso bloodline

Mach 5 took the Brangus breed by storm in our '22 sale, when he equalled the then-world-record price of \$150K, and has since gone where no other Australian Brangus bull has - to within one point of the World Champion Brangus Bull. Now he is also proving an exceptional sire. TH Char Master looks great in the mob with his father's style, gun-barrel-straight topline and super-clean reproductive area.

Maternal Brother: TH True Crit 468R15  
 Sold to Penna and sons for \$24,000 in 2022

Stands well in the paddock with his heavy stature, sires' head, presence, and excellent skin and sheath. The Mach 5 progeny stand out in their mobs. Because he is breeding so well, we will continue to use him heavily in the Telpara herd.

The "468" cow family has been one of the linchpins of our TH breeding programme - they are very strong in this 2026 sale.

Full Brother: Th Horizon 468U44,  
Selected by Reinke Pastoral, Lowmead (Gladstone/Bundaberg)

Ocean-deep pedigree here, again with TH Mach 5 joined to a TH 541L70 Foundation daughter. We have a group of six near-identical females of this pedigree who succeed to a range of bulls. Often a visitor's pick, TH Iron Grill is very heavy-bodied, strong in the hindquarter and tidy-underlined. A great set of growth EBVs- top 1-5% of the breed. A bull like this should be outstanding value for money.

Maternal Brother: TH Twilight 541U29, selected for \$34,000 for duties at Welcome Downs

Pit Boss is a bigger-framed Angus bull, super deep-ribbed with wide loins. He's ranked in the top 6% in the Australian Angus breed for 600 Day Weight growth!  
The Angus breed has moved hugely over the past 60 years, and he is a fine example of a moderate-framed, deeper-volumed, well-muscled, free-moving animal.  
This bull is a great example of one that should fit our northern environment.

An impressive, easy-fleshing bull by a leading USA AI sire, noted for the performance and lower birth weight of his calves. This son of Sitz Stellar is clean-coated, well-fleshed and traverses the paddock well. The dam here, MM Flower, is derived from one of Millah Murrah's most prestigious cow families.

He should be a Professional at bringing adapted Angus into North Queensland.

A bull we showed successfully at Malanda Show 2026 to indicate the style of Angus we believe could perform for our Northern clients.

Plenty of overall scale, bone, docile and correct in his structure. He has a beautiful slick coat, ideal for Northern herds.

Super-sire Benchmark is making a strong impact on Australia and USA Angus herds, and we were fortunate to use him in the Telpara UltraBlack programme. We are not selling any more daughters and have collected several of his sons, such as this bull. We believe in this genetic package.

Supreme is out of our "I46" cow line - once the top-EBV-rated family thanks to the power of the iconic Greendale matriarch U146. This impressive bull has outstanding figures, rising to the top 5% of the breed for 600-day weight gain. He is certainly well named.

Reflects his pedigree closely Firebrand is stacked for muscle expression, width of body and topline strength. The TH First Class bull is long proven at surviving the challenges of our high country on the Atherton Tablelands. TH 541V34's dam, by the Three D sire, is one of his typical easy-doing, moderate, no-fuss matrons in the cow herd. Very sound growth data, super-strong for marbling. Extra-gentle temperament as an added bonus. This is a good one!

Maternal Brother: TH Han Solo 541U136, purchased for \$15,000 for use at Lornevale Stn, Georgetown

Wants to be centre stage with his extreme docility. Seriously heavy-made, he oozes quality and is very correct in his underline. Banquet Quarter Pounder was a record \$60K sale-topper, and he routinely produces thick-topped progeny with strong heads and mid-section capacity. Great maternal strength here, and his EBVs reflect the absolute consistency of our herd's performance. His maternal brother, UltraSonic, was awarded Senior Champion Tropical bull at Malanda in 2025 and we retained him as a herd sire. *Used naturally in herd.*

Sire: Banquet Quarter Pounder Q252  
 \$60,000 sale topper in 2021

The Three D bull has been long proven at producing cattle that are super deep-bodied, chock-full of muscle and just nuggets in phenotype. Csonka of Brinks left us some outstanding daughters and they add incredible power to our breeding options. Again, great growth figures, top 5-10% of the breed. TH genetics are an investment for the future profitability of your operation.

Sire: TJM Three D 302A  
One of the most-popular Brangus bulls worldwide.

Like some wines, TH First Class seems to keep on succeeding with age. Longevity exists in this bull's maternal pedigree too; his dam is holding her place in the herd at 10 years of age. That is not easy, with so many credentialled young cows challenging for a place in our stud herd.

Sire: Telpara Hills First Class 801Q10, a consistent sire who has bred lots of shape in his progeny

Excellent! Dry Aged is ranks in the top 1% for multiple weight gain breed ratings. This UB bull is by the easy-calving Allendale Angus sire, while his dam is by our illustrious home-bred TH Ace of Spades, whose progeny sales alone are over the \$750K mark.

He should suit both cow and heifer breeding options.

Sire: Allendale Monarch R217  
High Selling Angus sire at the Allendale stud, Bordertown, SA

A La Carte's dam is a leading Mound Creek Real Deal donor. TH Miss Real Deal 392K19 has been a success story and still is at 12 years of age. Here she presents a Briggs Gulf Coast bull progeny that is moderate, lighter-boned and smooth-fronted for first calvers.

Moderation does not necessarily imply less growth and carcass. He has both in spades.

The UB sons of new sire MM Santiago are so impressive. Santiago himself sold for a whopping \$200,000 in 2023.

This one has that same extreme length, great capacity, smooth shoulders and slick skin. The donor dam is still one of the most outstanding females for phenotype - a \$45K half-share purchase by Hidden Valley Beef, NSW.

We were quick to acquire Santiago semen and as the Millah Murrah herd is selling Angus sons, we are offering UltraBlack sons. These are cutting edge genetics.

A true smoke stack of a bull! A huge, powerful, strong-headed, massive individual, with plenty of bone. His pedigree is stacked for performance and he delivers accordingly. Although a the younger bull in his group, he is the heaviest.

We have been impressed with the Ultimates so far. A very closely related sibling (same sire, dams are full sisters) just won Supreme Female in Atherton, and she's one of the best females we have seen anywhere, which is a big call. Take a look at her photo above to see what this mating can do.

BRANGUS

Remember this pedigree and see his closely related sister 541V70 on the next page.

ULTRA BLACK

Moderate in dimensions, lighter-boned, with excellent skin cover and a very clean-cut profile. The "801" cow family in Australia started with our purchase of the Grand Champion Heifer JOJ's Ms Onstar 801Y at the Houston Livestock Show the night before she was crowned champion. Strong figures and high IMF data. By Millah Murrah Trigger T308, who sold for \$180,000 in 2023. His daughters are just coming through our herd and are consistently good. This bull is a great option for heifers.

Paternal Sister: TH Trigger 924W6  
 One of our lovely young Trigger daughters who won Reserve Calf Champion Female in Malanda and Calf Champion in Atherton at just 9 mths of age.

A bull who catches your attention with his frame size, coupled with his deep flanks, heavy bone and weight for age. An interesting joining that has been proven in the Telpara herd. We put the evergreen, breed-leading TH Real McCoy back across a daughter of the classic matriarch TH 541L70 who herself produced so many sale-toppers by TH Real McCoy 920J19. This is a truly royal pedigree. This bull will breed on.

Only a handful of calves by Shea-Oak Rise Power Angus bull from South Australia, and this one is a good one. Years ago we used the Salacoa Valley Eisenhower bull from Lake Majestik, Alabama, and he has left us a special set of brood matrons. TH Steakhouse is attractive in outlook, shows great rib capacity and a slick appearance, and is a true beef sire. Through Doug Cross Custom Meats, many steakhouses reap the benefits of TH-sired meat - the eating quality is reportedly special.

In the 2024 sale the sire of this lot, TH Enterprise, was sold to discerning cattlemen the Turnbull Bros. He was one of the first TH Mach 5 sons to be sold. This grandson, from the well-proven Mound Creek "889" cow line, is stacked for growth genes. He has plenty of size, width and depth of body, with that slick hide we chase.

Sire: Telpara Hills Enterprise 15T3  
A great sire selected by the Turnbull Bros. for \$20,000

BRANGUS

"We purchased a Telpara Hills UltraBlack bull at their annual sale. In the first week he was getting cows in calf, and in his first year he's bred 40-50 calves over our Red Brahman herd. The calves are weighing consistently higher at weaning and we are returning a higher price per kilo on our Angus and UltraBlack cross calves. Our profit drivers are fertility and weaning weights, and we are very happy with how the bull is performing."

-Cameron Whiting, Tablelands Grazier

One of the first UltraBlack x Red Brahman calves born at Fred, Dell & Cam Whiting's farm outside Malanda.

A full brother to the lot above. Scotch Fillet is a bull full of red meat, great depth of body, a strong sire's head, deep hindquarter and corner underline.

Bulls like this drive profit for their owners as their calves will stand heavy on the scales. All growth and steer indexes in the top 5-10% of the breed. Most people love scotch fillet, and you'll love our Santiagos too.

"We are amazed at the difference in the meat quality from our Telpara steers. They are on the same grass diet as everything else, but the marbling is drastically improved and the eating quality is outstanding."

-Trevor Woodman, Tablelands Farm to Fork

Top steak is a typical quality grass fed steak, Bottom steak is from a Telpara Hills sired steer, showing drastically more marbling. They were fed the same diet with no grain, just grass and molasses.

MC X FACTOR 889X34  
D: TELPARA HILLS MISS X-FACTOR 541K79  
OAKS MS NEXT STEP 541X33

Long-time leading USA Brangus sire TJM Three D set a benchmark as the sire of stud sires in the USA for over a decade. This bull's dam, at 12 years of age, is out of a daughter of the USA-record-setting US\$70K cow, The Oaks Ms Csonka 541T7, in whom we purchased a share at the Houston Livestock Show. This bull is just so deep, heavy-made, lower-set and deep-hind quartered- another real nugget. A well-proven and seasoned pedigree that shows in his 5-15% ratings.

Maternal Brother: TH Peacemaker 541S29 selected by the Condon Family

When we cross the impressive phenotype of the "801" with the consistent performance of the "541" cow line, we get a thick-set bull ready to produce the flat-backed calves buyers chase and pay premiums for.

We have talked about this maternal pedigree a lot in this catalogue because it simply is outstanding. Great cows breed bulls that breed on.

 OAKS MS CSONKA 541T7

Very few sons come through now by the legendary Three D bull, who has a trademark style of producing extreme thickness, body depth and overall sogginess. Would add depth to a herd of larger framed cows.

Grand sire of lots 47 & 48:  
 Suhn's Foundation 331Z28

Sired by the senior sire TH First Class, who is still in our bull battery at eight years of age. The "11" cow family is noted for producing larger-framed progeny. This is a powerhouse - wide-barrelled, deep-hind quartered, with a very high marble score. There's a huge amount of smoke in this sale, but definitely no mirrors!

Top 1% Fats and IMF.

Matriarch of the "11" cow family, GACC Ms BT 11R5, she left a legacy of muscle, bone, and very good maternal abilities

A young UB by CP Moe M6," the sire of the world-record-priced UB bull, TH New Limit and out of a first-calving TH First Class daughter. He presents with super docility, a wide topline, deep barrel, and is a quality bull. An excellent data set, in the top 10% of the breed for growth, plus top 5% for IMF. Could prove as much a success as his famous cooking namesake.

Sire: Chiltern Park Moe M6  
Has consistently bred thickness in his calves. Sire of \$100,000 Record UltraBlack bull

Early progeny by MC Closing Time, introduced from the USA are certainly earning a second appraisal in their groups - with their strong heads, thickness and adequate bone. His dam is a quiet achiever, producing a great calf every year, including 3 bulls that averaged over \$10,000. Hard to achieve a much better set of EBVs on a sire new to the Australian EBV ratings. TH Slow Roast is rated 5-10% for growth, 5% for IMF, plus top 5% for steer data.

Sire: MC Closing Time 541G24, full brother to US \$160k Five Star, US\$110k Boomtown, and US\$60k Big Hoss

A moderate-sized, clean-cut-profiled, correctly made young Brangus bull. Amazingly high - top 1% of the breed for weight-for-age measures, and top 20% for eye muscle area. This 15 cow family is one that has been steadily building in the Telpara herd, gaining a reputation for strong made, attractive cattle. Two young brothers made a big splash at our local show, with TH Prime Minister 15W7 being awarded Supreme Male at both the Malanda and Atherton Shows.

Maternal Brother: TH Prime Minister 15W7. At just 12 months of age, he was awarded Supreme Champion Male at both the Malanda and Atherton shows

High IMF, with very strong growth and steer figures, in this UB by the high-demand Milwillah Reality Q170 bull. Several high-profile Angus herds are re-introducing Reality bloodlines into their herds, and its easy to see why. TH Smoked Oak is again long, heavy, deep-flanked and perfect to make those flat-backed, black, polled, heavy calves that earn a premium for our clients.

Maturi Reality 839, appears twice in the sire's pedigree. Famous NZ Angus bull.

Clearly a top-pedigreed UltraBlack, rich in extreme muscle expression through both Rocket Man and Beacon genetics. As expected, TH Wood Fired is deep, thick and silky-hided, with an excellent strong head and clean pizzle - a class lot. He also has the ability - common in this sale, but often considered antagonistic - to marry top growth and IMF in the same animal. He gained the **top value** for the breed for domestic steer index - what an achievement. Get yourself fired up on these genetics; they are special.

Maternal Sire: Suhn's Majestik Beacon 30C. His females are extremely productive and raise great calves.

Legendary Australian sire TH Real McCoy was a half-share \$50K purchase by the Dobe family, and has become one of Australia's most influential AI sires - progeny sales for TH alone have exceeded \$720,000.

The maternal line here is by the USA sire Vorel's Online, a calving-ease specialist bull. His dam is part of a set of full sisters that were phenotypic standouts from the beginning.

This bull is long, taller and very correct reproductively. Well named - he is a quality lot.

Dam: TH Miss Online 15S2. Sold for \$30,000 to D Devine, Bundaberg

Great to see the exciting home-bred stud UB sire produce a son like this, with three top-1% and six top-5% of the breed ratings. TH Avalanche is also producing calves with strong muzzles, thick toplines and definite style.

TH Topside is moderate in size, very slick and clean-sheathed, and looks to suit heifer matings. This is a bull to find on sale day.

TH Smokin 541V112 is a Mach 5 grandson, and he shows a special presence, correct design, mobility and a clean undercarriage typical of a good bull. To add to his striking phenotype, he has amassed a 'smokin' set of figures – top 5-10% of the breed for weight gain, top 20% for EMA, top 10% for IMF, and top 10-15% for steer indexes. He sure is 'smokin' his contemporaries.

An intriguing combination of the world record \$100,000 TH New Limit bull from the 2023 sale over a higher-content, AU-sired River Run 20 daughter, TH 15S9.

Perry has a great topline, moderate frame size and an excellent skin type. His EBV profile is consistently high.

A different pedigree in this Angus bull, who is super-long, slick-coated, easy-doing and well-fleshed. Banquet Quarter Pounder has been a widely used Angus AI sire, while the maternal line here comes from Maryvale stud in SA.

The donor is a super female of great length, depth of rear body, a clean coat, and excellent foot and udder structure.

A bull we consider ready to take on the North.

We have not used a sire so prepotent and consistently capable of producing top-class progeny as the TH Mach 5 bull. This bull, TH 889 V7, rates six times absolutely top 1% of the breed, plus twice top 5% – a rare data set. The '889' cow family from Mound Creek, Texas, was one of their very best when we started, and of course contributes seriously to the genetic horsepower of this impressive package.

A young star in the making with real sire potential!

A change in cow families here, with the MM Trigger Angus bull over a high-content TH Silver Bullet daughter of a PBF Brahman female, the matriarch of the new 591 cow family.

The maternal line here was introduced to meet some of our northern enquiry, and the dam draws interest from visitors. Very powerful EBV scores – high marbling and top 20% EMA.

His progeny could well make you their main course.

Grand Dam: PBF Levy Manso 591/18 as a heifer.

MM Paratrooper, a legendary Angus sire, has been a real success story in our UB programme; mated here with a TH Real McCoy dam, we get a special young Ultra Black. We admire the Paratroopers for their strong heads, extreme length and correctness – they are sheer class from the start. Again, pedigree predicts performance – he actually did score so well, with top of the breed 1-5% for weight, top 25% for EMA, then top 5% for IMF, and climbing further to top 1% for both steer ratings. Semen Collected

D: TELPARA HILLS MS REAL MCCOY 541T98  
TELPARA HILLS MISS FOUNDATION 541P16

Get a Milwillah Reality Q170 while you can – they topped the '25 sale averages, they stand out in their groups, and their supply is limited. TH Emberstone has a gun-barrel topline, a smooth front, a wide back to roll a swag out on, well-filled hams, and is so quiet. Backed by a huge top 1% of the breed for all three growth traits and top 5% for steer indexes, this is a very good lot, deep in the catalogue.

Remember, he will only be 21 months on sale day; its a good chance to buy a great bull for good value.

Well named, TH Reliability 920V26 – because his donor dam is the true epitome of reliability; each draft, her progeny stand high in the ratings. His maternal sister is an absolutely stunning female, winning Supreme exhibit at Malanda, judged by Rob Sinnamon.

Sire: CB Masterpiece 2051F from the famous Cavender Ranches in Texas, USA

Using the moderate CB Masterpiece USA bull, we produced a taller, straight-topped, slick-coated bull with an excellent sheath. Should reliably produce great drops – an extraordinary high set of EBV measurements.

This is a really docile, deep, long, clean-cut individual. A powerful data analysis – yielding top 5% of the breed for seven traits. Should have the easy-calving gene inherited from his low-birth-weight sire, CB New Standard.

Sire: CB New Standard 817J3, New sire to Australia

Gourmet is one of only 3 New Standard calves currently registered in Australia. His video is worth finding online and this young bull looks a lot like him.

Not all USA bulls are worthy of importing, but New Standard has genetics that caught our attention.

Double Poll

Black/Wildtype

It is a challenge each year, analysing the differences in these consistent TH Brangus and Ultra Black young bulls. This one is an embryo sibling to Lot 80, TH Oak Barrel, and is almost a carbon copy – the same phenotype: wide-bodied, lower-set, tidy underneath, and again of stable temperament. Figures to set your calves alight – top 5-10% of the breed for growth, and 5% for IMF and 5% for steer data. Must put that ‘flat-back’ style into Bos Indicus-type females.

ULTRA BLACK

The balance and consistency of the data we chase is just so obvious in this bull's top 5-15% top-of-the-breed figures. No wonder these UB bulls are in demand from our bull buyers. This TH 468V44 bull comes from a well-proven older MM Angus sire, Quixote, over an outcross AU-sired River Run 20 female.

Such a wide genetic combination should give plenty of genetic vigour to turn your calves over quickly. *Tiny SCURS*

Sire: MM Quixote Q96, from the famous Millah Murrah Angus herd. Photo by BJS

ULTRA BLACK

TH New York Strip 541V106 is out of a first-calving female by TH First Class. He is the only UB in the sale by the Texas Iceman sire, from Texas Angus stud in NSW. Iceman made headlines when he sold for \$225,000!

On inspection New York Strip is stable in temperament, long and strongly boned. The auroch ancestors of our present-day cattle were, some 2,000 years ago, described by Julius Caesar as being nearly as large as elephants and more ferocious than tigers. This helps explain our emphasis upon selecting for docility!

 MILWILLAH BARUNAH N104  
 TELPARA HILLS REAL MCCOY 920J19  
**D: TELPARA HILLS MS R/MCCOY 541T90**  
 TELPARA HILLS MISS FOUNDATION 541P16

A typical M. Reality Q170 son, with that extra depth of body, heavy bone, medium frame and correct sheath. These bulls make sense for producers, feedlotters and processors along the meat chain. Again a repeat of the huge top 1-5% for weight gain, top 5% for marbling, and top 5% steer indexes.

This catalogue is so consistent for high performance and appealing phenotype and Grill Fire incorporates the best of Telpara Hills genetics. At only 20 months at sale time, this bull has a lot of potential.

ULTRA BLACK

Great Grand Dam: TH Miss Final Cut 541L70, heavily represented in the TH herd. Anytime you see her name in a pedigree, it means quality.

# LOT 74 TELPARA HILLS CURTIS 146V5

NEVER SURRENDER OF SALACOA 803D9  
**S: BRIGGS GULF COAST 23F5**  
 MS SALACOA NEW ERA 23Z51  
 HOLLYWOOD OF SALACOA 23A53  
**D: TELPARA HILLS MISS HOLLYWOOD 146N7**  
 TELPARA HILLS MISS BRAXTON 146G6

A blend of our early AU, EBV-breed-leading '146' cow family from the Greendale dispersal sale, with the USA outcross Briggs Gulf Coast sire. Gulf Coast is a paternal brother to the sold out Empower bull.

TH Curtis is deep in his barrel, well-hammed in the hindquarter, clean-cut and finer-headed, with a super-smooth hide. His progeny's steaks should suit a celebrity chef.

Sire: Briggs Gulf Coast 23F5  
 Brangus sire from Briggs Ranches in Texas, also known for their Santa Gertrudis.

 TELPARA HILLS MISS SINGLETARY 541E

TH Kosciuszko is a brother we kept to the more famous TH Mach Five. This son was raised on his dam at 11 years of age, so he has high durability on both sides of his lineage. Top 10% of the breed is very special for growth in this case. He presents in his mob as taller, powerful, heavy-boned and well-muscled. Don't be hesitant adding TH Maple Smoke to your mix.

Maternal Brother: TH Cowboy Up 145R2,  
 Purchased for \$13,000 by Broadie Agencies, Winton

Aply named – the Mandayan Angus Balance S452 bull does produce well-balanced, moderate sons with adequate muscling.

This deep-bodied bull is also super-relaxed in the paddock. Amassed a staggering and balanced top 10% of the breed for five traits, then top 5-20% for carcase traits.

An appealing, moderate-framed, flat-backed, strong-hindquartered, docile bull with high rankings for both marbling and Eye Muscle Area– he should certainly be a chef's choice based upon that!

TH Trump Card in his pedigree stemmed from TH Miss Csonka 541D9, as did the former AU record-price-setter, the \$110K TH Van Damme.

This cow was also the first female to have embryos exported to the USA in 23 years. You don't need to be a chef to choose this bull.

Draws plenty of positive comment in his group. He appeals with his strong outlook, taller stance, heavy bone and super topline – quite an exclusive young bull. A very sound growth profile, coupled with super-high measures for the carcase trait of IMF. His sire recorded a 7.1% marble score on a scale where 8.2% is the top figure– direct off tropical grasses. TH Exclusive has plenty of maternal strength, embracing both the sires TH Silver Bullet and Csonka of Brinks 30 R4.

Newer AI sire from the USA, Suhns Spectrum, has some interesting early progeny, and this one – from a TH Masonry daughter – represents a true Telpara-type herd sire.

The TH cow herd is just so fixed for this phenotype that it keeps being reproduced across a range of sires. Excellent, same-top-of-the-breed EBV scores.

TH Oak Barrel sure inherited the 'usual wide barrel' of TH sires.

We have proven how highly prepotent TH Mach 5 can be, so we can confidently use him over a wide range of females. Here the dam is the 12-year-old matron North Star 920K6, whose origin was the Center Ranch 920 M1 cow – the start of the '920' cow line in AU. Selected by Stephen and Brittany, she proved an extra-special purchase (check out TH Mach 5 and TH Real McCoy's dam's family as two examples). TH Medium Rare is stacked with '920' genetics.

Maternal Sire: CRC North Star 9U8W3

A sound blend of consistent EBV ratings, with again a very elite marble score standing out. Resource R142 from Bauhinia Park in Central Qld is a higher-content walking sire, joined here to a thick-bodied, deep-set Suhn's Foundation cow in the 820 cow family. This family originated from the Center Ranch herd-dispersal sale when we started our USA donor herd in Texas over two decades ago.

The impressive, stylish and well-proven MM Trigger bull is giving us some excellent UB progeny. He has 'clicked' well with TH Ace of Spades matrons in particular, with their great maternal strength and deep-flanked bodies. Searching through the 2026 sale line-up, the females from our top sires are standing out for their longevity of production. Remember, the TH cow herd is run strictly as a commercial herd – no hand-feeding at all across the year; they have to perform on low-protein tropical grasses. This bull has an exciting EBV set to ignite your interest.

A pinnacle of our genetics here – MM Santiago over the \$40K half-share female TH 541 P92, who topped our inaugural on-property sale in 2020 when sold to Lunar stud in Central Qld. She has proven a successful breeding matron for us, with numerous sale lots selected by our top clients. TH Reserve Cut rates extremely high on EBV comparisons. This bull has the three P's in abundance – performance, phenotype and pedigree – and sells at Lot 85 in the catalogue!

3/4 Brother : TH Market Share 801T9  
Selected by the Turnbull Bros for \$35K

Purchaser \_\_\_\_\_ Price \$ \_\_\_\_\_

ULTRA BLACK

Add the muscle king MM Rocket Man to a very classy '801' Brinks Legacy daughter and you get a smoking data set. The dam has produced a top stud-sire prospect for us in TH Market Share, who sold to Turnbull Bros for \$35K and is a full sister to TH First Class.

The first progeny by Market Share are really turning heads in their groups – one heifer being the calf at foot on the Supreme Exhibit 2026 show champion is quite extraordinary at this stage.

MM Santiago is one of the go-to sires in this year's line-up. His progeny stand out in the cohorts with their scale and performance, and should add value to all sectors of the supply chain.

Mesquite is a First Generation Brangus bull, blending the top animals of the parent breeds.

Carrying 50% Brahman content, TH Mesquite 591V7 achieved very strong EBVs. Mesquite is a very hardy, low-vegetation species prevalent across Texas; this bull is bred to be just as hardy across Qld.

Double Poll

Double Black

A UB young bull by one of USA's leading Angus AI sires.

The TH 392K19 cow, by MC Real Deal, is a massive cow and has been a prolific donor – her bulls and females have consistently sold well over the sales. Powerhouse performance data, climbing into the top 5-10% of the ratings – the consistency of our high-performance figures is quite incredible.

Climbed to a super top 5% of the breed for all growth, IMF and steer comparisons. He is certainly proving a powerhouse Angus sire: MM Santiago, joined here to a 10-year-old Mound Creek moderate Embassador female.

TH Rustic Feast is exceptionally deep in the hindquarter, long-bodied and easy-fleshed, with an excellent underline. Visitors comment how impressed they are that we have addressed the issue of underlines in our Brangus bulls.

Should be a good option over heifers.

The \$80K BP Resource R142 bull from Central Qld has been used to meet the enquiry from some of our northern clients.

This mating lowers the progeny's Brahman content, as the dam is by the extremely thickset, wide-hindquartered Suhns Majestik Beacon – whom we inspected on numerous occasions with Nic Cornelison, Flat Rock, Alabama. This bull and his dam were pulled out of the paddock and shown successfully shown as a cow/calf unit in Malanda last year, winning Senior Champion Tropical female, and also were a favourite at the FNQ Field Days in Mareeba.

These flat-backed, thick-made sires have a huge role to play across northern beef herds. They are very much more than just a chef's delight.

TELPARA HILLS MISS REAL DEAL 801L10

Somewhat Angus-type in the head, this is a double-cross of UB genetics. TH Filet Mignon 801V28 is just so wide and heavy-made, yet he carries a very tidy underline.

The industry is chasing black, flat backs with no hump very strongly at present, and if ever a bull can sire this type of cattle consistently it is the M. Reality Q170 bull.

An awesome EBV data set – seven times in the top 5% or better in the breed. These bulls are bred to really give you that TH difference in your calf drops.

Deep in the line-up, there's no slackening off in the consistently high quality of phenotype and performance. This is a powerful individual – long in body, heavy-boned, with a great tropical skin type. Suhn's Ultimate is one of the most exciting new sires we are currently using from the USA, and these are some of the first sons to sell in this 2026 catalogue. He is also producing some of the best heifers we have ever bred.

An outstanding lead-donor dam just keeps on producing top-of-the-drop progeny. Last year she sold a son for \$34,000 and is approaching \$300,000 in lifetime progeny sales.

This bull's photo doesn't do him justice.

Certainly distinctive, with his incredibly smooth skin – this young UB bull ticks many boxes and is so docile in the mob. The Angus sire SAV America 8018 P has performed up to his huge USA reputation. Paired here with a highly proven Brinks legacy daughter, TH Miss Legacy 468P45, whom we displayed at Beef Australia 2021, we expected visual carcass and muscle expression. This year, the really distinctive feature of the bull draft is their absolute consistency of type and performance. They are full of muscle.

New AI USA sire Suhns's Ultimate punches power into his progeny over a range of different cow families. This dam from our elite '15' cow family, adds easy calving to this bull's make-up, as she is sired by the proven leading USA low-birth-weight-EBV bull, Vorel's Online.

Top 15% for both 200 and 600-day weight gain, and a top 25% of the breed for EMA.

This is a moderate-framed, strong-boned, very clean-hided, well-shaped younger bull. A dose of Black Pepper could lift your herd.

A classic pedigree, with the outstanding MM Angus icon Paratrooper on the top line and a Three D daughter on the maternal line.

Hard to believe you could stack more meatiness into a genetic package.

TH Moran reflects his pedigree exactly – super thick-made, deep-set, well-muscled along his topline and smooth-fronted. Top-tier EBV ratings – a hallmark of this bull catalogue.

Sire: Millah Murrah Rembrandt  
Sold in 2021 for \$240,000. Photo c/o Tom Baker

Sired by the 2021 \$240K then-record-price-setter, MM Rembrandt, who is leaving long, thick-topped progeny with loads of presence. Out of a first-calving Real McCoy heifer, TH Coal Burner is one very long (like his maternal grand sire), superbly muscled package.

Look at his superb set of EBVs for growth – but higher still on steer indexes, where he sits in the top 1% of the breed. He certainly burned through his contemporaries.

This is a young bull with huge potential. Watch for him late in the Sale.

You can pick these Reality Q170 bulls by their overall depth, strong heads, wide backs and docility. Cutting-edge genetics here, with the first sale progeny of a TH Mach 5 heifer – look at his figures from a first-calver.

In 2025, M. Reality Q170 topped our sale with the largest group and the highest average. A quality young UB to fly the flag for TH.

Sire: Milwillah Reality Q170, outstanding Angus sire used at Telpara Hills

TH Sirloin is very long, medium-boned and super-slick, with a tropical coat and a correct pizzelle. His sire, BP Resource was the second-highest-priced bull at the Rockhampton sale in 2022, making \$80K. Here he is joined to an Ace of Spades female, adding her performance and muscle expression to the equation. The record-priced USA female sits deeper in the pedigree – she has been an extraordinary female, in whom we were glad to purchase a share interest. With a strong set of data, this lot is a prime one – like sirloin itself.

A cow family that is unique for TH and highly valued in the USA, where it has produced numerous stud sires including On-Star, Rock Star and Elegido. The original 924 cow came from the Mexico State University herd, renowned for its hardiness in a desert environment. This TH bull is of Central Qld style and must be ideal for steer producers.

A high-merit, balanced, bigger bull, chock-full of high growth, carcass and steer ratings. A great proven pedigree, with his sire the TH Executive bull. TH Executive was withdrawn from stud duties last year following an injury sustained in a fight. He served eight consecutive seasons until then.  
A highly valued Geddes-sired potential donor female sits on his maternal line. Great data set – the quality is not slackening after 100 lots.

What a high-performing sire, so late in the sale – a UB sire by MM Rocket Man, whom you must appreciate by now. The TH 920 V29 phenotype leans more to the taller '920' cow line, though he still inherits the great fleshing of his sire.

Claims top 5% of the breed six times – amazing. Just imagine a tomahawk steak from his steers – mouth-watering!

Maternal Sire: MC Granite 834B  
Bred at Mound Creek Ranch, Texas

A gun-straight topline, lower-set, with a very tidy underline. A pedigree that oozes thickness – and TH Savour 541W4 did not miss out. MM Rocket Man always guarantees muscle expression, while MC Granite on his dam's side is easy-fleshing and noted for calving ease in the USA. Same top-of-the-pole high figures; to achieve top 1% of the breed is a serious figure.

You can buy these younger bulls with confidence. They should be value for money this late in the sale, and should grow up amazingly.

We include moderate Brangus sires, like CB Capital Gain, over some of our powerhouse Mound Creek cows going back to the breed-changer MC Real 541R4. Early in establishing our USA donor herd – with long-time close friend and advisor Cheramie Viator, then at Camp Cooley Ranch. We acquired the exclusive AU rights on MC Real Deal, a deal that paid handsome dividends for us. TH Whiskey is of the TH phenotype that punches out heavy-weight-for-age weaners.

Both sides of this pedigree are stacked for ease of calving – the SA Angus sire on the top side, and on the dam's side the early UB USA bull MC Granite, whom we inspected in Georgia. The label of heifer-breeding potential does not necessarily mean lesser performance.

TH Strip Loin is a prime example, with his five times top 1% of the breed and three times top 5% for profit-making assessments.

Silky skin – so smooth it almost glistens in sunlight. This youngster is both lighter in bone and super-quiet, with an underline that can't get much tidier. Australian bloodlines from Central Qld here, and accordingly we see a change in phenotype and performance data.

Maternal Sire: River Run 20

Ticks all our boxes of a TH herd sire, with a special attribute in his correct sheath design. Milwillah Angus in NSW purchased TH Bollinger with long-time client and friend Charles McKinlay, from our inaugural 2020 on-property sale. TH Bollinger, used in their UB programme, attracted much enquiry before we sold him.

A younger, moderate-framed bull with a well-balanced length-to-depth ratio and a well-laid-in front end. Both the '30' and '801' cow families have produced super sires – Csonka and New Limit, to cite just two. Massive and consistent – top 5% of the breed AGAIN!

A great option for heifers.

A combination of AU and American genetics to end the 2026 bull selection. Another moderate bull to suit all breeding options. TH Revolver was a low-birth sire on his maternal side. TH Prime Feast is really docile in the paddock – repeatedly our clients report that their TH-sired calf drops are just easy to work in their yards and cradles.

We hope this has been a prime feast of bulls for your selection.

An absolute superstar, and possibly one of the best females we have offered for phenotype in a TH sale – quite some claim, as TH is noted for releasing some of the most outstanding beef females every year in this sale. For EMA, she's ranked in the top 1% and you can see that when you look at her in person. Like the other River Run progeny, she has ample muscle across her spine. TH Miss River Run 920U17 is a half-sister to the Supreme Exhibit at the 2026 Malanda Show (pictured below) under highly acclaimed judge Rob Sinnamon from Kyogle, NSW, and is equally as exceptional a Brangus female. An outstanding donor prospect – Break her in and she could take you far in the show ring at Beef 2027!

Sensational donor dam TH 920M19, by Suhns Foundation, has produced a succession of breeding-changing progeny and is rated as our No. 1 donor currently being used at TH. What an outstanding opportunity to start our TH elite female offering!

All'd to TH Next Generation 392U17, a high-performance Mill Brae Benchmark son, and would be due to calve 3/11/26. De pastured with TH Centre Piece (Lot 26) and TH Prime Rib (Lot 11), and PTIC due 28/11/26. TH reserves the right to collect two IVF flushes in the future from this lot.

A gilt-edged heifer here, chock-full of the genetics that give us these high-performing, heavily muscled cattle. Her sire TH Executive 541N70 has been one of AU's most successful sires, and was the first Telpara Hills bull in Australia to break the \$1M barrier with his progeny sales alone. The absolute consistency shown by the Telpara Hills cattle is partly due to a legacy of this bull.

Her dam, TH Miss Beacon 541Q29, is of great maternal strength; she stands out in the paddock for the extreme volume and depth of body inherited from the Suhn's Majestik Beacon.

An outstanding set of top 5-10% of the breed for growth indexes. AI-ed to the legendary Millah Murrah Paratrooper sire, PTIC due 3/12/26. Take this Executive daughter home to your front paddock.

PTIC due 3/11/26 MM Paratrooper P15

Full Brother to Dam: TH World Traveller 541Q25, sold to Marcella Angus and Brangus for \$22,000

A unique-pedigreed heifer, being by the Shea-Oak Rise bull. He produced an incredible set of EBV ratings over a strong maternal-performance Mound Creek High Quality female. Five times top-rated 1% of the breed, four times top 5% of the breed, and outstandingly strong in the area of carcass traits.

Stud breeders wishing to position their product in the market place to gain premiums have to embrace growth and carcass traits – it is just plain common sense. Here's a very special package to do that. PTIC due 3/11/26 TH Flight Deck 919Q4

A class Ultra-Black heifer by the deep-made Suhns Epic 331 D16. The '331' cow family has been hugely influential in the Suhns herd, and Suhns Foundation from the '331's' is having a great maternal impact for TH at present. This heifer claims Foundation as her maternal great-grand-sire. The mix-and-matching we do with these top cow families – the '920', the '541', 468 and 801 – stands out with consistency in these lead heifer lots. A sound set of performance data in the top 15-30% of the breed EBVs. PTIC to Draggin M Ranch Kingdom, the latest calving-ease bull we have exclusively imported recently. PTIC due 3/11/26 DMR Kingdom 535G45

This heifer may be one of the last of the iconic sire Csonka of Brinks, as semen supplies are near exhausted in AU. Csonka became a legend in the USA – a high-priced bull as a yearling at Camp Cooley Ranch who became a leading sire. This heifer is a rare chance in AU. The maternal strengths of the '801' line are outlined across other lots. This heifer has strong, super-consistent EBV scores, in the top 10-15% of the breed for five traits. A world-class, record-price-setting UB sire here in TH New Limit 801S7, who took the Ultra Black scene by storm when sold in our 2023 sale. He was an outstanding young bull, no holes in his phenotype, top for performance with a marble score of 6.8% before his sale preparation. Here in this daughter, the maternal sire is TH Remington, a top-priced Roma sale bull selected by astute cattleman Charles McKinlay for Milwillah stud, the purchasers of TH Mach 5.  
 TH 801 U17 is a double-cross within the 801 cow line itself, so there is plenty of close DNA under her skin. Great growth-performance measurement, top 1-5% of the breed. PTIC due 30/1/27 TH Centrepiece 541V19 (Lot 26)

## AUSTRALIA'S LARGEST AND MOST EXPERIENCED CATTLE IVF PROVIDER

Your trusted partner from planning to pregnancy, providing:

This is the first time TH has ever offered a halter-broken show Brangus female. TH Ms Spectrum 541W32 only placed after other TH females at Malanda 2026 in a very strong class of nine, judged by the highly respected Rob Sinnamon of Santa Gertrudis fame; only Telpara Hills' own Junior and Reserve Champions placed above her. Recently this show has attracted over 150 entries from highly successful show competitors who exhibit at both Ekka and Beef Week. The dam of this heifer has already produced an outstanding show-champion-winning daughter, campaigned across SE Qld. Bred in the purple, this heifer has been running with TH Pure Gold, who is by Banquet Quarter Pounder from a daughter of the iconic matron at Telpara Hills, TH 541L70.

Her expected calving date could allow her to fit well into Ekka show dates. Recall that John Collins ('Yarrandoo') purchased the Beef Australia 2021 Grand Champion Brangus Female, selected by the widely known Ben Noller of Palgrove; this heifer was sold at our first on-property in 2020, so maybe you could repeat John's success?

A very special donor and show prospect. Troy Nuttridge of TLC Fitting, who judged her at Beef Camp said, "She's going to be one hell of a cow."

ULTRA BLACK

When Stephen and Fiona first spotted Folkslee 463, they thought she was a sweet heifer, who showed all best characteristics of what the Brangus breed was traditionally known for. We thought she would breed well to Telpara Hills Brangus sires or to high-performance Angus, and boy were we right! Trigger is being touted by Millah Murrah as one of the best breeding bulls they have ever used, and he is working beautifully in our herd too. He transmits a phenotype of structural excellence and his semen has been in high demand. We think so much of our Triggers that we selected 3 young heifers as part of our show team this year. This is a very special heifer that would breed beautifully to a TH sire. We look forward to seeing what this new cow family can do.

Closely Related: TH Miss Ultimate 541V70, supreme female at the Atherton show. Same sire, dams are full sisters.

BRANGUS

A newer sire has made a positive impact. Progeny of Suhn's Ultimate 30 H157 are strongly headed, larger and powerful in their performance. This strong heifer is perfect along her topline, wide and deep body type. Her dam is in our TH 541L70 royalty line, a cohort that has taken our TH herd to a new level. Superb objective-measurement figures, 8 times hitting the top 5-10% of the breed targets for traits of commercial relevance. You are chasing serious maternal strength in this heifer. TH Miss Ultimate 541V70 has nearly an identical pedigree and has been identified as one of our next great females and was awarded Supreme Female of the Atherton Show. Make sure to also inspect bull lot 3 as he is closely related and her full brother lot 34.

What a catalogue of high-end MM Santiago females! This one is certainly special, and rated highly at TH. Her maternal credentials mirror those of lot 122 and are top-notch. She appeals with her extreme topline, overall volume, clear muscle expression and inquisitive nature – she knows she is good! Her top 5% ratings also confirm how good she is objectively, across the Brangus comparisons. Add her to the others you've selected for your front paddock. Her photo does not do her justice. We look forward to her video or to you viewing her in person.

Great Grand Dam: Oaks Ms Csonka 541T7  
 Set the world Brangus price record at US\$70,000

They are strong females, these Suhns Ultimates, and so are their brothers. You cannot breed quality bulls from ordinary, low-performance cows – the female is long shown by researchers to have the greatest influence on the progeny. A rare 2 times top-pinnacle 1% of the breed – she should be a herd-changing breeder, and your ultimate choice from this line-up.

Maternal Brother to Dam: TH Magnetic 468U24,  
 sold to the Jukes Family, Morven (Roma)

Want to breed cattle that are eye-catching in their mobs, with their muscle, weight for age and visual carcase? Use MM Rocket Man, as in this female, over the '468' cow line and they will stand out from their peers. The MM Rocket Man UB cattle are absolute gilt-edged performers – this one is top 1% of the breed eight times – yes, eight times.

It is the great depth of breeding in the TH herd that achieves these results. A blue-ribbon heifer, a heart-of-the-herd opportunity.

Hits you in this heifer line-up with her velvety, slick coat and astounding width and depth, so characteristic of the Three D progeny. Her dam is yet another TH 541L70 x Suhns Foundation daughter.

When you have six females retained from a flush, they do have an impact in your herd. You can bid confidently on these heifers, who are so consistently maternally strong. EBV range 10-20% of the breed.

Any of the heifers on this page could easily be a feature animal in her own right.

Paternal Dam: Oaks Ms Patton 302X3, TH purchased this female in partnership with Lake Majestik because we thought so much of her. Photo by Penny Bowie

Asked to perform in our high country – well over 1000 metres above sea level, which he shares with wild dogs, pigs, cassowaries and tree kangaroos – the sire TH First Class, has proven his structural integrity and plain durability over seven seasons.

The ultimate goal of the red meat industry is to sell a product that provides an enjoyable eating experience at the end of the chain; eating quality is closely aligned to marble scores in the carcass, so heifers like these have a serious contribution to make.

This is a bigger-framed, strong-boned animal with a very smooth shoulder setting.

A star lot – feminine, stylish, with plenty of volume, strong in bone and wide from hip to pin. Impeccable temperament: she insists on showing her quality to you up close.  
 A very sound, balanced top 15-25% of the breed data set, focused on growth and steer indexes.

Both lot 128 & 129 are some of the first Alliance sired heifers offered in Australia. CRC Alliance sold for US\$56,000 and is big hipped, wide, with plenty of substance.

A powerhouse, top-level heifer combining great length, depth of flank and a well-filled hindquarter.  
 Integrity matters to us at TH. We pride ourselves on the professionalism of our recordings – our cattle are exactly as we describe them, both in pedigree and performance. Maybe one of the factors behind our over-60 years in the stud world is also our integrity in our dealings with our clients: we listen, and strive for fair outcomes.

 BWCC BIG TOWN 192B16  
 TELPARA HILLS MISS EMBASSADOR 11L7

An attractive, moderate-framed, neat-headed heifer from the '11' cow family, noted for its performance horsepower and usually more overall scale. Her grand dam 11L7 was one of our favourites in the paddock.  
 The new sire here stems from the same '30' cow family as the legendary Csonka of Brinks 30 R4. These special heifers represent a mix and match of animals with great depth of pedigree – her dam is by TH Executive, the over-\$1M progeny-sales bull. Super-impressive data, with two top-1% of the breed scores to add enormously to her breeding value in your herd, as well as eight times she rates in the top 5% for performance.  
 This is a very nice heifer in person.

BRANGUS

TH Avalanche, from the '468' cow line, has set our 2026 EBV growth ratings alight. In this daughter, TH 920V18, reaches top-of-the-pole 1% ratings, and then four more times she gets top 5% of the breed – these are mind-blowing figures. Being fair, however, and recalling the information earlier in this catalogue – that it is proven the female contributes more to the progeny's DNA than the male – we must look at the maternal line here. The '920's are close to our strongest for performance, with but two standouts, the TH Mach 5 and TH Real McCoy sires, coming from it. To say this is a powerhouse of genetic performance is an understatement. What will she do to your herd? Buy her and you'll know.

Who better could we use as a sire to bring genetic stability and consistency of type than the iconic TH Executive, who produced this calf in one of his last working years?

This representative of our higher-Brahman-content programme is impressive; she presents as clean, polled, wide-bodied, long and strong in bone, and expresses a stable nature in the paddock.

Genetically she represents a combination of traits sought after in the Brangus breed and is a great tool for breeding higher Brahman content Brangus for tougher environments.

Maternal Sire: TH Silver Bullet 468M24.  
We have seen steaks from Silver Bullet sons and the marbling is superb.

Like his full brother TH Mach 5, TH Kosciuszko transmits breed-leading growth genes to his progeny.

This taller, fine-headed daughter, with plenty of neck extension, records hugely dominant four top-1% and four top-5% EBV scores.

Breeders need to stop and internalise the significance of these EBV achievements.

If your herd is returning negative EBV ratings, what can you do about it? This heifer can't let you down performance-wise.

Maternal Sire: TH Peterbuilt 000L11.  
Outstanding young sire selected by the discerning Keough Family of Welcome Downs

Knowing the sire, knowing the cow family, one could almost predict with your eyes closed that this heifer will record highly for growth – thrice in the top 1% and five times in the top 5%. You were correct! There are heifers representing 17 different cow families for your 2026 selection, so there are plenty of options in this line-up. The '889' cows stem from a highly valued cow family from the huge Mound Creek Ranch in Leone, Texas – the other major Brangus operation in Texas when we started our USA-based donor herd. This strongly made, highly figured heifer will be a special addition in many ways.

Moderately framed – we are valuing our BWCC Blackwater progeny highly. They present as stylish, wide-backed, medium-boned and quiet, and have real visual muscle expression. One BWCC Blackwater heifer was a member of the exceptional line-up we exhibited at two shows this year – we won every class we entered, and there were over 150 entries from multiple-breed show exhibitors here in FNQ. Maternal sister to Lot 120 & 136. Add these newer genetics early to your stud; they will not disappoint.

The heifers from this mating just had to be eye-catching, with their extreme sogginess and muscle pattern. Visitors are high in their praise of the Santiago sons in the 2026 sale line-up, and we are expecting they will attract plenty of interest. By getting a sibling like TH 541V116, you are at the cutting edge of our genetics, and we believe they will be great breeding tools in the next generation. She is a maternal sister to the lot above, and lot 120.

What an attractive, taller female, with her extreme length, strong bone and super-well-laid-in front end for calving ease. The hot new MM Santiago sire is setting the track on fire with the outstanding quality of his UB progeny.

The donor dam of this lot, TH 541P92, is Brangus maternal royalty – the \$40K half-share purchase by Lunar Stud in 2020, who went on to produce a succession of high-priced progeny for TH. Performance EBV figures match her excellence, with one top 1%, four top 5% and three top 10% recordings against the 2024 AU herd.

We open our herd each year to our clients, offering these super, specially bred females from the heart of our herd. An outstanding donor prospect.

Maternal Brother to Dam: Telpara Hills Phenomena 541U165, sold to SP Grazing, Charters Towers

The TH New Horizon progeny can really perform. Seven times does this TH 541V89 reach top 5% of the breed. With a difference of near 100kg between top- and bottom-rated 600-day EBVs, calculate the huge loss you are having using lower-rated, EBV-performance Brangus bulls. Maternally, this heifer is backed by a coming-10-year-old dam, who is a full sister to the \$50k Rocky Sale topping TH Magnum.

The exciting TH New Horizon bull purchased at Sale 2023 by astute repeat clients Turnbull Bros from Central Qld – has left us excellent offspring. This classy female is so deep-volumed and wide-topped, with a square butt. She seems to exude all the volume and softness from all segments of her elite pedigree of sires – Plantation, Csonka, New Horizon, Real Deal, Three D – what an array! Astonishing EBV scores, six times reaching top 1-5% of the breed.

These heifers certainly open up new horizons for the industry.

The high-priced MM Angus bulls used in UB programmes have 'nicked' extremely well over our powerful, stable, predictable USA 3/8 Brangus females. This one, TH Miss Trigger 920V21, 7 times rates top 5% of the breed – there is a high level of excellence. Inheriting from her dam's 920 family, she stands taller, clean-shouldered, well-boned and smooth-coated. A very smart UB heifer.

A strong, taller-styled female with a slightly different maternal background, embracing the low-generation Hudgens New Blood sire we introduced to AU from the famous Hudgens Brahman family in Texas nearly 10 years ago. Generations of TH bulls over high-Brahman-content cows produce the TH-type cattle which our clients chase. This heifer, TH Miss Enterprise 920V31, punches out five top-10% of the breed straight, and top 25-30% for steer ratings – strong performance indeed from a higher-Brangus-content female.

Large-scale embryo-transfer programmes have allowed us to early-release the latest bull's progeny being introduced to our herd. Mound Creek sire MC Closing Time. Without strong linkages, this heifer relies on her '541' cow maternal background for performance comparisons. Pleasingly, she immediately climbs into the top half of the breed. TH Miss Closing Time 541V114 has a highly appealing 'no holes', deep-made phenotype and a new Mound Creek genetic source for you.

Sire: MC Closing Time, a full brother to the US\$110k Boomtown and US\$75k Big Tex, New to Australia

Add the genes of the successful Allendale Angus Monarch bull to those of the incomparable TH Ace of Spades and you get a heifer of high maternal merit. This young Ultra Black heifer is medium-sized, neat-headed, well-sprung across her barrel and finer-boned. 8 times she ascends to top 5% of the breed for growth performance – researchers are proving that high growth rates mean less carbon emissions! We know her high marbling score translates to better eating quality in the restaurants of her descendants too.

A stellar example of the consistency of TH females – she ticks many production boxes.

Maternal Sire: TH Ace of Spades 541K65, held the AU record for highest semen price paid at auction for many years.

A powerhouse-mated heifer, strong phenotype and wide-topped. Extraordinary maternal strength through not only the '889' cow line itself but also the TH Kenworth bull, a \$32K Rockhampton sale-topper to Lunar Stud – his influence on both our herd and the Lunar herd was huge, with 178 Kenworth calves registered in their herd to date.

EBVs Pending on this lot.

Her sire is named Mandayan Balance and hailed from SA; her figures are super-balanced, and she is so well balanced in her UB phenotype – a no-holes heifer. Being flat-topped and wide-hipped, yet smooth-fronted, heifers of this style can be matched to a wide range of sires. Growth and steer indexes in the top 10-20% of the breed on five occasions – that's impressive. The '468' cow family has made a real statement in this 2026 catalogue.

Double-crossing of the '468's – they have an extraordinary number of pick lots in our 2026 sale.

This heifer's sire, Avalanche is rolling into one of our hottest young stud sires. Looking at his physique, he seems to have extra ribs! Here's a great no-holes, strong-headed daughter with performance to burn – on 7 traits she acquires top 5% of the breed ratings. With a pedigree stacked with maternal greats, she should go straight to your short list.

Maternal Sister: TH Miss Benchmark 468U25, sold to Caloona Livestock, NSW

Not a common cow family, '209' numerically, yet some of the females in it are real standouts, with their scale, volume and excellent skin types. This heifer hits you with frame size, her impeccably straight topline and sheer classiness, so typical of TH 209K10, who exported embryos to the USA – a rare achievement and the first time from AU in 23 years. We don't aim to join bigger to bigger frame sizes, and both the sires Resource and Granite (a calving-ease specialist) add moderation to this heifer's DNA profile. Very sound EBV ratings in the 25-30% ranges, and she is of real breeding potential – so don't let her slip under your radar.

Extra-special breeding here, being by the top new MM bull we have used, whose impact from his first drop of calves has been exciting. Marginally less power-performance, but still high, being in the top 20% of breed comparisons. Last year we prepared a show team after an extended break, and this heifer's dam was nearly chosen to represent the style and standard of our cow herd – she has all the attributes of a top beef-breed female. Another great chance to select an elite, top-bred TH heifer of sheer maternal quality; the supply is running out.

The '801' cow family is rated in our 'big 5' top cow families. They are especially renowned for phenotype, stemming from the original cow JOJ 801Y, who you will recall won Champion Heifer at the Houston Livestock Show, while her mother even won an unheard-of triple crown of championships in her career. Incredibly high – six times top-of-the-breed pinnacle for performance. With Santiago on her top line, where could you find a heifer with more credentials.

They are just so consistent and predictable for phenotype, these TH females – no wonder they become maternal forces for our clients. Another high-growth-data heifer, with an extraordinary top 5% of the breed marble score and a 10 for DNA Tenderness. New research in major Southern processors' feedlots is early-scanning and drafting on marble scores; the ultimate goal is to improve processor efficiencies on the rails by presenting carcasses of uniform consistency. We have always valued the extreme marbling of our TH herd – you will recall our genetics go back to the pioneers of ultra-scanning at Kansas State University 60 years ago.

Grand Sire: Chiltern Park Moe M6. Has bred tremendous thickness in his calves. Sons also topped the Glenisa Angus Sale.

| Oozes quality: each year we open our herd to buyers with these exciting top-of-the-breed heifers, in numbers and with numbers! This one has a gun-barrel-straight topline, a super-smooth hide, strong bone, and extreme docility. Again, top-of-the-charts growth and steer figures. Producers' returns are very dependent upon the genetics in their herd – top genetics can have decades of profitable influence. No-one believes avalanches are exciting, but this Avalanche daughter is! A great one at the concluding part of the sale – there's no tail in this sale! |                               |     |                   |                   |                   |        |                |              |                   |                   |                  |      |      |         |      |

 TELPARA HILLS MISS SINGLETARY 59E

A granddaughter of TH Mach 5. This heifer's sire traces back to one of the most famous cows in the Brinks herd, Ms Brinks Cadence 468 G15, from which we developed the '15' cow line in our TH herd. The '59' maternal branch of the pedigree here is moderate, reliable and unassuming in the cow herd, yet they perform soundly and deserve their place. Don't underestimate this heifer – there's enormous genetic potential under her hide, which near glistens in sunlight.

Maternal Sister: TH Miss Quixote 59U, Purchased by Peter Hall, Carmilla

Double Poll

Double Black

This heifer's ratings sit in the upper half of the breed. The incredible rise of the Angus breed in AU has been closely aligned to a gigantic push by Angus Australia into objective measurement. Chicken, pork, dairy and now lamb have all made unbelievable progress in terms of production performance, based upon intense objective genetic selection as a starting point. This is your last chance to add a Telpara Hills heifer to the truck headed for your place! You won't regret it.

### THANK YOU FROM OUR FAMILY TO YOURS

Thank you very much for your support. We truly appreciate everyone who attends our sale either in person or online and invite you to join our family for refreshments after the sale.

We look forward to hearing about the success of your purchases in your own herd and appreciate your patience during the delivery process.

# SILAGE. IT'S FUTURE PROOF.

## PREPARE TODAY. PERFORM TOMORROW.

Don't leave feed security to chance. High-quality silage gives you the flexibility to maintain performance through seasonal uncertainty, dry conditions and changing feed markets. When forage quality is locked in, you can be confident about stocking rates, growth targets and enterprise profitability. Whether you're making your first silage pit or looking to improve results, the team at Lallemand Animal Nutrition can help you maximise forage quality from harvest through to feedout.

**Talk to Jordan to start making quality silage.**
