Gillian Leeds 0428 561 151
David Leeds 0428 561 102

Welcome

After a lifetime devoted to Shorthorns, Gillian “Gill” Leeds has finally decided it is time to hang up her boots and disperse her magnificent herd.

It has been a passion that has brought Gill a lifetime of wonderful memories, friendships, achievements and, most importantly, immense enjoyment. Her three children, David, Wendy and Richard, have all played a part in her journey, for which she is incredibly grateful. In particular, David has been by her side, allowing Gill to continue her passion for breeding quality Shorthorn cattle.

After more than nine decades of Shorthorn breeding under the stud names of Broome and Leeds Shorthorns, Gill has decided it is finally time to call it a day.

This Last Hoorah Leeds Shorthorn Dispersal Sale represents an extraordinary opportunity to purchase females carrying generations of carefully selected Shorthorn genetics. These cattle are the result of a lifetime of breeding for the traits that matter: fertility, performance, temperament, structure, doing ability and longevity. They carry the influence of some of Australia’s most respected Shorthorn families, combined with the knowledge and selection of the Leeds family across generations.

Gill is immensely proud of these females and what they represent.

We welcome you to Broome on October 30, 2026, to be a part of the proud history and a lasting legacy.

History

This is the story of a Shorthorn herd that began breeding on the banks of the Yanko Creek at Broome, Jerilderie, NSW.

The Broome Story

The first Shorthorns arrived at Broome in 1933, with Poll Shorthorns introduced in 1939 by Gill's parents, Clive and Tilly Brownless. Clive Brownless is a direct descendant of The Colling Brothers, founders of the Shorthorn Breed, England.

The Broome Shorthorn Stud was formally established in 1945, founded on seven heifers and a stud yearling bull gifted to Clive Brownless by his friend Douglas McLarty of Lone Pine Shorthorns.

Four Lone Pine females: Lone Pine Wynyard Wallflower, Wynyard Wayward, Wynyard Watermaid and Wynyard Wheaten - became the foundation of the Broome herd. From these beginnings, the Brownless family built a Shorthorn program based on fertility, structure, doing ability, temperament and longevity.

Following the death of her husband Murray in the mid-1970s, Gill returned home with her three children to help run the stud.

The cattle were tested in the tough Riverina environment, through poor rainfall and fluctuating feed conditions. Some cows were managed across as many as nine properties, adapting to different environments, feed availability and management systems.

The Broome philosophy was simple: **Breed cattle that could perform in the real world.**

Gill dedicated more than three decades to Broome Shorthorns. Her first bull was exhibited at the Dubbo National Shorthorn Show in 1980, beginning a long and successful showing career. The Broome name became firmly established and highly respected throughout the Australian Shorthorn and broader beef industry.

Broome Highlights

- **Broome Legion** - Dubbo National Grand Champion Bull, 1982
- **Broome Quality** - Dubbo National Grand Champion Bull, 1987
- **Broome University** - Bendigo Grand Champion Bull, 1991
- **Broome Venus** - Dubbo National Grand Champion Cow, 1993
- **Broome Y Explode** - Melbourne Royal Senior Champion Bull, 1995
- **Supreme Champion Shorthorn Cow** - Melbourne Royal, 1996
- **Broome Fugitive** - Junior Champion Bull, 2001

Broome genetics were sourced from many of Australia's leading Shorthorn herds, including Lone Pine, Wynyard,

Esquire, Eionmor, Magnet Boys, Kelso, Marrellan, Belmore, Templemore, Wyarama, Nero, Glengyron, Turanville, Marrington and Weebollabolla.

In 2003, Gill was recognised as Breeder of the Year by the Victorian Shorthorn Branch. She also was invited to judge at many Royal Shows throughout Australia, as well as judging in New Zealand.

From Broome Shorthorns to Leeds Shorthorns

In 2010, after 77 years of breeding, the decision was made to disperse Broome Shorthorns. More than 320 lots were offered and all sold with the sale marking the end of the Broome registered herd name.

But it was not the end, she retained eight females that couldn't make the dispersal, and from these she established **Leeds Shorthorns**.

The name changed, but the philosophy didn't.

Leeds Shorthorns continued the principles developed over generations at Broome, breeding cattle that were functional, fertile, adaptable, structurally sound and capable of performing in the real world.

With David by her side, Gill continued to develop the Leeds program, carrying forward the knowledge, experience and genetics accumulated through generations of Broome breeding.

And the success continued.

Leeds Shorthorn Highlights

- **Leeds Cactus Jack** - Dubbo National Grand Champion Bull, 2015
- **Leeds Latin Lover** - Dubbo National Grand Champion Unled Bull, 2024
- **Leeds Lloyd's** - Dubbo National Senior Champion Bull, 2024
- **Most Successful Exhibitor** - 2024 Dubbo National Show

The Last Hoorah

Sale Terms and Conditions

LOCATION:

The sale will be held on property. Broome is located 20 miles (29kms) north of Jerilderie, 162 Boyd Lane, accessed via the Kidman Way.

INSPECTION:

We encourage prospective buyers to inspect the cattle prior to the sale. Gillian and David are always available to advise or assist in the selection of the most suitable genetics for your herd. Phone for a pre-sale inspection make an appointment with Gillian on 0428 561151 or David on 0428 561102 or inspect on Friday October 30 from 9.00am.

TERMS AND CONDITIONS:

Terms of the sale are as per Conditions of Sale NSW Stud Stock. Intending purchasers must register with the duty agent and are required to use a buyer's number. All purchasers are required to fill out a Buyers Instruction Slip at the completion of the sale. A rebate of 3% is offered to outside Agents introducing buyers and attending sale with notice in writing 24 hours prior to the sale. Accounts must be settled within 7 days of the sale. Any announcement will take precedence over printed material in this catalogue and a supplementary sheet will be available from Tuesday 27 October on Auctions Plus website and Sale day.

REBATE FOR OUTSIDE AGENTS

3% with notice in writing (24 hours prior to Sale) to Elders Jerilderie.

FERTILITY GUARANTEE:

This is a dispersal sale, we cannot offer a replacement guarantee on these lots.

We pride ourselves on our attention to detail and every lot for the sale has been rigorously checked. All possible lots will be pregnancy tested and this information will be on the supplementary sheet. Some animals will be marked as not detectably pregnant meaning that they may be in calf to the backup sire and it's too early to tell. Every care will be taken to ensure all details are accurate and available however, we can accept no liability for any errors. We strongly advise you to insure all your lots from the fall of the hammer and representatives from Elders and Ray White will be available to assist you with your needs.

DELIVERY AND TRANSPORT:

Falls Livestock Transport, Lockie Falls 0429 826342 will be available on sale day for you to arrange transport of your lots home at your cost.

INSURANCE:

We strongly advise you to insure all your lots from the fall of the hammer and representatives from Elders and Ray White will be available to assist you with your needs.

AIR SERVICES:

Air services are available from Sydney to Narrandera (then 1 hour drive to Broome), or Sydney to Griffith (then 1 hour drive to Broome), or Sydney to Wagga Wagga (2 hours' drive to Broome) or Sydney to Albury (2 hours' drive to Broome). Jerilderie has an airstrip for private planes. For transfers to and from Jerilderie airport please advise David Rankin Elders Jerilderie 0427 938 187.

ABSENT BIDS:

The Sale will be interfaced with AuctionsPlus. We encourage those prospective purchasers who are unable to attend the sale to utilise this service. Contact one of the agents for any telephone bids.

HEALTH:

Broome is JBAS 6 in the Johnes Market Assurance Program and Pompes free.

All animals are free to travel interstate without testing. All animals have been vaccinated with 7 in 1. Broome is an accredited TB Free herd and confirmed Brucellosis free herd.

SEMEN:

All semen is stored at Genstock Australia, Jerilderie NSW.

SHORTHORN IGS EPD's:

The EPD figures in the catalogue have been generated as of September 10 2026.

TRANSFER OF OWNERSHIP:

All lots are available for transfer at the buyer's expense. Anyone wishing to transfer ownership should do so on the agent's buyer's instruction slip. We would appreciate if all purchasers would complete the Buyers Instruction Slip immediately after the sale.

REFRESHMENTS:

Lunch and refreshments will be provided for sale on the day.

PLEASE BRING YOUR CATALOGUE TO THE SALE.

Disclaimer Notice: People entering upon this property for any purpose whatsoever, including attendance at cattle auctions, so do at their own risk. Viewing laneways are available to view cattle outside the pens for your convenience.

Strictly No Children Allowed In Cattle Pens.

We are not liable to you for any personal injury or death suffering by you and or for the theft, loss of or damage to any property caused or contributed to by us or by any other person whether caused or contributed to by our or your negligence, deliberate act or unlawful conduct. "We" or "Us" or "Our" refer to the owners, their employees, contractors, and agents and each of them.

How to register as an AuctionsPlus buyer

01.

- ✓ Create an account on AuctionsPlus
- ✓ Verify your email and phone number

02.

- ✓ Enter your PIC number, ABN, and business details if applicable
- ✓ Read and accept the user rules and responsibilities

03.

- ✓ Finalise registration by completing the user quiz

Comments: A bull's bull, masculine, rugged that has bred exceptionally well. Low birth weight sire that goes well over any sort of cow. His females are moderately framed with good milking capability and neat structured udders. Minister has bred constantly high marbling traits and we have over 60 females in the stud.

LLANDILLO LOTTERY

Sire ID	Homozygous Poll	Myostatin Negative	7 in 1
			✓

Comments: Old school outcross genetics, low birthweight, ease of calving, producing functional cows for the Australian conditions. A bull ahead of his time.

Leeds Shorthorns' Farewell Dubbo National Show and Sale Team

Leeds Shorthorns will be offering a team of W-drop bulls at the
2027 Dubbo National Show and Sale.

After 45 years of exhibiting bulls at Dubbo, this will be our final chapter
at the National – a fitting close to a long and proud tradition.

Leeds Shorthorns' Farewell Dubbo National Show and Sale Team

Leeds Shorthorns will be offering a team of W-drop bulls at the
2027 Dubbo National Show and Sale.

After 45 years of exhibiting bulls at Dubbo, this will be our final chapter
at the National – a fitting close to a long and proud tradition.

Comments: A bull's bull, masculine, rugged that has bred exceptionally well. Low birth weight sire that goes well over any sort of cow. His females are moderately framed with good milking capability and neat structured udders. Minister has bred constantly high marbling traits and we have over 60 females in the stud.

Leeds Shorthorns' Farewell Dubbo National Show and Sale Team

Leeds Shorthorns will be offering a team of W-drop bulls at the
2027 Dubbo National Show and Sale.

After 45 years of exhibiting bulls at Dubbo, this will be our final chapter
at the National – a fitting close to a long and proud tradition.

Understanding the IGS EPD Suite

MATERNAL EPD'S

EPD	DEFINITION
CALVING EASE DIRECT (CE-D)	Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-D is relative to the direct Calving Ease of the animal. Higher values are more favourable.
CALVING EASE MATERNAL (CE-M)	Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-M is relative to the Calving Ease of the daughters of the animal. Higher values are more favourable.
MILK	Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. Predicts the difference in maternal production of daughters relative to milk production and mothering. Values are relative to the environment of the production system. Low input environments should be very conscious of introducing too much milk due to the increased nutrient requirements that it can place on cows.
MATERNAL WEANING WEIGHT	Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. This is a measure of weaning weight differences relative to the combined effects of growth and milk. Breeders who are not looking to change milk production should consider Total Maternal as the most relevant EPD for maternal weaning weights. Higher values are more favourable.
STAYABILITY (STAY)	Reported as the differences in percentage of a sire's offspring that are predicted to still be in the herd at 6 years of age... given that they calved at 2, relative to the average. Stayability is a measure of reproductive longevity. Higher values are more favourable.
DOCILITY	Reported as the percentage of progeny, relative to the average, that will record a score of docile. Higher values are more favourable.
MATURE WEIGHT	Reporting the difference in pounds of cow body weight at six years of age and a body condition score (BCS) of 5. A higher Mature Weight (MW) EPD indicates a genetic tendency for heavier daughters at maturity, while a lower MW EPD indicates a genetic tendency for lighter daughters at maturity.
COW ENERGY REQUIREMENTS	Reporting the yearly difference in pounds of total digestible nutrients (TDN) required for a cow aged six years. A lower Cow Energy Requirement (CER) EPD indicates a genetic tendency for daughters that require less energy to support production, while a higher CER EPD indicates a genetic tendency for daughters that have higher energy demands.
HEIFER PREGNANCY	Reporting the percentage of daughters expected to conceive and subsequently calve at two years of age. As with any EPD, it is important to remember that an EPD predicts differences in progeny performance between animals. Therefore, a heifer's Heifer Pregnancy (HP) EPD does not represent the likelihood that the individual herself will become pregnant. Rather, the HP EPD predicts differences among individuals (typically sires) in the percentage of their daughters that become pregnant during their first breeding season as heifers. Higher values are favourable.

GROWTH EPD'S

EPD	DEFINITION
BIRTH WEIGHT	Reported in pounds of birth weight relative to the average. When selecting bulls to use on heifers, breeders should also focus on the Calving Ease EPD as Birthweight is already used in the Calving Ease EPD calculation.
WEANING WEIGHT – ADJUSTED TO 205 DAYS	Reported in pounds of weaning weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birthweight.
YEARLING WEIGHT – ADJUSTED TO 365 DAYS	Reported in pounds of yearling weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birthweight.

CARCASE EPD'S – ADJUSTED TO 475 DAYS OF AGE.

CARCASE WEIGHT	Reported as pounds of Carcase Weight relative to the average. Higher values are usually more favourable, however this is relevant to each producers target market.
RIB EYE AREA	Reported as square inches relative to the average. Higher values are usually more favourable.
FAT	Reported as inches of back fat relative to the average. Higher values are usually more favourable, however this requires a balance between adequate doing ability in daughters and carcase fat thresholds for target markets.
YIELD GRADE	Reported as expected differences in progeny average USDA Yield Grade scores. Yield Grade is used to improve the yield potential of progeny and may seem a strange value for Australian animals. Whilst Australian animals will never receive a USDA graded Yield Grade score, they will also never receive an actual Retail Beef Yield % value either. However, US Shorthorns (including progeny of Australian sires used in the US) are USDA graded each year and so the pedigree linkages provide linkage to actual USDA Yield Grade values. Lower values are usually more favourable, however because of the negative correlations between fat and yield it is important to maintain some balance in the selection.
MARBLE SCORE	Reported as the differences in actual carcase marble scores relative to the average. This is different to IMF% which is used as an indicator trait in Marble Score. Higher values are more favourable.
ALL PURPOSE \$INDEX – API	Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ Indexes come in. Through well conceived, rigorous mathematical computation, \$ Indexes blend EPD's and economics to estimate an animal's overall impact on your bottom line. The All Purpose \$Index (API) evaluates sires for use on the entire cow herd, bred to both first-calf heifers and mature cows, with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put onto feed and marketed for both quality grade and yield.
UNDERSTANDING ACCURACIES	BOLT EPD accuracies have experienced the most change, usually lowering numerically and especially for non-parent animals, however the reported accuracy will be more accurate. Accuracy refers to the amount a reported EPD can possibly change as more data is added. EPD values with higher accuracy result in less possible change for the value over time. More accurate accuracies better represent the amount of possible change for each EPD.

THANK YOU

We would like to extend
our sincere thanks to all
our clients, friends and
family who have supported

Leeds Shorthorns
over the years.

We look forward to seeing
you at the sale.
