FORWARD

Welcome to the 2026 Talooby Bull Sale

The period pre-Christmas to date has been challenging in the extreme; however Talooby Angus has weathered the roller-coaster ride in our usual manner and our bulls are in fantastic shape. With the recent rain, the next couple of months' spring-calves look to have a good start in life and we are very excited for their future.

A few comments on the market — there is currently a definite shortage of slaughter cattle, placing upward pressure on prices. Producers and others concerned with the shortage of red meat protein are seeing a steady rise in cattle prices. NB: the US prices are currently at never-before-seen high levels. This makes it an excellent time to buy; the current prices will seem cheap before long as the market continues to run up. Don't delay your purchase or you may well pay above the odds for poorer quality stock as others take advantage of the current opportunity.

The main event - the Talooby bulls. This year we have a breeding emphasis on low-moderate birthweights in anticipation of considerable heifer retention if the season goes with us. The first run of bulls will present in exceptional condition, having been fed for most of the year. We are trying to slow them down, but even so they are averaging 840 kg on June 4th at scanning with several over 900kg. These will definitely be cow bulls even though many have a low birthweight EBV. They really show what Talooby bulls can do when feed is good.

The second run of 'V' bulls will be lighter and should be 600-700 kg having not been fed until mid-July. They are predominantly low-birthweight bulls suitable for heifers. It's also been impressive to see how well they handled the lack of feed and how quickly they responded when it came.

To complete the offering, there are nine autumn crop yearling bulls which until recently were fed (no paddock feed) a ration of 2kg DDG per day plus cereal hay to gain about 1 kg per day. They are now on free-choice DDG, hay and some grass and will present well on September 7th. We currently have two of their mates out with heifers — 505 kg at joining, and 14 months of age.

This year we will not be offering surplus females at the sale due to the previous drought conditions. That said, the recent rains and subsequent reduction in feeding pressure is allowing us to present the surplus females in good condition. They will instead be offered through AuctionsPlus in mid-October. Please contact me if you would like further details.

During the last twelve months we have genomically tested sale bulls, potential sires etc, with Angus Australia and the top-grade bulls with Neogen. We are able to say that Talooby Angus are above average for tenderness, marbling, stayability etc with Neogen (USA), when benchmarked against their 27 million records database across all breeds. This has led to the creation of a new tagline: 'Talooby Tender' — more to come in this space.

We look forward to welcoming as many of you as possible on 7th September. If you would like to inspect the bulls beforehand, please don't hesitate to get in touch.

Regards,
Peter G.

TALOOBY ANGUS EST 1953

Decades of history, bred for the future

Talooby Angus have always been bred for the traits that make money for our clients. I would like to highlight some of those here:

STAYABILITY- The time the animal stays in your herd. Stay is largely dependent on structural soundness and fertility, the cornerstones of a productive herd.

MATURE COW WEIGHT- The aim is to have moderate sized cows. In the world of EBV's, this means less than +100. Moderate cows, coupled with feed efficiency make for a more sustainable herd.

BIRTH WEIGHT- Records show about 45% of difficulties are related to calf weight and 55% to management. I entirely agree.

CARCASE QUALITY- The ingenity data shows Talooby to be a relatively high for tenderness and marbling when compared to some 27 million records worldwide. This statistic includes all breeds except Wagyu. Remembering that tenderness has not to date been selected for the data, indicates a predominately tender beef herd.

DEPTH OF BREEDING- Generations of selection along the same lines with visual clues for some traits that are not yet measured, here in Australia. Talooby is 73 years young and uses all modern technologies.

RED BULLS

No Bulls in this sale – Bulls will be available by private treaty.

GENERAL INFORMATION

MANAGEMENT – BULLS
All bulls in 3 mobs Group 1: Lots 1 -4 Group 2: Lots 5 – 19 Group 3: Lots 20 - 40
ALL BULLS WILL BE:
Tested for Pestivirus, vaccinated for Vibrio, Pesti and 7in1
Individually assessed by Dick Whale, I.B.M.S.
Fertility – assessed by Northern Artificial Breeders, Scone

*Please note animals purchased for Queensland or North Coast NSW tick areas may be left, by arrangement, at Talooby where the first tick vaccine (3 Germ) will be given at no cost to the purchaser - refer special offer.

Inspections prior to the sale are welcome and stock will be penned for inspection from 10am on sale day.
*** Be sure to check out our website www.taloobyangus.com to view stills and videos of sale lots***
Inspections also available via AuctionsPlus

THE SIRES

CONNEALY GUARD RAIL 923E, AI / USA – 3 SONS SELL (LOTS 2, 3 & 22)
Guard Rail was sired by the great Tehama Tahoe B767. An industry leading calving ease sire (-0.3) birthweight with excellent 600-day EBV of +127. Guard Rail also has high milk, average EMA and above SS. The Guard Rail progeny are showing exceptional growth and moderate mature cow weight.

STIRLING CONFIDENCE PLUS 804 – 3 SONS SELL (LOTS 12, 32 & 38)
Has 773 progeny recorded. Confidence Plus 804 is by Hoover Dam from the Isabel female line. Confidence Plus 804 is a low birthweight (+1.3) average growth at 600 days but top 28% at 200 and 400 days. Confidence Plus is a high EMA bull at +10.9 (top 10%) whilst maintaining fat cover and average IMF. A lot of shape in these progeny.

TALOOBY RADAR R74 – 9 SONS SELL (LOTS 13, 14, 15, 18, 19, 20, 26, 29 & 31)
Radar is by Musgrave 316 Exclusive (1997 progeny recorded in Australia), from a daughter of our farm "J212" who is top 2% IMF. (N41 is top 4%) R74 is top 10% for SS. Top 32% IMF with fertility to burn, a slightly smaller frame and maturing earlier, Radar is producing some very appealing calves. 61 progeny now recorded including 23 genomic.

REILAND REED R1033 – 3 SONS SELL (LOTS 11, 21 & 23)
Purchased from Reiland Stud at Gundagai, Reed is producing some top calves. Reed brings average birthweight (+3.9) with top gestation length at – 11.6 days. Reed also carries a high EMA of +10.5 with a top 26% IMF. Some very good calves coming through. Reed is a slick coated bull via his sire Esslemont Lotto L3.

TALOOBY SCULPTOR S102 – 6 SONS SELL (LOTS 1, 5, 7, 8 10 & 16)
The Sculptor sons are a definite type, big, powerful and plenty of weight for age. They are only in the lead run of bulls and have been fed since weaning with a lack of paddock feed. Sculptor is a son of Chiltern Parck Moe, a widely used bull bred in Australia

(4782 progeny recorded). From a cow (M38) by Sydgen Black Pearl 2006 (3274 progeny recorded). Sculptor's genomic profile indicates an excellent carcass values, marbling 8/10, tenderness 7/10 and carcass weight 7/10.

MYERS FAIR-N-SQUARE M39 (USA) – 2 SONS SELL (LOTS 6 &17)
1108 progeny recorded, massive growth (+155 at 600 days) with sound EBV's overall. Top 31% net feed intake. His sons are more moderate in growth with plenty of shape.

TALOOBY STERLING S66 – 2 SONS SELL (LOTS 33 & 39)
Early days for S66 – a top 2% net feed intake bull, good growth, average birthweight and good calving ease.

TALOOBY THOR T82 – 3 SONS SELL (LOTS 28, 36 & 40)
A serious calving ease Bull (-0.2 to 108), top 12% NFI with a moderate mature size (+64). His daughters are high fertility, excellent milk and high feed efficiency in a moderate sized cow). T82 is by Tehama Patriarch.

There are several sires with just one son in the sale; try and see, mop up the odd left-over straw etc.
Should anyone want to know more about any of these sires, please ask:

- TD DOC RYAN 049 (USA)
- WATTLETOP Q41
- TALOOBY THUNDER T16
- MOGCK ENRICH 1348 (USA)
- DULVERTON SMART MISSILE S058

SPECIAL OFFER & CONDITIONS

LOYALTY DISCOUNT- BULLS ONLY:
A loyalty discount of 5% of the purchase price of any lot/s purchased at the current sale provided a purchase of one or more bulls was made at the previous sale, i.e. (this offer will apply to purchases made at the Spring sale 2025).

VOLUME DISCOUNT:
Purchases of five or more bulls at the 2025 Spring sale will attract a discount of 5%.

PLEASE NOTE:

1) The discounts apply singly i.e. only to the loyalty programme or to the volume discounts programme (not both).
2) The discounts are not cumulative and apply only to the current sale i.e. 2026 sale.

TICK AND 3 DAY SICKNESS VACINATIONS:
Bulls purchased for tick areas may be left, by arrangement at Talooby where the first round of vaccinations will be given at no cost to the purchaser and may remain at Talooby for 2-3 weeks prior to transport. Insurance is recommended.

GUARANTEE:
Talooby No Bullshit 3 Year Bull Fertility Guarantee
Because of the confidence we have in the longevity of our bulls we are offering the following bull guarantee.

If in the unlikely event that a bull you purchase from our Spring Sale in 2026 is diagnosed as infertile during its first 3 joinings, and is not caused by injury, illness, stress or disease contracted after leaving Talooby, we offer the following options upon receipt of a veterinary certificate:

- A satisfactory replacement bull, less salvage value of the original bull, if available.
- Or a credit to the value of the purchase price of the original bull (less the salvage value), redeemable at any Talooby Bull Sale over the next 3 years. This credit reduces over the 3 years of the guarantee.

We still encourage all clients to ensure their bull or bulls at the sale to protect the purchaser from illness or injury after the fall of the hammer on Sale Day.

How it works if the bull is infertile?

Year 1 Joining	**Year 2 Joining**	**Year 3 Joining**
Purchase - $9,000	Residual - $6,000	Residual - $3,000
Salvage - $2,500	Salvage - $2,500	Salvage - $2,500
Credit - $6,500	Credit - $3,500	Credit - $500

THINGS THAT IMPACT BULL LONGEVITY

THE IMPACT OF BULL LONGEVITY ON CALF COST

Assumptions: joining % bulls – 2.0, calving % - 90, salvage value bulls - $2,500

Purchase Price $	**Usage Cost $**	**Joining 1**	**Joining 2**	**Joining 3**	**Joining 4**
		45 Calves	**90 Calves**	**135 Calves**	**180 Calves**
• $25,000	$22500	$500	$250	$167	$125
• $20,000	$17,500	$389	$194	$130	$97
• $15,000	$12,500	$278	$139	$93	$69
• $10,000	$7,500	$167	$83	$55	$42
• $5,000	$2,500	$56	$28	$19	$14

The take home message from this table is that longevity of your sire battery has an enormous impact on the cost/calf in your beef operation.

What is Current Longevity of Bulls in Southern Australia

- 1985 Bob Freer research – 3 Joinings
- 2018 McKinnon Project – 2.3 Joinings

WHY ARE WE NEOGEN IGENITY TESTING?

This is a genomic test that has been available through Neogen for more than 7-years measuring 17 different traits using TSU's or hair samples. We are doing this testing to complement current Breed Plan data. This testing records results on a 1-10 scoring system. The data is validated by the International Genetics Solutions (IGS) database, which consists of over 27-million records. Higher scores are desirable in all traits except for birthweight and residual Feed Intake (RFI).

The Angus breed has made great progress this century particularly in growth rate, maternal and direct calving ease, and improved carcase traits. But there has been little emphasis on how long cows last in the commercial herd, and how much each animal eats.

New Traits Available through Igenity Beef Profiling

The trait with no consideration currently with Angus Breedplan is Stayability, which is the ability of a sire to produce daughters that remain in your commercial herd until at least 6 years of age. This selection trait has been available in some breeds in the USA for more than 20 years, Red Angus and Simmental are 2 of these breeds. Bulls in the top 25% for this trait in these breeds have daughters that produce 2 more calves in their lifetime, compared to bulls that are in the bottom 25% for this trait.

Carcase tenderness is another trait of great importance that is available through Igenity Beef testing. This is how easy the eye muscle cuts using the Warner Bratzler test. Animals that are high under this test, combined with high marbling, are carcases that will deliver beef consumers a positive eating experience.

Neogen Igenity Beef test gives us a direct genomic selection for actual carcase marbling, not IMF%, which is a correlated trait to carcase marbling.

Five feedlot trails have been conducted in USA, with in excess of 6000 head tested prior to feedlot entry, including both steers and heifers, using Igenity Beef. The carcase traits marbling, HSCW, EMA, and rib fat, have a very high correlation in excess of 90% with these animals tested and followed through these feedlots to the rail.

The other trait that is regularly overlooked in cattle production is feed efficiency. We believe that Angus cattle today consume significantly more feed than 20 years ago. Yes, they have more growth, but do they convert feed efficiently. Angus Australia has an EBV for Net Feed Efficiency (NFI) yet choose not to use this trait in their selection indexes. Neogen measure and report Residual Feed Intake (RFI) and include this in their indexes. These two traits are basically the same measuring feed consumed relative to animal maintenance and performance needs.

Remember in times of drought feed generally climbs to $600+/ tonne delivered farm.

Breed Indexes

We are currently using 2 indexes in our breeding programme derived from Igenity Beef data. The following weightings are used.

	CEM	**Stayability**	**RFI**	**ADG**	**Marbling**	**Tenderness**	**EMA**	**HSCW**
	%	**%**	**%**	**%**	**%**	**%**	**%**	
Neogen Production	10	30	-15	15	20	10		
IBMS – Aust. Results	10	20	-15	10	20	10	5	10

The reason for the high weightings for stayability/RFI, are because the Angus breed is poor for these traits against the reference population. The Angus breed performs well for most other traits, except for tenderness which is all over the place because no breed has selected for it.

The most surprising finding in testing a significant number of commercial herds over the last 4-years, is how much each herd varies. Some have excellent growth and carcase traits, and poor stayabilty and RFI, while others are the complete opposite.

With this additional information available through Neogen Igenity Beef we believe this information will assist us to breed a more feed efficient cow herd, with lower methane emissions, that produce more calves in their lifetime. Their progeny will have superior marbling and tenderness, which is extremely important when beef is 3.5 times more expensive than chicken.

ATTENTION BUYER – ANGUS AUSTRALIA DISCLAIMER

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

TACE TransTasman Angus Cattle Evaluation

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA
SV : the sire has been verified by DNA
DV : the dam has been verified by DNA
: DNA verification has not been conducted
E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.
